RE: ATCB012225 –Original Equipment Certification Application

FCC ID: O8IRTXTRENDLCD for Sistematica S.p.A.

You can find our answers after your comments.

Thank you.

Francesco Barbieri

2. The submitted user manuals appear to be incomplete because they both contain no information on how to operate this transmitter. Please address. (Please note that this is a repeat of question 12 from my request for additional information dated June 5, 2012.)

**IMQ: The reason of the absence of the specific part “functional description” is due to the customizable approach of this application; the firmware loaded in the device is the result of agreement between the customer and his client. The firmware is built in order to assign particular mean to each button command, but don’t change radio details. In this way, the manual is personalized for each application.**
