### Delete the photos and videos in the list

On the top right of the screen, Tap  icon → Tap **select album** or **Select item**, And then select the photo or video which you want to delete, tap  → **Delete**.

☆ **Gallery** only supports the display and manages photos and videos in the **default reading/writing storage**. To toggle the display of the storage area, go to **Settings** → **storage** → **default reading/writing storage** to make changes. The device default storage area is SD card.

## 26 SCREEN CAPTURE

You can capture a screen image by tapping  at any time.

Tap the  **Screen Capture** application icon to set options for a screen capture.

- Select a delay timer to capture the screen (seconds) .
- Select the default storage device.
- Show screen capture icon in status bar.

After the images are saved, they can be viewed through  **My Photo** application.

## 27 TASK MANAGER

Use PK Manager to manager applications and widgets.

### Stopping Applications

Android does not automatically stop applications after they are loaded, so you can manually stop the applications as desired.

1. Tap the  **Task Manager** Application icon.
2. Tap **Running** to display all running applications.
3. Tap on an application you want to stop operation → tap **Force stop** → **OK**.

### Uninstall Applications

1. Tap the  **Task Manager** Application icon.
2. Tap **All** to display all applications.
3. Tap on an application you want to uninstall → tap **Uninstall** → **OK**.

### Install Applications

1. Tap the  **Task Manager** Application icon.
2. Tap **Install** to display all applications and folders.
3. Find and tap on an application you want to install → tap **Install**.

---

## 28 WI-FI

Tap **Settings** → **Wi-Fi**, enter into Wi-Fi settings.

1. Slide the Wi-Fi switch to turn on Wi-Fi.
2. All the AP in the vicinity will be listed, click to select the name you want to connect to AP;
3. If the AP is connected successful before, the AP information will be saved in the pop-up window, select "Connect" starts to connect, choose "forget" to remove AP information;
4. If the AP is not encrypted, in the pop-up window, select "Connect" Start Connection;
5. If the AP is encrypted, enter the password in the pop-up window, and click "Connect" Start Connection;
6. When internet connections are successful, the wireless connection icon in the bottom status bar appears.

---

## 29 3G NETWORK

First of all you need to buy 3G wireless network card according to China Telecom, China Mobile or China Unicom. The currently supported on the 3G card type please refer to **3G dongle support list** or **appendix**.

We strongly recommend on buy the 3G Network Cards, in order to ensure normal 3G Internet access. Please come to the prepaid card into the purchase of 3G Network Cards, put the 3G network card insert into the USB host transfer cable and then insert OTG interface. At this time it will be bright lights

on the 3G network card, which indicated that it could begin to connect the 3G network.

Tap **Settings** → **3G network**, And tap “**Add 3G network**”, in the popup dialog box, Fill the **name**, **Device number**, **APN**, **user** and **password** information.

**Name:** In the popup dialog box, Name field enter the name you want free you can.

**Device number and APN:** Please fill in the information provided by carriers. (As in China: If you use China Unicom and China Mobile's 3G network card, **device number** field need to fill in “\*99#”, **APN** need to fill in the “cmnet”; if China Telecom formats 3G on the card, phone number need to fill in the column “T#777”, **APN** do not need to fill in the name of column.)

**User and Password:** If you use the standard of China Unicom and China Mobile's 3G network card, user and password fields are free to fill or not fill; if you use the standard of China Telecom's 3G network card, **user** and **password** fields need to fill in( **user**: card, **password**: card).

**Note:** If enter the above user and password does not work properly. Please make try to fill in (**user**: ctnet@mycdma, **password**: vnet.mobi) or (**user**: ctnet, **password**: vnet.mobi), also you can request to China Telecom.

Fill then click the link, and you will see the bottom of status bar 3G symbol  appears, indicating the completion of 3G is connected, and then you can get online.

---

## 30 GPS

GPS functionality requires the use of a USB interface external GPS receiver. (It access to device via the USB host transfer cable). Users need to download the navigation software and map from the internet, through the SD card installation (please refer to the Application Management section of this User Guide). The currently supported on the GPS receiver type please refer to Appendix.

---

## 31 PPPoE SETTINGS

Before using this feature, connect the USB network card via the USB host transfer cable access to device.

1. Tap **Settings** → **PPPoE settings** .
2. Input name and password then click connect to access the broadband network.

---

## 32 ETHERNET

Before using this feature, connect the USB network card via the USB host transfer cable access to device. When the USB network cable is plugged into

the USB network card, you will see the bottom of status bar ETH symbol 

appears

1. Tap **Settings** → **Ethernet**.
2. The device can automatically obtain IP address to connect to the network. You can also choose to manually set the IP address to get connected.

## 33 SETTINGS

Wireless & networks	Wi-Fi	Turn on /off Wi-Fi, Set up & manage wireless access points.

## FREQUENTLY ASKED QUESTIONS

### Android

**Q: What Android OS version is on my Device?**

A: 4.0.3

### Basic Device Functionary

**Q: Do I have to charge the battery before use?**

A: You should charge the battery for at least 6 hours in the off status, but you can use the device while it's charging. Use the include power adapter to charge; this device does not charge via the USB cable.

### Email

**Q: Can I use any of my personal email addresses to send/receive email?**

A: The device supports POP3 and SMTP accounts. Some free email accounts are not supported on mobile devices. Check with your email provider to see if you account is supported.

### Media Cards

**Q: Which media cards are compatible with my Device?**

A: micro SD cards.

### Music

**Q: What type of music files can I play on my device?**

A: MP2, MP3, WAV, AAC, WMA

**Q: How do I add music files to my device?**

A: Copy the music files from your computer onto a SD card or USB storage device, and then use the File Browser application to copy the files into the device.

### Photos

**Q: What type of photo files can I view on my device?**

A: JPG, JPEG, BMP and PNG.

**Q: How do I add photo files to my device?**

A: Copy the photo files from your computer onto a SD card or USB storage device, and then use the File Browser application to copy the files into the device.

### Video

**Q: What type of video files can I play on my device?**

A: Video file formats supported: MPEG1/2/4、H263、H264、VC1、RealVideo、MotionJPEG.. The largest video format is supported 1080P(1920×1080) resolution.

**Q: How do I add video files to my device?**

A: Copy the video files from your computer onto a SD card or USB storage device, and then use the File Browser application to copy the files into the device.

### Wi-Fi

**Q: Do I need a Wi-Fi adapter to connect to the Internet?**

**A:** No. The Wi-Fi adapter is built-in to the device.

Inconsistent with the physical specifications, please prevail in kind.

---

## BATTERY MANAGEMENT

The battery is not fully charged out of the box, so it is recommended that you charge the battery for at least 6 hours before you start to use the device.

The rechargeable battery is designed and manufactured to be used and recharged frequently. As with all batteries, the capacity of the battery reduces each time it is charged/depleted. However, you can still try to prolong the battery's lifetime by following the suggestions below:

- Use your Tablet at least once a week.
- Charge the battery regularly and fully.
- Never leave the battery fully discharged for a long period of time.
- Always keep the device and the battery away from heat.

### Charge battery

Plug the power adapter into an electrical wall outlet, and then connect to the device to fully charge the battery before use (A full charge takes about 6 hours in the off status).

☆ *You cannot charge the battery using the USB cable.*

When fully charged, the battery icon displays as .

A fully discharged battery takes approximately 6 hours to fully charge in the off status, but you can use the device while plugged in when desired.

---

## IMPORTANT SAFETY PRECAUTIONS

Always follow these basic safety precautions when using your Tablet. This reduces the risk of fire, electric shock, and injury.

- Do not expose this product to rain or moisture.
- Keep the device out of direct sunlight and heat sources.
- Protect the power cord. Route power cords so that they are not likely to be walked on or pinched by items placed on or against them. Pay particular attention to the point where the cord attaches to the device.
- Only use the AC adapter included with the device. Using any other power adapter voids your warranty.
- Do not remove the cover. There are no user-serviceable parts inside.

### **Cleaning your device**

Treat the screen gently. To clean fingerprints or dust from the screen, we recommend using a soft, non-abrasive cloth such as a camera lens cloth.

## FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.
