

# ENGLISH

Thank you for purchasing Siggy™  
With Jen or Maria doll by SmartGurlz™!

Siggy, is a fun app-controlled, self-balancing, inverted pendulum robot that is controlled by the SmartGurlz app - SugarCoded.

Please note that Siggy only 'balances' when it is 'carrying' a SmartGurlz doll or other 11 inch / 28 cm fashion dolls that can be attached to the wrist holders on the handlebar.

Play, learn to code, interact and problem solve with Siggy our Bluetooth® Low Energy (BLE) enabled, self-balancing mobile device.

Take a few minutes to look through this user guide and get the most out of your play with Siggy and begin the fun of SmartGurlz.

Please NOTE the following when operating Siggy:

- Siggy is self-balancing and it will never settle and stand still, so don't force this.

- Do not drop, throw, or kick Siggy as this may damage mechanical functions.

- Do not allow the Siggy to roam freely or leave unattended near table edges from which Siggy could fall.

- Siggy may be irreversibly damaged if you allow sand or dust to penetrate it.

- Do not drive Siggy on a wet surface or fuzzy carpets.

- Do not leave Siggy in direct sunlight for long periods, this could result in irreversible damages.

We recommend that Siggy is played and driven on a smooth surface indoors such as a wooden or tiled floor.

NOTE: When using Siggy, adult supervision is required, especially when changing the batteries.

## BEFORE PLAY

Note: For easy reading, iPhone®, iPad®, Android phones or tablets are referred to as 'smart device' in this user guide.

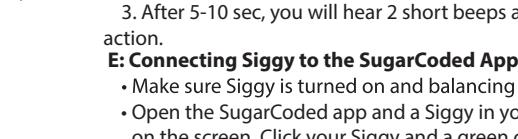

### A: Install the SmartGurlz SugarCoded application

The SUGARCODED App requires following minimum configuration of your smart device

- Android OS version newer than 4.4
- iOS version newer than iOS 9.0

#### Download the App

Connect to the App Store or Google Play and download the free SugarCoded by SmartGurlz application, and make sure it opens on your smart device

#### B: Install / Change the battery

Your Siggy comes with a complimentary 9V Alkaline battery in the package. A regular 9-volt battery will provide 3-6 hours of moderate play. However we recommend that you purchase a rechargeable 7.4 V

Re-chargeable SiggyPower® Module with built in charger allows your Siggy to be recharged without the hassle of exchanging the battery. SiggyPower® will be available for purchase in the first quarter of 2017.

#### 1. Remove the screw on the bottom of the Siggy using a screwdriver

#### 2. Remove the compartment door

#### 3. Attach the battery cord to the battery terminals.

#### 4. Insert the battery into the battery compartment

#### 5. Screw the door back on.

#### LOW BATTERY INDICATORS:

When the battery grows weak, Siggy™ will move slowly and more easily fall down while moving or turning. Also driving range will decrease and a beeping sound may occur.

When this occurs, power Off Siggy and replace the battery as described above.

#### C: Clip on doll

NOTE: Siggy needs to have a doll to balance and drive.

Use the wrist holders to clip in a SmartGurlz doll or other standard 11 inch / 28 cm fashion doll on to the handlebar. Make sure that the feet of the doll are firmly positioned in the designated footrests.

WE recommend that Siggy is played and driven on a smooth surface indoors such as a wooden or tiled floor.

NOTE: When using Siggy, adult supervision is required, especially when changing the batteries.

Siggy is self-balancing and will always try to keep the balance. This also means that whenever Siggy is turned on and standing it will consume battery power. So turn off Siggy when you don't play.

Turn On Siggy with the On/Off switch, located on the bottom if Siggy.

You will now hear a short beep

2. Carefully place Siggy™ upright on its wheels on a smooth surface away from edges and obstacles. When balancing, you should feel traction in its wheels and hear a short beep. Let go of Siggy™ and it will balance on its own with slight movements, back and forward, in order to keep its balance.

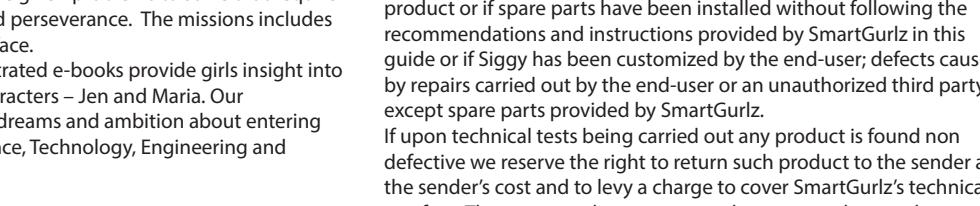

3. After 5-10 sec, you will hear 2 short beeps and Siggy is ready for action.

#### E: Connecting Siggy to the SugarCoded App.

- Make sure Siggy is turned on and balancing on the floor.
- Open the SugarCoded app and a Siggy in your color will appear solid on the screen. Click your Siggy and a green contour will indicate when your Siggy is connected to the app.

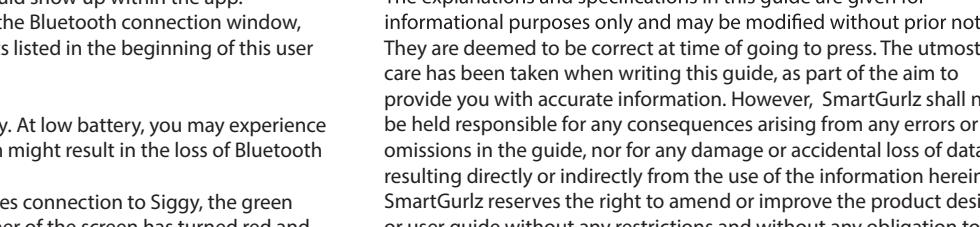

In the upper right corner, a green check mark on the Bluetooth symbol, will at all times indicate if your Siggy is successfully connected to the app.

You may name your Siggy by pressing the name tag below Siggy.

When connected, click the "Choose Activity" button, and the CHOOSE ACTIVITY screen will appear.

## CHOOSE ACTIVITY

• **FREE PLAY:** Your first try playing with Siggy should be using the Free Play. Use the joystick in the middle of the screen to move Siggy and Jen/Maria around the room. Girls want to have fun and FreePlay allows them to do it in a creative and engaging way. With our advanced joystick, girls can drive on the floor, save their choreography, use our pre-programmed buttons to ask Siggy to perform a figure 8, a "twist and turn" dance, 90 degrees turns, etc. You may save and load recorded drive patterns using the record, save and load buttons.

• **Turn on Siggy**

Siggy is self-balancing and will always try to keep the basics of coding via Blockly. The girls are introduced to the basic concepts of coding through game like puzzles. Exploring variables, conditional them to do it in a creative and engaging way. With our advanced joystick, girls can drive on the floor, save their choreography, use our pre-programmed buttons to ask Siggy to perform a figure 8, a "twist and turn" dance, 90 degrees turns, etc. You may save and load recorded drive

patterns using the record, save and load buttons.  
patterns using the record, save and load buttons.

• programming and more, Siggy responds powered by kid's code. See whether you coded correctly by clicking 'see on the screen' before driving on the floor.

• Replacement of batteries must be done by adults.

• Follow the polarity (+/-) diagram in the battery compartment.

• Promptly remove dead batteries from the toy.

• Dispose of used batteries properly.

• Remove batteries for prolonged storage.

• DO NOT incinerate used batteries.

• DO NOT dispose of this product in fire, as batteries inside may explode or leak.

• DO NOT dispose of batteries in fire, as batteries may explode or leak.

• DO NOT recharge non-rechargeable batteries.

• DO NOT short-circuit the supply terminals.

• Siggy könnte unwiderruflich beschädigt werden, wenn du Sand oder Staub eindringen lässt.

• Fahre Siggy nicht auf einer nassen Oberfläche oder flauschigen Teppichen.

• MISSIONS: Challenge yourself with SmartGurlz missions! Girls who

want to become master coders are given problems to solve that require map reading, critical thinking and perseverance. The missions includes fun videos and a game-like interface.

• BOOKS: Our beautifully illustrated e-books provide girls insight into the worlds of our SmartGurlz characters - Jen and Maria. Our wholesome characters give girls dreams and ambition about entering the exciting world of STEM (Science, Technology, Engineering and Math).

**C: Befestige die Puppe**

HINWEIS: Siggy braucht eine Puppe, um zu balancieren und zu fahren.

1. Du verwendest die Handgelenk-Klemmen, um eine SmartGurlz Puppe oder andere Standard 28 cm Modepuppe am Lenker zu befestigen. Stelle sicher, dass die Füße der Puppe in den dafür vorgesehenen Fußrasten positioniert sind.

## MODIFICATIONS

• Problems with connecting to SugarCoded:  
o Make sure that Bluetooth connection on your device is ON.

Bluetooth is enabled within the settings menu of your smart-device.

After being enabled Siggy should show up within the app.  
o If Siggy does NOT appear in the Bluetooth connection window,

check the version requirements listed in the beginning of this user guide.

• Lost connection while playing:

o Most likely: Check the battery. At low battery, you may experience decreased driving range which might result in the loss of Bluetooth connection.

o Less likely: If SugarCoded loses connection to Siggy, the green check mark in upper right corner of the screen has turned red and Siggy is NOT connected. Go to CHOOSE SIGGY screen and re-connect.

o Even less likely: Close SugarCoded and turn Siggy off and on again. Restart SugarCoded and Siggy should appear.

o Rare:

• Close SugarCoded.

• Turn Off / On Bluetooth in the device setting menu.

• Turn Off / On Siggy, and Siggy should appear.

o Seldom:

• Turn Off Siggy.

• Restart your smart device and start all over.

• Falling easily: Check battery.

• Unexpected behavior:  
o When turning Siggy on make sure to hold Siggy on an even surface where it self-calibrates within 5-10 seconds. The calibration starts with one beep and finishes with a double beep.

Ein wieder aufladbares SiggyPower® Modul mit eingebautem Ladegerät ermöglicht deinem Siggy aufgeladen zu werden ohne den Aufwand eines Batteriewechsels. SiggyPower® wird im ersten Quartal 2017 zum Kauf angezeigt, wenn dein Siggy mit der SugarCoded App verbunden ist. iPad and iPhone are trademarks of Apple Inc., registered in the U.S. and

#### 1. Entferne mit einem Schraubendreher die Schraube auf der Unterseite des Siggy

Requires 1x 9 V (6LR61) alkaline battery (included). Batteries are small objects.

2. Nimm die Tür des Faches ab

3. Festige das Batteriekabel an die Batterieklemmen.

All other trademarks are the property of their respective owners.

## IMPORTANT SAFETY INSTRUCTIONS

All of the safety and operating instructions should be read, adhered to and followed before the unit is operated.

Blocks of code based on Java are easy to drag and drop and lets you code the movement of a dance, a parade or even a game. You may save and load SugarCoded programs using the save and load buttons in the bottom of the screen.

Wenn dies geschieht, schalte Siggy aus und ersetze die Batterie, wie oben beschrieben.

## WARNING

• For ages 6 and up.

• Warning! Not suitable for children under 3 years, small parts.

• Use this unit only for its intended use as described in this manual.

• Close supervision is necessary when this unit is used by or near children or mentally disabled individuals.

• EBOOKS: Our beautifully illustrated e-books provide girls insight into the worlds of our SmartGurlz characters - Jen and Maria. Our wholesome characters give girls dreams and ambition about entering the exciting world of STEM (Science, Technology, Engineering and Math).

**D: Schalte Siggy an**

HINWEIS: Siggy braucht eine Puppe, um zu balancieren und zu fahren.

1. Du verwendest die Handgelenk-Klemmen, um eine SmartGurlz Puppe oder andere Standard 28 cm Modepuppe am Lenker zu befestigen. Stelle sicher, dass die Füße der Puppe in den dafür vorgesehenen Fußrasten positioniert sind.

## CARE AND MAINTENANCE

Always remove batteries from the toy when it is not being used for a long period of time. Wipe the toy gently with a clean damp cloth. Keep the toy away from direct heat. Do not submerge the toy in water. This can damage the electronic assemblies.

## E: LERNEN

Always remove batteries from the toy when it is not being used for a long period of time. Wipe the toy gently with a clean damp cloth. Keep the toy away from direct heat. Do not submerge the toy in water. This can damage the electronic assemblies.

## F: PFAD

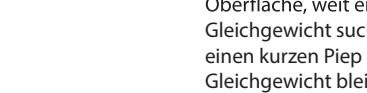

Grundlagen der Programmierung über Blockly beibringen. Wir stellen grundlegende Konzepte der Programmierung vor durch Spiele wie Rätsel. Wir entdecken Variablen, Bedingungen und mehr, Siggy reagiert angetrieben durch Kinder Code. Schau, ob du richtig programmiert hast durch Klicken auf 'auf dem Bildschirm sehen' bevor du es 'auf dem Boden fährst'.

## G: AUFGABEN

Mit Pfad werden den Kindern die Grundlagen von Roboter-technik und Programmierung vorgestellt, und das mit nur einem Wischen eines Fingers! Die Kinder zeichnen einen Weg auf ihrem Smart-Gerät und so senden sie die Mädchen Siggy und Jen/Maria auf den Pfad.

## H: DEUTSCHE

Vielen Dank, dass Sie Siggy™ mit der Jen oder Maria Puppe von SmartGurlz™ gekauft haben

## B: Installiere / Wechsle die Batterie

Dein Siggy kommt mit einer kostenlosen 9V Alkaline Batterie im Paket. Eine normale 9-Volt Batterie bietet 3-6 Stunden mittelmäßige Spielzeit. Wir empfehlen allerdings, dass du ein wiederaufladbares 7,4 V

Lithium-Ionen oder Lithium-Polymer-Akkus mit einer Kapazität größer als 600 mAh kaufst.

## D: SUGARCODED

ist die ultimative Codierung Sandbox, in der alles der Fantasie überlassen wird! Code-Blöcke auf Basis von Java kann man leicht ziehen und legen. Exploring variables, conditional them to do it in a creative and engaging way. With our advanced joystick, girls can drive on the floor, save their choreography, use our pre-programmed buttons to ask Siggy to perform a figure 8, a "twist and turn" dance, 90 degrees turns, etc. You may save and load recorded drive patterns using the record, save and load buttons.
