USA - FCC CFR 47 Part 15, Subpart B and C

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- \* Reorient or relocate the receiving antenna.
- \* Increase the separation between the equipment and receiver.
- \* Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- \* Consult the dealer or an experienced radio/TV technician for help.

Operation with non-approved equipment is likely to result in interference to radio and TV reception. The user is cautioned that changes and modifications made to the equipment without the approval of manufacturer could void the user's authority to operate this equipment.

This device is for handheld operation only. This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. This equipment complies with FCC/IC RF radiation exposure limits set forth for an uncontrolled environment. To maintain compliance with FCC/IC RF exposure compliance requirements, avoid direct contact to the transmitting antenna during transmitting.

## Canada - IC RSS-210, ICES-003

This Class B digital apparatus complies with Canadian ICES-003. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

## Europe - Declaration of Conformity

We, SMK-Link Electronics declare under our sole responsibility that the product, VP3700 Blu-Link Universal Remote Control, to which this declaration relates is in conformity with the following standards or other normative documents:

Art.3.1(a): EN 60950-1:2001

Art.3.1(b): EN 301 489-17 v1.3.2, EN 301 489-1 v1.8.1

Art.3.2: EN 300 328:2006(V1.7.1)

Following the provisions of 1999/5/EC,R&TTE directive.

European RoHS DIR 2002/95/EC

Bluetooth is a trademark or registered trademark of Bluetooth SIG Inc. All other trademarks are trademarks or registered trademarks of their respective holders.

# Getting Started - Overview

---

Before you begin, please insert two AA batteries as labeled on the remote control.

## Control 6 different Devices

Blu-Link™ Universal Remote Control controls up to six different devices. One of the device buttons is reserved for the PlayStation® 3, the other buttons can be programmed to control a TV, VCR, DVD, Cable Box, DVR, Satellite Box or Surround Sound system.

## Setting up the perfect system

Many universal remote controls don't offer all of the features of the stand alone remote controls that come with your equipment. People often keep 3 or 4 remote controls on their coffee table because of some obscure functions that they just couldn't live without. Blu-Link™ avoids the problem of redundant remotes by having 50 programmable buttons that can be set by entering a 4-digit device code, by "learning" from the original remote control or both.

## Setting up the Remote for PlayStation® 3

Your remote has a dedicated Bluetooth™ radio that is used to communicate with the PlayStation® 3. In order to control your PS3, the remote must first be registered with your console.

Registering Blu-Link™ remote with PS3

**Step 1:** On Blu-Link, press the PS3™ device button  on the top row of the remote.

**Step 2:** Make sure there is no game or movie in the PS3™.

Using your game controller, press the PlayStation® button

to turn on your PS3™. The PS3™ will boot to the control panel.

**Step 3:** Navigate over to **Settings**  on the horizontal menu using the game controller.

**Step 4:** Navigate down to **Accessory Settings**  on the vertical menu. Press  to select.

**Step 5:** Navigate down to **Register BD Remote Control**.  
Press  to select.

**Step 6:** On Blu-Link, press and hold the Start and Enter buttons at the same time. The PS3™ device button on the remote should light while holding these buttons. If it does not light, press the PS3™ device button  and try again. After a few seconds the PS3™ should recognize the remote and complete registration.

**Step 7:** After the PS3™ is done registering your remote, press the  button on Blu-Link™ to go back to the control panel. Verify that the remote control is working.

You can now play movies and control your PlayStation® 3 with Blu-Link™.

## Setting up the Remote for other devices

It is recommended that you set up your TV first. Blu-Link™ can control five components in addition to the PlayStation® 3. Blu-Link™ has buttons labeled for TV, DVR, DVD/VCR, Cable/Satellite, and Audio. While the buttons are labeled for these functions, that is for clarity only. For example, you could program a VCR into any device button other than the PS3™ button.

### Four-Digit Code Set-Up Method

**Step 1:** Turn on the device you wish to program into your Blu-Link™ remote using the remote that came with that device.

**Step 2:** Find the four-digit code numbers assigned to your brand of device from the list in the back of this manual. The codes are listed by device type and then by brand name. If you do not see the brand of your device, please look online at [www.Blu-Link™.com](http://www.Blu-Link™.com) for the complete list of four-digit codes.

**Step 3:** Enter setup mode by holding the device button down for approximately 3 seconds. After 3 seconds all of the device buttons will blink to confirm that you are in setup mode.

**Note:** You have 10 seconds to perform each of these steps. If you do not finish within 10 seconds, the device button light will turn off and setup mode will be exited. You will then need to start over.

**Step 4:** Enter the four-digit code. If it is a valid code, after the 4th digit is entered, any prior device will be removed and it will be set with new code. This removes any “learned” keys as well. If the code is not valid, the device button will flash 4 times. Either way, the device button will turn off and you will exit setup mode.

**Step 5:** Point Blu-Link™ towards your device and press the power button. If you have the correct code, the device should turn off. If the device didn't turn off, please look up the next code and return to step 3 until you have tried all four-digit codes for your brand of device.

**Step 6:** Sometimes more than one code will control your device. Test the other buttons on the remote control. If functions aren't working correctly, try the other device codes until you have selected the best code for your device.

**Notes:** Even if all buttons aren't doing exactly what you want, Blu-Link™ can “learn” buttons from other remotes and can be customized as desired.

**Step 7:** Repeat steps 1-6 for your other devices.

## Learning and Teaching Set-Up Method

You can either start from a blank device and “learn” all the keys or you can start with a four-digit device code and customize it to meet your needs.

**Step 1:** Line up Blu-Link™ with the remote you want to “learn” from, head to head about one to two inches apart on a solid surface. See diagram.

**Step 2:** Enter setup mode by holding the device button down for approximately 3 seconds. After 3 seconds all of the device buttons will blink to confirm that you are in setup mode.

**Step 3:** Press Rec  button to enter “learning” mode.

**Note:** You have 20 seconds to perform each of these steps. If you do not finish within 20 seconds, the device button light will turn off and setup mode will be exited. Learned keys will be retained but to learn additional keys you will need to re-enter “learning” mode.

**Step 4:** Press the key on Blu-Link™ that you wish to teach. The device button will blink once to indicate it is ready to learn.

**Step 5:** Press and hold the key on the other remote control you wish Blu-Link™ to learn. After about one second the device button will blink once to indicate successful learning or 4 times to indicate that it did not learn the key.

**Step 6:** Repeat from step 4 until you have learned all of the keys you wish to teach. You can exit from learning either by waiting 20 seconds or by pressing another device key to exit.

**Troubleshooting:** To achieve the best results during “learning” mode:

- If you are having trouble, move away from any Plasma TV, avoid fluorescent lighting and direct sunlight.
- Gradually vary the distance between the two remote controls.
- Some original remotes require you to tap the button to learn rather than holding it during learning.
- Learning only works on individual keys. Macros cannot be learned.
- Remember, when programming keys such as arrow keys, the orientation between the remotes is reversed.

## Forgetting Learned Keys

**Step 1:** Enter setup mode by holding the device button down for 3 seconds. After 3 seconds all of the device buttons will blink to confirm that you are in setup mode.

**Step 2:** Enter “forget” mode by pressing the Stop  button. The device button will blink once to indicate it is ready to forget the keys it learned.

**Step 3:** Press the key you wish to forget. If this key has learned anything, the device button will blink once and revert to its original settings, otherwise, it will blink four times in error.

**Step 4:** Press keys you wish to forget until you are done. When you are done, you can either wait 10 seconds to time out or press another device button to exit.

**Note:** If you had previously entered a four-digit device code, the forgotten keys will return to their original settings.

## Forgetting a Device

**Step 1:** Enter setup mode by holding the device button down for 3 seconds. After 3 seconds all of the device buttons will blink to confirm that you are in setup mode.

**Step 2:** Enter the code 9999 to erase the prior four-digit code and any learned keys for the device.

**Note:** Pressing any key besides “9” during this mode will exit.

## Forgetting all Devices

**Step 1:** Enter factory-reset mode by holding down two device buttons for 3 seconds. After 3 seconds all of the device buttons turn on to confirm you are in factory-reset mode.

**Step 2:** Enter the code 9999 to erase the prior four-digit code and any learned keys for all devices.

**Note:** Pressing any key besides “9” during this mode will exit.

## Controlling Volume (Punch Through)

In a fairly typical setup with a TV, PS3™ and Cable box, there is only one device that controls the sound. It would be difficult to switch devices between Cable and TV every time you want to change the volume. By default, Blu-Link™ is set so that regardless of what device you are using, when you change the volume, it is sent to the TV. This is called “punch through.”

When you press any key on Blu-Link, the device button will light to show what device is receiving that command. For example, when you are watching a DVD and hit Pause, the DVD button will light. When you hit Mute, the TV button will light.

Volume Punch Through is completely customizable. For example, if you have a surround sound system, you may want volume commands to be sent there instead of the TV. To do this, you would set the surround sound system as the sound master.

## Setting Sound Master

The sound master can be set for any device that supports volume up and volume down. To change from the default TV as master to another device:

**Step 1:** Enter setup mode by holding the device button you wish to make master down for 3 seconds. After 3 seconds all of the device buttons will blink to confirm that you are in setup mode.

**Step 2:** Press the Mute key and this device will now be the sound master. Future volume up, down, and mute operations for devices with punch through on will now control this device.

## **Advanced Configuration**

If you wish to independently control the volume without using punch through, punch through can be turned off (and back on) for any device. For example, if you have a surround sound system, you may wish to turn off punch through for the TV so you can still control it's volume when the TV device button is selected.

### **Turning off Punch Through for a Device**

By default, all devices start with punch through turned on. For any device other than the PS3, punch through can be turned off.

**Step 1:** To turn off punch through for a device, enter setup mode by holding the device button down for 3 seconds. After 3 seconds all of the device buttons will blink to confirm that you are in setup mode.

**Step 2:** Press the volume down (Vol -) key and that device will no longer punch through volume controls to the sound master

## **Turning on Punch Through for a Device**

If you accidentally turned punch through off for a device, it is simple to re-enable it.

**Step 1:** To turn punch through back on for a device, enter setup mode by holding the device button down for 3 seconds. After 3 seconds all of the device buttons will blink to confirm that you are in setup mode.

**Step 2:** Press the volume up (Vol +) key and that device will now punch through to the sound master.

# Remote Control Layout

---

## Functions by Device Type

Different keys have different meanings depending upon the type of device you are controlling. The best way to become familiar with your remote control is to experiment, but here are some hints to guide you.

### Television / Set Top Boxes

**Turn On/Off:** To turn the TV on or off, press the TV device button and press the Power  button.

**Input:** If you have multiple devices, press the Input  button to switch between what input is showing on your TV.

**Aspect Ratio:** To switch between different resolutions or to a different aspect ratio, press the Aspect  button.

**Sub-Channels:** Some TV's support alternative HiDef channels for over the air broadcasts. To reach these channels, enter the main channel number, press the Dash  button and enter the sub-channel. For example to select the 2nd sub-channel of channel 11 you would enter 11-2.

**Subtitles:** Pressing the Subt  button turns on closed captioning or subtitles for some models of TVs.

**PIP Controls:** The bottom row of colored buttons offer control over Picture-in-Picture modes.

## Cable / Satellite / DVR

**List:** On some devices with DVR capabilities, pressing the List  button will bring up a list of recorded programs.

**DVR Menu:** Pressing the Home  button will bring up the DVR menu.

**Live TV:** Pressing the Live TV  button exits to Live TV.

**Menu:** Pressing the Menu button brings up the main menu for your device.

**Guide:** Pressing the Guide / Popup button brings up the listing of available and upcoming showings.

**Info:** Pressing info brings up the details for the currently playing show.

**Aspect Ratio:** To switch between different resolutions or to a different aspect ratio, press the Aspect  button.

**Previous Channel:** Pressing the Prev  button will jump back to the previous channel.

**Skip:** Pressing the Skip Backwards  or Skip Forwards  button will rewind 10 seconds or fast forward 30 seconds on supported devices with DVR functionality.

**Record:** Press the Rec  button to start recording the existing show.

**Colored Buttons:** The colored buttons perform similar functions on Blu-Link™ as on your original remote control.

## PS3™ Blu-Ray / DVD

**Menu:** Pressing the Menu button brings up the top menu of the DVD or Blu-Ray disc.

**Guide / Popup:** Pressing the Guide / Popup button brings up the popup Menu on Blu-Ray discs.

**Info:** Pressing Info gives you play statistics

**Rewind and Fast Forward:** Press the Rewind  or Fast Forward  to scan through the movie.

**Previous Chapter and Next Chapter:** Press the Previous Chapter  or Next Chapter  button to change chapter.

**Audio:** Press the Audio  button to change audio tracks in a movie.

**Subtitles:** Pressing the Subt  button will bring up the next language subtitle for supported discs.

**Angle:** For the few movies with multiple points of view, pressing the Angle  button will change the viewing angle.

## PlayStation® 3

The keys on the Blu-Link™ universal remote control operate in much the same way as they do on the Sony game controller with the following exceptions:

**Volume:** Volume keys are sent to your TV set so you do not need to use the original TV remote.

**Power:** Sony does not offer a dedicated power off button on their controller. The Power  button on Blu-Link™ simulates the menu sequence used to manually shut down the PS3™.

**L1-L3 and R1-R3:** These little used keys are not included on Blu-Link™. All Blu-Ray functions can be controlled without these keys.

**PlayStation® Key:** Blu-Link™ uses the Home  button as the PlayStation® button (the key with the stylized P).

For more details you can review your PlayStation® 3 manual or visit us online at [www.Blu-Link™.com](http://www.Blu-Link™.com).

**Note:** In the event that the remote locks up due to excessive electro static discharge, the remote may need to be reset by removing and reinserting the batteries.

# Thank You!

Thank you for purchasing SMK-Link's Blu-Link™ Universal Remote control for PlayStation® 3.

Blu-Link™ is unique because it has both a Bluetooth™ radio for communicating with Sony's PlayStation® 3 and an infrared transmitter for controlling the rest of the devices in your home theater system.

This User's Guide is designed to help guide you through setting up your Blu-Link™ Universal Remote Control. Since we support so many different devices, the setup codes for more obscure devices can be found on our website.

The process of setting up your remote to control your equipment is an easy step-by-step process. Should you need additional help with setting up your remote, we have the following additional resources:

**[www.blu-link.com](http://www.blu-link.com)**

**888-696-3500**

**[pcsupport@smkusa.com](mailto:pcsupport@smkusa.com)**
