SRAM LLC certifies that this product and its packaging are in compliance with:

R&TTE Directive, the Radio and Telecommunication Terminal Equipment Directive 1999/5/EC

WEEE Directive, the Waste Electrical and Electronic Equipment Directive 2012/19/EU

RoHS Directive, the restriction of the use of certain hazardous substances in electrical and electronic equipment 2002/95/EC

REACH Directive, the Regulation on Registration, Evaluation, Authorization and Restriction of Chemical Directive 1907/2006/EC

Batteries and Accumulators and Waste Batteries and Accumulators Directive 2006/66/EU

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Industry Canada's license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

The term "IC:" before the radio certification number only signifies that Industry Canada technical specifications were met.

Canadian Department of Communications Compliance Statement:

Firmware Update Dongle - DOC: CAN ICES-3(B)/NMB-3(B) C

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence.

L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Warning: Any changes or modifications not expressly approved by SRAM could void the user's authority to operate this equipment.

This product is ANT+ certified and complies with the bicycle power ANT+ Device Profile. For a complete listing of ANT+ Certified Products and their specific interoperability, please visit www.thisisant.com.

Rechargeable Lithium-ion Polymer Battery Model: 25401

Cell Type	300mAh/3.7V
Pack Configuration	2S1P
Nominal Voltage	7.4 DC
EOD Voltage	6.0V DC
Nominal Capacity	300mAh
Minimum Capacity	290mAh
(at 0.2C discharge rate 3.0v cut off after standard charge)	
Average Working Voltage	7.4V at 0.2C rate
Fast Charge	Constant current 1.0C
Constant Voltage	8.4V
Operating Temperature Range	
Standard Charge	32° to 114°F / 0° to 45°C
Discharge	-4° to 140°F / -20° to 60°C
Weight of Battery Approx	6.5 g
Cell Dimension	
Length	Max.30.0mm
Width	Max. 19.0mm
Thickness Max.	Thickness: Max. 6.0mm
Storage at 50% SOC and specified temp, recoverable capacities in % vs. time.	
-20° to 25°C (12 months, 85%)	25° to 45°C (3 months, 80%)
60° to 70°C (1 hour, 85%)	70° to 85°C (1 hour, 80%)

Battery Charger Model: 25301

The charger is designed to meet EMI safety standards for use in information technology equipment.

Rated Input Voltage	5V DC
Maximum Rated Output Voltage	8.4V
Operating Temperature Range	32°F to 104°F / 0°C to 40°C
Non-operating Temperature Range	50° to 140°F / 10°C to 60°
Relative Humidity for Operating and Non-operating	10% to 80%

Replacable Lithium Coin Cell Battery CR2032

Consult the battery manufacturer's instructions for technical information.

SRAM[®]

www.sram.com

“We will revolutionize the relationship that our users have with SRAM products, cultivating a bond between the rider and bicycle. Our technical communication will be delivered in innovative and exciting ways, with deliberation and accuracy that inspires loyalty and trust across the globe.”
