If your product malfunctions, go through the check points below before contacting a Samsung authorized service center,

No power.	• Check whether the power cord is securely plugged into the power outlet. • Did you press the power button of your DVD Recorder-VCR-VCR
The input is displayed for a while when the power turns on.	The DVD Recorder-VCR-VCR requires some time to initialize it and logo will be displayed for approx. 15 seconds after it is turned on.
Cannot record TVprograms.	• Check whether the power cord is securely plugged into the power outlet. • Did you set the DVD Recorder-VCR-VCR channel settings correctly? • Check the free space on your DVD-RAM/DVD-RW/DVD-R disc.
Timer recording does not work properly.	• Did you turn the power off after setting a timer recording? • Check the recording time and end time settings again. • Recording will be cancelled, if the power is removed due to a power failure or other reason during recording.

I pressed the REC button but there is no response.	Recording is available for DVD-RW/DVD-RAM disc only. If a program is copy protected, you cannot record it.
It forget the pass word for parental care.	Press the ►II and < buttons of your DVD Recorder-VCR-VCR at the same time when the power is on. All settings including password will revert to factory settings. Do not use it if not absolutely required. (Note that this function is available only when there is no disc inserted.)
Cannot playback the disc.	• Check whether the disc is inserted correctly with the label facing up. • Check the regional code of your DVD disc. • This DVD Recorder-VCR-VCR cannot playback some types of disc. (See page 14.)

No sound.	• Are you watching a program in slow or skip mode?
	  If you are playing a program at a speed other than normal speed, sound is not output.
	• Check the connections and initial settings.
	• Check whether the disc is damaged.
	  Clean up the disc, if necessary.
	• Check whether the disc is inserted correctly with the label facing up.

Troubleshooting

⊘ icon appears on the screen.	You cannot use the operation or function due to one of the following reasons: (1) Your DVD disc restricts it. (2) Your DVD disc does not support the feature (for example, angles) (3) The feature is not available at the moment. (4) You've requested a title, chapter, or scan time that is out of the correct range.
Play mode settings is different from the settings configured with the Setting menu.	The disc does not support all the selected functionali-ties. In this case, some settings you configure on the Setting menu may not work properly.
Cannot change the aspect ratio.	Aspect ratio is fixed for DVD disc.
No audio output.	Check whether you selected correct digital output options on the Audio Output Options menu.
No video or audio output.The disc tray is ejected after 2 to 5 seconds.	Did you move your DVD Recorder-VCR-VCR suddenly from a cold place to a place? In this case, remove discs and wait for one to two hours with the power on, and then, insert the disc and try to playback again. It will work properly when condensations are removed.
Angle operation does not work during play-back of a DVD disc.	Angle operation is available only when the disc con-tains the images captured at different angles. In this case, an angle mark is displayed on both the front panel display of your DVD Recorder-VCR-VCR and your TV screen.
The disc revolves, but no image or bad quality images are output.	• Check whether there are damages or foreign materi-als on your disc. • Some discs with bad manufacturing quality may not played back. • If the scenes change from dark ones to bright ones suddenly, the screen may tremble vertically temporari-ly, but it is not a fault. • Check the video output select switch setting.
Desired sound language and subtitle language are not played.	Sound languages and subtitle languages are disc-spe-cific. Only the sound and subtitle languages contained on a DVD disc are available and displayed on the disc menu.
No progressive (480P) output.	• Check whether the component video output switch is set to 480p. • Make sure to change the =component video output switch setting when the disc is stopped.
The remote con-trol doesn't work.	• Point the remote control at the remote control sensor on your DVD recorder. Give a proper distance. Remove obstacles between your DVD Recorder-VCR-VCR and remote control. • Check whether the batteries are depleted.
Other problems	• Read the table of contents and then find and read the sections describing on your problems, and follow the directions given. • Turn off and on your DVD Recorder-VCR-VCR. • If your problem still persists, contact your Samsung service center nearby at your location.

Problems and Solutions (VCR)

Before contacting the Samsung after-sales service, perform the following simple checks.

Problem	Explanation/Solution
No power	♦ Check that the power plug is connected to a wall outlet. ♦ Have you pressed the STANDBY/ON button?
You cannot insert a video cassette	♦ A video cassette can only be inserted with the window side up and the safety tab facing you.
The television programme was not recorded	♦ Check the DVD Recorder-VCR-VCR aerial connections. ♦ Is the DVD Recorder-VCR-VCR tuner properly set? ♦ Check if the safety tab is intact on the cassette.
Timer recording was unsuccessful	♦ Was the STANDBY/ON button pressed to activate the timer? ♦ Re-check the recording start/stop time settings. ♦ If there was a power failure or interruption during timer recording, the recording will have been cancelled.
No playback picture or the picture is distorted	♦ Check to see if you are using a prerecorded tape.
You cannot see normal broadcasts	♦ Check the TUNER/EXTERNAL setting. It should be on TUNER. ♦ Check the TV/VCR aerial connections.
Noise bars or streaks on playback	♦ Press the TRK (▲ or ▼) buttons to minimize this effect.
When the ►❙❙ button is pressed during playback, the still picture has severe "noise bars" streaks	♦ A still picture may have "noise bars", depending on the condition of the tape. Press the TRK (▲ or ▼) buttons during SLOW motion to minimize this effect.
Video Head Cleaning	♦ If poor pictures appear on a variety of cassettes, the video heads may need cleaning. This is not a common problem and unless it appears, the heads should not be cleaned. When cleaning the video heads, read all instructions provided with the head cleaning cassette. Incorrect head cleaning can permanently damage the video heads.
If when tuning in your TV to the DVD Recorder-VCR-VCR TV does not find the Screen or the pattern when found suffers from interference, it may be due to the DVD Recorder-VCR-VCR output channel clashing with the normal TV transmissions in your area. To prevent this you will need to change the DVD Recorder-VCR-VCR output channel in the following way	1. Remove the aerial input plug from the socket marked (aerial symbol) on the rear of the DVD Recorder-VCR-VCR. 2. Carry out the instructions "Tuning Your Television for the DVD Recorder-VCR-VCR" 3.
