Section 8: Web

This section describes the various Internet networking applications available on your device such as Google+ and Internet.

Google+

Share updates and see what is going on around you with Google+ for mobile.

• Share your thoughts and location.
• Instantly upload your photos and videos as you take them.
• Get updates from your circles in the stream.
• Check in to a place.
• Make plans on-the-go with group messaging.
• View posts from people around you.

To get started:

1. From a Home screen, tap ▦ **Apps** ➔ 🔘 **Google+**. The Google+ home screen displays.

2. Tap 🔘 **Menu** ➔ **Help** and then touch a topic to learn more about using Google+.

Internet

Your device is equipped with a full HTML Browser that allows you to access the Internet.

Tip: Internet displays by default as a Primary shortcut on the Home screen.

■ From a Home screen, tap ▦ **Apps** ➔ 🔘 **Internet**. The Most visited screen displays.

3. Tap an entry, such as Google. The Google home screen displays.

Navigating the Internet

1. To select an item, tap an entry.

2. To scroll through a website, sweep the screen with your finger in an up or down motion.

3. Tap ⟵ to return to the previous page.

The following options are available for Internet navigation.

Command Keys

• Tap ⟵ **Back** or ⟵ to return to the previous page.

• Touch and hold ⟵ **Back** to display a list of Most visit pages.

• Tap → **Forward** to go forward to a recent page.

• Tap ⟳ **Refresh** to reload the current page.

Touching and Dragging

• Touch and drag your finger on the screen to navigate pages and to reposition pages within the screen.

Entering Text in a Field

• While browsing, tap a text field to display the virtual QWERTY keyboard to enter text.

Zoom

• Tap the screen twice to zoom in or out.

• Use two fingers, such as your index finger and thumb, to zoom out by making an inward pinch motion on the screen. To zoom in, make an outward motion by sweeping your fingers out.

Tip: For convenient browsing, you can rotate the device to landscape mode.

Selecting Items On a Page

While browsing, use gestures and menus to navigate:

• Tap an item to select it.

• Tap a hyperlink to follow the link.

• Touch and hold on a hyperlink for these options:

– **Open**: Open the linked page.

– **Open in new tab**: Open a new window to display the linked page.

– **Save link**: Save the linked page to Download history.

– **Copy link URL**: Save the link's URL to the clipboard.

– **Select text**: Copy the link text to the clipboard.

- Touch and hold an image for the additional options:
  - **Save image**: Download an image. View downloaded images in Gallery.
  - **Copy image**: Copy an image to the clipboard.
  - **View image**: View the image source.
  - **Set as wallpaper**: Use the image as your home screen wallpaper.

Using Browser Windows

You can have multiple windows open at one time and easily switch between windows.

To add a new window:

1. From a Home screen, tap ⬛ **Apps** ➔ 🌐 **Internet**.
2. To open a new window, tap ➕ **New window** at the top of the screen.
3. To switch to another open window, tap its tab at the top of the screen.

To delete an existing window:

■ To delete an open window, tap the tab at the top of the screen, and then tap ✖.

Entering a URL

Access a website quickly by entering the URL.

1. From a Home screen, tap ⬛ **Apps** ➔ 🌐 **Internet**.
2. Tap the **URL** field at the top of the screen, then enter the URL using the virtual QWERTY keyboard.

   As you enter characters, potential matches display.

Note: Use the ⌫ **Delete** key to clear the URL field, if necessary.

3. Tap a match to complete the URL.

   – or –

   Tap **Go** to proceed to the desired Web address.

DRAFT

Internal Use Only

Copying Fields or Text

Copy information from a webpage to the clipboard for pasting, searching, or sharing.

Selecting, Copying, and Pasting Text

1. From a Home screen, tap ⌗⌗⌗ **Apps** ➔ 🌐 **Internet**.
2. Browse to a webpage.
3. On the webpage, touch and hold on the text until you see the text you want highlighted, then stop tapping the screen.

   The text is highlighted.

4. Touch and drag the ⬚⬚ tabs to the left or right to select more or less text.
5. Tap **Copy** at the top of the screen to copy the selected text or tap **Done** to stop.
6. To paste the copied text, navigate to the desired field (or to another application), then touch and hold in a text field and tap **Paste** in the pop-up.

Copying and Pasting a Hyperlink or URL

1. From a Home screen, tap ⌗⌗⌗ **Apps** ➔ 🌐 **Internet**.
2. Browse to a webpage.
3. Touch and hold on the link or URL, then tap **Copy link URL** on the pop-up menu.
4. To paste the copied link or URL, navigate to the desired field (or to another application), then touch and hold in a text field and tap **Paste** on the pop-up menu.

Using Bookmarks

While browsing, bookmark a site to quickly access it later.

Creating a bookmark

1. From a Home screen, tap ⌗⌗⌗ **Apps** ➔ 🌐 **Internet**.
2. Browse to a website, then tap ⭐ **Add bookmark**.
   The **Add bookmark** options list displays. Confirm the **Name** and URL **Address** for the bookmark.
3. In the **Account** field, tap the drop-down menu, and tap **Local** or an account.
4. In the **Folder** field, tap the drop-down menu, and select **Homescreen**, **Bookmarks**, or a **Other folder**.
5. Tap **OK** to save the bookmark.
   A gold star ⭐ displays on the Bookmarked page.

Accessing Bookmarks and History

Launch a bookmarked page or reload recent pages.

1. From a Home screen, tap ▦ **Apps** ➔ 🌐 **Internet**.
2. Tap ★ **Bookmarks**, **History**, and **Saved pages**.
3. On the **Bookmarks** tab, use these options:
   • Tap a bookmark to load the page.
   • Touch and hold on a bookmark for these options:
     – **Open**: Open the bookmarked page.
     – **Open in new tab**: Open the linked page in a new window.
     – **Edit bookmark**: Make changes to the bookmark description.
     – **Add shortcut to home screen**: Create a bookmark on the Home screen.
     – **Share link**: Use Bluetooth, Email, Gmail, Google+, Messaging, or Wi-Fi Direct to send the link.
     – **Copy link URL**: Save the link's URL to the clipboard.
     – **Delete bookmark**: Remove the bookmark.
     – **Set as homepage**: Assign the bookmarked link as the home page.

4. On the **History** tab, tap **Today**, **Yesterday**, **Last month**, **Older**, or **Most visited** to use these options:
   • Tap a page to reload it.
   • Tap the ★ next to a page to bookmark it. Tap a gold star ★ next to a page to remove the bookmark.
   • Touch and hold on a page for these options:
     – **Open**: Open the webpage.
     – **Open in new tab**: Launch the webpage in a new window.
     – **Add bookmark/Remove from Bookmarks**: Bookmark the page or remove the bookmark for this page.
     – **Share link**: Use Bluetooth, Email, Gmail, Google+, Messaging, or Wi-Fi Direct to send the link.
     – **Copy link URL**: Save the link's URL to the clipboard.
     – **Remove from history**: Remove the record of this page.
     – **Set as homepage**: Assign the bookmarked link as the home page.
5. On the **Saved pages** tab, use these options:
   • Tap a page to reload it.
   • Touch and hold on a page and then select **Delete saved page** to remove the page from Saved pages.

DRAFT

Internal Use Only

Internet Menu

While viewing a webpage, tap **Menu** for the following options:

• **New tab**: Open the webpage in a new window, under a new tab.

• **New incognito tab**: Open the webpage in a new window, under a new tab, and the pages you view in the new window will not appear in your browser history or search history. See the on-screen explanation of **going incognito**.

• **Add shortcut to home screen**: Add the URL for this webpage as a shortcut on the first home screen.

• **Share page**: Use Bluetooth, Email, Gmail, Google+, Messaging, or Wi-Fi Direct to send the webpage URL.

• **Find on page**: Search for content on the current page.

• **Desktop view**: Your browser displays a website in a modified format that makes it easier to read. Desktop view displays a website the same way it would appear on a PC.

• **Save for offline reading**: Saves the webpage so you can read it later even when offline.

• **Downloads**: View and manage recent downloads.

• **Print**: Print the current screen or page to a Samsung printer.

• **Settings**: Configure web settings.

Internet Settings

Use the browser settings to customize the browser.

1. From a Home screen, tap **Apps** ➔ **Internet**.

2. While viewing a webpage, tap **Menu** ➔ **Settings**. Customize the Browser by using the following options:

   General

   • **Set home page**: View and set the default first page that displays when you launch Internet.

   • **Form auto-fill**: Enable or disable form auto-fill to complete Internet forms with a single click.

   • **Auto-fill text**: If **Form auto-fill** is enabled, set up the following information:

   – **Full name**: Enter your name.

   – **Company name**: Enter a company name.

   – **Address line 1**: Enter your address.

   – **Address line 2**: Enter any additional address information.

   – **City/Town**: Enter your city and town.

   – **County**: Enter your county.

   – **Zip code**: Enter your ZIP code.

   – **Country**: Enter your country.

– **Phone**: Enter your telephone number.

– **Email**: Enter a valid email address.

Privacy and security

- **Clear cache**: Delete content and databases stored on the device.
- **Clear history**: Delete the list of previously-visited pages.
- **Show security warnings**: When enabled, the browser warns you if there is a problem with a site's security.
- **Accept cookies**: When enabled, allows the browser to save and read cookie information used by webpages.
- **Clear all cookie data**: Delete cookie information saved to the device.
- **Remember form data**: When enabled, stores information you enter into forms to make future forms easier.
- **Clear form data**: Deletes saved form information.
- **Enable location**: When enabled, sites you visit can request access to your location.
- **Clear location access**: Clear location access for all websites.
- **Remember passwords**: When enabled, saves user names and passwords for sites you visit, to make future visits easier.
- **Clear passwords**: Clear all saved user names and passwords.

- **Enable notifications**: Adjusts the notification status for Web activity. Choose from: Always on, On demand, or Off.
- **Clear notifications**: Removed Web notification access information.

Accessibility

- **Force zoom**: Override the website's request to control zoom.
- **Text size**: Use the Preview field and the following controls to configure text size:
  – **Scale text up and down**: Scale the text size up or down using a slider bar.
  – **Zoom amount on double tap**: Set how much to zoom when you double-tap the screen, from 175 to 225 percent.
  – **Minimum font size**: Set the minimum font size, which can range from 1 point to 24 points.
- **Inverted screen rendering**: Use the Preview screen and the following controls to configure inverted screen rendering:
  – **Inverted rendering**: Enable the display of websites with inverted colors – black becomes white and vice versa.
  – **Contrast**: If Inverted rendering is enabled, use this slider to set the contrast, which can range from 100 to 300 percent.

Advanced

- **Select search engine**: Choose a search engine from Google, Yahoo!, or Bing.

- **Open in background**: When enabled, new windows open behind the current window.

- **Enable JavaScript**: When enabled, Internet automatically runs JavaScript scripts on pages you visit.

- **Enable plug-ins**: When enabled, Internet automatically loads and runs plug-ins on pages you visit.

- **Default storage**: Assigns the default storage location for Browser downloads.

- **Website settings**: View and manage settings for individual websites.

- **Default zoom**: Adjusts the zoom feature. Set to Far, Medium, or Close.

- **Open pages in overview**: When enabled, displays an overview of newly-opened pages.

- **Auto-fit pages**: When enabled, Internet automatically sizes webpages to fit your device's display.

- **Block pop-ups**: When enabled, blocks pop-up windows.

- **Text encoding**: Choose a default character set for webpages.

- **Reset to default:** Clear all browser data and reset all settings to the factory defaults.

Bandwidth management

- **Preload search results**: Enable the browser to preload high confidence search results in the background to help speed up searches. Options are: Never, Only via Wi-Fi, or Always.

- **Load images**: When enabled, images are automatically loaded when you visit a page. When disabled, images are indicated by a link, which you can tap to download the picture.

Labs

- **Quick controls**: When enabled, the Application and URL bars are hidden. To access the hidden controls, swipe inward from the left or right edge of the screen to access Quick Controls. For more information, refer to *"Internet Quick Controls"* on page 149.

- **Google Instant**: When enabled, you can use Google Instant when you use Google Search to show results as you type. Enabling this option can increase data use.
Internet Quick Controls

Use Quick Controls to maximize your viewing area while browsing the internet.

1. From a Home screen, tap ▦ **Apps** ➔ 🌐 **Internet**.
2. While viewing a webpage, tap ☰ **Menu** ➔ **Settings** ➔ **Labs**, and then tap **Quick Controls** to enable the function.

   The Application and URL bars are hidden.
3. Swipe inward from the left or right edge of the device screen to access quick controls.

4. Without lifting your finger, move to an option and then lift your finger to initiate the option.

5. To cancel, display the Quick controls and tap ☰ **Menu** ➔ **Settings** ➔ **Labs** and tap **Quick controls** to uncheck it.

For PRA Only, Printing NOT approved by Technical Writing Team

Section 9: Connections

Your device includes features to connect to the internet and to other devices by using Wi-Fi, Bluetooth, or a USB cable.

Wi-Fi

Wi-Fi is a wireless networking technology that provides access to local area networks. Use your device's Wi-Fi feature to:

- Access the internet for browsing or to send and receive email.
- Access your corporate network.
- Use hotspots provided by hotels or airports while traveling.

Wi-Fi communication requires access to an existing Wireless Access Point (WAP). WAPs can be Open (unsecured, as with most hotspots) or Secured (requiring you to provide login credentials). Your device supports the 802.11 a/b/g/n Wi-Fi protocol.

Configuring Wi-Fi Settings

For more information about configuring your device's Wi-Fi settings, see *"Wi-Fi"* on page 202.

Finding Wi-Fi Networks

You can have your device automatically notify you of available networks. For more information, refer to *"Advanced Settings"* on page 203.

Turning Wi-Fi On or Off

Turn your device's Wi-Fi service on or off. When you turn Wi-Fi service on, your device automatically searches for available, in-range WAPs (Wireless Access Points).

By default, your device's Wi-Fi feature is turned off (deactivated). Activating Wi-Fi allows your device to discover and connect to compatible in-range WAPs (Wireless Access Points).

Turning Wi-Fi On:

   1. From any screen, tap the Time in the Status Bar.
   The Status Details displays.

   2. Tap **Wi-Fi** to turn Wi-Fi On.
   – or –

   1. From a Home screen, tap ▦ **Apps** ➔ ⚙ **Settings**.

2. Under **Wireless and network**, on the Wi-Fi tab, tap the **OFF / ON** icon [image] to turn Wi-Fi on.

Turning Wi-Fi Off:

1. From any screen, tap the Time in the Status Bar. The Status Details displays.

2. Tap **Wi-Fi** to turn Wi-Fi Off.

Wi-Fi Status Indicators

The following icons indicate the Wi-Fi connection status:

Displays when Wi-Fi is active and there is an available open wireless network.

Displays when Wi-Fi is connected, active, and communicating with a Wireless Access Point (WAP).

Scanning and Connecting to a Wi-Fi Network

When you turn on Wi-Fi, your device searches for available Wi-Fi connections, then displays them on screen.

1. From any screen, tap the Time in the Status Bar. The Status Details displays.

2. Tap **Wi-Fi** to turn Wi-Fi On. Your device automatically scans for available Wireless Access Points.

3. When the scan is complete, select a Wi-Fi network to connect. If the Wi-Fi network is open, your device automatically connects. If the Wi-Fi network is secured, enter the password at the prompt to connect.

4. Tap **Connect**.

Adding a Wi-Fi Network Manually

1. From a Home screen, tap ▦ **Apps** ➔ ⚙ **Settings**.

2. Under **Wireless and network**, on the Wi-Fi tab, tap the **OFF / ON** icon [image] to turn Wi-Fi on.

3. Tap **Add Wi-Fi network**, then enter network information:

• **Network SSID**: Enter the name of the Wi-Fi Wireless Access Point (WAP).

• **Security**: Select the type of security used by the WAP.

DRAFT

Internal Use Only

Note: Depending on the Security protocol used by the WAP, additional network information may be required, such as a Password.

- **Password**: If the WAP is secured, enter the password or hex key.

4. Tap **Save** to save the settings.

Wi-Fi Sleep Policy

Specify when to disconnect from Wi-Fi.

1. From a Home screen, tap ▦ **Apps** ➔ ⚙ **Settings**.
2. Under **Wireless and network**, tap **Wi-Fi**.
3. Tap ☰ **Menu** ➔ **Advanced**.
4. Tap **Keep Wi-Fi on during sleep**. Choose from: **Always**, **Only when plugged in**, or **Never (increases data usage)**.

Wi-Fi Direct

Wi-Fi Direct allows device-to-device connections so you can transfer large amounts of data over a Wi-Fi connection.

1. From a Home screen, tap ▦ **Apps** ➔ ⚙ **Settings** ➔ **More settings** ➔ **Wi-Fi Direct**.
2. Tap the **OFF / ON** icon ▭▬▬ to turn Wi-Fi Direct on.
   If you are currently connected to a Wi-Fi network, a prompt displays **Start Wi-Fi Direct operation. This will turn off Wi-Fi client/hotspot operation**.
3. Tap **OK** to continue.
   Your device will begin to search for other devices enabled with Wi-Fi direct connections.

Note: Confirm 📶 (**Wi-Fi Direct On**) appears at the bottom of the screen.

4. Tap the Wi-Fi Direct field to display Available devices.
5. Enable Wi-Fi Direct (similar to Steps 1 and 2) on the device to which you want to connect.

Note: The target device must also have Wi-Fi Direct service active and running before it is detected by your device.

6. Tap **Scan** and select the single device name to begin the connection process to another Wi-Fi Direct compatible device.

7. Once the device you want to connect to is displayed, tap it.

   An Invitation to connect displays on the device to which you want to connect.

8. On that target device, tap **Accept**.

   You have 2 minutes to tap **Accept** on the device to which you want to connect for the connection to be made.

   Once connected, the other device will show as **Connected** in your list of Wi-Fi Direct devices and the 🛜 icon will display at the bottom of your screen.

Sharing Information with a Connected Device

To share videos, photos, or other information with the connected device, follow these steps:

1. View the information that you want to share. For example, if you want to share a photo, find the photo in your camera viewer or **Files** folder, then tap the **Share, Share via,** or **Send via** option.

2. Tap the **Wi-Fi Direct** option.

   The Wi-Fi Direct settings screen displays, Wi-Fi Direct is turned on, and your device scans for other devices.

3. Tap a connected device name. For example, Android_XXXX.

4. The other device displays a pop-up that indicates it is receiving the file.

   The file is transferred and can be found in **Files** within the ShareViaWifi folder.

Note: Depending on the other device model, the prompts and shared folder information may differ.

For PRA Only, Printing NOT approved by Technical Writing Team

Bluetooth

Bluetooth is a short-range wireless communications technology for exchanging information over a distance of about 30 feet.

You do not need to line up the devices to send information with Bluetooth. If the devices are in range, you can exchange information between them, even if they are in different rooms.

Configuring Bluetooth Settings

Configure your device's Bluetooth settings. For more information, refer to *"Bluetooth"* on page 204.

Turning Bluetooth On or Off

To turn Bluetooth on:

1. From a Home screen, tap **Apps ➔** **Settings**.
2. Under **Wireless and network**, on the Bluetooth tab, tap the **OFF / ON** icon to turn Bluetooth on.

Note: When Bluetooth is on, the **Bluetooth** icon displays in the Status Bar.

To turn Bluetooth on or off:

1. From a Home screen, tap **Apps ➔** **Settings**.
2. Under **Wireless and network**, on the Bluetooth tab, tap the **OFF / ON** icon again to turn Bluetooth off.

Bluetooth Settings

The Bluetooth settings menu allows you to set up many of the characteristics of your device's Bluetooth service, including:

- Entering or changing the name your device uses for Bluetooth communication and description
- Setting your device's visibility (or "discoverability") for other Bluetooth devices
- Displaying your device's Bluetooth address

To access the Bluetooth Settings menu:

1. From a Home screen, tap **Apps ➔** **Settings**.
2. Under **Wireless and network**, on the Bluetooth tab, tap **Menu.**
3. Tap the **Rename device**, **Visible time-out,** and **Received files** fields to set the options.

To change your Bluetooth name:

1. Verify Bluetooth is active.
2. From the Bluetooth page, tap ≡ **Menu** ➔ **Rename device**.
3. Enter a new name.
4. Tap **OK** to complete the rename process.

To change your Bluetooth visibility time out value:

1. Verify Bluetooth is active.
2. From the Bluetooth page, tap ≡ **Menu** ➔ **Visible time-out**.
3. Select a time out value. Choose from: 2 min, 5 min, 1 hour, Never timeout.

To view files received via Bluetooth devices:

1. Verify Bluetooth is active.
2. From the Bluetooth page, tap ≡ **Menu** ➔ **Received files** to display a list of files received from external sources via Bluetooth communication.
3. Tap ⬑ to return to the previous page.

Pairing with a Bluetooth Device

Search for a Bluetooth device and pair with it, to exchange information between your device and the target device.

Tip: After pairing, your device and the target device recognize each other and exchange information without having to enter a passcode or PIN.

1. From a Home screen, tap ▦ **Apps** ➔ ⚙ **Settings**.
2. On the Bluetooth field, tap the **OFF / ON** icon ⬜▬▮ to turn Bluetooth on.
3. Tap the **Bluetooth** tab and then enable the target device's discoverable or visible mode.
4. Tap **Scan**. Your device displays a list of discovered in-range Bluetooth devices.
5. Tap **Stop** at any time to stop scanning.

DRAFT

Internal Use Only

6. From the list of found devices, tap the target device, then follow the prompts to complete the pairing:
   • If the target device requires a PIN, enter a PIN for the target device and tap **OK**. When prompted, enter the PIN on the target device.
   • If the device allows automatic or smart pairing, your device attempts to pair with the device automatically. Follow the prompts on your device and the target device to complete the pairing.
7. Confirm ⁂ is now showing your devices are paired.

Sharing Data with a Bluetooth Device

To send data to a Bluetooth device:
1. Select a file or item from an appropriate application.
2. Select an option for sharing data with the Bluetooth feature.

Note: The method for selecting an option may vary by data type.

3. Search for and pair with a Bluetooth device. For more information, refer to *"Pairing with a Bluetooth Device"* on page 155.

Receiving Data from a Bluetooth Device

To receive data from a Bluetooth device:
1. Turn Bluetooth on. For more information, refer to *"Turning Bluetooth On or Off"* on page 154.

Note: To select the length of time that your device will be visible, select ☰ **Menu** ➔ **Visible time-out**.

2. Pair with the Bluetooth device from which you want to receive data. For more information, refer to *"Pairing with a Bluetooth Device"* on page 155.

   A Bluetooth authorization request pop-up displays when a Bluetooth device sends data to your device.

3. Select **Accept** to confirm that you are willing to receive data. A File received message displays.

Received data is saved to the Bluetooth folder. If you receive a contact, it is saved to your contacts automatically.

USB Tethering

This option allows you to share your device's mobile data connection via a direct USB connection between your device and computer. A wireless version of this same functionality would be the Mobile AP feature.

Note: If additional software or USB drivers are required, navigate to: http://www.samsung.com/us/support/downloads.

1. From a Home screen, tap ▦ **Apps** ➔ 🔽 (**Mobile HotSpot**).

   – or –

   From a Home screen, tap ▦ **Apps** ➔ 🔵 **Settings** ➔ **More settings** ➔ **Tethering and Mobile HotSpot**.

2. Plug in the USB cable between your computer and your device.

3. When prompted for a USB mode, tap ⬅ to exit the menu.

4. Tap **USB tethering** from the Tethering menu. This places a green check mark next to the entry and activates the feature. A Tethering or HotSpot active notification briefly appears on the screen.

   Look for the USB Tethering active icon 🔽 in the Status bar area of the screen.

To disconnect tethering:

1. From a Home screen, tap ▦ **Apps** ➔ 🔽 (**Mobile HotSpot**).

2. Tap **USB tethering** from the Tethering menu to remove the check mark and deactivate the feature.

3. Remove the USB cable from the device.

DRAFT

Internal Use Only

Portable Wi-Fi HotSpot

This feature allows you to turn your device into a Wi-Fi hotspot. The feature works best when used in conjunction with HSPA+ (4G) data services (although 3G service can also be used).

Important! The Mobile AP service can not be active at the same time as Wi-Fi. Please close your Wi-Fi connection prior to launching the Mobile AP service.

Note: You must have a tethering plan on your account to use the Wi-Fi HotSpot. You can not use data on the device while it is being used as a hotspot.

To edit the Portable Wi-Fi HotSpot information:

1. From a Home screen, tap ▦ **Apps** ➔ ▵ (**Mobile HotSpot**).

   – or –

   From a Home screen, tap ▦ **Apps** ➔ ⚙ **Settings** ➔ **More settings** ➔ **Tethering and Mobile HotSpot**.

2. On the Mobile HotSpot field, tap the **OFF / ON** icon to turn the feature on.
3. Tap the **Network SSID** field and edit the name if desired.
4. Select a Security option and enter a new security option (**Open**, **WPA-PSK**, or **WPA2-PSK**).
5. With security enabled, delete the previous password and enter a new one into the **Password** field.
6. Tap **Save** to store the new settings.
7. Confirm the Mobile HotSpot active icon ▵ appears at the bottom of the screen.

Note: Using your 4G service and Portable Wi-Fi HotSpot drains your device's battery at a much faster rate than when using any other feature combination.
The best way to keep using the device as a hotspot is to have it connected to a power supply.

DRAFT

Internal Use Only

To connect to the HotSpot:

1. Enable Wi-Fi (wireless) functionality on your target device (laptop, media device, etc.).

2. Scan for Wi-Fi networks from the device and select your device hotspot from the network list.
   - The SSID name for your device's hotspot is determined by what you entered into the **Network SSID** field.
   - You can change the name by tapping **Mobile HotSpot ➔ Configure ➔ Network SSID** and changing the entry.

3. Select this HotSpot and follow your on-screen instructions to complete the connection.

4. Launch your Web browser to confirm you have an Internet connection.

To secure the Portable HotSpot service:

The two most common methods for securing your connection to the HotSpot are to a security method (WPA2 PSK) and to Hide your device's SSID name.

1. From a Home screen, tap 📱 **Apps ➔** 📶 (**Mobile HotSpot**).

2. Tap **Mobile HotSpot ➔ Configure**.

3. Tap the **Security** field and select **WPA2 PSK**.

4. With security enabled, enter a new password into the **Password** field.

Important! The more complex the password, the harder it will be for intruders to break your security. It is recommended that you not use names, birthdays, or other personal information.

---

5. Tap **Save** to store the new settings.

Kies Via Wi-Fi

Samsung Kies is a software that enables you to update your device firmware, synchronize files, and transfer data to and from your device directly by connecting to the PC.

Note: Some features will be supported through the System Updates feature in the future. For more information, refer to *"Software Update"* on page 246.

To learn more about Samsung Kies and Samsung applications, browse featured applications and download Kies at: http://www.samsung.com/us/support/downloads.

Note: Samsung Kies works on both PC and Macintosh computers.

Connecting With Samsung Kies

1. Install Samsung Kies software on your PC.

Warning! Close any running applications before connecting your device to a PC.

2. Run Samsung Kies.

3. From a Home screen, tap ▦ **Apps ➔** ⚙ **Settings ➔ More settings ➔ Kies via Wi-Fi**.

Select the source of the Wi-Fi connection for Kies air.

4. Follow the prompts from Kies to update your device firmware.

5. Refer to Samsung Kies Help for more information.

Synchronizing with Windows Media Player

Ensure that Windows Media Player is installed on your PC.

1. Attach your device to the computer with the USB cable.

Your computer recognizes the connection and displays the AutoPlay screen.

2. Click the option to **Sync digital media files to this device** to synchronize music files.

3. Select and drag the music files you want to the sync list and begin synchronizing.

4. When finished, exit Windows Media Player and disconnect the USB cable.

DRAFT

Internal Use Only

Connecting as a Mass Storage Device

You can connect your device to a PC as a removable disk and access the file directory.

1. Attach your device to the computer with the USB cable. Your computer recognizes the connection and displays the AutoPlay screen.

2. Click the option to Open device to view files. You should see a Tablet folder.

3. Copy files to or from the PC from or to the device (Tablet folder).

4. When finished, close the PC folder and disconnect the USB cable.

GPS Applications

GPS applications allow you to achieve real-time, GPS-enabled, turn-by-turn navigation and to access local searches based on a variety of category parameters.

To receive better GPS signals, avoid using your device in the following conditions:

• inside a building or between buildings

• in a tunnel or underground passage

• in poor weather

• around high-voltage or electromagnetic fields

• in a vehicle with tinted windows

Global GPS turn-by-turn navigation, mapping, and Point of Interest content is available for three continents, including North America (U.S., Canada, and Mexico), Western Europe, and China, where wireless coverage is available.

Important! If you tap or cover the internal GPS antenna while using GPS services, it may impede the GPS signal resulting in the GPS services not working in an optimal manner. Refer to the following diagram to locate the approximate location of the internal GPS antenna.

For PRA Only, Printing NOT approved by Technical Writing Team

Section 10: Applications and Widgets

This section contains a description of each application that is available on the Apps screen, its function, and how to navigate through that particular application. If the application is already described in another section of this user manual, then a cross reference to that particular section is provided. Various widgets are also described.

Tip: To open applications quickly, add the icons of frequently-used applications to one of the Home screens. For details, see *"App Shortcuts"* on page 41.

Update Available

When you open an application that is preloaded on your device, an **Update Available** message may be displayed if there is a new version of the app available.

■ Tap **Upgrade** to update the app or tap **Not Now** to open the app without updating.
For more information, refer to *"Updates to Downloaded Apps"* on page 189.

Alarm

Set alarms for reminders or for wake-up times.

Adding and Configuring Alarms

1. From a Home screen, tap ▦ **Apps** ➔ ⏰ **Alarm**.
2. Tap ➕ **Create alarm** or tap an alarm that is already set.
3. Use the arrow symbols to enter adjust the hour, and minutes, then tap **AM** or **PM** (toggles depending on which was last selected).
4. Tap the **Alarm repeat** field and touch the number of times you want this alarm to repeat. Selections are: day blocks or **Repeat weekly**. Selected day blocks turn blue when active.
5. Slide the slider bar left or right in the **Alarm volume** field to decrease or increase the alarm volume. A sample of the volume level plays.
6. Tap the **Alarm tone** field and either select an available tone or select **Add** to use locate a sound to use as an alarm ringtone. Tap **OK** to activate the ringtone.

7. Tap the **Snooze** box to the right to activate the feature. Tap the available fields to assign a **Duration** time (3 minutes,
   5 minutes, 10 minutes, 15 minutes, or 30 minutes) and **Repeat** (1 time, 2 times, 3 times, 5 times, and 10 times).

   • **Duration** indicates the length of time the alarm will remain silent between alarm notifications (snooze time).

   • **Repeat** indicates the numbers of snooze sessions that are assigned to this alarm. How many times will the snooze silence the alarm.

8. Tap the **Smart alarm** box to the right to activate this feature which slowly increases screen brightness and the volume of nature tones to simulate dawn breaking. Tap the **Interval** field to assign a interval time (3 minutes, 5 minutes, 10 minutes, 15 minutes, or 30 minutes) and nature tone (Fairy fountain, Birdsong by the lake, The secret forest, Serenity, Gentle spring rain, and Sparkling mist).

   • **Interval** category describes the length of time the alarm will remain silent between alarm notifications (snooze time).

   • **Tone** category provides one of several nature sounds that are used as the alarm tone.

9. Tap the **Name** field and enter a name for this Alarm.

10. Tap **Done** to save the alarm.

    The main Alarm screen displays showing the new or updated alarm.

Activating Alarms

1. From a Home screen, tap ▦ **Apps** ➔ 🕐 **Alarm**.

2. Tap 🕐 **Turn alarm on** to activate the alarm. A gray alarm means the alarm is deactivated.

3. Tap an alarm to change any of its settings and then select **Done** to save the updates.

Deactivating and Deleting Alarms

1. From a Home screen, tap ▦ **Apps** ➔ 🕐 **Alarm**.

2. Touch and hold an alarm and then tap one of the following options:

   • **Delete alarm**: Delete the alarm.

   – or –

   Tap 🗑 **Delete** and select the existing alarms you want to delete, and then tap **Done**.

For PRA Only, Printing NOT approved by Technical Writing Team

Turning Off an Alarm

When the alarm sounds, to turn off the alarm:

■ Touch and drag [×] in any direction.

Setting the Snooze Feature

To activate the Snooze feature after an alarm sounds:

■ Touch and slide [zz] in any direction. Snooze must first be set in the alarm settings.

AllShare Play

AllShare Play™ allows your tablet to stream photos, music, and videos from its memory to other DLNA certified™ (Digital Living Network Alliance) devices. Your tablet can also play digital content streamed from other DLNA certified devices.

Note: To view more information about DLNA certified products visit http://www.dlna.org/home.

Configuring AllShare

You must first connect both of your communicating devices to the same Wi-Fi and be using an active and registered Samsung account prior to using this application. For more information, refer to *"Turning Wi-Fi On or Off"* on page 150. Connect to Wi-Fi, configure AllShare Play settings to identify your device as a server, and set treatment of copied files.

Important! The Samsung account manages the access information (username and password) to several applications, such as AllShare Play.

1. Connect to a Wi-Fi network. For more information, refer to *"Wi-Fi"* on page 150.

2. From a Home screen, tap [▦] **Apps**
   ➔ [▶] **AllShare Play**.

Note: If prompted, read the on-screen message about network charges and tap **OK** to continue.

The AllShare Play Sign In screen displays.

3. Tap **Sign in**. The Samsung account screen displays.

4. Tap **Create new account**, if you have not set up a Samsung account, or select **Sign in**, if you have already set up a Samsung account.

For more information, refer to *"Creating a Samsung Account"* on page 17.

The AllShare Play main screen displays.

5. For more information, tap ☰ **Menu → FAQ**.

Using Group Cast

While using various applications, such as 🖼️ **Gallery**, when you tap ◁ **Share** to share a file, you see Group Cast as an option.

Group Cast is an easy way to share files in real time with others who are on the same Wi-Fi network. Group Cast can be used when you want to share documents, images, music, and so on.

You can use Group Cast for meetings, sales presentations, conferences, and classes. All you need is a Wi-Fi network that works with Group Cast, and most do.

To share a file using Group Cast:

1. From a Home screen, tap ⊞ **Apps → 🖼️ Gallery**.

2. Navigate to the file you want to share and touch ◁ **Share → Group Cast**.

For more information, refer to *"Gallery"* on page 116.

Note: After the initial Group Cast request, tap ▶️ **Group Cast** instead of ◁ **Share**.

3. Use the keyboard to enter a PIN code and tap **Done**.

This process makes sure only desired recipients can view your shared image.

The AllShare Play - Group Cast screen displays and the device waits for other connected recipients to accept the connection and enter the PIN on their screens.

4. Tap **OK** to start the group cast process while other users connect.

You can now interact and draw with the on-screen image, and users will instantaneously see the same gestures and also be able to interact.

For PRA Only, Printing NOT approved by Technical Writing Team

5. The newly altered image (with markups and comments) can not be saved, but you can take a screen shot of the current image and save it to your Clipboard. For more information, refer to *"Navigating Your Device"* on page 30.

Calculator

The calculator provides the basic arithmetic functions to solve simple arithmetic problems and advanced operators to solve more complex problems.

1. From a Home screen, tap **⌗ Apps → ⌗ Calculator**.

2. Enter the first number using the numeric keys.

3. Enter the operation for your calculation by tapping the **+** (add), **-** (subtract), **×** (multiply), or **÷** (divide) key.

4. Enter the next number.

5. To view the result, tap the **=** (equals) key.

6. Repeat Steps 3 through 5 as many times as required.

7. Tap **C** to clear the result.

8. For more advanced problems, rotate your device to landscape mode and use the advanced operators **sin**, **ln**, **cos**, **log**, **tan**, and so on, just as you would on a pocket calculator.

9. Touch and hold the Calculator's display to copy or cut the contents of the display.

Copied to clipboard displays. Paste the copied value in another app.

Calendar

Your device includes a powerful Calender to help you organize your schedules more conveniently and effectively. Learn to create and manage events and tasks, and set alarms to remind yourself of important events and tasks.

1. From a Home screen, tap **⌗ Apps → 31 Calendar**.

2. Tap a tab to choose a calendar view:
- **Year**: Display all twelve months of this year. Sweep across the years at the bottom of the screen to display another year.
- **Month**: Display the current month. Tap a month and year at the bottom of the screen to display another month.
- **Week**: Display the current week. Tap a week at the bottom of the screen to display another week.
- **Day**: Display today's schedule by hour. Tap day at the bottom of the screen to display another day.

- **List**: Display only event and task names and dates for a selected year. Tap a year at the bottom of the screen to display another year. Tap a date to hide or show the event or task name.

- **Task**: Display your list of tasks. Tap the sort field to change how your tasks are sorted. Tasks can be sorted by due date, priority, date, week, month, or group.

3. Swipe left or right across the screen to view other days or other weeks. Swipe up or down the screen to view other events.

4. To find an event or task, tap **Search**.
   Use the on-screen keyboard to enter a search term. Possible events display as you type.

   Tap an event to send, edit, or delete the event.

5. Tap **Add event / Add task** and then tap **Done** to add a new event to your calendar. For more information, refer to *"Creating an Event or Task"* on page 168.

6. Tap **Menu** for these options:
   - **Zoom in**: In the Week and Day views, increase the size of the area being viewed.

- **Zoom out**: In the Week and Day views, decrease the size of the area being viewed.

- **Go to**: Use the Set date pop-up to enter a date and then tap Set to display that date on your calendar.

- **Delete**: Delete events for the year, month, week, day, week, month, before today, or all events, depending on the Calendar view.

- **Sync**: Manually synchronizes the calendar entries among all of your current accounts, for example, Gmail, Exchange, and so on.

- **Show controls** / **Hide controls**: Show or hide a small month calendar and a list of events in landscape mode.

- **Settings**: Customize the calendar. For more information, refer to *"Calendar Settings"* on page 169.

7. Tap **Today** to return to the current date.

8. Tap **Calendars** to configure which events to display. Tap **Add account ➔ Add account** to add additional accounts from which calendar events can be synced.

Creating an Event or Task

1. From a Home screen, tap ▦ **Apps** ➔ 📅 **Calendar**.
2. Double-tap the date for which you want to enter an all day event or task.
   • Tap the **Add event** or **Add task** tab.
   • Tap the **My calendar** field and tap a calendar to which the even or task should be added.
   • Use the keyboard to enter the event or task name.

   – or –

   Tap the date for which you want to enter an event or task.
   • Tap ➕.
   • Tap the **Add event** or **Add task** tab.
   • Enter the event or task information.
3. Tap **Save**.

Managing Events

You can delete, send, and edit events on your mobile device:

1. From a Home screen, tap ▦ **Apps** ➔ 📅 **Calendar**.
2. Tap an event. A pop-up displays event information.
3. Tap ☰ **Options**. Choose from: Reply, Reply all, Forward or Share via.
4. Tap **Delete** and then tap **OK** to delete the event.
   – or –

   Tap **Edit** to update the event details.
5. Tap **Share via** and then select **Bluetooth**, **Email**, **Messaging**, or **Wi-Fi Direct** to share the event.

Add Additional Calendar Accounts

1. From a Home screen, tap ▦ **Apps** ➔ 🗓 **Calendar**
    ➔ **Calendars** ➔ **Add account**.

    – or –

    From a Home screen, tap ▦ **Apps** ➔ ⚙ **Settings**
    ➔ **Accounts and sync**.

    The Accounts and sync screen displays.

2. Tap **Add account** to display the Add account option.

3. Select an account type and enter your account
    information.

Calendar Settings

To set up Calendar preferences:

1. From a Home screen, tap ▦ **Apps** ➔ 🗓 **Calendar**.

2. Tap ☰ **Menu** ➔ **Settings**.

    The following options display:

    View settings

    • **First day of week**: Choose a day to begin each week.

    • **Hide declined events**: Enable or disable display of events.

• **Lock time zone**: Allows you to lock event times and dates
  based on your selected time zone, which is defined by the
  following field.

• **Select time zone**: If **Lock time zone** is enabled, used this
  option to select a time zone to lock event times and dates.

• **Show week number**: Show the week number to the left of
  each week in the Month view.

• **Calendars**: Enable calendars for your various accounts.

Event notification

• **Set alerts & notifications**: Tap to select, which allows you to
  set the Alert, Status bar notification, or Off.

• **Select ringtone**: Choose a tone for calendar notifications.

• **Default reminder time**: Set the default time for a notification
  before an event is to occur.

• **Notifications while screen is off**: Enable or disable the display
  of notifications on the full screen while the screen is turned off.

DRAFT

Internal Use Only

Sync settings

• **Sync events/tasks**: Displays the General sync settings. For more information, refer to *"Accounts and Synchronization"* on page 222.

(Accounts): Tap an account and then tap the check box to enable or disable the calendar sync for that account.

Camera

Take photos and record video with your device's built in Camera.

For more information, refer to *"Camera"* on page 102.

■ From a Home screen, tap ▦ **Apps** ➔ 📷 **Camera**.

Contacts

Store contact information for your friends, family and colleagues, to quickly access information or to send a message. For more information, refer to *"Contacts"* on page 66.

■ From a Home screen, tap ▦ **Apps** ➔ 👤 **Contacts**.

Downloads

Files, apps, and other items you download in Internet, Gmail, Email, or in other ways, are stored on your tablet's internal storage. Use the Downloads app to view, reopen, or delete what you have downloaded.

1. From a Home screen, tap ▦ **Apps** ➔ 📥 **Downloads**.

2. Tap an item to open it.

3. Tap headings for earlier downloads to view them.

4. Tap items you want to send, to check them, and then tap ◁ **Share via**. Select an option to share the item. Options are: Bluetooth, Email, Gmail, Google+, Google Cast, Messaging, Photo editor, Picasa, or Wi-Fi Direct.

5. Tap items you want to delete, to check them, and then tap 🗑 **Delete**. The items are deleted from your tablet.

6. Tap **Sort by size** or **Sort by date**, at the bottom of the Downloads pop-up, to switch back and forth.

Latitude

With Google Latitude, you can see the location of all of your friends on a map or on a list. You can also share or hide your location.

You must first set up your tablet to use wireless networks to help pinpoint your location. Also, Latitude works best when Wi-Fi is enabled.

To enable Wi-Fi:

1. From a Home screen, tap ▦ **Apps** ➔ ⚙ **Settings**.

2. Tap **Location services** ➔ **Use wireless networks**.
   A green check mark ✅ indicates the feature is enabled.

3. Tap **Location services** ➔ **Use GPS satellites**.
   A green check mark ✅ indicates the feature is enabled.

4. Tap **Location services** ➔ **Location and Google search**.
   A green check mark ✅ indicates the feature is enabled.

5. Under **Wireless and network**, on the Wi-Fi tab, tap the **OFF / ON** icon 🔲 to turn Wi-Fi on.
   For more information, refer to *"Wi-Fi"* on page 150.

6. Log on to your Google account.
   To create a Google account or set up your Google account on your device use **Accounts and sync** settings. For more information, refer to *"Accounts and Synchronization"* on page 222.

7. Tap 🏠 **Home** ➔ ▦ **Apps** ➔ 😊 **Latitude**.
   Your location is displayed on the map, accurate to 30 meters.

Sharing Your Location with Friends

1. Tap ▤ **Menu** ➔ **Latitude**.

2. From the Latitude map screen, tap | Latitude | to display your Latitude list of friends. At first, only your name is displayed.

3. Tap ▤ **Menu** ➔ **Add friends**.

4. Tap **Select from Contacts** and select a contact
   – or –
   Tap **Add via email address**, enter an email address, and tap the **Send** key or close the keyboard and tap **Add friends**.

5. At the **Send sharing requests** prompt, tap **Yes**.

Your friend will receive an email or text message with your location marked on a map. They will also receive instructions on how to view your location from the Internet or use Latitude on their device, if it is available. Once they acknowledge your request, their location will display on your tablet. They can share their location from their computer, device, or tablet.

For more information, go to http://www.google.com/latitude.

Latitude Menu

1. From a Home screen, tap ▦ **Apps ➔** 🔵 **Latitude**.
2. Tap [Latitude], if necessary.
3. From the top-right select any of the following functions:
   • **My Location** Uses GPS technology to determine your current location.
   • **Local** Launch the Local app. For more information, refer to *"Local"* on page 174. This option only displays in portrait mode.
   • **Directions** Allows you to enter a start and end point for directions.

• **Layers**: Enable or disable a map layer to display. Choose from Traffic, Satellite, Terrain, Transit Lines, Latitude, My Maps, Bicycling, or Wikipedia. This option only displays in portrait mode.

– or –

Tap ▦ **Menu** for these options:

• **Add friends**: Share your location with friends. For more information, refer to *"Sharing Your Location with Friends"* on page 172.

• **Check in**: Tap a location to check-in so others will know your location.

• **Refresh friends**: Update your Latitude list of friends.

• **Show stale friends / Hide stale friends**: Show or hide friends depending on the accuracy of their Latitude information.

• **Location settings**: Configures the location reporting settings. For more information, refer to *"Maps Menu"* on page 176.

• **Clear Map**: Remove search results from the map.

• **Make available offline**: Makes the current map functionality available even no network connection is available.

• **Join Latitude/Latitude**: Join Latitude, to share your location with friends you choose and Google.

For PRA Only, Printing NOT approved by Technical Writing Team

- **My Places**: Displays a list of Starred places.

- **Offers**: Displays nearby local offers based on your current location.

- **Settings**: Configure settings. For more information, refer to *"Maps Settings"* on page 178.

- **Help**: Launches Google mobile Help.

Local

Local (formerly known as Google Places) displays company logos on a layer of Google Maps. When viewing an area you can quickly locate a business or person, find out more information about the business, see coupons, public responses, and more.

1. From a Home screen, tap ▦ **Apps** ➔ 📍 **Local**.
2. Tap 🔍 **Search** and then use the **Search Maps** field to manually enter a desired place or choose from among the various categories. Matches are filtered by those closest to your current location.

3. Locate and tap one of the listed places (Restaurants, Cafes, Bars, Attractions, [user added searches], RECOMMENDATIONS, or IN THIS AREA a list of places within this category displays.

4. Tap the Maps icon to launch the related maps feature.

   – or –

   Tap 🔳 **Menu** and then tap either **My Places ➔ Starred**.

   – or –

   Tap the Maps icon (upper-right) to launch the related maps feature.

   - Tap 🔳 **Menu ➔ Latitude**. The functions of this application are similar to those of the Navigation application, but work along with the Latitude service where you can share your location with your chosen Google friends.

DRAFT

Maps

Use Google Maps to find your current location, get directions, and other location-based information.

Tip: A shortcut to Maps displays on the main Home screen by default.

Note: You must enable location services to use Maps. Some features require Standalone or Google location services. For more information, refer to *"Location Services"* on page 224.

◼ From the Home screen, tap ⬛ **Apps** ➔ 🗺 **Maps**.

Navigating the Map

Zooming

• Double-tap on the screen to zoom in.

• Use two fingers, such as your index finger and thumb, to zoom out by making an inward pinch motion on the screen. To zoom in, make an outward motion by sweeping your fingers out.

Tip: For convenient browsing, you can rotate the device to landscape mode.

Scrolling

• Touch and drag on the screen to reposition the map in the display.

Tap

• Tap an icon on the map to display information about the location. For example, your location is indicated by a flashing 🧭 and a pop-up that displays your name.

Maps Menu

1. From the Home screen, tap 🗺 **Maps**.

2. From the top-right select any of the following functions: My Location, Local, Directions, and Layers. For more information, refer to *"Other Map Options"* on page 177.

   – or –

   While viewing a map, tap ⬛ **Menu** for these options:

   • **Clear Map**: Remove search results from the map.

   • **Make available offline**: Makes the current map functionality available even no network connection is available.

- **Join Latitude/Latitude**: Join Latitude, to share your location with friends you choose and Google.
- **My Places**: Display starred locations.
- **Offers**: Displays nearby local offers based on your current location.
- **Settings**: Configure settings. For more information, refer to *"Maps Settings"* on page 178.
- **Help**: Learn about Google maps.

Tip: Local and Layers display in the Application Bar in landscape mode.

Other Map Options

Tap the indicated icon to use these additional Map options:

Search Maps: Use the keyboard to enter your request to Search the map for a city, location, and so on. Suggestions are displayed as you type.

Speak: Just speak a city, location, and so on, to display.

Compass: Set the map to always display north at the top of the screen or to automatically rotate like a compass, keeping north on the map facing north, and so on. Your device may have to be calibrated the first time you use this feature. Follow the on-screen instructions.

Local: Launch the Local app. For more information, refer to *"Local"* on page 174.

Directions: Displays the Directions pop-up. Enter **My Location** and **End point** or tap the button to the right of the fields to choose your current location, a contact's location, or to tap a point on the map.

- Tap the automobile, bus, bicycle, or walking icon for the appropriate directions. Then tap **Go** to display a list of directions.
- Tap the Directions list and scroll up or down. Tap an entry in the Directions list to show the point mentioned on the map.

Layers: Enable or disable a map layer to display. Choose from Traffic, Satellite, Terrain, Transit Lines, Latitude, My Maps, Bicycling, or Wikipedia.

Memo Options

While viewing a Memo:

- Tap ◄ **Memo options** for the following options:

  🗑 **Delete**: Delete this Memo.

  🎨 **Color**: Choose a color for this memo.

  🔒 **Lock/Unlock**: Lock the memo or use your PIN number to remove the lock form the memo. Once you lock a memo, you have to use your PIN number to view the memo.

  🖨 **Print**: Send this memo to a Samsung printer.

  ◄ **Share via**: Tap **Bluetooth**, **Email**, **Gmail, Messaging,** or **Wi-Fi Direct** to send the memo by the selected method. For more information, refer to *"Bluetooth"* on page 154.

Messaging

1. From a Home screen, tap ▦ **Apps** ➔ ✉ **Messaging**.
2. Follow the on-screen prompts.

For more information, refer to *"Messaging"* on page 76.

Messenger

With Google Messenger, you can bring groups of friends together into a simple group conversation.

For more information, refer to *"Messenger"* on page 101.

- From a Home screen, tap ▦ **Apps** ➔ 💬 **Messenger**.

Mobile HotSpot

Provides access to the Tethering and portable HotSpot menu where you can use either the USB tethering or Mobile HotSpot functionality.

1. From a Home screen, tap ▦ **Apps** ➔ 📶 (**Mobile HotSpot**).
2. Activate the desired connection method.

For more information see either *"USB Tethering"on page 157* or *"Portable Wi-Fi HotSpot"on page 158*.

More for Me

Provides customized offers, discounts and deals right to your device by providing some brief customer and location information. The application uses your current location to bring you the best deals in your area.

Initial Setup

1. From a Home screen, tap ▦ **Apps ➔** (**More for Me**).

2. Read the on-screen information and configure the necessary options such as: Gender, Age, and agreements.

3. Tap **Continue** to complete the setup process.

Using the More for Me Application

1. From a Home screen, tap ▦ **Apps ➔** (**More for Me**).

2. From the upper-right, tap the button to access an available tab for more options:

   • **What's Hot**: displays a listing of current hot offers in your area.

   • **Great Apps**: Provides you with current Daily Deals & Shopping applications.

   • **All Deals**: Provides you with current Top Deals & Discounts.

Music Player

Play music and other audio files that you copy from your computer.
For more information, refer to *"Music Player"* on page 133.

■ From a Home screen, tap ▦ **Apps ➔** ▶ **Music Player**.

My Files

Find, view, and manage folders and files, such as music files, photo files, video files, and so on, stored on your tablet. If the file is associated with an application on your device, you can launch the file in the application.

1. From a Home screen, tap ▦ **Apps ➔** 📁 **My Files**.

2. Tap a folder and scroll down or up until you locate a file.

Note: You may have to tap one or more subfolders before you encounter files.

3. Tap a file to launch it in the associated application, if the file is associated with an application.

4. While browsing files, use these controls:

Up: Display a higher directory.

Search: Use the keyboard to enter a search term. The current folder is searched and results are displayed. Tap **X** to remove the search field.

Display mode: Enable or disable thumbnails for each file.

Root: Display the root directory.

Add Folder: Add a new folder in the current folder.

Mark files: Tap the box to the left of each file or next to the folder to select all files in the folder. Then tap send, copy, cut, or delete in the Application bar.

5. To view a photo file:

- Tap the file.

  The Gallery app is used to open the photo.
  For more information, refer to *"Viewing Photos and Videos"* on page 117.

6. To view a video file:

- Tap the file.

  The Video player is launched and plays the video.
  For more information, refer to *"Video Player"* on page 113.

Navigation

Use Google Navigation to find a destination and to get walking or driving directions.

Note: You must first create a Wi-Fi connection to use Navigation.

1. From a Home screen, tap ⌗ **Apps** → ▲ **Navigation**.
2. Tap **Accept** to accept the Google Maps Navigation beta message.
3. Tap 🚗 in the Application bar and then tap either **Driving** or **Walking** to describe the type of directions you want.
4. Tap 🗺 **Map** in the Application bar to see a map (Driving) or a satellite image (Walking) of your area.

5. Tap ▤ **Menu** for the following options:
   • **Route options**: Set whether directions should **Avoid highways** and **Avoid tolls**.
   • **Settings**: Display Navigation settings:
     – **Screen dimming**: Enable or disable screen dimming, which lets the screen dim between instructions to save power.
     – **Terms, privacy & notices**: View Google's Terms and conditions, Privacy policy, and Legal notices.
   • **Help**: Display Navigation help information.
6. To find a destination, tap an option:
   • **Speak destination**: Say the name or address of your destination.
   • **Type destination**: Enter the destination.
   • **Contacts**: Choose a destination from a contact record.
   • **Starred places**: Choose destinations you have marked as favorites.
   • **Recent destinations**: Choose from recent destinations. This option is not available until a destination has been requested.

DRAFT

Internal Use Only

7. While navigating, tap:

ROUTE AND ALTERNATES: View information about the current route and alternate routes.

Directions List: View directions in a step-by-step list.

SHOW MAP: Return to the map view after viewing ROUTE AND ALTERNATES or the directions list.

Layers: Choose map layers to display.

Menu: To display these options:

- **Turn off voice/Turn on voice**: Enable or disable voice-guided prompts.
- **Exit navigation**: Close Navigation and discard route information.
- **Search**: Find a location.
- **Set destination**: Choose or enter a destination.
- **Settings**: Enable or disable screen dimming and view Google's Terms and conditions, Privacy policy, and Legal notices.
- **Help**: Display Navigation help information.

Photo Editor

To perfect any photos stored on your tablet, use Photo editor to crop, rotate, resize, adjust color and contrast, and much more.

For more information, refer to *"Photo Editor"* on page 121.

- From a Home screen, tap **Apps**
  ➔ **Photo editor**.

Play Books

Use the Play Books app to read eBooks from the Internet-based Google Play™ Books service. Google eBooks is a new way to discover, buy, and enjoy your favorite books online and offline.

You can read books online or mark them for availability offline, so you can read them when you have no Internet connection (such as on an airplane). You can also use Books as your starting point for browsing or searching for books on line.

1. From a Home screen, tap ⊞ **Apps**
    ➔ 📘 **Play Books**.

    The Google Play Books main screen displays.

Note: You may be asked to create or sign on to your Google account. For more information, refer to *"Setting Up Your Gmail Account"* on page 84.

2. To add more books to your library, tap **SHOP** in the Application bar.

    A pop-up displays a link to the Google Play Terms of Service. Read the document and tap **Accept**.

Browse the selection of Google eBooks, which are arranged in categories like Featured, Top Selling, Top Rated, Top Free, and many more.

3. To find a book by title or author name, tap 🔍 **Search** on the Play Books main screen or tap **SHOP** ➔ 🔍 **Search**.

4. On the Play Books main screen, tap ▤ **Menu** for these options:

    • **Make available offline**: Mark books to make them available offline. Tap below a book cover to mark it with 📌 a pin and then tap ✓. Just reverse this process to remove books from your device.

    • **View as list / View as carousel**: Set how you want to view your books.

    • **Refresh**: If a book in your library does not appear on your device, use this option to update the display.

    • **Accounts**: Set the account to use.

    • **Settings**: Provides access to the application's settings.

    • **Help**: Displays various Book help information. Tap **Help Center** to get additional Google Play Books information.

5. Tap the cover of a book to start reading.

Reading a Book

Once the book displays:

1. Sweep across the screen to turn the page.

2. Tap the screen to display or hide the following options.

3. Tap ☰ for a table of contents.

4. Tap Aa to set THEME (day or night), BRIGHTNESS, TYPEFACE, FONT SIZE, TEXT ALIGNMENT, and LINE HEIGHT.

5. Tap 🔍 **Search** on the Play Books main screen or tap **SHOP → 🔍 Search**.

6. Tap ⋮ **Menu** for these additional in-book options:
   - **Original pages** / **Flowing text**: Display the pages of the book in their original format or use your format settings.
   - **About the book**: Displays the Google Play description of the book.
   - **Share**: Share the book by using Bluetooth, Email, Gmail, Google+, Messaging, or Wi-Fi Direct.
   - **Keep on device**: Tap the check box to make the book available offline.
   - **Add bookmark**: Adds a bookmark to the current page.

   - **Read aloud / Stop reading aloud**: Tap to let your device read the book to you.
   - **Settings**: Provides access to the application's settings.
   - **Help**: Tap **Help center**, **Contact us**, or **Report a problem** to link the appropriate website. Tap **Terms of Service**, **Privacy Policy**, or **Open source licenses** to read those documents. The Play Books version number is also displayed.

7. Touch and drag the slider at the bottom of the page to display a different page, which is indicated by the pop-up.

8. To contact customer support, report an issue, and display more Google eBooks information, from a Home screen, tap ▦ **Apps → 📘 Play Books → ⋮ Menu → Help**.

DRAFT

Internal Use Only

Play Magazines

With Google Play Magazines, you can subscribe to your favorite magazines and have them available to read on your device at any time or any place.

1. From a Home screen, tap ▦ **Apps** ➔ 🗞️ (**Play Magazines**).
2. Log on to your Google account if you have not already done so.
3. At the Welcome! display, tap the shop icon 🛒 to browse the full catalog.
4. Read the Google Play Terms of Service and tap **Accept**.
5. Sweep the screen to the left or right to view Categories, Featured, Top Selling, and New Arrivals.
6. Tap a magazine to see more information and subscribe.
7. Follow the on-screen instructions to subscribe to a magazine.

Play Movies & TV

The Play Movies app is a new application for select Android devices. Any movie you rent from the Google Play™ Store can be downloaded for offline viewing through this application. In addition, the Play Movies app can be used to stream your Google Play™ movie rentals as well as play any of your personal videos stored on your tablet.

■ From a Home screen, tap ▦ **Apps** ➔ 🎬 **Play Movies & TV**.

For more information tap ▐ **Menu** ➔ **Help**.

Play Music

Play music and other audio files that you copy from your computer. For more information, refer to *"Play Music"* on page 125.

■ From a Home screen, tap ▦ **Apps** ➔ 🎧 **Play Music**.

DRAFT
Internal Use Only

Play Store

Google Play Store provides access to downloadable applications and games to install on your device. It also allows you to provide feedback and comments about an application, or flag an application that might be incompatible with your device.

Tip: A shortcut to Play Store displays on the main Home screen by default.

1. From the Home screen, tap 📥 **Play Store**.

   – or –

   From a Home screen, tap 🔲 **Apps** ➔ 📥 **Play Store**.

   If you are not already logged in with your Google account, the Add a Google Account screen displays.

   • Tap **Existing**, if you already have a Google account, or **New** to create a Google account.

   For more information, refer to *"Setting Up Your Gmail Account"* on page 84.

2. The first time you open Play Store, read the Google Play™ Terms of Service and then tap **Accept** to continue.

3. To browse for items to install, tap **Apps**, **Games**, **Music**, **Books**, or **Movies**. Tap a tab, such as CATEGORIES, FEATURED, TOP PAID, or TOP FREE to refine your search.

4. To get help for using Google Play™, tap 📋 **Menu** ➔ **Help**.

Updates to Downloaded Apps

You can check for new versions of applications by visiting the Google Play Store. Items that have a new version available will say **Update**.

You can also select apps that you would like to be updated automatically. To do this:

1. From the Home screen, tap 📥 **Play Store**.

2. Tap 📥 **Installed Apps**.

3. Select the **INSTALLED** tab to list the Play Store apps installed on your device.

   Update is displayed if there is an update available for the app.

4. Tap an app and then select **Allow automatic updating** to enable automatic updating.

5. Tap **Open** to open the app on your device.

For PRA Only, Printing NOT approved by Technical Writing Team

6. Tap **Update** to update the app on your device.

Managing Downloads

Files, apps, and other items you download in Internet, Gmail, Email, or in other ways, are stored on your tablet's internal storage. You can use the Downloads app to view, reopen, or delete what you have downloaded.

To manage the demands on their networks or to help you avoid unexpected charges, some mobile networks place restrictions on the size of the files you can download. When you are connected to such networks, and you try to download an oversized-file, you are asked or required to delay downloading the file until the next time you are connected to a Wi-Fi network. At that time, the download resumes automatically. The Downloads app can also be used to view and manage these queued files.

Downloaded files are stored in the Download directory in your tablet's internal storage. You can view and copy files from this directory when connected to a computer with a USB cable.

Uninstalling an App

Apps come pre-installed on your device and you can download additional apps from Google Play. If you decide to, you can uninstall apps you downloaded from Google Play and other sources.

There are several ways to uninstall an app:

1. From a Home screen, tap ▦ **Apps** ➔ ⚙ **Settings** ➔ **Application manager**.

2. Tap the **Downloaded** tab.

3. Tap the app you want to uninstall.

4. Tap the **Uninstall** button.

   A pop-up displays the message **This application will be uninstalled**.

5. Tap **OK** to confirm you want to uninstall the app.

You can also use Google Play to uninstall apps you downloaded from there (see *"Play Store"* on page 189).

DRAFT

Internal Use Only

To uninstall an app from the Apps screen:

1. From a Home screen, tap ▦ **Apps**.

2. Tap ☰ **Menu** ➔ **Downloaded applications**.

   The Downloaded applications screen displays.

3. Tap ☰ **Menu** ➔ **Uninstall**. A ⛔ appears on Apps that can be uninstalled.

4. Tap an app's icon and then tap **OK** to uninstall and remove the app from your tablet.

Note: You cannot uninstall the apps that are included with Android. You can only uninstall the apps you have downloaded.

Polaris Office

Polaris Office Mobile for Android is a Microsoft Office compatible office suite. This application provides a central place for managing your documents online or offline.

The application can also open Adobe PDF (Portable Document Format) files.

1. From a Home screen, tap ▦ **Apps** ➔ 📗 (**Polaris Office**).

2. From the Registration screen, tap **Skip** to begin using the application without registration.

   – or –

   Enter your email address and tap **Register** to use the currently indicated email address for registration purposes.

DRAFT

For PRA Only, Printing NOT approved by Technical Writing Team

3. On its initial launch, navigate the application to begin use:
   - **New**: creates a new office document.
   - **Recent documents**: provides a scrollable list of recently accessed documents.
   - **Browser**: allows you to search on your device and SD card for compatible documents.
   - **Clouds**: provides access to documents stored on your configured Cloud storage location.
   - **Form type**: allows you to quickly access your documents based on file type. Each type is separated into several available tabs located at the bottom of the screen, such as: Word, Excel, PowerPoint, Other, and PDF.
   - **Favorites**: allows you to list only those documents tagged as Favorite.

Pro Apps

Provides access to compatible productivity tools. These productivity packs can be accessed from anywhere.

Note: Access to these applications and packs requires you have an active Google account and are logged in prior to connection.

1. From a Home screen, tap ▦ **Apps** ➔ 📇 **Pro Apps**.
2. Select an application and follow the on-screen download and installation instructions.

DRAFT
Internal Use Only

S Suggest

Provides on-screen recommendations for applications that are specifically supported and made for use on your device.

Note: Access to this feature requires that you already be logged in to your Samsung account application.

1. From a Home screen, tap ▦ **Apps ➔** 𝕊 (**S Suggest**).
2. Read the terms and conditions.
3. Place a checkmark in the **Agree** field then tap **Agree**.
4. Select an application from one of the available categories (Picks, Categories, Games, Friends, and Info).

Follow the on-screen download and installation instructions.

Samsung Apps

Allows you to easily download an abundance of applications to your device. This includes games, news, reference, social networking, navigation, and more. Samsung Apps makes your Smartphone smarter.

Note: Access to this feature requires that you already be logged in to your Samsung account application.

1. From the Home screen, tap ▦ **Apps ➔** (**Samsung Apps**).
2. If prompted, read the on-screen disclaimer and agree to the information.

Follow the on-screen instructions.

DRAFT

Internal Use Only

Smart Remote

Allows you to locate programming, watch it on your tv, and then control your entertainment system with gestures from the device.

For more information, go to: http://www.peel.com.

Discover and control TV programming right from your device. Lose your remotes, once and for all. Quit scrolling those tiresome grid guides. See what you want, right at your own fingertips: your shows, your controls, your friends.

Peel suggests Top Pick TV shows for you based on what you watch and like. Instead of a long, boring channel grid, Peel presents an easy-to-use mosaic of your favorite shows, filtered by type and genre in the order you like.

1. From a Home screen, tap ▦ **Apps ➔** ◌ (**Smart Remote**).
2. Read the disclaimer and tap **Agree**.
3. Select a country location by tapping either **US & Canada** or **International.**
4. Read the on-screen information to complete your set up.

T-Mobile My Account

This application provides you online access to account information such as your current activity, billing information, service plans, downloads, and other information.

Note: Wi-Fi connection must be disabled prior to use, this application requires use of a T-Mobile network connection.

1. From a Home screen, tap ▦ **Apps ➔** 🔑 (**Access T-Mobile**).
2. If prompted, follow the on-screen information for what's new in the app.

Note: Some features may require you to log into your account.

3. The application screen provides several available options:
    *   **Account Info** provides access to account-specific features such as: Notifications.
    *   **Device Support** provides details about your current billing summary.

For PRA Only, Printing NOT approved by Technical Writing Team

- **Notifications** provides about both your current plan, other available plans and other related services.

- **MobileLife Family Organizer** provides links to other T-Mobile related information.

T-Mobile TV

T-Mobile TV is an application that allows you to get live TV and Video on Demand.

■ From a Home screen, tap ▦ **Apps** ➔ ▦ (**T-Mobile TV**).

For information, refer to *"T-Mobile TV"* on page 140.

Talk

Use Google Talk to chat with other Google Talk users.

For more information, refer to *"Google Talk"* on page 97.

■ From a Home screen, tap ▦ **Apps** ➔ ▦ **Talk**.

Video Maker

Video Maker lets you custom-make your own videos. You can add themes, music, pictures, and other videos to your video.

1. From a Home screen, tap ▦ **Apps** ➔ ▦ **Video Maker**.

2. Tap **New Project**.

3. Follow the on-screen instructions.

Video Player

View and manage videos stored on your tablet.

For more information, refer to *"Video Player"* on page 113.

■ From a Home screen, tap ▦ **Apps** ➔ ▦ **Video Player**.

DRAFT
Internal Use Only

VPN Client

This is a full-featured VPN Client that provides support for the latest IPSec VPN standards and provides interoperability with support for all major VPN Gateways.

1. From a Home screen, tap ▦ **Apps** ➔
   ◎ (**VPN CLient**).
2. Follow the on-screen instructions to configure the VPN Client.

World Clock

View the date and time in any time zone.

1. From a Home screen, tap ▦ **Apps**
   ➔ 🕐 **World Clock**.
   A map of the world displays with the locations you have added flagged.
2. Tap ⊕ **Add** to add a city to display.
   A list of world cities displays in landscape mode.

3. Scroll through the list and tap the city you want to add.

Tip: Tap the first letter of the city's name, to the right of the list, to find the city more quickly.

   – or –

In portrait or landscape mode, tap and turn the globe to locate a city and tap the city you want to add.

A pop-up displays the city name, the current time and date there, and the GMT offset.

4. Tap ⊕ and from the pop-up, tap the city and select ➕ **Add city**.
5. Tap ⇄ **Reorder** to change the order of the cities. Tap the grid ▦ on an entry and drag the entry to a new position in the list. Tap **Done** to change the order.
6. Tap 🗑 **Remove** to delete entries. Tap the box to check the cities you want to delete (a green check mark displays), then tap **Remove**.
7. Touch and hold an entry to remove it or to set the **DST settings**, which enable or disable Daylight Savings Time adjustments.

Yahoo! Finance

Stay on top of the markets with the Yahoo! Finance app for Android devices. Get real-time quotes, follow the market, or check out a particular stock. View headline news, top stories, and videos from Tech Ticker. Yahoo! Finance lets you keep up with the market movers from your Android device.

To add the Yahoo! Finance widget to a Home screen, see *"Adding Widgets to a Home screen"* on page 38.

Adding Your First Stock

To add your first stock:

1. From a Home screen, tap ⊞ **Apps → Widgets**.
2. Touch and drag the **Yahoo! Finance** widget onto an available area of the screen.

   The Yahoo! Finance main screen displays with Samsung and Yahoo stocks listed by default.

3. Tap the widget and from the full application, tap ➕ **Add**.
4. Type in a stock name and select an entry in the list of stocks that is displayed.
5. The Yahoo! Finance widget displays with information about the stock just added.

Managing Stocks

Once you add a stock, there are additional Yahoo! Finance options you can use to add more stocks and set up how they are displayed and refreshed.

1. From a Home screen, tap an entry in the Yahoo! Finance widget.

   Information about the stock displays.

2. Tap 🔄 **Refresh** to update the information.
3. Tap ➕ Add to add another stock. For more information, refer to *"Adding Your First Stock"* on page 198.
4. Tap ☰ **Menu** to display the following options:
   • **Delete**: Tap to delete the stock being displayed.
   • **Change order**: Displays your stocks list. Tap and drag stocks to change the order in which they are displayed.
   • **Search**: Tap to search for a new stock.
   • **Settings**: Displays the following option:

DRAFT

Internal Use Only

- **Auto refresh**: Choose a time interval for automatic refreshing of stock information. The choices are: None, Every 30 minutes, Every 1 hour, and Every 3 hours. When the setting is None, tap the refresh icon on the Yahoo! Finance widget to update stock information.

5. Under the **My Stocks** tab, tap a stock entry to display the full stock information screen.

6. Tap the **Major indices** tab to display a summary of the performance of major groupings of stocks, classified by the exchange on which they trade.

7. Tap the **Currencies** tab to display the currency exchange rate for various currencies.

Additional Options

There are more options available from the full stock information screen.

1. From a Home screen, tap the **Yahoo! Finance** widget. The full stock information screen for one of your stocks displays.

2. If you have added more than one stock, tap a heading bar to display the full stock information screen for the stock.

3. Near the center of the screen, tap **1d** (1 day), **5d** (5 days), **1m** (1 month), **3m** (3 months), **6m** (6 months), or **1y** (1 year) to view a stock performance graph for the requested period.

4. At the bottom, right of the screen, tap **Y! More Information** to link to the Yahoo! Finance website.

5. At the bottom of the screen, tap **Quotes delayed** to read about real-time exchange quotes and access other Yahoo! Finance online options, such as Top Stories and a currency converter.

DRAFT

YouTube

View and upload YouTube videos right from your device.

1. From a Home screen, tap ▦ **Apps** ➔ ▶ **YouTube**.

2. Tap the **HOME** tab to return to the main YouTube page.

3. Tap the **BROWSE** tab to browse videos by categories like Comedy, Education, Music, and so on. Tap the desired category to display video thumbnails.

4. Tap the **ACCOUNT** tab to choose which Google account you would like to use or add an account. Once you are signed in, tap **ACCOUNT** to display your subscriptions, see your favorites, see you watch later list, manage your playlists, or upload a video.

5. Tap 🔍 **Search YouTube** and use the keyboard to enter a keyword or phrase to find a YouTube video.

6. While browsing, tap ▮ **Menu** for these options:
   • **Sign in / Sign out**: Sign in, sign out, or add an account. You may have to sign in to use certain options.
   • **Settings**: Configure display and search settings and view information about the application.
   • **Help**: Display YouTube help information.
   • **Feedback**: Display a YouTube feedback form.

7. Tap a video thumbnail to view the video.

Options While Viewing a Video

Use these options while viewing a video:

1. Tap 🔲 **Add to** and select an available account. THis lets you add the video to your watch later list or your favorites, or add a new playlist.

2. Tap ◁ **Share** (in landscape mode) or tap ▮ **Menu** ➔ **Share** (in portrait mode) to use Google+, Wi-Fi Direct, Messaging, Google+, Bluetooth, Gmail, or Email to send the video's URL.

3. Tap ▮ **Menu** for these options:
   • **Add YouTube TV**: Adds the current selection to your YouTube TV channel listing.
   • **Copy URL**: Copy the URL of the video to the clipboard. For more information, refer to *"Copying Fields or Text"* on page 144.
   • **Flag**: Flag the video for YouTube review.
   • **Settings**: Configure display and search settings and view information about the application.
   • **Help**: Display YouTube help information.
   • **Feedback**: Display a YouTube feedback form.

Zinio

Launches a digital magazine reader. Zinio has transformed your favorite print magazines into digital format.

1. From a Home screen, tap ▦ **Apps ➔** ⚡ (**Zinio**).
2. Tap **Sign in** if you already have an account or tap **Join Zinio** to continue.
3. Follow the on-screen prompts.
