## Thank you

Thank you for purchasing the Samsung Bluetooth Headset SBH100, we hope you will be delighted with its operation.

Please read the instruction manual to get started and to make best use of the headset's many features.

## ! Drive safely

Using a mobile phone while driving creates a distraction to the driver which may increase the likelihood of an accident.

When using the phone while driving, keep conversations short and do not make notes or read documents. Before answering calls consider your circumstances. Pull off the road and park before making or answering calls when driving conditions require (e.g. bad weather, high traffic density, presence of children in the car, difficult junctions or manoeuvres.)

**Remember, driving comes first, not the call!**

**Abide by local laws.**

## ! Check phone compatibility

The Samsung Bluetooth headset SBH100 is compatible with most **Bluetooth<sup>1</sup>** (see **Glossary**) phones that are compliant with Bluetooth version 1.1 or higher specification and support Advanced Audio Distribution profile, Audio Video Remote Control Profile **headset profile and hands-free profile<sup>2</sup>**.

Ensure that your phone has Bluetooth capability by visiting your phone manufacturer's web site.

## 4 Charging the Battery

This device has an internal battery which is non-removable and rechargeable. Please make sure that you should charge the battery fully before using the headset for the first time.

Plug the charger into the headset's charger connector.

Plug the charger into the electrical outlet.

### About the charging

#### > Battery charging and standard operation time

|                        | charging time      | Standard operation time |                   |                |
|------------------------|--------------------|-------------------------|-------------------|----------------|
| Battery operation time | Approximately 3hr. | Talk time               | Standby time      | Play time      |
|                        |                    | More than 8hr.          | Maximum of 200hr. | More than 7hr. |

- Disconnect the charger from the power source or the headset after completing the charging.
- Use only Samsung-approved charger. Unauthorized charger may cause an explosion or damage on the headset.
- Always try to keep the battery at room temperature (0 ~ +40°C).
- The battery will gradually wear out if charging/discharging are repeated because it is a consumable part.
- The headset is not able to operate while charging.
- Try connecting again after charging is completed.

### When the battery charge falls low

- > Warning sound beeps and the red indicator light flashes every 10 seconds.
- > If the warning sound beeps, switch the call from the headset to the phone.
- > If the warning sound beeps, the headset will be automatically turned off.

### To check the charging status

- > Press the  (FF) Button and  (Volume Down) Button at the same time.
- > The red indicator light flashes from 1 to 4 times according to the remaining battery amount.
- > The more it flashes, the more the battery is remained.  
(Refer to page 6. **If press these buttons together** section.)

## 5 Putting on the headset

Check the RIGHT/LEFT sign at the bottom of the ear-hook to put on the headset properly.

Slide the headset onto your ear while opening wide the ear-hook to be easy to wear on.

-Move the ear hook to place the headset to the most comfortable position.

Grip the headset body and jostle it to back of the ear for it to be fixed well.

## Before using your headset

Explains the basic operation and set-ups of your Bluetooth headset.

## 6 Turning the headset On or Off

- > Push the On/Off Button  to turn the headset on.
- > Push the On/Off Button  to turn the headset off.

If the headset is ready to be paired, the blue indicator light flashes per second.

## 7 Pairing the headset with a compatible phone

- > **Pairing<sup>3</sup>** will create a unique and encrypted wireless link between two Bluetooth enabled devices such as our Bluetooth phone and Bluetooth headset. To use the headset with other Bluetooth devices, both devices must be paired. When trying pairing, keep the headset and the phone close-by.

### When being ready to be paired

There are 2 cases for being ready to be paired.

- > When turning the headset on for the first time after purchasing.
- > When turning the headset on by vpressing .

1. Turn on the headset.
  - The blue indicator light will flash per second if the headset is ready to be paired.
2. Prepare your phone according to the phone's user manual on Pairing.
3. Your phone will find "Samsung Stereo Headset" and ask if you want to pair with it. Confirm this by selecting "Yes" or "OK".
  - You can see the Bd Address of the product at the bottom of the LCD screen. If there are many headsets connected with your phone, choose the Bd Address of the right one.
4. Enter **passkey** or **PIN**<sup>4</sup> = 0000(4zeros).
5. If the headset and the phone are connected successfully, the blue indicator light will flash per 6 seconds.

- You can see the Bd Address marked on the label if you take off the speaker cover on the left side.
- If there is no Bluetooth device to be connected in 3 minutes, the blue indicator light will flash per 3 seconds. In that case, turn the headset off and on again to try pairing from the first step by following **Pairing the headset with a compatible phone** section.

## 8 Connecting the paired headset to the phone

If two Bluetooth Devices are disconnected by being turned off, you need to reconnect them. When you reconnect a paired headset, you are not asked for its passkey.

1. Turn on the headset.
  - The blue indicator light will flash per 3 seconds if it is ready to be paired.
  - The headset can connect to your phone automatically if the pairing is completed depending on the types of the phone.
2. Choose the connection method you want.

### To connect from the phone

> Follow your phone's user guide

### To connect from the headset

To connect from the headset, your phone and the headset have had to be connected more than once.

> To answer or make a call, press .

- Available only when your Bluetooth phone supports the headset or Hands-free Bluetooth profile.

3. If connected successfully, you can make or answer a call on the headset.
  - The blue indicator light will not flash in active mode.
  - If the connection fails, the blue indicator light will flash every 3 seconds. In that case, try connecting again from the beginning.

| Indicator light status              |                       |
|-------------------------------------|-----------------------|
| When ready for pairing              | Flashes per second    |
| When the pairing is completed       | Flashes per 3 seconds |
| In <b>standby mode</b> <sup>5</sup> | Flashes per 6 seconds |
| In <b>active mode</b> <sup>6</sup>  | Not flash             |

## Using the headset

Explains how to use the various functions such as making/answering a call, menus that you can use while the call is in progress, and listening to music that SBH100 provides.

### 9 Making and answering a call

#### Redialing the last dialed number

- > Press  to check the latest call numbers list.
- > Press  once again to make a call to the last dialed number.

 - The headset can make a call to the last dialed number by pressing  once depending on the types of the phone.

#### Voice dialing

- > Press and hold  or  Button.
- > Say a name into the microphone.
  - Available only when your phone supports the voice recognition function.

 - Available only when your phone and the headset are connected as Hands-free Bluetooth profile.

#### Making a call

- > Make a call with your Bluetooth phone.
  - Press and hold  after dialing and sending a call.
  - Depending on the types of the phone, it switches the call from the phone to the headset automatically.

#### Answering a call

- > Press  if the phone rings.
  - Press  once again to hang up the phone.

### 10 Rejecting a call

- > Press and hold  or  if a call comes in.

- Available only when your headset and the phone are connected as Hands-free Bluetooth profile, and the phone supports the incoming call rejecting function.

### 11 Switching the call between phone and headset

- > Press and hold  to switch the call to the phone while talking on the headset
- > Press and hold  to switch the call to the headset while talking on the phone.

- Available only if your headset and the phone are connected as Hands-free Bluetooth profile.

### 12 Adjusting the speaker volume

- > Press  to adjust the speaker volume while talking.
- > Press  to adjust the speaker volume while listening to music.

## 13 Muting an ongoing call

- > Press and hold  or  to mute the microphone of your headset during a call.
- > Press  or  to cancel the Muting mode.

## 14 Listening to music

Settings to play MP3 files may differ depending on your Bluetooth phone. So please make sure that you make proper setting for MP3 playback on your phone by following the phone's user guide.

### Listening to music

- > Press  while being connected to your Bluetooth phone.
- > Press  while the music is stopped.

- Depending on the types of your Bluetooth phone, it may read MP3 files only. Make sure that you have the right file format (\*.mp3) for your music files.

### Stopping music

- > Press and hold  while listening to music.
- > Press  again to listen to the song from the very first part.

### Pausing music

- > Press  while listening to music.
- > Press  again to listen to the song from the paused part.

### Listening to the previous/next song

- > Press  while music is on.

### Rewinding/Fast Forwarding

- > Press and hold  while music is on.

## 15 Answering a call while listening to music.

- > Available only when your phone supports the Advanced Audio distribution profile, A/V Remote control profile, and headset profile or hands-free profile.
- > Settings to play MP3 files may differ depending on your Bluetooth phone. So please make sure that you make proper setting for MP3 playback on your phone by following the phone's user guide.

### Making a call while listening to music

- > Press and hold  to stop the music.
- > Press  to check the latest call numbers list.
- > Press  once again to make a call to the last dialed number.
  - The headset can make a call to the last dialed number without showing the latest call number list by pressing  once depending on the types of the phone.

### Answering a call while listening to music

- > Press .

### Ending a call

- > Press .

## Care and Maintenance

### 16 Storing the headset

Place the each side of the headset in the net tidily.

- Be careful for the headset not to be scratched nor cracked by applying excessive force or giving damage.
- Always store the Samsung SBH100 with power off and safely protected.
- Avoid storage at high temperatures (above 60°C / 134 °F)- such as in a hot vehicle or in direct sunlight. (Storage at high temperatures can degrade performance and reduce battery life).
- Do not expose the headset or any of its supplied parts to rain or other liquids.

### 17 Frequently asked questions

#### 1. How far away from my phone will my Samsung SBH100 work?

The operating range is typically up to 30 feet (10 metres).

#### 2. Will Samsung SBH100 work with my cordless phone at home?

Samsung SBH100 is not designed for use with cordless phones.

#### 3. Will Samsung SBH100 work with laptops, PCs, and PDAs?

Samsung SBH100 will work with devices that are compliant with Bluetooth version 1.2 and support Advanced Audio Distribution profile, A/V Remote Control profile, Headset profile and/or Hands-free profile(s).

#### 4. Will anything cause interference with my conversation when I'm using my Samsung SBH100?

Appliances such as cordless phones and wireless networking equipment may cause interference with your conversation, usually adding a crackling noise. To reduce any interference, keep the headset away from other devices that use or produce radio waves.

#### 5. Will my Samsung SBH100 interfere with my car's electronics, radio, or computer?

Samsung SBH100 produces significantly less power than a typical mobile phone. It also only emits signals that are in compliance with the international Bluetooth standard. Therefore, you should not expect any interference with standard consumer-grade electronics equipment.

#### 6. Can other Bluetooth phone users hear my conversation?

When you pair your headset to your Bluetooth phone, you are creating a private link between only these two Bluetooth devices. The wireless Bluetooth technology used in your headset is not easily monitored by third parties because Bluetooth wireless signals are significantly lower in radio frequency power than those produced by a typical mobile phone.

#### 7. Can I use the headset while charging?

The headset is not able to operate while charging.
