

VoiceRanger Quick Guide (SCM-220 Series)

Preparing the Necessary Items

- VoiceRanger Cable Modem SCM-220 Series
- A power adapter
- RJ-45 Ethernet Cable
- USB Cable
- USB Driver and the Manual CD-ROM for USB port (used for both Windows 98 SE (Second Edition), Windows 2000, Windows XP environment)
- Quick Guide
- RJ-11 Telephone Cable(2)
- Wall-mount Bracket(Optional)
- Power Backup Battery(Optional)

Installing the InfoRanger

Connecting the Coaxial Cable

Connect one end of the coaxial cable to the **Cable** connector of the VoiceRanger and connect the other end of the coaxial cable to the cable outlet or cable splitter. Slide the pin in the center of the coaxial cable into the hole in the **Cable** connector carefully without bending, and turn the connector clockwise until the cable is firmly attached.

Connecting PCs

(1) Using Ethernet port

1. Turn off the PC you will connect to the VoiceRanger.
2. Locate the Ethernet cable supplied in your package.
3. Connect one end of the Ethernet cable to the Ethernet port on your PC. This port may be a part of NIC located in your PC.
4. Connect the other end of the cable to the Ethernet port on the VoiceRanger.
5. Turn on your PC.

(2) Using USB port

To use USB port, there should be a USB port in the PC supposed to be connected to VoiceRanger. Make sure if there is a USB port in the PC most of all.

Connect the USB port of PC and the USB port of VoiceRanger using USB cable, which is provided with VoiceRanger. It is not necessary to turn off the PC to connect the PC to VoiceRanger.

1. Select the USBDriver folder in **CD-ROM Drive** as a location of a new driver and insert the USB driver CD-ROM provided with VoiceRanger into CD-ROM drive.
2. Follow the on screen instructions and restart the PC.

Connecting the Power Adapter

Be sure to connect the power adapter to the VoiceRanger only after connecting other cables.

Connect one end of the power adapter to **DC 12V** jack of the VoiceRanger and the other end to a wall outlet as follows.
