Pairing 3D Active Glasses

- What is Pairing?** Pairing is the process of connecting 3D glasses and a 3D TV so that the two devices can exchange data.
- Ensure your Samsung TV and 3D glasses are no farther than 19.5 in (50 cm) apart from each another while pairing is in progress.

Turning the glasses on

Press the power button briefly. The green LED is turned on for 3 seconds. (Make sure that 3D is activated on the TV before using the 3D glasses.)

Turning the glasses off

Press the power button briefly. The red LED is turned on for 3 seconds.

Performing the pairing process

Press and hold the Power button. The green and the red LEDs blink alternately for 2 seconds.

Operating range

Recommended pairing distance

Recommended viewing distance

Recommended viewing distance	2~6m (6.5 to 19.5 ft)
------------------------------	--------------------------

Recommended pairing distance	50 cm or less (19.5 in)
------------------------------	----------------------------

- Once the 3D glasses are paired, the remaining battery capacity is displayed on the TV screen. (This feature only applies to Samsung F series 3D TVs and 3D glasses that have been launched since 2013.)
- If you keep trying to do the pairing, the battery level will decrease significantly. However, the battery level will recover to a certain degree in about a minute.
- The working distance depends on the existence of obstacles (a person, metal, walls, etc.) between the glasses and the TV or the strength of electromagnetic waves.
- Turn off the 3D glasses while they are not in use. If you leave the 3D glasses on, the battery lifespan decreases.

◆ Pairing steps

1. Turn on the TV, and then move the glasses within 19.5 inches of the TV.
2. Press the power button on the 3D glasses briefly. The 3D glasses will power on and pairing will start.
3. The message "3D glasses are connected to TV." will be displayed on the TV screen when the pairing is successfully completed.
 - ☞ If the pairing failed, the 3D glasses will power off.
 - ☞ If the first attempt to pair fails, power the TV off and on again and perform step 2.
 - ☞ **How to pair again:** Press the power button on the 3D glasses for more than 1 seconds.

<Pairing is needed again in the following situations:>

- If the 3D glasses do not function, even when the power button is pressed, especially with a 3D TV after a repair.
- If you want to play 3D content on another Samsung 3D TV model that belongs to the D, E, or F series released in 2011 through 2013.

◆ Replacing the Batteries

If the red LED blinks every two seconds continually, replace the battery with a new one.

- ☞ Insert the "+" side of the battery into the side marked with "+" in the battery compartment.
- ☞ To check the remaining battery capacity, refer to the pairing section in this manual.

Viewing guidelines

- When viewing a 3D video under a fluorescent lamp (50 Hz – 60 Hz) or 3-wavelength lamp, you may notice a small amount of screen flickering.
 - ※ If this occurs, dim or turn off the light.
- Switching the input mode while watching a 3D movie may disable the 3D function on the TV. As a result, the 3D glasses may not function and the movie may not be displayed properly.
- If the 3D glasses are moved outside of their working distance, the signal from the TV will disconnect and the glasses' 3D function will turn off after several seconds.
- The 3D glasses will power off after the 3D function turns off. When this happens, the red LED will turn on for 3 seconds.
 - ※ Under some circumstances, the 3D glasses may malfunction due to interference from other devices.
- Ensure you are within the working distance of the glasses when you view a 3D video.
 - ※ The images may not be viewable in 3D if you move outside of the working distance for 3 seconds.
- If you lie on your side while watching TV with 3D active glasses, the picture may appear dark or may not be visible.
- The 3D glasses may not work properly due to interference from other 3D products or electronic devices that operate on the 2.4GHz frequency such as a microwave oven or Internet AP. If the 3D function malfunctions due to interference, please move all other electronic or wireless communication devices as far away from the glasses and the TV as possible.
- The 3D effect may be experienced differently depending on the viewer. You may not notice the 3D effect at all if you wear glasses and have an unusual prescription.
- If a part of the 3D glasses or lenses is defective or damaged, it cannot be repaired and the glasses should be replaced. If the glasses stop working within the warranty period, the glasses can be repaired or replaced for free. If the glasses have been damaged due to the fault of the customer or the warranty period has expired, a new pair of glasses will have to be purchased.

CAUTION!

IMPORTANT HEALTH AND SAFETY INFORMATION FOR 3D IMAGES. READ THE FOLLOWING CAUTIONS BEFORE YOU OR YOUR CHILD USE THE 3D FUNCTION.

- Adults should frequently check on children who are using the 3D function. If there are any complaints of tired eyes, headaches, dizziness or nausea, stop the child from viewing the 3D TV and ensure that they rest.
- Do not use the 3D glasses for other purposes such as general wear, sunglasses, protective goggles, etc.
- Some viewers may experience discomfort such as dizziness, nausea and headaches while viewing 3D TV. If you experience any of these symptoms, stop viewing the 3D TV, remove the 3D glasses and rest for awhile.
- Watching 3D pictures for an extended period of time may cause eye strain. If you experience any eye strain, stop viewing the 3D TV, remove the 3D glasses and rest for awhile.
