The cautions for using product

1. When you using the Alio and fining out the "red LED", do not remove it because of loss of data.
2. Windows ME/2000/XP can be recognized without driver but the name of the memory card that is connected to Slot is not marked exactly.
So we recommended you to install the driver with driver installation CD.
3. If you want to separete the Alio from the computer or want to remove the media, make sure if the Access LED is put out and also check if the data is transfered completly.
After checking, please remove it.
4. Static electricity and strong magnetic materials can make the troubles.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING

Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operations.
