

**SOLAR POWERED BLUETOOTH®  
SPEAKERPHONE WITH BACKUP BATTERY****PARTS INCLUDED:**

- (1) Solar Bluetooth Speakerphone
- (1) Visor Clip
- (1) Set of Suction Cups
- (1) USB Charging Cable
- (1) USB Car Charger

**SPECIFICATIONS:**

Frequency: 2.4 GHz  
Bluetooth version: 2.HEDR  
Range: up to 33+, 10m  
Supported Profiles: HSP, HFP 1.5

Talk time: up to 20 hours.  
Standby time: up to 1200 hrs.  
TTS Languages: English(US), French, Spanish, Italian, German  
Stored contacts: up to 1000

**FEATURES:**

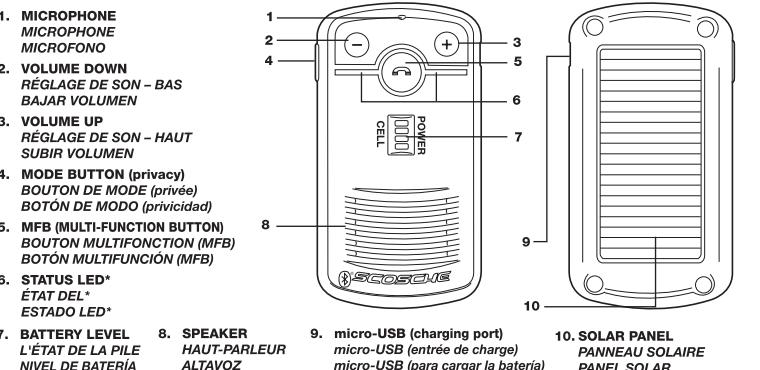

- TTS support for Caller ID
- Phonebook synchronization enabled
- Echo cancellation
- Auto Wake up Feature is automated by car entry (on) and exit (off)
- Auto Pairing and Auto Reconnect
- Advanced Multipoint technology to simultaneously connect two mobile phones
- 2 watt high performance speaker for excellent sound quality
- USB A tape output port for external device charger

USB output: 5V; up to 100mA  
Operating temp range:  
-4° to 149° F / -20° to +65° C  
Weight: .225 lbs.  
Dimensions: .73"(D) x 2.36"(W) x 4.33"(H)

**OVERVIEW SURVOL VISTA GENERAL****WINDSHIELD SUCTION MOUNT (SOLAR POWER)**

When mounting the chatBAT with the windshield suction mount make sure the suction cups are locked into place on the back of the mounting cradle. The windshield suction mount allows you to use direct sunlight to charge the chatBAT. Charge times may vary depending on location and conditions.

**INSTALLATION PAR SUCCION SUR LE PARE-BRISE (ALIMENTATION SOLAIRE)**

Lorsque vous installez le chatBAT avec l'ensemble d'installation par succion, assurez-vous que les ventouses sont bien collées en place à l'arrière du berceau de montage. L'ensemble d'installation par succion vous permet d'utiliser directement les rayons du soleil pour charger le chatBAT. Le temps de chargement peut varier en fonction de l'emplacement et des conditions.

**VENTOSA PARA PARABRISAS (ENERGÍA SOLAR)**

Al montar el chatBAT con la ventosa para parabrisas verifique que las ventosas estén trabadas en su lugar en la parte posterior del soporte de montaje. Las ventosas para parabrisas le permiten usar la luz directa del sol para cargar el chatBAT. Los tiempos de carga pueden variar dependiendo de la ubicación y las condiciones.

**VISOR CLIP MOUNT (USB POWER)**

When mounting the chatBAT with the visor clip mount, make sure the mounting clip is locked into place on the back of the mounting cradle.

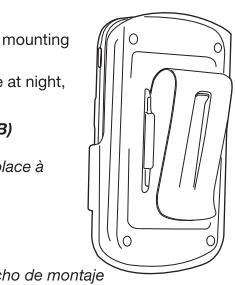

The visor mounting clip mount allows you to use the USB charge cable at night, on a cloudy day, or if you need a faster charge.

**SUPPORT DE FIXATION POUR PARE-SOLEIL (ALIMENTATION USB)**

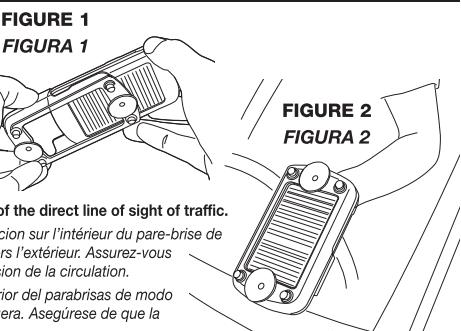

Lors de l'installation du chatBAT avec la monture de fixation pour pare-soleil, assurez-vous que la monture de fixation est verrouillée en place à l'arrière du berceau de montage. L'ensemble de montures de fixation vous permet d'utiliser le câble de charge USB la nuit, lors des jours nuageux où si vous devez faire une charge rapide.

**GANCHO PARA EL VISOR (ALIMENTACIÓN USB)**

Al montar el chatBAT con el gancho para el visor, verifique que el gancho de montaje esté trabado en su lugar en la parte posterior del soporte de montaje. El gancho para el visor le permite usar el cable USB de carga a la noche, en días nublados o cuando necesite una carga más rápida.

**SOLAR CHARGING CHARGEMENT SOLAIRE CARGA SOLAR**

Slide the chatBAT into the windshield mounting cradle.  
Glissez le chatBAT dans le berceau de montage pour le pare-brise.  
Deslice el chatBAT dentro del soporte de montaje para parabrisas.

Press the suction mount onto the interior of the windshield so that the solar panel faces out. Make sure the unit is out of the direct line of sight of traffic.  
Appuyez sur l'ensemble d'installation par succion sur l'intérieur du pare-brise de façon à ce que le panneau solaire soit face vers l'extérieur. Assurez-vous que l'appareil n'est pas en ligne directe de vision de la circulation.  
Presione la ventosa de montaje contra el interior del parabrisas de modo que el panel solar quede apuntando hacia afuera. Asegúrese de que la unidad no obstruya la visión del tráfico.

**OPERATION**

BUTTON	FUNCTIONS
MULTIFUNCTION BUTTON (MFB)	Power ON/OFF Pairing Connecting Answering Call End Call Reject Call Voice Dial Last number Redial Swap the call
VOLUME (+) & VOLUME (-)	Volume Adjustment Delete Phonebook Select TTS Language/TTS ON/OFF Restore to Default
MODE	Transfer Call Mute/un-mute microphone Get Phonebook Battery level check
PASSKEY CODE (fixed)	"0000"

**CHARGING THE chatBAT**

**Using the USB cable & car charger:** For initial charge or charging at night use the USB cable with any available USB port to charge the chatBAT in the car or at home. The LED will be lit in RED indicating the chatBAT is charging. The chatBAT's LED will turn off when charge is complete.

**WARNING:** Do not attempt to charge the chatBAT with any other charger than the one provided. Using any other charger or cable may cause damage to your device.

**Using solar power:** Direct the solar panel on the back of the chatBAT toward the sun. Make sure the chatBAT is out of the direct line of sight of traffic (See Figure 2, page 3). If the chatBAT receives sufficient sunlight for 2 hours, your talk time can be up to 1 hour. Using solar power for charging will continuously extend your talk time.

**USING THE chatBAT TO CHARGE YOUR DEVICE**

Plug your device into the chatBAT using your device's USB cable. The LED will flash blue.

**Battery Level Check:** Under power off mode, press and hold the MODE button for 3 seconds. The battery level LED will flash ON. Under standby mode, press "mode" button, the battery level LED will FLASH ON.

**POWER ON AND OFF:**

**Power On:** Hold the MFB for about 3 seconds. The LED will begin to flash BLUE and announce "Power On". Note: Do not hold the button down for more than 8 seconds when turning on the chatBAT or the unit may switch to pairing mode. If this happens, turn off the chatBAT and repeat the process for turning on the unit.

**Power Off:** Hold the MFB for about 3 seconds. The LED will flash RED and announce "Power Off".

**LOW VOLTAGE PROTECTION OF BATTERY:** When the voltage of battery decreased to 3.3V, the red LED will flash in every 3 seconds, and the Speakerphone will be power off automatically when the voltage under 3.0V.

**AUTOMATIC PAIRING:** You are required to pair the chatBAT with your mobile phone before using it.

1. Power on the chatBAT. The speakerphone will automatically connect to last device. If after 5 seconds it can't connect to last device, it will automatically enter pairing mode stating "Pairing phone - please put your phone in pairing mode and enter PIN code 0000".

**Answer the Second Mobile Phone Call:** When receiving a second call, press "MFB" button twice to hold the first call on line and answer the second call.

**Reject the Second Mobile Phone Call:** When receiving a second call, press and hold the "MFB" button for 3 seconds to reject the second mobile phone call.

**SWITCH BETWEEN 2 PHONE CALLS**

1. With 2 calls on the line, press "MFB" button twice to switch between the 2 phone calls.

2. Make sure that the Bluetooth feature on your phone is activated. The phone will search all Bluetooth devices within 10 meters and display them as a list.

3. Select "CBHSOLCHRG" from the list. Enter passkey "0000" to pair and connect the chatBAT to your phone.

4. The blue LED will blink at a regular interval when both devices are successfully paired and "Pairing Successful" will be announced.

Note: If pairing can't be completed within 2 minutes after pairing mode is activated, the chatBAT will enter Standby mode. You will hear "Pairing failed, please put your phone in pairing mode and try again". Please repeat steps to pair the chatBAT.

**MANUAL PAIRING**: In some cases the device could be disconnected from your phone (For example, if the chatBAT is switched off). To restore the connection between the chatBAT and your phone:

1. If the chatBAT has been turned off, turn on the power and the connection will be restored automatically.

2. If the mobile phone has been switch off, turn on the mobile phone and restore the connection in the phone's menu or press the "MFB" button once.

3. If one of the two devices has been out of range, make sure that both devices are within working range and press the "MFB" button once.

**DISCONNECTION:** To disconnect the chatBAT from your phone, turn off the unit or disconnect the chatBAT in the phone menu. Note: Once disconnection is successful you will hear "Disconnect complete". When losing the connection/link, the chatBAT will automatically power off in 2 minutes.

**AUTOMATIC ON/OFF:** The chatBAT will turn off automatically with the motion of closing your car door. When you open the car door the speakerphone will turn on and attempt to reconnect with your device.

1. Moving the unit also turns it on

2. When the chatBAT turns on or off, an audio tone is sounded.

3. When traveling with or transporting the chatBAT, press and hold the "MFB" to power off the speakerphone manually. This will prevent the unit from repeat edly powering on/off during the trip.

**RESTORE BLUETOOTH TO DEFAULT SETTINGS:** To restore the chatBAT to its original settings, press and hold both "V+" and "V-" buttons for 10 seconds until the blue LED light indication flashes rapidly. Press and hold both "V+" and "V-" buttons for a further 3 seconds and the chatBAT will power off automatically. This process is complete when chatBAT announces "Set Factory Default Complete".

**USING THE chatBAT:** Most functions will be verbally announced through the chatBAT.

**Making a Call:** Using Voice Dial: To use voice dial your mobile phone must support the voice dial feature. If the mobile phone does not have the feature the chatBAT will not be able to make a call using voice dial. If your mobile handset is voice dialing enabled, under standby mode, short press the "MFB" and when you hear a beep, say the voice tag.

**IMPORTANT:** Please make sure to record voice tag into the mobile handset before using voice dialing function.

This function is only applicable to mobile handset with Bluetooth Hands-Free Profile. Functionality varies depending on the mobile handset model. Please refer to your mobile handset user guide for additional information.

**OPERATION****Making a Call (cont'd)**

**Using the Mobile Phone:** Making a phone call directly on your mobile phone will automatically transfer the call to the chatBAT.

**NOTE:** Restricted and unknown numbers will only ring through the chatBAT speaker.

**Receiving a Call:** Press the MFB button on the chatBAT once to answer the phone call. The call will come through the chatBAT unless the phone call is answered on the mobile phone, then the call will default to the mobile phone (phones may vary).

**Ending a Call:** Press the MFB button on the chatBAT once to disconnect.

**Rejecting a Call:** Press and hold the MFB button on the chatBAT for 3 seconds.

**Answering/Rejecting a Second Call During a Call**

a) Short press the MFB button once to hold the first call and answer the second call.

b) Press and hold the MFB button for 3 seconds to reject the second call.

**Switching Between 2 Phone Calls**

a) With 2 calls on the line, press and hold the MFB button for 3 seconds to switch between calls.

b) Short press the MFB button once to end the first call and stay with the second call.

**Redial a Call:** To redial the last number dialed, simply press the MFB button twice on the chatBAT to re-connect.

**Adjusting the Volume**

To Increase: Press the Volume(+) button on the chatBAT to increase the volume to your desired volume level.

To Decrease: Press the Volume(-) button on the chatBAT to decrease the volume to your desired volume level.

**Mute & Un-mute the Microphone**

Mute: During a call, press and hold the "MODE" button for 3 seconds to mute the speakerphone's microphone.

Un-Mute: Press and hold the "MODE" button for 3 seconds again.

**Transferring a Call**

**Speakerphone to Mobile:** During a phone call simply press Mode button twice on the chatBAT to route the call back to your mobile phone.

**Mobile to Speakerphone:** During a phone call simply press the MFB button on the chatBAT once to route the call back to the speakerphone.

**TEXT TO SPEECH (TTS) FEATURES**

**Text-To-Speech Language Options**

The chatBAT is available in 5 language options. In standby mode, press the "V+" button for 3 seconds until the blue LED flashes 3 times and the speakerphone announces "Select Language". Repeat this process to select the desired language in the following order: US English, French, Italian, German and Spanish.

**Transferring Mobile Phone's Phonebook to Speakerphone**

In the connecting status, press the MODE button for 3 seconds and the Blue LED light indicator will come on. The chatBAT will announce "Loading phonebook. Please wait". While loading the phonebook the chatBAT will announce "Please wait" every 30 seconds. When the process is completed, the chatBAT will announce "Contacts Saved" and announce the amount of memory used. If available memory is exceeded the speakerphone will announce "Phonebook is full". If transfer is unsuccessful the chatBAT will announce "Loading phonebook failed".

Please check whether your supports this function.

Note: When the device is linked to two phones, phonebook function will be disabled, and phone numbers can only be announced for incoming calls.

**Removing Phonebook Entries**

In standby mode, press and hold both "V+" and "V-" buttons for 3 seconds. "Phonebook Deleted" will be announced and the entire phonebook memory in the Speakerphone will be deleted.

**Turning On/Off the Text-To-Speech Function**

To turn TTS function On or Off, press and hold the "V+" button for 6 seconds while in standby mode "Voice Prompt On" or "Voice Prompt Off" is announced to denote its current status.

**MULTIPOINT FEATURES**

**Multipoint Pairing**

1. First mobile phone: Pair the speakerphone with one of the Bluetooth-enabled mobile phones.

2. Second mobile phone: Power off the chatBAT. Press and hold the "MFB" button for 6 seconds to enter pairing mode again to pair and connect with the second mobile phone.

**FCC Information:**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and 2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B Digital Device, pursuant to Part 15 of the FCC Rules. These limits are designed to this equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the radio or television off and on, the user is encouraged to try to correct interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on another circuit.
- Consult the dealer or an experienced radio/TV technician for help.

**Caution:** Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

**Industry Canada Statement:**

This device complies with RSS-210 of the Industry Canada Rules. Operation is subject to the following two conditions: 1) this device may not cause interference and 2) this device must accept any interference, including interference that may cause undesired operation of the device.

This class B digital apparatus complies with Canadian ICES-003

**IC Radiation Exposure Statement:** This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment.

**Avis d'Industrie Canada:**

Cet appareil est conforme à la norme CNR-210 des règlements d'Industrie Canada. Son fonctionnement est sujet aux deux conditions suivantes:

- 1) Cet appareil ne doit pas provoquer d'interférences et 2) Cet appareil doit accepter toutes les interférences, y compris celles pouvant entraîner son dysfonctionnement.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada

**Avis d'Industrie Canada sur l'exposition aux Rayonnements:** Cet appareil est conforme aux limites d'exposition aux rayonnements d'Industrie Canada pour un environnement non contrôlé.
