3. Use mouse pad for smooth movement and to protect mouse from dust.
4. Place receiver unit as close as possible to the mouse.(within 6 feet)

● Cleaning mouse ball

For smooth and correct movement and for long life, cleaning is important like car.

1. Open ball cover from bottom side of mouse
2. Take out ball from mouse
3. Remove dust from ball with velvet or soft cloth
4. Remove dust from roller with thin alcoholic cotton stick
(do not use benzene, thinner, acetone)
5. Put ball in mouse and close ball cover
6. Remove dust from foot with soft tooth brush
