SleepIQ™

user guide

sleep  number®
know better sleep™

Welcome to SleepIQ™

The SLEEP NUMBER® bed is the first bed that lets you track and optimize your sleep with SleepIQ™ technology. Sensors work directly with SLEEP NUMBER® DualAir™ technology inside your *Sleep Number* bed to measure your average breathing rate, average heart rate and movement to track how you're sleeping.

Designed and engineered by SLEEP NUMBER, SleepIQ™ technology is powered by BAM Labs, a company whose mission is to make sleep tracking as easy as going to bed.

All you have to do is sleep

SleepIQ™ technology provides a simple and intuitive way to know more about your sleep. As it tracks your sleep patterns it makes suggestions, like adjusting your SLEEP NUMBER® setting or daily routine. Best of all, it empowers you so you can achieve your best possible sleep, night after night.

And SleepIQ™ couldn't be easier to use. Nothing to wear, nothing to turn on. All you have to do is sleep.

Your daily view

Labels for the tablet interface:

- Your SleepIQ™ score
- Your Sleep Number® setting
- Average heart and breathing rates
- Total time in bed and breakdown of sleep quality
- Tap here for hourly breakdown of last night's sleep
- Simple sleep quality color coding

Tablet screen data:

- Hi Sara
- Time filters: Last Night, Day, Week, Month, Now
- SleepIQ score: 78 (Sleep Number setting: 45)
- Total time in bed: 7 Hrs 55 Mins
- Average heart rate: 77 BPM
- Average breathing rate: 12 BrPM
- Sleep quality breakdown: 7:20 Hrs (REST), 0:27 Hrs (WAKE), 0:08 Hrs (OUT OF BED)
- Journaling prompt: Make tonight better by journaling.

Smartphone screen data:

- Hi Sara
- Time filters: Last Night, Day, Week, Month, Now
- SleepIQ score: 78 (Sleep Number setting: 45)
- Hourly breakdown for Wednesday: 7:51 Hrs (WAKE), 1:05 Hrs (REST), 0:01 Hrs (OUT OF BED)
- Average heart rate: 77 BPM
- Average breathing rate: 12 BrPM
- Journaling prompt: Make tonight better by journaling.

Remote control screen data:

- Hi Sara
- SleepIQ score: 78 (Sleep Number setting: 45)

Every morning, you'll see your SleepIQ™ score and know how you slept. You can also view comprehensive details of your night, including restful time in bed, goal time in bed, average heart rate, average breathing rate, movement and bed exits. It's information that will empower you to sleep better—there's no such thing as a bad score.

You can view your SleepIQ™ score and all of your data at the simple touch of a button via your SLEEP NUMBER® remote, smart phone, tablet or PC. (See page 16)

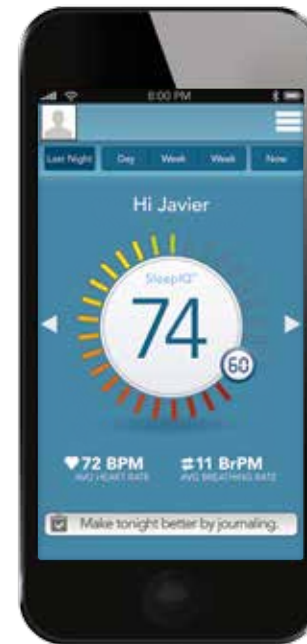

Sleep better together

SleepIQ™ technology not only tells you which SLEEP NUMBER® settings you've tried, but also which of those settings ensure your best sleep. Not only that, it measures and understands how your partner sleeps and how it can impact you. When they sleep better, so do you.

Different sleep schedules? Traveling for business? Whatever is going on in your lives, you each can add custom journal notes so SleepIQ™ can empower you to get the most from your sleep. (See page 10.)

Need private time? You can turn off SleepIQ™ whenever you choose. (See page 20.) You and your partner's individual data is kept between the two of you, so you can sleep safe and sound.

Your Partner's SleepIQ™ Home Screen

Your SleepIQ™ Home Screen

Simply turn your phone sideways for an hourly breakdown of how you both slept last night

Journal feature

Select items specific to your day. Press again to deselect.

Add customized details specific to your day

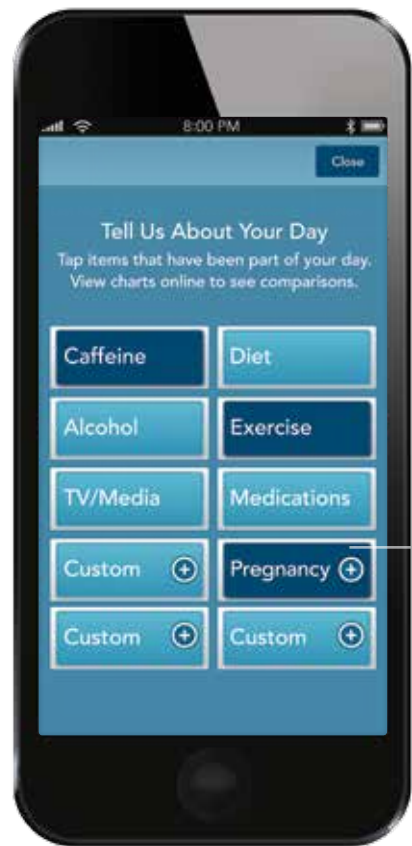

Track trends over time

Quickly identify how things like diet, exercise, caffeine and alcohol affect your SleepIQ™ score

Using your journal, you'll be able to track things like caffeine intake, diet, exercise, TV, media usage and medications. As SleepIQ™ technology learns your sleep patterns, it offers insights and tips.

For example, by clicking on Exercise in the journal feature, you'll be able to quickly identify how your exercise routine is affecting your sleep. Exercising in the evening? You may discover that exercising too late in the day interferes with your sleep.

The more custom details you add to your journal, the more SleepIQ™ can help you make the most of your sleep.

Customize with details specific to your day

Custom journal feature

New parent? Stressful day? Track what's important to you by entering custom details about your day. Over time, you'll start to see connections between your daily activities and nighttime sleep. You'll be empowered to make adjustments because you'll know what made the difference between a good night, a better night and an awesome night.

Good night

Better night

Awesome night

Your sleep over time

From your first night to your first year, you can see at a glance how you've been sleeping. Simple color-coding shows you how you're progressing. Click on any day of the week or month to see details.

Monthly view

As SleepIQ™ learns your sleep patterns, it offers insights and tips. The more you customize your journal, the more individualized your tips will be.

Choose between your daily, weekly and monthly views to see how your sleep is progressing

Out of town for a night? SleepIQ™ technology knows when you're away and factors it into your score

Control your bed with the SleepIQ™ app

Download the SleepIQ™ app from the App Store for your iPhone or iPad. Once it's downloaded, log in with your email address and SleepIQ™ account password. (Note: if you haven't created an SleepIQ™ account yet, see instructions on the next page). Follow the instructions on the app under "First time setup" to link your smart device to your bed.

To adjust your SLEEP NUMBER® setting through the app, open the menu and select Sleep Number®. Additional control options, like adjusting bed elevation, will vary depending upon the features of your bed.

Move the circle around the dial to adjust your Sleep Number® setting

Swipe left to right to control the other side of the bed

Access SleepIQ™ with your Sleep Number® remote

Press for Home menu

From the Home menu on your SLEEP NUMBER® remote, select SleepIQ™. Press up and down buttons to scroll through your sleep data.

Setting up your SleepIQ™ account

If you haven't already, you'll need to set up a SleepIQ™ account using the link that was sent to you by email a few days after you purchased your bed.

1. Click on the emailed link, enter your email address and create a SleepIQ™ password.
2. Next, enter your profile information. To complete your profile, you'll need your home network name and password.
3. Ensure your home Wi-Fi is working properly with a strong signal in your bedroom. (You can do this by checking your Wi-Fi strength on your tablet or phone. 📶)

NOTE: Home Delivery Technicians cannot complete SleepIQ™ setup without Wi-Fi connectivity. For questions about your home network Wi-Fi, please contact your Internet service provider. Our Home Delivery Technicians cannot troubleshoot your Wi-Fi network for you.

4. Once you've agreed to the End User Agreement, your account setup is complete. Click Bookmark for easy access to the SleepIQ™ login page.
5. Proceed to the login page. This page can also be found at **SleepNumber.com/SleepIQ**.
6. Enter your email address and password.
7. Now you're ready to start using SleepIQ™. If you have any questions, we're here to help. Visit us at **sleepnumber.com/chat** or call **1.877.252.7813**.

Enter your information. Some of the fields may already be filled out for you.

Customize your profile by adding a photo here

Select a sleep goal

Enter your Wi-Fi network and password

Tip for entering your sleep goal

When you enter the hours you wish to sleep for your sleep goal, make sure the goal is realistic. If you overestimate the hours, it could result in a lower SleepIQ™ score.

SleepIQ™ System FAQs

Q: How does SleepIQ™ monitor my sleep?

SleepIQ™ couldn't be easier to use. Sensors work directly with the DualAir™ technology inside your SLEEP NUMBER® bed so there's nothing to wear, nothing to turn on. All you have to do is sleep.

Q: What makes up my SleepIQ™ score?

Your individual quality and length of sleep, consisting of restful time in bed, average heart and breathing rates, motion and bed exits. Your SleepIQ™ score is information that will empower you to sleep better—there's no such thing as a bad score.

Q: What does my sleep goal mean?

Your sleep goal is the number of hours you'd like to sleep every night to feel your best. You can enter and update it in your profile settings. Your sleep goal, entered in hours, should be realistic and based on what a typical good night's sleep is for you. If you overestimate the hours, it could result in a lower SleepIQ™ score.

Q: What is a good heart rate? What is a good breathing rate?

With SleepIQ™ you can view your average heart rate and average breathing rate over the night. This is a question best addressed by your physician since every person is different. Keep in mind, the data from SleepIQ™ technology is averaged and not provided in real time for diagnostic purposes.

Q: How can I view my SleepIQ™ data?

You can access your SleepIQ™ data via the Web, iOS app and SLEEP NUMBER® remote. Data is viewable on the following browsers:

Desktop: Safari 4+, Chrome 4+, Firefox 7+, IE9+

iOS: 5+

Android: 2.1+

Q: If I read, watch TV or relax in bed before I go to sleep, will this affect my score?

Your SleepIQ™ score is specific to you and your habits. SleepIQ™ will track your time in bed and it will be part of your overall habits. Over time, SleepIQ™ will know and understand your patterns to give you the best possible information.

Q: How long can I view my SleepIQ™ data?

You can view your data for a rolling 2 year period.

Q: What happens if the power goes out? Will I lose my data?

After your power is restored, your SleepIQ™ system will automatically power on and reconnect to the Internet. Based on the length of the power outage, you may have a gap in your data.

Q: Do I need Wi-Fi in my bedroom?

Yes, in order for you to get your SleepIQ™ score and view your data, the SleepIQ™ system needs to be connected to the Internet via Wi-Fi.

Q: Can I turn off SleepIQ™ technology?

Yes, you can turn off SleepIQ™ through your SLEEP NUMBER® remote, SleepIQ™ app or SleepIQ™ website at any time. Press the Home button on your remote and hold for 2 seconds. You'll be asked if you'd like to turn off SleepIQ™. It will stay off until you turn it back on.

Q: Is my data kept private?

Yes, your SleepIQ™ data is confidential to you and your sleep partner. See End User Agreement for detailed information at SleepNumber.com.

SleepIQ™ LEDs (images read left to right on the front of your Firmness Control™ system)

-  **Power.** This light will come on and stay solid when your SleepIQ™ system has power.
-  **Remote Binding.** After Power light is solid, this light will blink. Wake up your remote so it can bind to this Firmness Control™ system. This light will turn solid when successful.
-  **Wi-Fi Connection.** This light will blink when it is searching for your home network. When this light turns solid, your home network was successfully detected.
-  **Internet Connection.** This light will blink when your Firmness Control™ system is trying to connect to the Internet. When this light turns solid, your Firmness Control™ system has successfully detected the Internet.
-  **Cloud/Server Connection.** This light will blink when your Firmness Control™ system is trying to connect to the cloud servers. When this light turns solid, your Firmness Control™ system has successfully connected.

If blinking persists on any light, please contact Customer Service for further assistance.

FCC/Statement: The equipment described in this guide has been tested and found compliant with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment to an outlet on a circuit different from that on which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help

Warning: Any attempt to make changes or modifications could void the user's authority to operate the equipment according to FCC certification.

Precautions: Content found at SleepNumber.com\SleepIQ or provided through the SleepIQ™ services is for informational purposes only and under no circumstance will such information be construed as medical advice, diagnosis or treatment. It is not intended to replace medical care, medical diagnosis, or the relationship between you and your physician or other medical provider. We are not a licensed medical care provider and have no expertise in diagnosing, examining or treating medical conditions of any kind. In no way should the SleepIQ™ data be used to diagnose or treat any medical condition. You should always consult with a physician regarding any concerns you have relating to your health, especially before you start or stop any particular health-related regimen. Never disregard professional medical advice or delay in seeking it because of something you have read or interpreted while using the SleepIQ™ system or SleepIQ™ services or based on any data generated by the SleepIQ™ module.

Not a Substitute for Active Monitoring: Through your use of the SleepIQ™ module, the SleepIQ™ system or the SleepIQ™ services, you will have access to certain biometric data regarding you or anyone else you allow to use your bed. The data is not provided to you in real time. In some cases, the data is generated by averaging or otherwise manipulating raw data being captured and transmitted to the SleepIQ™ module. The data is intended to be informational only and should, in no way, be used as a substitute for medical diagnosis or medical care including, without limitation, the proper supervision of either a person or of a medical condition. For example, using the SleepIQ™ services to monitor a person of limited mobility or who is at risk of a fall to ensure that they remain in bed or using the SleepIQ™ services to monitor someone with sleep apnea to ensure they are breathing are examples of improper use of the bed, the SleepIQ™ module, the data, the SleepIQ™ system and the SleepIQ™ services for something for which it wasn't intended. We undertake no responsibility or liability with respect to actively monitoring the data to ensure your or anyone else's health or safety. You understand that the SleepIQ™ system and the SleepIQ™ services do not protect your health or safety. You agree to use other safety and medical devices and techniques available to you as advised by your doctor or other health care professional and to otherwise adhere to any limitations, precautions or warnings which may accompany any medications, prescribed or otherwise.
