## Chapter 1. Introduction

This chapter provides the brief concept of ADSL, and the external form and specification of VisionNet 708.

This chapter covers the following topics:

What is ADSL VisionNet 708 Layout and LED Description VisionNet 708 Specification

### What is ADSL

ADSL (Asymmetric Digital Subscriber Line) is a technology for transmitting digital information at a high bandwidth on existing phone lines to homes and businesses. Unlike regular dialup phone service, ADSL provides continuously available, "always on" connection. ADSL is asymmetric in that it uses most of the channel to transmit downstream to the user and only a small part to receive information from the user. ADSL simultaneously accommodates analog (voice) information on the same line. ADSL is generally offered at downstream data rates from 512 Kbps to about 8 Mbps, upstream data rates up to 1Mbps.

ADSL was specifically designed to exploit the one-way nature of most multimedia communication in which large amounts of information flow toward the user and only a small amount of interactive control information is returned.

## VisionNet 708 Layout and LED Description

VisionNet 708 (Front view)

Location	Label	Status	Description
	POWER	VisionNet 708 power status	lt ' s On when VisionNet 708 is
			connected to PC which is working.
	USB	USB is awake	USB connected PC which is working
	Tx/Rx	Data transmission	It 's flashing whenever data is
			transmitted over VisionNet 708
	SYNC	ADSL Line initialization and	It 's remain on after ADSL line
		synchronization	synchronization achieved
	LAN	VisionNet 708 LAN status	It 's On when VisionNet 708 is
			connected to PC LAN which is
			working.
	PPP	PPP Connected status	It 's On when VisionNet 708 is
			connected to PPP which is working.

Location	Lable	Port	Function
	LINE	ADSL Line Port	Connects telephone Line cable in ADSL line.
	PHONE	Telephone	Connects the telephone cable in your
		Connection Port	telephone.
	Console	Console Port	Console Setting Port.
		(Option)	
	Ethernet	Ethernet Port	Connects Ethernet cable from the LAN port in
			your PC.
	USB	USB Port	Ethernet Firmware Upgrade (Option)
	DC IN	DC IN Port	Connects Adaptor
	Power	Power Switch	VisionNet 708 Ethernet Power On/Off

## VisionNet 708 Modem Specification

	Specification
Size (outfit)	200mm X 147mm
Power (V / A)	600m A 18V
Operating Temperature	5 ~ 45
ADSL Standards compliant	ANSI T1.413 Issus 2, ITU G.DMT(G.992.1), ITU G.Lite(G.992.2)
Connection Speed	Down Stream(Rx) : 8Mbps(Max) , Up Stream(Tx) : 860Kbps (Max)
Modulation	DMT (Discrete multi-tone)
Connector	Telephone Line(RJ 11) connector 2 port, Ethernet 1 port, USB Line 1 port,
Interface	Ethernet Interface
Operating System	Windows 98/98SE/ME/NT 4.0/2000/XP, Macintosh, Linux, UNIX compliant
Protocol	PPP Over ATM (RFC 2364) Bridged Ethernet Over ATM (RFC 1483) Classical IP Over ATM (RFC 1577)
P V C value range	VPI: 0~255 , VCI :0~65,535

#### <<Notice >>

The connection speed of VisionNet 708 may vary depending on your ADSL service, the ADSL line condition, your PC specification and the distance between ADSL modem and Central Office of your local ADSL service provider.

## Chapter 2. Before Installation

This chapter provides basic safety information before installation. Please read this chapter very carefully before installation.

This chapter covers following topics:

Safety Check The climate condition Check System Requirements Check VisionNet 708 Package Check

### Safety Check

Before installing and using VisionNet 708, please the following topics must be checked first.

Safety check related to the electricity, heat and water.

VisionNet 708 is Ethernet type ADSL modem, so you must connect VisionNet 708 to the Ethernet Port in your PC.

VisionNet 708 must be located in safe space such as near non-grounded extension cable, torn power cable and very close to the power outlet.

VisionNet 708 generates the heat when it is operating. It must not be exposed to heat trap conditions.

It must not be used near water, like a bathtub, kitchen sink or in a wet basement.

These environments could damage VisionNet 708 or effect the performance of VisionNet 708.

### The climate condition Check

For installing VisionNet 708 in safe and being used properly, please be aware of the climate Condition first.

VisionNet 708 is connected either Desktop PC or Laptop PC, so check the climate conditions of your PC and follow those instruction first.

It's recommendable that VisionNet 708 is being used in same temperature and humidity. The range of operating VisionNet 708 is

Operating temperature : 5 ~ 45

relative humidity : 10 ~ 85 % (non-condensation case)

## System Requirements Check

Before installing and using VisionNet 708, please the following topics must be checked first.

PC Operating System Windows 95 Windows 98 Windows 98SE Windows Millennium Edition Windows 2000 Home Edition & Professional Windows XP Home Edition & Professional Macintosh, Linux, UNIX

System Specification (Recommended).

The performance of VisionNet 708 depends on your system specification, so following specification is recommended.

OS : Windows 98/98SE

CPU :Pentium III 350MHz or higher

System Memory(RAM): 64MB or higher

LAN Card : Connect Ethernet Port

## VisionNet 708 package Check

When opening VisionNet 708 Package, please check the following items in the Package.

## Chapter 3. Installation of VisionNet 708

This chapter provides the brief concept of ADSL, and the external form and specification of VisionNet 708.

This chapter covers the following topics:

Installation VisionNet 708 Connect and Disconnect the Internet

### Installation VisionNet 708

1. Start Internet Explorer to view or reset the configuration of the ADSL And type 10.0.0.2 at [Open] and click [OK] button.

2. Enter "admin" at [User Name], "visionnet" at [Password] as below and click [OK] button to proceed.

Enter Net	work Passw	ord	?×
<b>?</b> >	Please type y	our user name and password.	
IJ	Site:	10.0.0.2	
	Realm	1	
	<u>U</u> ser Name	admin	
	<u>P</u> assword	×××××××××	
	☑ <u>S</u> ave this	password in your password list	
		OK C	Cancel
