Battery Disposal

The device is battery-powered. In order to protect the environment, please read the following points concerning battery disposal:

- Take the used battery to your local waste depot, dealer or customer service centre for recycling.
- Do not expose the used battery to a naked flame, immerse in water or dispose with the household waste.

Charging the Battery

You must charge the battery for at least 135 minutes before using your phone for the first time.

Using the Charger

1. Open the cover of the external connector, connect the charger to the external socket located at the bottom of the phone by pressing both sides indicated with arrows, and connect to an AC outlet.

The small light turns on.

Standard charging time: Approx. 135 minutes

Note

- Charging time may vary depending on the state of the battery and other conditions. (See "Battery" on page 121.)

To Disconnect the Charger

When charging is complete, the small light turns off.

1. Unplug the charger from the AC outlet, then unplug the charger connector from the phone.
2. Close the cover.

Note

- Do not use any non-approved chargers as they may damage your phone and invalidate any warranties, see "Battery" on page 121 for details.

To Charge Using the Cigarette Lighter Charger

The optional cigarette lighter charger supplies power for charging from the cigarette lighter socket of a car.

Vodafone live! (M 2)

Your phone is already configured to access Vodafone live! and the mobile internet*.

Vodafone live! is a new mobile internet portal which is your gateway to a new world of information, games, music and services.

Because your phone uses 3G (UMTS), it has a system that is much faster than previous ways of getting mobile information. Also, the connection is 'always on' which means there is no need to wait for dialling up. You only have to pay for the data you send or receive, not how long you're connected.

* If you have problems getting connected, please phone Vodafone Customer Support.

Your phone contains a WAP browser used for surfing on the Mobile Internet, where you can get a lot of useful information. Normally, pages are designed for a mobile phone.

Your phone is already setup to Vodafone site for WAP/MMS Settings.

“Hide My Phone”: Hides your phone from other devices.

To Search for Devices to be Paired (M 10–1–3)

“Connectivity” → **“Bluetooth”** → **“Search for Devices”**

1. Select the desired device for pairing.
2. Enter the device passcode.

Note

- If the *Bluetooth* wireless function is off before searching, the phone turns the *Bluetooth* wireless function on automatically and starts searching.
- You can only select one device for pairing. To change the paired device, see “To Activate the Paired Device” on page 110.

Tip

- You can save battery power by turning the *Bluetooth* wireless function off while it is not in use. Turn the *Bluetooth* wireless function off in “To Turn On or Off” or in “To Turn Off Automatically” on page 110.
- During a call, you can divert voice calls to the paired device. Press [Options] and select “Enable Bluetooth” or “Disable Bluetooth”. If you wish to disconnect the paired device, select “Off”.

To Activate the Paired Device (M 10–1–4)

Paired devices are listed by tabs for all devices and for handsfree devices.

“Connectivity” → “Bluetooth” → “Paired Devices”

1. Press  to switch to the list for handsfree devices.
2. Select the desired device you wish to activate.

To Rename or Delete the Paired Devices

“Connectivity” → “Bluetooth” → “Paired Devices”

1. Press  or  to switch between all devices and handsfree devices.
2. Highlight the desired device.
3. Press [Options].
4. Select “Change Name” or “Delete”.

You can rename or delete by pressing  after selecting desired device.

To Send All Data to Other Devices (M 10–1–5)

You can send all the data for applications such as Contacts List, Calendar, Tasks, etc. to selected devices.

“Connectivity” → “Bluetooth” → “Send All”

1. Select the desired device.

If a device is not specified, searching starts automatically.

2. Enter your handset code.

The default handset code is “9999”. For details on changing the handset code, see “To Change the Handset Code” on page 105.

3. Enter the device passcode for unpaired devices.
4. Select the desired data to send.

Note

- If the handsfree device is connected, the confirmation screen to deactivate the handsfree function is displayed. Press [Yes] to deactivate.

Bluetooth Wireless Settings (M 10–1–6)

With this setting you can rename your phone, prevent other phones from recognising your phone, turn the *Bluetooth* wireless function off automatically to save battery power, etc.

To Rename Your Phone

You can rename your phone. The name is shown in other devices when your phone is detected.

“Connectivity” → “Bluetooth” → “Bluetooth Settings” → “Device Name”

1. Enter the new device name.

To Turn Off Automatically

“Connectivity” → “Bluetooth” → “Bluetooth Settings” → “Bluetooth Timeout”

1. Select the desired time.

Your phone turns the function off automatically in the specified time.

To Switch the Handsfree Settings

You can switch modes of the handsfree kit between two modes; talking with the handsfree kit or talking with the phone.

“Connectivity” → **“Bluetooth”** → **“Bluetooth Settings”** → **“Handsfree Setting”**

1. Select “Private mode” or “Handsfree mode”.

“Private mode”: For talking with the handset

“Handsfree mode”: For talking with the handsfree kit

To Turn the Authentication Request On or Off

You can request the sender or receiver of the OBEX data to authenticate the passcode (exchanging the passcode) before pairing devices.

“Connectivity” → **“Bluetooth”** → **“Bluetooth Settings”** → **“Authentication”**

1. Select “On” or “Off”.

Note

- No authentication is required for the paired devices.
- Even if you select “Off”, you may authenticate the passcode when the sender requests it.

To See Your Phone Details

“Connectivity” → **“Bluetooth”** → **“Bluetooth Settings”** → **“My Phone Details”**

Infrared (M 10–2)

In order to use the infrared function, you need to search for other infrared enabled devices to establish contact with your phone. Keep your phone within a distance of 20 centimetres before searching. The infrared setting will return to off when no data is transmitted/received via infrared communication.

To Turn On or Off (M 10–2–1)

“Connectivity” → **“Infrared”** → **“Switch On/Off”**

1. Select “On” or “Off”.

The infrared setting is activated, and “” is displayed.

To Send All Data to Other Devices (M 10–2–2)

“Connectivity” → **“Infrared”** → **“Send All”**

1. Enter your handset code.

The default handset code is “9999”. For details on changing the handset code, see “To Change the Handset Code” on page 105.

2. Select the desired data to send.

3. Enter the authorisation code.

Network Settings (M 10–3)

To Select a Network Automatically

Each time the power is turned on, your phone always tries to connect to the preferred network.

If your phone is not connected to the network, you can perform the following immediately to establish the preferred network connection.

“Connectivity” → **“Network Settings”** → **“Select Network”**
→ **“Automatic”**

To Set the Network Manually

“Connectivity” → **“Network Settings”** → **“Select Network”**
→ **“Manual”**

1. Select the desired network.

To Add a New Network

“Connectivity” → **“Network Settings”** → **“Select Network”**
→ **“Add New Network”**

If there are no entries, press  and go to step 2.

If there is an entry, press  and perform the following steps.

1. Select “Add”.
2. Enter the country code (up to 3 digits).
3. Enter the network code (up to 3 digits).
4. Enter a new network name (up to 25 characters).
5. Select “Select network type”.
6. Select the desired network.

To Edit the Preferred List

“Connectivity” → **“Network Settings”** → **“Select Network”**
→ **“Set Preferred”**

1. Select the name of the network you wish to edit.
2. Select “Insert” to insert over the selected position, “Add to end” to insert at the end or “Delete” to delete.

To Cut the Network Connection

“Connectivity” → **“Network Settings”** → **“Flight Mode”**

1. Select “On” or “Off”.

To Show the Network Information (M 10–3–3)

“Connectivity” → **“Network Settings”** → **“Network Information”**

Information about the operator name, package and services are displayed.

Flight Mode (M 10–4)

When the Flight Mode is set to “On”, the handset cuts off the network connections and stops searching for available networks to connect.

“Connectivity” → **“Flight Mode”**

1. Select “On” or “Off”.

Internet Settings (M 10–5)

Note

- In normal operations, you do not need to change the settings.
- Internet settings have already been made in your phone depending on your network operator. You may have restrictions on viewing, deleting, copying or modifying the settings. Contact your network operator for details.

Memory Card (M 10–6)

With a memory card inserted in your phone, you can make backup files of Bookmarks, Text, Contacts, Calendar and Tasks in the handset memory card to the memory card. You can also restore the backup data from the memory card.

Making a Backup File on the Memory Card

“Connectivity” → “Memory Card” → “Backup/Restore” → “Backup”

1. Enter your handset code.

The default handset code is “9999”. For details on changing the handset code, see “To Change the Handset Code” on page 105.

2. Select the desired item to backup or “Select All” to backup all files.

Restoring a Backup File

“Connectivity” → “Memory Card” → “Backup/Restore” → “Restore”

1. Enter your handset code.
2. Select the desired item to restore or “Select All” to restore all files.
3. Select the desired file to restore.

A confirmation message indicating deletion from the memory card is displayed on the screen.

4. Press [Yes].

Note

- To delete a backup file, highlight the desired item, press [Options] and select “Delete” after performing steps 1 to 3.

Formatting Memory Card (M 10–6–3)

“Connectivity” → “Memory Card” → “Format Card”

1. Enter your handset code.

The default handset code is “9999”. For details on changing the handset code, see “To Change the Handset Code” on page 105.

2. Press [Yes] to start formatting.

Connecting 703SH to Your PC

You can use the following functions by connecting the 703SH to your PC using an Infrared port, a USB port* or *Bluetooth* wireless technology port:

- 3G/GSM/GPRS modem
- Handset Manager for 703SH
- * Requires an optional USB data cable XN-1DC30 for USB port connection.

System Requirements

Operating System:

Windows[®] 98*, Windows[®] Me, Windows[®] 2000**,
Windows[®] XP***

- * Windows[®] 98 Second Edition, Windows[®] 98 Service Pack 1 with Internet Explorer 5.01 or later
- ** Service Pack 4
- *** Service Pack 1a

Supported Software:

Microsoft[®] Outlook/Outlook Express

Interface:

Infrared port, USB port or *Bluetooth* wireless port

CD-ROM drive

3G/GSM/GPRS Modem

You can use 703SH as a 3G/GSM/GPRS modem to access the Internet from your PC. Connect your phone to your PC via *Bluetooth* wireless technology or USB interface. Software installation on your PC is required. For details, see “Software Installation” on page 118.

Modem via the USB Cable

To use the modem function using a USB cable, use the cable mentioned above and see the instructions accompanying the cable.

Modem via Bluetooth connection

To use the modem function via *Bluetooth* wireless technology interface, see “Using the Bluetooth Wireless Function” on page 109 and turn the modem function on.

For details on software support, refer to the following site:

<http://www.sharp-mobile.com>

Note

- *Modem communication is not possible while communicating with the Handset Manager via Bluetooth wireless technology, Infrared or USB interface.*
- *Your phone exhausts the battery when connected to a PC, even when not communicating.*

Handset Manager

You can transmit the following items between your phone and your PC, and can use Contacts List entries on your PC:

- My Items files (pictures/sounds/video clips/Other Documents data)
- Contacts List entries
- Schedule entries

To use the Handset Manager function, see “Connecting 703SH to Your PC” on page 117 and set your phone to Data Transfer mode.

For details on software support, refer to the following site:

<http://www.sharp-mobile.com>

Software Installation

1. Insert the supplied CD-ROM into your CD-ROM drive.

The 703SH CD-ROM screen is displayed.

If the 703SH CD-ROM screen is not displayed, double-click [Launcher.exe] in your CD-ROM.

2. Press the desired button.

The installation starts.

3. Follow the on-screen instructions to complete installation.

Note

- The phone may not recognise the USB data cable if it is connected while an application (Camera, My Items, etc.) is running. Connect the USB data cable in standby.

Infrared Communication

- Infrared ports need to be aligned with each other.
- Infrared ports need to be placed within 20 cm of each other and within a 30° angle.

3G/GPRS modem

- It is not recommended that you make or answer calls when you are using 703SH as a 3G/GPRS modem. The operation may be interrupted.

Handset Manager

- Some large files may not be able to be transmitted from the PC to the phone.
- Applications (Camera, My Items, etc.) do not run when the phone is connected to the PC via Bluetooth wireless technology interface, Infrared or USB data cable.

Safety Precautions and Conditions of Use

Your phone conforms to international regulations insofar as it is used under normal conditions and in accordance with the following instructions.

CONDITIONS OF USE

Electromagnetic waves

- Do not switch on your phone aboard an aircraft (as your phone may interfere with the aircraft's electronic systems). Current legislation forbids this use and legal action can be taken against the user.
- Do not switch on your phone in a hospital, except in designated areas.
- Use of your phone's function may affect the performance of medical electronic units (pacemakers, hearing aids, insulin pumps, etc.). When the phone function is on, do not bring it near medical equipment or into areas in which medical equipment is being used. If you have a hearing aid or a pacemaker, only use the phone on the opposite side of your body from where it is located. The phone should be kept at least 6 inches (15.24 cm) from a pacemaker ANYTIME the phone is switched on.
- Do not switch on your phone near gas or flammable substances.
- Observe the rules concerning the use of mobile phones at gasoline stations, chemical plants and at all sites where a risk of explosion exists.

Caring for your phone

- Do not allow children to use your phone without supervision.
- Do not open or attempt to repair your phone yourself. The product can only be repaired by authorised service personnel.
- Do not drop your phone or subject it to severe impacts. Bending the body and pushing the display or keys with extreme force could damage the phone.
- Do not use solvents to clean your phone. Use only a soft, dry cloth.
- Do not carry your phone in your back pocket as it could break when you sit down. The display is made of glass and is particularly fragile.
- Avoid touching the external connector on the underside of the phone, since the delicate components within can be damaged by static electricity.

Battery

- Use your phone only with batteries, chargers and accessories recommended by the manufacturer. The manufacturer disclaims any liability for damage caused by the use of other chargers, batteries or accessories.
- **Network configuration and phone usage will affect talk-time and standby time.**
Using the games or camera will hasten battery consumption.

- **When the battery charging alert is displayed on the screen, charge the battery as soon as possible.** If you continue using your phone ignoring the alert, the phone may cease to function, and all data and settings you have stored may be lost at any moment.
- Before removing the battery from the phone, make sure the phone is switched off.
- Replace and charge the new battery as soon as possible after removing the old one.
- Do not touch the battery terminals. Batteries can cause damage, injury or burns if a conductive material touches exposed terminals. When the battery is detached from the phone, use a cover made of non-conductive material for keeping and carrying the battery safely.
- Recommended temperature for using and storing batteries is approximately 20°C.
- The batteries' performance is limited in low temperatures, particularly below 0°C and the phone may not work temporarily regardless of the amount of remaining battery power.
- Exposing the phone to extreme temperatures will shorten battery life.
- The battery can be charged and discharged hundreds of times but it will eventually wear out. When the operating time (talk-time and standby time) is noticeably shorter than normal, it is time to buy a new battery.

CAUTION

RISK OF EXPLOSION IF BATTERY IS REPLACED
BY AN INCORRECT TYPE,
DISPOSE OF USED BATTERIES ACCORDING
TO THE INSTRUCTIONS

See "Battery Disposal" on page 15.

Memory Card

- Do not remove or insert a memory card while data on the card is being edited. Do not turn off the handset or device containing the memory card while data on the card is being edited as this may damage the data or cause the card to stop functioning correctly.
- Data may be lost under the following circumstances.
 - If the handset is dropped, or shook, or force is applied while the memory card is inserted.
 - When the handset is used in areas that are exposed to static electricity or electric noise.
- Backup your important data in case data on the memory cards are lost due to malfunctions.
- Do not touch the metal terminals with your hands or metal objects.
- Do not bend the memory card or subject it to violent impact. Keep it away from water and high temperatures.
- SHARP holds no responsibility for the loss or damage of data contained on a memory card.
- Keep all memory cards out of the reach of small children.

Aerial Care

- Do not cover the top of the phone (p. 11, No. 19) with your hand when in use as this may interfere with the performance of the built-in aerial. Call quality may deteriorate leading to shortened talk-time and standby time because the mobile phone has to operate on a higher power level than is necessary.
- Use only the aerial supplied or one approved by Sharp for your mobile phone. Using unauthorised or modified aerials may damage the mobile phone. Moreover, since the mobile phone may violate the appropriate regulations, it may lose performance or exceed the limitation of SAR levels.
- To avoid impaired performance, do not damage the aerial of the mobile phone.
- While talking directly to the microphone, please hold the mobile phone so that the aerial is upwards over your shoulder.
- To avoid interfering with blasting operations, please turn off the mobile phone in a blasting area or in a place where a "turn off two-way radio" sign is posted.

Camera Operation

- Learn picture quality, file formats, etc. beforehand.
The taken pictures can be saved in JPEG format.
- Be careful not to move your hand while taking pictures.
If the phone moves while taking a picture, the picture can become blurred. When taking a picture, hold the phone firmly to prevent it from moving, or use the delay timer.
- Clean the lens cover before taking a picture.
Fingerprints, oils, etc. on the lens cover hinder clear focusing.
Wipe them off with a soft cloth before taking a picture.

Others

- As with any electronic storage unit, data may be lost or corrupted under various circumstances.
- Before connecting the phone with a PC or a peripheral unit, read the operation manual for the other unit carefully.
- If the phone's battery has been removed for some time, or the phone has been reset, the unit's clock and calendar may be reinitialised. The date and time should be updated in this case.

ENVIRONMENT

- Keep your phone away from extreme heat. Do not leave it on the dashboard of a car or near a heater. Do not leave it in any place that is extremely damp or dusty.
- Since this product is not waterproof, do not use it or store it where fluids such as water can splash onto it. Raindrops, water spray, juice, coffee, steam, perspiration, etc. will also cause malfunctions.

PRECAUTIONS CONCERNING VEHICLE USE

- It is the user's responsibility to check the local laws governing the use of a mobile phone in vehicles. Pay full attention to driving. Pull off to the side of the road, park the car, and switch off the engine before making or answering a call.
- Use of your phone's function may interfere with the vehicle's electronic systems, such as the ABS anti-lock brakes or the air-bag. To ensure no such problem occurs, please check with your dealer or car manufacturer before connecting your phone.
- Only allow qualified service maintenance personnel to install the vehicle accessories.

The manufacturer disclaims any liability for damage which may result as a consequence of improper use or use contrary to the instructions contained herein.

SAR

Your Sharp mobile phone has been designed, manufactured and tested so as not to exceed the limits for exposure to electromagnetic fields recommended by the Council of the European Union. These limits are part of comprehensive guidelines developed by independent scientific organisations. The guidelines include a substantial safety margin designed to assure the safety of the phone user and others and to take into account variations in age and health, individual sensitivities and environmental conditions. European standards provide for the amount of radio frequency electromagnetic energy absorbed by the body when using a mobile phone to be measured by reference to the Specific Absorption Rate (SAR). The SAR limit for the general public is currently 2 watts per kilogram averaged over 10 grams of body tissue. Your Sharp mobile phone SAR value is X.XXX watts per kilogram. This has been tested to ensure that this limit is not exceeded even when the phone is operating at its highest certified power. In use however your Sharp mobile phone may operate at less than full power because it is designed to use only sufficient power to communicate with the network.

Information on Proper Disposal

Attention: Your product is marked with this symbol. It means that used electrical and electronic products should not be mixed with general household waste. There is a separate collection system for these products.

A. Information on Disposal for Users (private households)

1. In the European Union

Attention: If you want to dispose of this equipment, please do not use the ordinary dust bin!

Used electrical and electronic equipment must be treated separately and in accordance with legislation that requires proper treatment, recovery and recycling of used electrical and electronic equipment.

Following the implementation by member states, private households within the EU states may return their used electrical and electronic equipment to designated collection facilities free of charge*. In some countries* your local retailer may also take back your old product free of charge if you purchase a similar new one.

*) Please contact your local authority for further details.

If your used electrical or electronic equipment has batteries or accumulators, please dispose of these separately beforehand according to local requirements.

By disposing of this product correctly you will help ensure that the waste undergoes the necessary treatment, recovery and recycling and thus prevent potential negative effects on the environment and human health which could otherwise arise due to inappropriate waste handling.

2. In other Countries outside the EU

If you wish to discard this product, please contact your local authorities and ask for the correct method of disposal.

For Switzerland: Used electrical or electronic equipment can be returned free of charge to the dealer, even if you don't purchase a new product. Further collection facilities are listed on the homepage of www.swico.ch or www.sens.ch.

B. Information on Disposal for Business Users.

1. In the European Union

If the product is used for business purposes and you want to discard it:

Please contact your SHARP dealer who will inform you about the take-back of the product. You might be charged for the costs arising from take-back and recycling. Small products (and small amounts) might be taken back by your local collection facilities.

For Spain: Please contact the established collection system or your local authority for take-back of your used products.

2. In other Countries outside the EU

If you wish to discard of this product, please contact your local authorities and ask for the correct method of disposal.

CAUTION: Changes or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

Exposure to Radio Waves

THIS MODEL PHONE MEETS THE GOVERNMENT'S REQUIREMENTS FOR EXPOSURE TO RADIO WAVES.

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg.* Tests for SAR are conducted using standard operating positions specified by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government-adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at

the ear is 0.530 W/kg and when worn on the body, as described in this user guide, is 0.386 W/kg. Body-worn Operation; This device was tested for typical body-worn operations with the back of the phone kept 1.5 cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5 cm separation distance between the user's body and the back of the phone. The use of belt-clips, holsters and similar accessories should not contain metallic components in its assembly.

The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided. While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF emission guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on FCC ID APYHRO00038) → *fcc*

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications & Internet Association (CTIA) web-site at <http://www.phonefacts.net>.

* In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.
