See Online User Guide for "Safety Precautions."

Before Using Handset

Accessory

- Battery (SHBCC1)
- Desktop Holder (SHECJ1)

Battery Installation

1 Unlock and remove cover

- Slide lever as shown.

2 Insert battery

3 Close cover

- Fit cover top into slot, then press down firmly.

4 Lock cover

- Slide lever as shown until it clicks.

Charging (Desktop Holder)

Use specified AC Charger ZTDAA1 (sold separately) only.

1 Insert AC Charger connector into Desktop Holder until it clicks

2 Plug AC Charger into AC outlet

3 Place handset onto Desktop Holder

- Small Light illuminates red while charging.
- Small Light goes out when battery is full.

4 After charging, disconnect handset, then unplug AC Charger

USIM Card Installation

1 Using Tab, pull out Tray until it clicks

2 Slide in USIM Card with IC chip facing up

3 Push in Tray fully

4 Insert battery (P.ii)

- First power off handset and remove battery.
- Do not force USIM Card into/out of handset.
- USIM Card must be inserted to use handset.

USIM PIN

4-digit code (**9999** by default); activate PIN Entry to restrict usage. Change PIN as needed.

■ PIN Lock & Cancellation (PUK Code*)

Entering incorrect PIN three consecutive times activates PIN Lock, limiting handset use. Enter PUK Code to unlock. For details, contact SoftBank Mobile Customer Center, General Information.

*Each USIM Card has a unique Personal Unlocking Key (PUK Code). Do not disclose it to unauthorized persons.

Before Using Handset

Manner Mode

■ Minding Mobile Manners

Please use handset responsibly. Inappropriate handset use can be both dangerous and bothersome. Please take care not to disturb others when using handset. Adjust handset use according to your surroundings.

Activating/Canceling Manner Mode

(Long)

Security Codes

■ Handset Code

9999 by default; use or change some functions.

■ Center Access Code

4-digit code selected at contract; access Optional Services via landlines or change contract details.

■ Network Password

4-digit code selected at contract; restrict incoming/outgoing calls (Call Barring).

- Message appears for incorrect code entries; retry.
- If Network Password is incorrectly entered three times consecutively, Call Barring settings are locked. To resolve, Network Password and Center Access Code must be changed. For details, contact SoftBank Mobile Customer Center, General Information.

Specifications

Weight*	129 g
Continuous Talk Time*	230 minutes (3G) 220 minutes (GSM)
Continuous Standby Time* (handset closed)	300 hours (3G) 270 hours (GSM)
Charging Time* (power off)	AC Charger: 135 minutes In-Car Charger: 140 minutes
Dimensions* (W x H x D)	50 x 108 x 15.9 mm (handset closed, without protruding parts)
Maximum Output	0.25 W (3G) 2.0 W (GSM)

• Values calculated with battery installed.

*Approximate value

■ Water Resistance

935SH is water-proof. However, improper handling may affect water resistance, resulting in malfunction.

- Handset is resistant to fresh/tap water between 5°C - 35°C.
- Malfunction resulting from misuse is not covered by the warranty.

Display Indicators & Key Assignments

	Signal strength		Manner mode active
	Packet transmission available (3G)		Battery strength
	Packet transmission available (GSM)		New Voicemail
	Unread mail		Alarm set
	Memory Card in use		

Multi Selector

Select menu items, move cursor, or scroll pages, etc. Multi Selector operations are indicated in this guide as shown below:

- : Press the center
- ◀: Press the left side
- ▶: Press the right side
- ⬇: Press the bottom

- Open Yahoo! Keitai Main Menu or execute Softkey functions
- Activate TV or switch entry mode
- Turn handset power on/off

Side Keys

Side Key operations are indicated in this guide as shown below:

- Toggle External Display view
- Press or

- Open Messaging menu or execute Softkey functions
- Open Shortcuts menu. In text entry windows, toggle upper/lower case
- Delete entries, escape/return to previous window
- Initiate/answer calls
- Enter numbers/characters
- Open Dictionary
- Select handset mode

General Notes

Electromagnetic Waves

For body-worn operation, this phone has been tested and meets RF exposure guidelines when used with accessories containing no metal, that position handset a minimum of 15 mm from the body. Use of other accessories may not ensure compliance with RF exposure guidelines.

CE Declaration of Conformity

CE 0168

Hereby, Sharp Telecommunications of Europe Ltd, declares that 935SH is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC. A copy of the original declaration of conformity for each model can be found at the following Internet address: <http://www.sharp.co.jp/k-tai/>

Battery - CAUTION

Use specified battery or Charger only.

Non-specified equipment use may cause malfunctions, electric shock or fire due to battery leakage, overheating or bursting.

Do not dispose of an exhausted battery with ordinary refuse; always tape over battery terminals before disposal. Take battery to a SoftBank Shop, or follow the local disposal regulations.

Charge battery in ambient temperatures between 5°C and 35°C; outside this range, battery may leak/overheat and performance may deteriorate.

Mobile Light

Do not use Mobile Light near people's faces.

Eyesight may be temporarily affected leading to accidents.

CAUTION:

Use of controls, adjustments or performance of procedure other than those specified herein may result in hazardous radiation exposure. As the emission level from Mobile Light LED used in this product is harmful to the eyes, do not attempt to disassemble the cabinet. Servicing is limited to qualified servicing station only.

EN50825-1:1994 A1:2002 & A2:2001

Mobile Light LED Properties

- a) Emission Duration: Continuous
- b) Wavelength
 - White: 400 - 700 nm
- c) Maximum Emission Output
 - White: 230 μW (1.2 mW inside handset)

European RF Exposure Information

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2 W/kg. As mobile devices offer a range of functions, they can be used in other positions, such as on the body as described in this user guide*. Highest SAR value:

Model	At the Ear**	On the Body
935SH	0.525 W/kg	0.508 W/kg

As SAR is measured utilizing the device's highest transmitting power the actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum level required to reach the Network. The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of mobile devices. They note that if you want to reduce your exposure then you can do so by limiting the length of calls or using a handsfree device to keep the mobile phone away from the head and body.

*Please see Electromagnetic Waves on P.xii for important notes regarding body-worn operation.

**Measured in accordance with international guidelines for testing.

FCC Notice

• This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

• Changes or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

FCC Information to User

This equipment has been tested and found to comply with the limits of a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation; if this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient/relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.

General Notes

■ FCC RF Exposure Information

Your handset is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless handsets employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg.

Highest SAR value:

Model	FCC ID	At the Ear	On the Body
9355SH	APYHRO00100	0.461 W/kg	0.629 W/kg

This device was tested for typical body-worn operations with the back of the handset kept 1.5 cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5 cm separation distance between the user's body and the back of the handset. The use of beltclips, holsters and similar accessories should not contain metallic components in its assembly.

The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided. The FCC has granted an Equipment Authorization for this model handset with all reported SAR levels evaluated as in compliance with the FCC RF emission guidelines. SAR information on this model handset is on file

with the FCC and can be found at <https://fjallfoss.fcc.gov/oetcf/eas/reports/GenericSearch.cfm> under the Display Grant section after searching on the corresponding FCC ID (see table on the left). Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications & Internet Association (CTIA) Website at <http://www.phonefacts.net>.
