- Emergency, Radiology, Pathology, Anesthesiology, Cardiology
- Medical Records
- Laboratory Services
- Clinical Research
- Nurses Stations
- Human Resources
- Administration
- Accounts Payable
- Collections
- Marketing/Public Relations
- Training
- Sales
- Customer Service

Current legislation impacting the Healthcare industry:

HIPAA

Innovative Scan² Technology for enhanced productivity

Comprehensive device and document security

ImageSEND

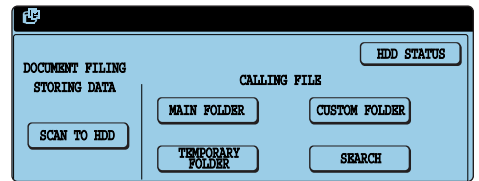

Effortless document distribution for a streamlined workflow

Digital IMAGER
Advanced Workgroup System

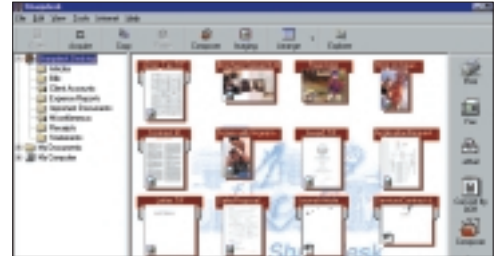

Efficient Document Distribution and Management

Sharp feature/accessory	benefit
Standard Document Filing	16 GB storage capacity (up to 20,000 letter size pages) allows for storage of admission forms, insurance forms, medical transfer forms, daily diagnostic reports, etc.
Network scanning with ImageSEND and six scan destinations (option)	Scan and send insurance documentation, research reports, and regulatory compliance documents instantly for increased productivity and reduced mail costs
Integrated Sharpdesk™ software (option)	Allows you to organize, edit and manage scanned files for maximum productivity
Printer Status Monitor	View printer conditions, check paper and toner levels before you send your job for optimum reliability
Seamless, Doc2NET™ compatibility (option)	Store and easily access frequently used documents from a network server including admissions materials, regulatory compliance forms, and research forms
Super G3 Faxing with PC-Fax driver (option)	Fax documents including precertification reports, insurance documentation, and admission reports directly from within an application for increased efficiency

Standard document filing makes it easy to access frequently used files like admission, insurance, and transfer forms.

With Sharpdesk you can edit, combine and manage scanned files for greater efficiency.

Ultra-Secure Document and Device Technology

Sharp feature/accessory	benefit
Built-in LDAP Support	Minimizes manual entry of e-mail addresses
User Authentication	Restricts network scan activity by verifying user information with LDAP server
Confidential Print	Protects sensitive documents like patient information, insurance claims, and treatment reports by holding them in the queue until a 5-digit PIN code is entered
IP/MAC Address Filtering	Protects device from unauthorized users
Data Security Kit (option)	Provides maximum security with AES 128-bit encryption and overwriting of data up to 7 times without having to remove the hard disk drive
Printer Administration Utility	IT Managers can monitor network printing activity for potential problems, ensuring maximum uptime

The IMAGER Home Page provides IP/MAC Address Filtering, so networked devices are restricted to authorized users only.

High-Performance Features and Document Finishing

Sharp feature/accessory	benefit
Scan ² Technology	Minimizes paper misfeeds and enhances reliability so your job gets completely quickly
Card Shot Feature	Conveniently copies both sides of an insurance card onto single side of paper for increased efficiency
Saddle-Stitch Finisher, Hole Punch Unit or Post Sheet Inserter (option)	Offers versatile finishing options for medical presentations, patient service brochures, fund raising collateral
Tandem Copying/Printing	Maximize networked printers by printing the same document on 2 IMAGERs for increased speed and efficiency
TIFF and PDF Direct Printing	Increases efficiency and speeds up workflow with simple, drag-and-drop, icon-driven printing
Carbon Copy Print	Reduces costs by enabling users to produce multiple-part forms for admissions, insurance, and more in-house

The innovative Card Shot feature holds the first side of the ID card in RAM, captures the reverse side, and copies both onto one side of paper.

Carbon Copy Print mode enables you to produce forms in triplicate—and reduce costly out-sourcing.
