1. There is an LED light in the middle of the front of the **621BT** Bluetooth Speaker. Below are what the LED indicates the status of speaker.

LED Off – Power OFF

BLUE – Power ON

Flashing BLUE – Pairing mode

Green – AUX input

2. There is an LED light beside the on/off button of the **621BT** Bluetooth Speaker. The LED indicates the status of battery charging.

RED – Battery is charging

Green – Battery is full charged

Set-up and Pairing via Bluetooth for Music Playback

The following instructions apply for mobile phone and music player with Bluetooth capability.

1. Ensure that the speaker is off and that the phone is on.
2. Push the power key to "ON" and you will hear a beep sound. Then the blue led light will blink every 0.5 seconds. It's now ready for pairing.

Note: If the Bluetooth Speaker does not pair successfully with the Bluetooth device in 20 minutes, the blue led light will keep blink every 0.5 seconds.

If Bluetooth device does not connect to the speaker in 50 minutes, Bluetooth will be off automatically.

3. Activate the Bluetooth function on your phone and search for Bluetooth devices.
4. Select the Bluetooth speakers **aoni-621** from the list of devices found.
5. You may be prompted to enter a Bluetooth passcode for some devices. If necessary, enter the Bluetooth passcode 0000 to pair the speaker to the bluetooth devices. In some devices you may need to connect to the speaker separately after pairing.

Note: If the pairing is successful and the speaker is in Bluetooth connection with the music device, you will hear a beep sound and the blue led light flashes 2 times about every 3 seconds.

6. This speaker includes hands-free calling function. When it successfully establishes a Bluetooth connection to your mobile phone, you can press  button to answer or end a call.

Reconnection in Event of Bluetooth Disconnection

If by any reason your device and the Speaker are disconnected, such as out of connection distance or powering off, the Speaker will "auto-connect" with compatible devices that auto-search and re-connect with their last connecting device, the reconnection time is 30 seconds, pls don't operate the speaker at that time.

If want to connect with the other Bluetooth devices after succeed in pairing current Bluetooth device, you can long press  button for 3-4 seconds and the blue led light will blink every 0.5 seconds with a beep sound, then connect.

Controlling Playback When Connected Via Bluetooth:

Volume: Using the volume controls on the top of the Speaker, press the (+) button to increase volume and the (-) button to decrease volume.

Pause music: Press  button to pause playback. Press again to resume music.

Connecting to a Device via 3.5 mm "AUX" Input

You can use **621BT** Bluetooth Speaker for music playback with any device which has a 3.5 mm headphone port. Simply plug one end of 3.5mm audio cable into your device's headphone port. Plug the other end of 3.5mm audio cable into the 3.5mm AUX in port on the back of the **621BT** Bluetooth Speaker, then Play music.

When Connected Via 3.5 mm "AUX" Input:

Note: Pause cannot be controlled with the  button on the **621BT** Bluetooth Speaker when connected via the 3.5 mm "AUX" input; the green LED light will be normally on. Use the volume control on your device as you normally would.

Recharging Battery

Plug the Micro USB end of the included USB charging cable into the Micro USB port of the **621BT**. Plug the other end into a USB port on your computer or other devices made for USB charging. The LED light will begin to RED. It will be Green at full charged. Charging time is 4 hours from an empty battery, it's better to charge 12 hours at the first three times.

FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
 - (1) This device may not cause harmful interference.
 - (2) This device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential

installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.
