Chapter 1. Introduction

Congratulations on purchasing the SC900 Portable Data Terminal, a Microsoft Windows® CE Rugged Device. Its special combination of features makes it perfect for using in a wide range of applications. These features as:

- Intel® XScale™ PXA310 624 MHz 32 bits RISC Processor
- Windows® CE 6.0 Operating System
- 128MB SDRAM & 256MB Flash ROM
- Open Architecture: User Accessible MicroSD Slot
- 240 x 320, 2.8" Color TFT Display with Touch Panel
- One Numeric-Alpha Keyboards with LED backlight
- WLAN 802.11a/b/g Radio Support
- Bluetooth V2.0+EDR, Class II Support
- WAN Module, MC75i(Optional)
- Integrated 1D Barcode Scanner or 2D Imager Scanner

1.1 About this Manual

The following chapters contained in this manual are:

| | | |
|-----------|----------------------|---|
| Chapter 1 | Introduction | General information about the Device. |
| Chapter 2 | Getting started | Describe the basic use of the Device. |
| Chapter 3 | Setting | Provide basic instructions for customizing the Device. |
| Chapter 4 | Communication | Describe how to use all kinds of communication of the Device. |
| Chapter 5 | Software Application | Describe the installed applications on the Device. |

1.2 User and Product Safety

- Do not stare into the laser or LED beam directly or shine it into eyes.
- Never use strong pressure onto the screen or subject it to severe impact, as the LCD panel could become cracked and possibility cause personal injury. If the LCD panel is broken, never touch the liquid inside because the liquid irritates the skin.
- Although the Device has passed the test of IP65 standard for water and dust resistance, avoid prolonged exposure to rain or other concentrated moisture. Such condition exceeds the IP65 standard, and could result in water or other contaminants entering into the Device.
- Use only the original approved AC Adapter with the Device. Use of an unapproved AC Adapter could result in electrical problems, or even cause a fire or electrical shock to the user.
- Do not disassemble the Device. Servicing should be done by supplier only. If the Device or accessories gets damaged due to wrong handling or unauthorized repair, warranty is void. In case the warranty seals are broken, warranty is void too.
- Make regularly back-up of all important data.
- Under no circumstance will supplier be liable for any direct, indirect, consequential or incidental damages baring out of the use or inability to use the hardware and software and/or any data loss, even if supplier has been informed about the possibility of such damages.
- LASER RADIATION DO NOT STARE INTO BEAM CLASS 2 LASER PRODUCT

1.3 Battery Safety

CAUTION: Risk of Explosion if Battery is replaced by an Incorrect Type.

Dispose of Used Batteries According to the Instructions.

Lithium-ion battery packs might get hot, explode, ignite and/or cause serious injury if exploded by abusive using. Please follow the safety warnings listed as below:

- Do not throw the battery pack in fire. Do not expose the battery to high temperatures.
- Do not connect the positive battery pack with negative battery pack to each other with any metal object (like wire).
- Do not carry or store battery pack together with metal objects.
- Do not pierce the battery pack with nails or drills, strike the battery pack with a hammer, step on the battery pack or otherwise expose it to strong impacts, shocks or excessive force.
- Do not solder onto the battery pack.
- Do not expose battery pack to liquid or allow the battery contacts to get wet.
- Do not disassemble or modify the battery pack. The battery pack contains safety and protection measures, which, if damaged, may cause the battery pack to generate heat, explode or ignite.
- Do not discharge the battery pack using any device except for the specified device. When it is used in devices other than the specified devices, the battery pack can be damaged or its life expectancy reduced. If the device causes any abnormal current to flow, it may cause the battery pack to become hot, explode or ignite and cause serious injury.
- In the event the battery pack leaks and the fluid gets into one's eye, do not rub the eye. Rinse well with water and immediately seek medical care. If left untreated, the battery fluid could cause damage to the eye.

1.4 CE Statement

This device complies with the essential requirements of the R&TTE Directive 1999/5/EC. The following test methods have been applied in order to prove presumption of conformity with the essential requirements of the R&TTE Directive 1999/5/EC:

- **EN 60950-1: 2006 +A11:2009 +A1:2010**
Safety of Information Technology Equipment

- **EN 300 440-1 V1.6.1: 2010**
Electromagnetic compatibility and Radio spectrum Matters (ERM); Short range devices; Radio equipment to be used in the 1 GHz to 40 GHz frequency range; Part 1: Technical characteristics and test methods

- **EN 300 440-2 V1.4.1: 2010**
Electromagnetic compatibility and Radio spectrum Matters (ERM); Short range devices; Radio equipment to be used in the 1 GHz to 40 GHz frequency range; Part 2: Harmonized EN covering the essential requirements of article 3.2 of the R&TTE Directive

- **EN 300 328 V1.7.1: 2006**
Electromagnetic compatibility and Radio spectrum Matters (ERM); Wideband Transmission systems; Data transmission equipment operating in the 2,4 GHz ISM band and using spread spectrum modulation techniques; Harmonized EN covering essential requirements under article 3.2 of the R&TTE Directive

- **EN 301 893 V1.5.1 (2008-12)**
Broadband Radio Access Networks (BRAN); 5 GHz high performance RLAN; Harmonized EN covering the essential requirements of article 3.2 of the R&TTE Directive

- **EN 301 511 V9.0.2: 2003**
Global System for Mobile communications (GSM); Harmonized standard for mobile stations in the GSM 900 and DCS 1800 bands covering essential requirements under article 3.2 of the R&TTE directive (1999/5/EC)

- **EN 301 489-1 V1.8.1 (2008-04)**
- Electromagnetic compatibility and Radio Spectrum Matters (ERM); ElectroMagnetic Compatibility (EMC) standard for radio equipment and services; Part 1: Common technical requirements

- **EN 301 489-17 V2.1.1 (2009-05)**
- Electromagnetic compatibility and Radio spectrum Matters (ERM); ElectroMagnetic Compatibility (EMC) standard for radio equipment; Part 17: Specific conditions for Broadband Data Transmission Systems

- **EN 301 489-7 V1.3.1 (2005-11)**
- Electromagnetic compatibility and Radio spectrum Matters (ERM); ElectroMagnetic Compatibility (EMC) standard for radio equipment and services; Part 7: Specific conditions for mobile and portable radio and ancillary equipment of digital cellular radio telecommunications systems (GSM and DCS)

- **EN 62209-2: 2010**
- Human exposure to radio frequency fields from handheld and bodymounted wireless communication devices — Human models, instrumentation, and procedures Part 2: Procedure to determine the specific absorption rate (SAR) for wireless communication devices used in close proximity to the human body (frequency range of 30 MHz to 6 GHz)

- **EN 62311: 2008**
- Assessment of electronic and electrical equipment related to human exposure restrictions for electromagnetic fields (0 Hz – 300 GHz)

This device is a 2.4 GHz wideband transmission system (transceiver), intended for use in all EU member states and EFTA countries, except in France and Italy where restrictive use applies.

In Italy the end-user should apply for a license at the national spectrum authorities in order to obtain authorization to use the device for setting up outdoor radio links and/or for supplying public access to telecommunications and/or network services.

This device may not be used for setting up outdoor radio links in France and in

some areas the RF output power may be limited to 10 mW EIRP in the frequency range of 2454 – 2483.5 MHz. For detailed information the end-user should contact the national spectrum authority in France.

CE 0560 !

1.5 FCC Statement

1.5.1 Federal Communication Commission Interference Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Operations in the 5.15-5.25GHz band are restricted to indoor usage only.

Radiation Exposure Statement:

The product comply with the FCC portable RF exposure limit set forth for an

uncontrolled environment and are safe for intended operation as described in this manual. The further RF exposure reduction can be achieved if the product can be kept as far as possible from the user body or set the device to lower output power if such function is available.

Note: The country code selection is for non-US model only and is not available to all US model. Per FCC regulation, all WiFi product marketed in US must fixed to US operation channels only.

Please use only the specific belt-clips/holsters/accessories supplied by the SHIN CHUAN COMPUTER CO., LTD. For this product or select a belt-clips, holsters or similar accessories that have no metallic component in the assembly and must provide at least 1.5 cm separation distance between the device and the user's body.

Caution: SCC declares that SC900 (FCC ID: TQ2-SC900PDT-BWG)is limited in CH1~CH11 for 2.4GHz by specified firmware controlled in U.S.A.
The FCC ID of SC900 is TQ2-SC900PDT-BWG

LED AND LASER SAFETY INFORMATION

- Class II LED/Laser Product
- Do not stare at the LED/Laser or shine into eyes
- Do not allow young children to use the product without adult supervision
- Do not replace/repair the LED/Laser, these are not user replaceable
- Do not shine the LED/Laser on a shiny reflective surface
- LASER RADIATION DO NOT STARE INTO BEAM CLASS 2 LASER PRODUCT

1.6 Recycling & disposal instructions.

Do not throw this product in the home waste bin.

1.7 Regulatory information.

For CE, FCC, RoHS and other Document of Conformities, consult the Contact Window of Shin Chuan Computer.

1.8 Product Labeling

The Device has several labels as shown in Figure 1-1 to 1-2.

| 15 | Stylus | Use the stylus for selecting items and entering information. | |
| 16 | Battery Cover | Protect Battery pack, keep the switch of battery cover to leave system from suspend mode | |
| 17 | Battery cover Latch | To keep battery cover locked | |
| 18 | Hand Strap | This strap can be sealed tighter or looser | |
| 19 | Speaker | 1W speaker for audio sound | |

2.3 Charging the Battery Pack

Before using the Device, perform the basic procedure of charging the battery pack through the following steps.

2.3.1 Installing the battery pack

1. Turn the locking latches (right and left) downwards and lift the battery cover away from the Device.

Figure 2-4 Detach the battery cover from Device

2. Insert the battery pack into the battery compartment with the label facing out, and ensuring the battery snaps into place.

Figure 2-5 Insert the battery pack

3. Replace the battery cover by inserting the bottom first, and then press the top in firmly. Turn the locking latches (right and left) upwards to secure the cover to the Device.

Figure 2-6 Replace the battery cover

4. Charge time: For the first time to charge the battery pack needs approximately 6 hours. Subsequent charging time needs approximately 3 hours.
- ◆ When charging the battery pack, the charge LED indicator on the Device turns on Red. After the battery pack is fully charged, the charge LED indicator turns to Green.

2.3.2 Charging the battery pack with Micro USB cable

1. Connect the Micro USB cable to both Device and computer or a power adapter.
2. Plug in the connector of the power adapter.

Figure 2-7 Charging with power adapter

- ◆ When charging the battery pack, the charge LED indicator on the Device turns on Red.
- ◆ After the battery pack is fully charged, the charge LED indicator turns to Green.

CAUTION: Please do not remove the Battery pack too long from Device after you have already full-charged the Battery pack and backup battery pack and start to use the Device. Otherwise non-saved data will be lost. Please also keep in mind power the Device off if you want to change the main Battery pack.

2.4. Handling the Device

2.4.1 Starting the Device

Press the Power key to turn on/off the Device. If the Device does not power on, perform a cold boot. See 2-7 Resetting the Device.

CAUTION: When a battery is fully inserted in Device for the first time, upon the Device first power up, the device boots and powers on automatically.

Figure 2-8 Starting the Device

When the Device is powered on for the first time, it initializes its system. A splash screen (figure 2-8) appears for a short period of time followed by the WinCE 6.0 window.

This section offers the basic procedures of Device using.

2.4.2 Power on / off

➤ To turn on the Device

Press the Power key briefly (). If the Device does not power on, perform the cold reset. See chapter 2.7.2.

As the Device initializes its file system, its splash screen displays for about 30 seconds followed by calibration screen. Every time you perform a cold reset, these screens will also appear.

To turn off the Device, just press the Power key again. This action does not actually turn off the Device, it only turns the Device into suspend mode. All running applications remain as you left them, until you press the Power key again to resume operation of the Device.

2.4.3 Calibration of the touch Screen

On the initial boot-up of the Device, the stylus calibration screen (Labeled Align Screen) opens. Use the stylus to press and hold briefly on the center of each target as it moves around the screen.

If necessary, adjust the backlight on the Device to make the screen readable.

When you feel the touch screen function is poor or the operation does not match the exact location it should be, please recalibrate the screen by using the stylus to tap the **Start > Settings > Control Panel > Stylus**, to open the **“Calibration”** to recalibrate again.

Figure 2-9 Calibration

2.4.4 To mute the Sound for SC900

To mute the sound, press the **Fn** key first, and then press the **BS** key to turn off and turn on the sound.

2.4.5 Using the Stylus

The stylus is located next to hand-strap on the right rear of the Device. The stylus function is same as the mouse on a PC. Use the stylus to:

- 1) Navigate the display, select menu item and open optional applications.
- 2) Tap the characters on soft keyboard panel.
- 3) Hold the stylus on the screen and drag across the screen to select the list of multiple items.

CAUTION: Never use a pen, pencil, or other sharp object on the display to avoid any unexpected damage of the touch screen.

2.4.6 Using the SC900 Keypad

Figure 2-10 SC900 Keypad

Table 2-2 Keypad List

| Key | Main Function | Fn + Main Function | Alpha + Fn+ Alpha + Main Function |
|---|-----------------------|--------------------|-----------------------------------|
|  | Main BarCode Scan Key | | |
|  | Power On/Off | | |

| Key | Main Function | Fn + Main Function | Alpha + Fn+ Alpha + Main Function |
|---|-------------------|---------------------|-----------------------------------|
|  | Up | Soft Keyboard | |
|  | Down | Reserved | |
|  | Left | Device Power | |
|  | Right | Brightness | |
|  | Function change | | |
|  | Escape | Tab | |
|  | Change to letters | Caps | Change to cap letters |
|  | Backspace | Mute | Backspace |
|  | Enter | Del (Delete) | Enter |
|  | 1 | @ (at) | : \ |
|  | 2 | ' (Quotation Marks) | A B C |
|  | 3 | + (Plus Sign) | D E F |
|  | 4 | Paste | G H I |
|  | 5 | € | J K L |
|  | 6 | - (Minus Sign) | M N O |
|  | 7 | Copy | P Q R S |
|  | 8 | & (AND) | T U V |
|  | 9 | X (Multiplication) | W X Y Z |
|  | 0 | Space | [] |
|  | * (Asterisk) | Start Menu | . ' ; |
|  | # | / (Division) | = % |

Table 2-3 Special Assembler Key

| Assembler Key | Functionality | Definition |
|---|---------------|---|
| "Alpha" + "Fn" + "Enter" Key | Warm Reset | Press "Alpha", "Fn" and "Enter" buttons simultaneously. |
|  + "Fn" + "Enter" Key | Cold Reset | Press "Power", "Fn" and "Enter" buttons simultaneously. |

Table 2-4 Definition of main Function

| Key | Main Function | Definition |
|---|-----------------------|--|
|  | Main Barcode Scan Key | The  key activates the scan function of SC900. |
|  | Power On/Off | The  key puts the terminal into and wakes the terminal from suspend mode if this key button is not pressed more than two seconds . |
|  | Up | Move the cursor up one row or line The cursor will move continuously if button is pressed continuously. Application key 1, User can define F1 function from setting. |
|  | Down | Move the cursor down one row or line The cursor will move continuously if button is pressed continuously. Application key 2, User can define F2 function from setting. |
|  | Left | Move the cursor one character to the left. The cursor will move continuously if button is pressed continuously. Application key 3, User can define F3 function from setting. |
|  | Right | Move the cursor one character to the right. The cursor will move continuously if button is pressed continuously. Application key 4, User can define F4 function from setting. |

| Key | Main Function | Definition |
|---|-------------------|---|
|  | Function change | The  key is used in combination with other keys to type special characters and perform system functions. Note: When continue press “Fn” key twice, the “Fn” key function will be lock and color change from White() to Yellow (). Press again to disable “Fn” Function. |
|  | ESC | This key performs a cancel action |
|  | Change to letters | 1. The  key enables you to toggle between the numeric and alpha modes. Numeric mode is when you type numbers with number keys. Alpha mode is when you type letters with the number keys. 2. When you press  key, it appears “Alpha” icon <  > at the Task bar to indicate Alpha mode is enabled. The keypad stays in the alpha mode until you press  key again. |
|  | Backspace | “ Backspace ” key, it moves the cursor back one space each time the key is pressed. It deletes the previous character each time it is pressed if you are typing text. The cursor will move continuously if button is pressed continuously. |
|  | Enter | This key confirms data entry |
|  | 1 | Number key “1” |
|  | 2 | Number key “2” |

| Key | Main Function | Definition |
|-----|---------------|----------------|
| | 3 | Number key "3" |
| | 4 | Number key "4" |
| | 5 | Number key "5" |
| | 6 | Number key "6" |
| | 7 | Number key "7" |
| | 8 | Number key "8" |
| | 9 | Number key "9" |
| | 0 | Number key "0" |
| | * | * key |
| | # | # key |

2.4.6.1 Special Function by "Fn" + Main Function

The "Fn" key is used in combination with other keys to type special characters and perform system functions.

Table 2-5 Special Function key define

| Key Sequence | Fn + Main Function | Definition |
|--------------|---------------------|---|
| | SW Keyboard | You must press key, then press key to use SW Keyboard. |
| | Reserved | You can define F2 function. |
| | Device Power | You must press key, then press key to use Device Power. |

| Key Sequence | Fn + Main Function | Definition |
|---|--------------------|--|
|   | Backlight | You must press  key, then press  key to adjust Brightness. |
|   | TAB | <ol style="list-style-type: none"> The "TAB" function is to move the cursor to the next tab stop or the next control (on a form) To do this function by pressing  key first, and then pressing  key each time. |
|   | Audio Mute | <ol style="list-style-type: none"> Toggle the audio mute/on You must press  key, then press  key to enable audio mute or turn on audio function each time. |
|   | Caps | Toggle the Caps function |
|   | Del | <ol style="list-style-type: none"> The "Delete" function delete the next character forward each time. To do "Delete" function by pressing  key first, and then pressing  key each time. |
|   | @ | Enter an @ by pressing  key, then pressing  key. |
|   | ' | Enter a { ' } by pressing  key, then pressing  key. |

| Key Sequence | Fn + Main Function | Definition |
|---|--------------------|--|
|   | + | Enter a plus sign by pressing  key, then pressing  key |
|   | Paste | <ol style="list-style-type: none"> 1. It is to do "Paste" function. 2. To do this function by pressing  key first, and then pressing  key each time. |
|   | Euro symbol | <ol style="list-style-type: none"> 1. It is to do "€" function. 2. To do this function by pressing  key first, and then pressing  key each time. |
|   | - (Minus Sign) | Enter a minus sign by pressing  key, then pressing  key. |
|   | Copy | <ol style="list-style-type: none"> 1. Copy action. 2. You must press  key, then press  key to do "Copy" action each time. |
|   | & | Enter an AND sign by pressing  key, then pressing  key. |
|   | * | Enter an asterisk sign by pressing  key first, and then pressing  key. |
|   | Space | <ol style="list-style-type: none"> 1. The "Space" function is to move the cursor one space. 2. To do this function by pressing  key first, and then pressing  key each time. |

| Key Sequence | Fn + Main Function | Definition |
|---|---|--|
|   | Start Menu | <ol style="list-style-type: none"> 1. It displays the Start menu. 2. To do this function by pressing  key first, and then pressing  key each time. |
|   |  | Enter a slash by pressing  key first, and then pressing  key. |

2.4.6.2 Alpha plane keys by “Alpha” + main Function

1. The  key enables you to toggle between the numeric and alpha modes. Numeric mode is when you type numbers with number keys. Alpha mode is when you type letters with the number keys.
2. When you press  key, it appears “Alpha” icon at the Task bar to indicate Alpha mode is enabled. It means Alpha mode is disabled if there isn't “Alpha” icon at Task bar. The keypad stays in the alpha mode until you press  key again. For an example to type “ cap1 ” word, press     < wait 1 seconds > 
  .
3. If you want to type a lowercase “ c ”, press   
 (The  key three times, the  key is needed if it's the first alpha character keying in.). If a letter that is on the same key as the last letter entered, wait two seconds after you pressed the last key, then you can enter the correct series of keystrokes to create the next letter.
4. While you are in the Alpha mode and you press  key +  key to initial the “ Caps ” mode, you will render a Caps Lock until you press  key again. Once you are in Caps mode, you stay in “ Caps “ until it is pressed  key again.
5. It appears”  “ and “  ” icon at Task Bar during Caps mode.

Table 2-6 Alpha + Numeric keys define

| To enter | Press the Keys | To enter | Press the Keys |
|----------|-----------------------------------|----------|--|
| : | Alpha 1 ; \ | \ | Alpha 1 ; \ 1 ; \ |
| a | Alpha 2 ABC | A | Alpha Fn Alpha 2 ABC |
| b | Alpha 2 ABC 2 ABC | B | Alpha Fn Alpha 2 ABC 2 ABC |
| c | Alpha 2 ABC 2 ABC 2 ABC | C | Alpha Fn Alpha 2 ABC 2 ABC 2 ABC |
| d | Alpha 3 DEF | D | Alpha Fn Alpha 3 DEF |
| e | Alpha 3 DEF 3 DEF | E | Alpha Fn Alpha 3 DEF 3 DEF |
| f | Alpha 3 DEF 3 DEF 3 DEF | F | Alpha Fn Alpha 3 DEF 3 DEF 3 DEF |
| g | Alpha 4 GHI | G | Alpha Fn Alpha 4 GHI |
| h | Alpha 4 GHI 4 GHI | H | Alpha Fn Alpha 4 GHI 4 GHI |

| o | Alpha 6 MNO 6 MNO 6 MNO | O | Alpha Fn Alpha 6 MNO 6 MNO 6 MNO |
| p | Alpha 7 PQRS | P | Alpha Fn Alpha 7 PQRS |
| q | Alpha 7 PQRS 7 PQRS | Q | Alpha Fn Alpha 7 PQRS 7 PQRS |
| r | Alpha 7 PQRS 7 PQRS 7 PQRS | R | Alpha Fn Alpha 7 PQRS 7 PQRS 7 PQRS |
| s | Alpha 7 PQRS 7 PQRS 7 PQRS 7 PQRS | S | Alpha Fn Alpha 7 PQRS 7 PQRS 7 PQRS 7 PQRS |
| t | Alpha 8 TUV | T | Alpha Fn Alpha 8 TUV |
| u | Alpha 8 TUV 8 TUV | U | Alpha Fn Alpha 8 TUV 8 TUV |
| v | Alpha 8 TUV 8 TUV 8 TUV | V | Alpha Fn Alpha 8 TUV 8 TUV 8 TUV |
| w | Alpha 9 WXYZ | W | Alpha Fn Alpha 9 WXYZ |
| x | Alpha 9 WXYZ 9 WXYZ | X | Alpha Fn Alpha 9 WXYZ 9 WXYZ |
| y | Alpha 9 WXYZ 9 WXYZ 9 WXYZ | Y | Alpha Fn Alpha 9 WXYZ 9 WXYZ 9 WXYZ |
| z | Alpha 9 WXYZ 9 WXYZ 9 WXYZ 9 WXYZ | Z | Alpha Fn Alpha 9 WXYZ 9 WXYZ 9 WXYZ 9 WXYZ |
| [| Alpha 0 !@ |] | Alpha 0 !@ 0 !@ |
| . | Alpha * .: | , | Alpha * .: * .: |
| ; | Alpha * .: * .: * .: | | |
| = | Alpha # =% | % | Alpha # =% # =% |

Note: The  key is not needed to key in if the character isn't the first alpha character being keyed in.

2.5 Navigating the Display

2.5.1 Setting Time and Date

In the **Date/Time** options, you can change the year, month, date, time, time zone, or select automatic adjust for Daylight Saving Time. To set or change the date and time:

1. Select **Start > Settings > Control Panel > Date/Time**

2. To change the year, select the year or open a numeric dial. Select the up arrow to increase the value; select the down arrow to decrease the value. or you can type a new value in the field.

3. Select the month to open a pull-down list of months or press the arrow buttons to either side of the month to increase or decrease the month.

4. To change the time, select the hour, minute, seconds, or AM/PM and select the up arrow to increase the value; select /tape the down arrow to decrease the value. or you can type a new value in the field.

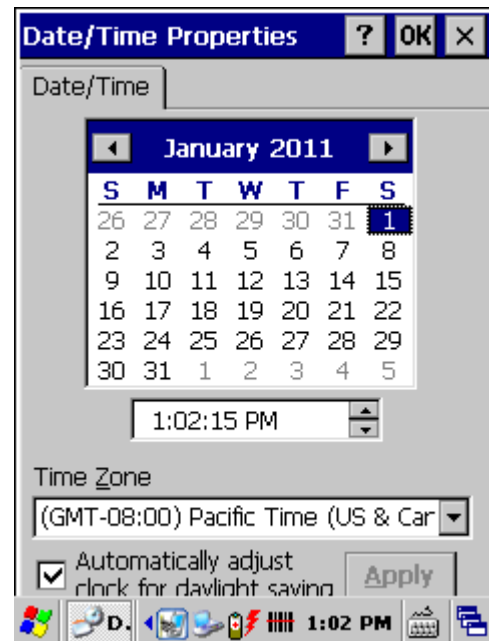

Figure 2-11 **Date/Time properties**

5. Select your correct time zone from the pull-down list.

6. To automatically adjust the clock for Daylight Saving Time, enable the checkbox at the bottom of the screen.

7. Select **Apply** to make save your changes [and make additional modifications] or select **OK** to exit the **Date/Time** settings.

2.5.2 Entering the Data

To select and open programs, select **Start > Programs** from the task bar to open a list of available programs. or if the program has an icon on the desktop, double-tap to open it.

There are several ways to enter data on the Device once in an application:

- Use the keypad to enter alpha-numeric characters, Refer to “**2.4.6 Using the SC900 keypad**”.
- Use the stylus on the touch screen.
- Select text in the same way you select the text on a PC. Use the stylus to highlight the desired text by dragging the stylus across the desired text,

double-tapping to select one word and triple-tapping to select an entire line/paragraph. Refer to “**2.5 Navigating the Display**” starting.

- Use the soft input panel (digital keyboard) with the stylus.
- Use the bar code scanning to enter data. Press the trigger or “Barcode Scan” key to initiate a scan. The scanned data will enter the current application’s open file. Refer to “**2.5.7 Reading barcodes, 1D laser version**” starting for more information on using a scanner.

For more information on factory installed applications, Refer to Chapter 5 “**Software Applications**”.

2.5.3 The Command Bar

Use the **Command** bar at top of the screen to perform tasks in programs, such as opening a file, or editing a file.

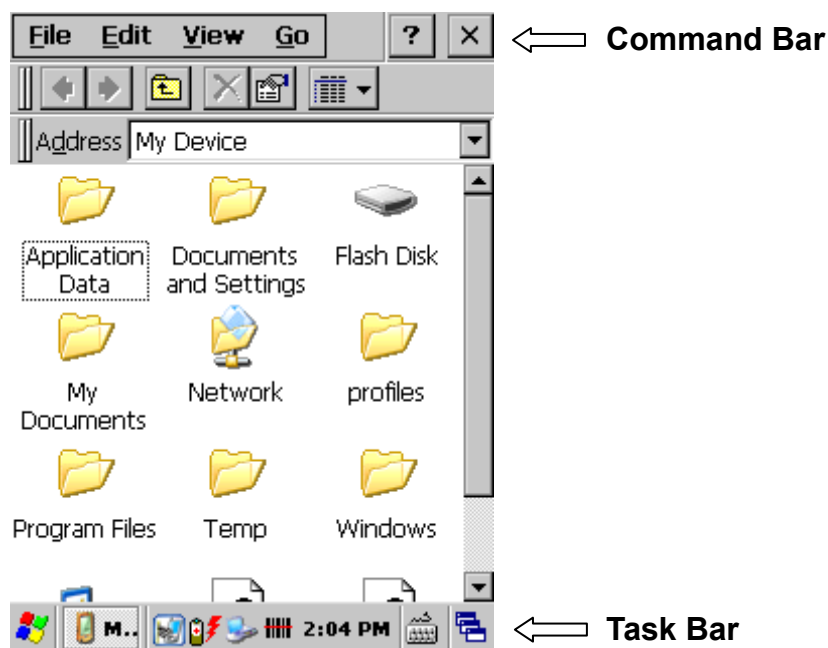

Figure 2-12 **Task Bar & Command Bar**

2.5.4 The Task Bar

The **Task** bar at the bottom of the screen displays the icon, an icon for the active program, the current time, and system icons for utilities loaded in memory. The **Task** bar includes menu names, buttons, and the keyboard icon, which opens and closes the soft input panel (SIP). The **Task** bar allows you to select and close programs. Refer to Figure 2-12 to view the **Task** bar.

2.5.5 The Soft Keypad

In applications that accept keypad input, the soft input panel (**SIP**) can be used to enter data using the stylus. The **SIP** is digital, QWERTY-style keyboard.

To open the **SIP**, tap the **keyboard** icon to open the menu and select **Hide Input Panel** to close the keyboard.

Use the stylus to select letters, numbers, or symbols from the **Soft Input Panel** for the current application.

2.5.6 Setting Up Wireless LAN

The Summit Client Utility (SCU) is an application designed for end users and administrators of mobile devices that use a Summit radio module. Using SCU, an end user can:

- Disable the radio (turn it off) and enable the radio (turn it on)
- View the contents of configuration profiles, or profiles, each of which houses the RF, security, and other settings for the radio
- Select the profile to be used to connect to a WLAN
- View global settings, which apply to every profile
- View status information on the radio, the access point (AP) or WLAN router to which it is connected, and the RF connection or link between the two devices
- To troubleshoot a connection or performance issue, view in-depth diagnostic information on the connection and the radio, and perform various troubleshooting and diagnostic tests

After completing an administrator login to the utility, a user can perform these additional tasks:

- Create, rename, edit, and delete profiles
- Alter global settings, which apply to every profile

SCU provides a graphical user interface (GUI) for access to all of its functions. Access to these functions also is available through an application programming interface (API), which an application programmer can use to enable another utility to manage the radio.

To initialize SCU:

- From the Start menu, select Programs
- Select the directory called Summit
- Inside the Summit directory are two items: a directory for the storage of security certificates and an SCU icon. To run SCU, double-click the SCU icon

SCU has five tabs: Main, Profile, Status, and Diags, and Global. Each tab is described in more detail in this section.

Main Tab

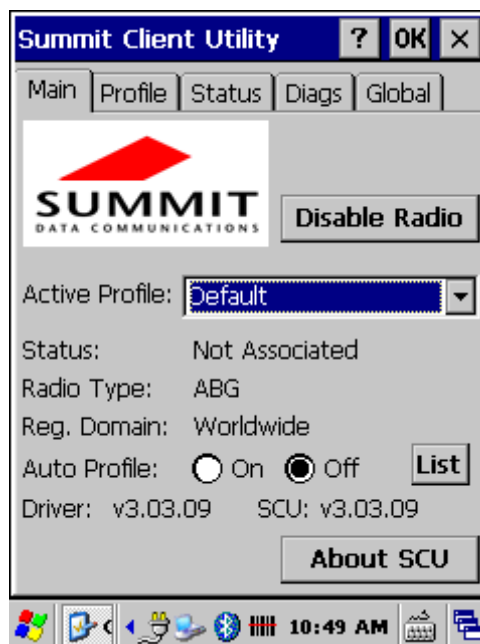

Figure 2-13 Main Tab

- **Enable/Disable Radio:** When the radio is enabled, selecting this button disables it; when the radio is disabled, selecting this button enables it.
- **Active Profile:** You can view the name of the active profile and, using the selection list, select a different profile.
- **Status:** Indicates the radio's status.
- **Radio Type:** Indicates the type of radio in the device. "ABG" means a Summit radio that supports 802.11a, 802.11b and 802.11g.
- **Regulatory Domain:** Indicates the regulatory domain or domains for which the radio is configured "Worldwide" means that the radio can be used in any domain. The domain cannot be configured by an administrator or user.
- **Auto Profile:** enables you to activate or deactivate automatic profile selection. Tap **List** and use the dialog box to select a created profile.
- **Driver:** Indicates the version of the device driver that is running on the device.
- **SCU:** Indicates the version of SCU that is running on the device.
- **About SCU:** When tapped, supplies information on SCU that on a Windows application normally would appear under Help/About.

Profile Tab

Profile settings are radio and security settings that are stored in the registry as part of a configuration profile. When a profile is selected as the active profile on the Main tab, the settings for that profile become active. An administrator can define up to 20 profiles, edit them, and delete them on the Profile tab in SCU.

Profile changes made on the tab are saved to the profile only when the Commit button is pressed.

Unless it is modified, the Default profile does not specify an SSID, EAP type, or method of encryption. If the Default profile is the active profile, then the radio will associate only to an access point that broadcasts its SSID and requires no EAP type and no encryption.

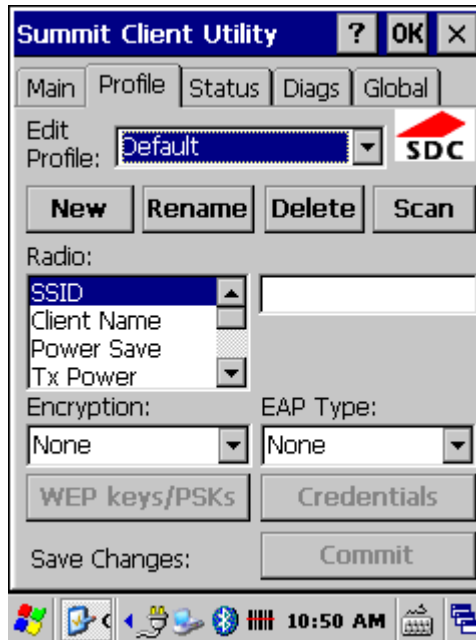

Figure 2-14 Profile Tab

- **Edit Profile:** This is used to select the profile to be viewed or, if you are an administrator, edited.
- **Actions:** Four actions are available, with the first three available only to an administrator:
 - New:** Create a new profile with default settings and give it a unique name (and then change settings using other selections on the tab).
 - Rename:** Give the profile a new name, one that is not assigned to another profile
 - Delete:** Delete the profile, provided that it is not the active profile.
 - Scan:** Open a window that lists access points that are broadcasting their SSIDs. Each time you tap the Refresh button, you view an updated list of APs, with each row showing an AP's SSID, its received

signal strength indication (RSSI), and whether or not data encryption is in use (true or false). You can sort the list by clicking on the column headers. If you are authorized as an administrator, select an SSID in the list, and tap Commit, you return to the Profile tab to create a profile for that SSID.

- **Radio:** Radio attributes in the list box can be selected individually. When an attribute is selected, the current setting or an appropriate selection box with the current setting highlighted appears on the right.
- **Security:** Values for the two primary security attributes, EAP type and encryption type, are displayed in separate dropdown lists, with the current values highlighted. When you as an administrator select an EAP type, the Credentials button appears; when you tap it, a dialog box appears that enables you to define authentication credentials for that EAP type. When you as an administrator select an encryption type that requires the definition of WEP keys or a pre-shared key, the PSKs/WEP Keys button appears; when you tap it, a dialog box appears that enables you to define WEP keys or a PSK.
- **Commit:** To ensure that changes to profile settings made on the tab are saved in the profile, you must tap the Commit button.

To cause a Summit radio to connect to a typical business WLAN, you must select a profile that specifies the SSID, EAP type, and encryption type supported by the WLAN:

- **SSID:** This is the name or identification of the WLAN.
- **EAP type:** This is the protocol used to authenticate the device and its user if the WLAN uses the Enterprise version of Wi-Fi Protected Access (WPA) and WPA2. SCU supports five EAP types: PEAP with EAP-MSCHAP (PEAP-MSCHAP), PEAP with EAP-GTC (PEAP-GTC), EAP-TLS, LEAP, and EAP-FAST
- **Encryption:** This specifies the type of key used to encrypt and decrypt transmitted data and how that key is specified or derived. Encryption options include:
 - WPA2 or WPA with dynamic keys (derived from the EAP authentication process)
 - WPA2 or WPA with pre-shared keys
 - Static WEP keys

Consult the user's guide for details on all profile settings, including security settings.

Status Tab

The Status tab provides status information on the radio.

- Active profile
- Radio's status: Down (not recognized), Disabled, Not Associated, Associated, or [EAP type] Authenticated
- Client info: Name, IP address, and MAC address
- AP info: Name, IP address, MAC address, beacon period, and DTIM interval
- Connection info: Channel, data rate, transmit power, signal strength, and signal quality

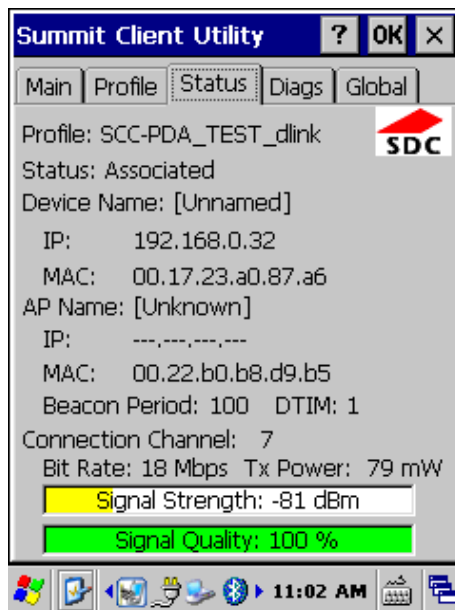

Figure 2-15 Status Tab

Diags Tab

Figure 2-16 Diags Tab

- **(Re)connect:** Disable and enable the radio, apply or reapply the current profile, and attempt to associate and authenticate to the wireless LAN, logging all activity in the output area at the bottom.
- **Release/Renew:** Obtain a new IP address through DHCP release/renew, and log all activity in the output area at the bottom.
- **Start Ping:** Start a continuous ping to the address in the edit box next to it. Once the button is clicked, its name and function will change to Stop Ping. Moving to an SCU window other than Status or Diags also will stop the ping, as will Pings will continue until you tap the Stop Ping button, move to an SCU window other than Diags or Status, exit SCU, or remove the radio.
- **Diagnostics:** Attempt to (re)connect to an AP, and provide a more thorough dump of data than is obtained with (Re)connect. The dump will include radio state, profile settings, global settings, and a BSSID list of APs in the area.
- **Save To...:** Save the diagnostics output to a file.

Global Tab

Global settings include:

- Radio and security settings that apply to all profiles
- Settings that apply to SCU itself

An administrator can define and change most global settings on the Global Settings Tab in SCU.

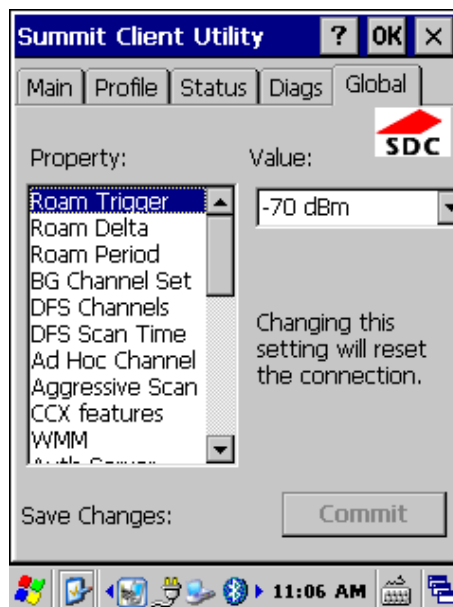

Figure 2-17 Global Tab

The default setting for each global setting ensures reliable operation in most environments. Consult the user's guide for details on all global settings.

2.5.7 Reading barcodes, 1D laser version.

To use the scanning function, complete the following steps:

1. If you have not already done so, remove the protective plastic film before using devices equipped with a 1D laser bar code reader.
2. Select **Start > Setting > Control Panel > Barcode Controls**; complete all configurations following all description of **3.2.1 BarCode Controls**.
3. Run the **WordPad** software program.
4. Press one of the three barcode reader trigger buttons.
5. Aim the scanning beam at the center of barcode.
6. Good scanning position.

The reading range is from 40 to 300mm distance.

- 1) Decrease the scanning distance to the bar code when scanning small barcodes.
- 2) Increase the scanning distance from the bar code when scanning large barcodes
- 3) The scanning area is visible by a red laser beam.

7. Bad scanning position.

- 1) Make sure that the laser beam sweeps across whole bar code.
- 2) Scanning operations may fail if the laser beam is positioned as below.

8. upon reading a barcode, the red LED indicator turns on until the trigger is release or after five seconds. The green LED and the beep tone indicates a good read.

Note: This product scans using laser light. Never look directly into the laser light or shine the laser light into the eyes.

2.5.8 Installing the MicroSD Card

1. Turn the locking latches (right and left) downwards and lift the battery cover away from the Device.

Figure 2-18 Detach the battery cover from Device

2. Detach MicroSD Holder and Insert the MicroSD Card into the MicroSD compartment.

Figure 2-19 Detach the SD Holder from Device

2.5.9 Help

To tap “?” can get help information for each program.

2.6 Power management

2.6.1 Suspend Mode

The Device will go into a suspend mode when it is idle for a period of time. The idle duration can be customized using the **Power** control panel (refer to Figure

“**Schemes Tab**”) Suspend mode works and looks just like you have turned the unit off. Press the  key to suspend the Device, Press the  key again for the Device to resume its Previous state.

Use the **Battery power** control panel to set the duration to switch state to Suspend mode when system using battery power. This will save battery power when Device is not in use.

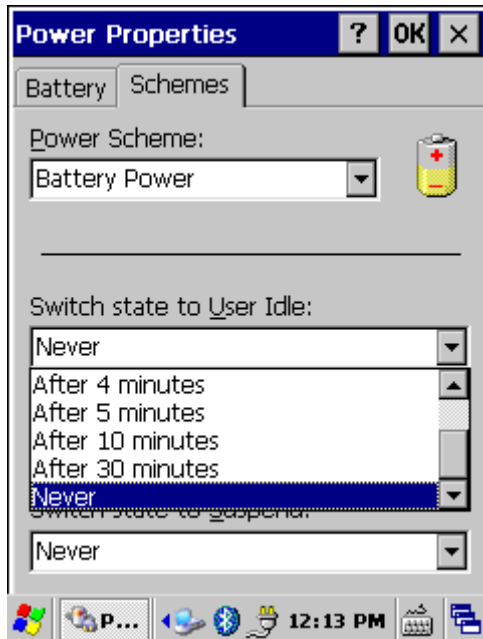

Figure 2-20 Schemes Tab-Idle

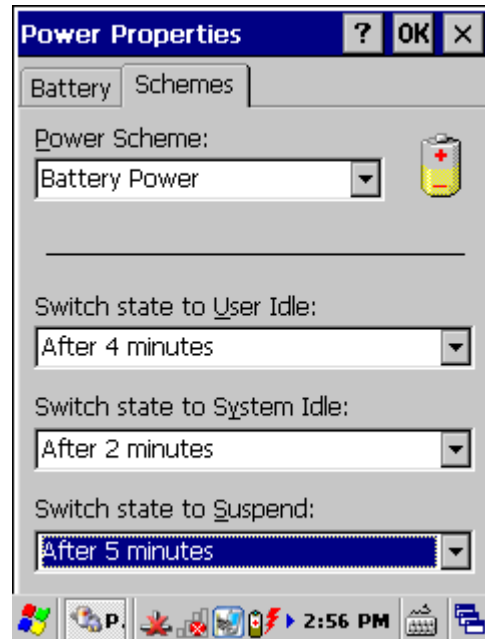

Figure 2-21 Schemes Tab-Suspend

Suspending:

The following conditions will suspend:

- Press <Power> key while the Device is on.
- The duration timer of item “**Switch state to Suspend**” expires, which indicates that there has been no use for a specified of time.
- The battery pack is completely discharged.

2.6.2 Resuming

Use one of following methods to resume (wake up the Device):

- Press <Power> key to suspend or resume (wake up).

When a battery pack completely discharges while the unit is in suspend mode, the Device remains suspended until discharged battery condition is corrected.

2.7 Resetting the Device

2.7.1 Software (Warm) Reset

A warm reset is a transition from the on, idle, or suspend power state that close all applications, clears the working RAM, but preserves the file system.

Reason to Warm Reset: If an application “ hangs ”, initiate a warm reset to terminate the application only.

Process to Warm Reset: To a warm reset, press “**Fn**” + “**Alpha**” + “**Enter**” buttons simultaneously.

After Warm Reset:

- The desktop appears with the application shortcuts on the screen.
- The custom settings in the registry are persistent.

2.7.2 Cold Reset

- 1) You can use Cold Reset to initiate device if WinCE.NET OS lock up or Warm Reset still can't work
- 2) To perform Cold Reset, press “**Fn**” + “**Power**” + “**Enter**” buttons simultaneously.
- 3) Device will initiate boot up after Cold Reset.

CAUTION:

Only use the Warm Reset. Try warm reset before you initiate Cold Reset. All applications will be Closed and working RAM and all files will be cleared if you initiate the Cold Reset. It's better usually to back up your files to Flash ROM, Flash Card or PC.

Chapter 3. Setting

3.1 Introduction

To view available options for Device setting, tap **Start > Settings**. Then, there are three items inside “**Control Panel**”, “**Network and Dial-up**” and “**Taskbar and Start**”.

3.2 Control Panel

To view the **Control Panel** and settings you can modify by tapping **Start > Settings > Control Panel**.

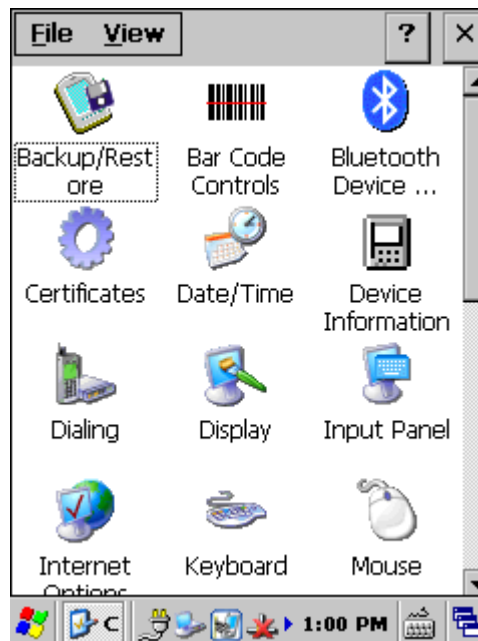

Figure 3-1 **Control Panel**

3.2.1 BarCode Controls

CAUTION : Please do not enter into any Barcode Application Program before settings completing this Barcode.

There are five Tabs for barcode scanner configuration setting: “**Scan**” Tab, “**Format**” Tab, “**Bar Codes**” Tab, “**Settings**” Tab and “**Others**”. In addition, there is “**Settings**” for the “Code Configure” Tab.

3.2.1.1 “Scan” Tab

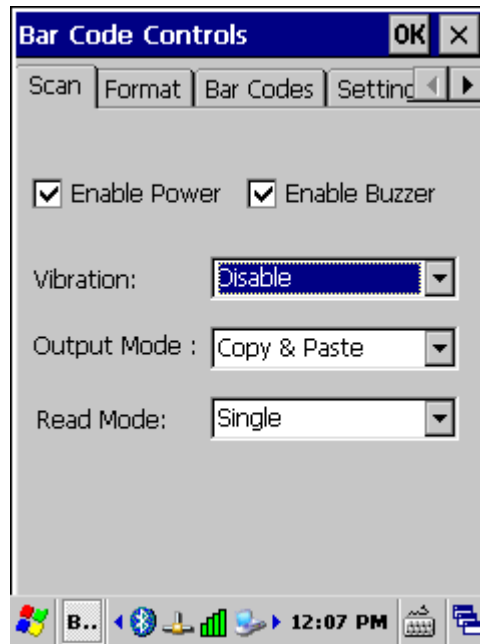

Figure 3-2 Scan Tab

Table 3-1 Basic Description

| Field Name | Description | |
|----------------------|---|---|
| Enable Power | To Enable/Disable Barcode Engine Power. <u>Default set to Enable.</u> | |
| Enable Buzzer | To Enable/Disable Buzzer Power. <u>Default set to Enable.</u> | |
| Vibration | <u>Default set to Disable.</u> To Select Vibration type; “Disable”, “Short”, “2 Times”, “Long”. | |
| Output Mode | Select a method based upon the barcode scanning application you will use. | |
| | Key Emulation | A unit continues a unit, fast showing barcode number. |
| | <u>Copy & Paste</u> | Once show barcode number. |
| | Clipboard | Not show the barcode number. |
| Read Mode | To Setup Barcode scan engine <u>Single</u> or Multiple Read | |

3.2.1.2 “Format” Tab

Figure 3-3 Scan Tab

Table 3-2 Basic Description

| Field Name | Description | |
|----------------------|--|---|
| Prefix | Type the desired label prefix in this text box | |
| Suffix | Type the desired label suffix in this text box | |
| Terminal Char | None | After showing barcode, do not action |
| | <u>Enter</u> | After showing the barcode, jump to next row |
| | Space | After showing the barcode, jump one unit |
| | Tab | After showing the barcode, jump a section |
| Code ID | <p><u>Default set to Disable. When use “Code ID”, the “Prefix” function will disable automatically.</u></p> <p>Select :</p> <p>“Opticon ID”, ”AIM/ISO15424 ID”, “Opticon ID + Length(2/6)”, “AIM/ISO15424 ID + Length(2/6)”, “Opticon ID + Length(6/6)”, “AIM/ISO15424 ID + Length(6/6)”.</p> | |

3.2.1.3 “Bar Codes” Tab:

Select the barcode symbologies you plan to scan from the list. Tap to enable/disable the desired symbologies.

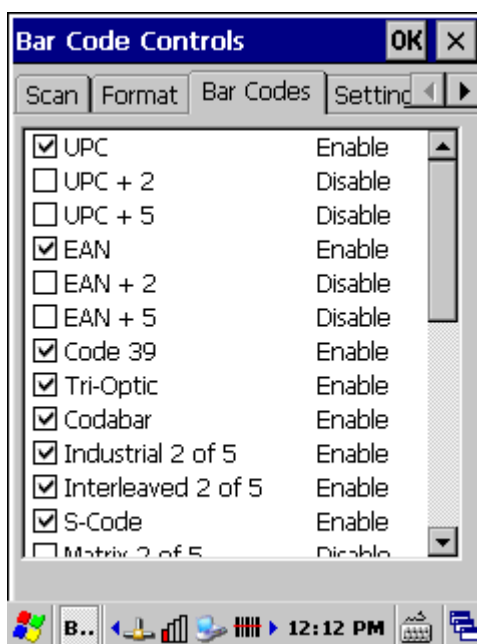

Figure 3-4 Bar Codes Tab

Table 3-3 Bar Codes Description

| Barcode Symbology | | Description |
|-------------------------------------|--------------------------|--|
| <input checked="" type="checkbox"/> | UPC | Universal Product Code. The standard bar code type for retail products in the United States |
| <input type="checkbox"/> | UPC + 2 | Universal product code seen on almost all retail products in the USA and Canada |
| <input type="checkbox"/> | UPC + 5 | Universal product code seen on almost all retail products in the USA and Canada |
| <input checked="" type="checkbox"/> | EAN | European Article Numbering system. The international standard bar code for identifying packages, shipping containers, parts practically anything |
| <input type="checkbox"/> | EAN + 2 | Added for a total of 14 data digits |
| <input type="checkbox"/> | EAN + 5 | Added for a total of 17 data digits |
| <input checked="" type="checkbox"/> | Code 39 | General-purpose code in very wide use worldwide |
| <input checked="" type="checkbox"/> | Tri-Optic | Media Barcodes |
| <input checked="" type="checkbox"/> | Codabar | Older code often used in library systems, sometimes in blood bar |
| <input checked="" type="checkbox"/> | Industrial 2 of 5 / IATA | Older code not in common use |

| | | |
|-------------------------------------|--------------------|--|
| <input checked="" type="checkbox"/> | Interleaved 2 of 5 | Compact numeric code, widely used in industry, air cargo, other applications |
| <input checked="" type="checkbox"/> | S-Code | This symbology encodes like Interleaved 2 of 5 but encodes the last data character as Industrial 2 of 5. The number of data digits is therefore always an odd number |
| <input type="checkbox"/> | Matrix 2 of 5 | Used in miscellaneous industrial applications, and mechanical numbering systems |
| <input type="checkbox"/> | Chinese Post | Used by China Postal Service for automated mail sorting |
| <input type="checkbox"/> | Korean Postal | Authority code is a fixed length numeric symbology with a mandatory check digit |
| <input checked="" type="checkbox"/> | IATA | A variable length symbology with an optional check digit and non printable start/stop characters |
| <input checked="" type="checkbox"/> | MSI / Plessey | MSI: Variation of the Plessey code commonly used in USA. Plessey: Older code commonly used for retail shelf marking. |
| <input checked="" type="checkbox"/> | Telepen | A variable length symbology with an optional check digit and non printable start/stop characters |
| <input checked="" type="checkbox"/> | UK / Plessey | A variable length symbology with a mandatory checksum and non printable start/stop characters |
| <input checked="" type="checkbox"/> | Code128 | A variable length symbology with a mandatory check digit and non printable start/stop characters |
| <input checked="" type="checkbox"/> | Code 93 | Compact code similar to Code 39. |
| <input type="checkbox"/> | Code 11 | Used primarily for labeling telecommunications equipment. |
| <input type="checkbox"/> | RSS 14 | Reduced Space Symbology. Application Identifier "01" and 14 digits |
| <input type="checkbox"/> | RSS Limited | Reduced Space Symbology. Application Identifier "01" and 14 digits |
| <input type="checkbox"/> | RSS Expanded | Reduced Space Symbology. 74 numeric or 41 alpha characters |
| <input checked="" type="checkbox"/> | PDF417 | A variable size multi row (stacked) symbology with selectable error correction levels |
| <input checked="" type="checkbox"/> | Micro PDF417 | A variable size multi row(stackd) symbology with fixed error correction levels |

3.2.1.4 “Settings” Tab:

Figure 3-5 Settings Tab

Table 3-4 Settings Description

| Field Name | Description |

3.2.3 Bluetooth Device Properties

Note: Here are two ways to use Bluetooth Device.

1. Tap “Start” > “Programs” > “Bluetooth” > “Bluetooth Manager”.
2. Tap “Start” > “Settings” > “Control Panel” > “Bluetooth Device Properties”.

Table 3-22 Bluetooth Device Properties

| ICON | ITEM & FUNCTION |
|---|---|
|  | <ul style="list-style-type: none"> ● “BT Service” Tab: (Figure 3-30) |
| | <ul style="list-style-type: none"> ✓ Tap “Bluetooth Device Properties” to enable Bluetooth device(Figure 3-30). ✓ Wait for 10 seconds in order to initialize the Bluetooth hardware correctly. ✓ Tap the “Scan Device” button to initiate a scan for Bluetooth hardware. The Bluetooth manager lists the Bluetooth devices that it finds, see Figure 3-33. If Bluetooth hardware is not found the <i>Bluetooth Hardware Error</i> window appears, see Figure 3-34. Table 3-23 described the Bluetooth Icons. ✓ Double tap the device to connect to on the device list. The Bluetooth Manager Authentication window appears. Tap No to connect to the device without authentication, or tap Yes to authenticate the device before connecting. (Figure 3-35) ✓ If the Yes button was selected in the Bluetooth Manager Authentication window, the enter PIN windows appears. Enter a PIN (between 1 and 16 characters) in the <i>Enter PIN:</i> text box, and tap OK. The mobile computer sends the PIN request to the device for bonding. (Figure 3-36) ✓ When prompted, the same PIN must be entered on the other device. When the PIN is entered correctly on the other device, the  bonded icon appears on the device list. (Figure 3-37) |
| | <ul style="list-style-type: none"> ● “Serial Port” Tab: (Figure 3-38) |
| <ul style="list-style-type: none"> ✓ Tap “Start” > “Programs” > “Bluetooth” > “Bluetooth SPP Manager” and Tap “Scan Device” ✓ Wait for 10 seconds in order to initialize the Bluetooth hardware correctly ✓ Select which device you want to use | |

- ✓ If want to use Virtual com, only SPP base profiles are supported.(i.e. Printer, Modem, and LAP).Switch to “Serial Port” tab, and will see the devices you had trusted or active. Select the device that you want to map a virtual com and which virtual com you want to use see **Figure 3-38**
- ✓ Now COM6 has mapped for BT device see **Figure 3-40**

Note: If the device to which the mobile computer is bonding does not appear in the list, ensure it is turned on, in discoverable mode, and within range (30 feet / 10 meters) of the mobile computer.

Table 3-23 **Bluetooth Icon**

| Icon | | Description |
|---|-----------------------|--|
|  | Unknown device icon | Device is not defined |
|  | Locked icon | Device is locked and cannot be bonded to. |
|  | Not locked icon | Device is not locked and can be bonded to. |
|  | Bluetooth device icon | Bluetooth device |
|  | Bonded device icon | Bonded Bluetooth device |
|  | Mobile device icon | Device is a mobile device |
|  | Phone icon | Device is a phone. |
|  | Printer icon | Device is a printer |
|  | Network icon | Device is a network. |
|  | Linked icon | Device is linked. |

3.2.4 Certificates

Certificates are used by some applications for establishing trust and for secure communications.

Certificates are signed and issued by certificate authorities and are valid for a prescribed period of time. Windows CE manages multiple certificate stores.

Table 3-24 **Certificates**

| ICON | ITEM & FUNCTION |
|---|---|
|  | <ul style="list-style-type: none"> ● “Store” Tab: (Figure 3-43) |
| | <ul style="list-style-type: none"> ✓ In the Stores tab, select the certificate store you wish to view or modify from the drop-down list (Figure 3-43). ✓ The “Trusted Authorities” store lists the top-level certificates for authorities you trust. (Figure 3-43) ✓ The “My Certificates” store contains your personal certificates, which you use to identify yourself ✓ Intermediate certificate authorities that help establish a chain of trust are stored in the “Other Authorities” store |
| | <ul style="list-style-type: none"> ● “Store” Tab: (Figure 3-44) |

- ✓ To add a certificate or associated private key to the selected store, select **“Import”**(**Figure 3-44, Figure 3-45**)
- ✓ To view more details of the selected certificate, such as the expanded name or expiration date, choose **“View”** (**Figure 3-46**)
- ✓ To delete the selected certificate from the store, choose **“Remove”**

Chapter 4. Communication

4.1 Installing & Setting Up Microsoft ActiveSync

4.1.1 Installing Microsoft ActiveSync on the Host PC

Microsoft ActiveSync is a file transfer tool to synchronize the files on a PC with the files on your Device.

To install Microsoft ActiveSync, complete the following steps on the PC:

1. Go to the Microsoft Windows CE.NET website and download the latest current version of ActiveSync:

<http://www.microsoft.com/windowsmobile/en-us/help/synchronize/device-synch.mspix>

2. Install the latest version of Microsoft ActiveSync on the host PC.
3. Open ActiveSync.
4. Select **File > Communication Settings** from ActiveSync's menu bar.
5. Go to "**Using ActiveSync**" on page 4-1 to continue using ActiveSync.

4.1.2 Connecting Device to Host PC

1. You can use a Micro USB cable to connect the Device directly or by a cradle to Host PC.
 - To use the dock, you must first insert the Device into the slot, making sure that the unit is firmly seated the dock.
2. Connect the dock or Device to the power adapter and power source.

4.2 Using ActiveSync

Use ActiveSync to transfer and synchronize files between the Device and the Host PC.

4.2.1 Setting up a Partnership

During the Microsoft ActiveSync installation, you were prompted to create a partnership with your mobile device. When you set up a partnership, you select synchronization and file conversation settings, which are contained in a file on your desktop computer. This file enables your desktop computer to recognize your device. Only devices that have a partnership with a desktop computer can synchronize information between the two computers.

For more information on partnerships, please refer to your Microsoft ActiveSync documentation or help file.

Transferring Files:

To transfer files, complete the following steps on the host PC:

- ✓ Insert Micro USB cable to Device and connect to PC.
- ✓ After you have established a connection with Device, tap the “**Explore**” button at the top of the **ActiveSync** window (or select **Explore** from the File menu).
- ✓ Navigate to the target directory on your Device and copy the desired file by using the **Copy/paste** method or dragging and dropping the desired file(s) into the folder.

4.2.2 ActiveSync File Synchronization

ActiveSync files synchronization requires an ActiveSync partnership between the Device and the Host PC. Refer to “Setting up a Partnership”, above:

- ✓ Select the files in the synchronization configuration for the Device partnership.
- ✓ Select **Tools > Options** from the ActiveSync command bar to configure the synchronization options.
- ✓ Place the file to be synchronized in the **Synchronization** folder created you’re **My Documents** directory. Defaults to the desktop. During the ActiveSync connection, all files in the **Synchronization** folder will be synchronized to the **\My Documents** directory on the Device.

Figure 4-1 Connected

4.3 Networking

Please see the **3.2.13 Owner, Table 3-31 Owner** on page 3-61 for **setting up the network ID**. And see the **2.5.6 Setting Up Wireless LAN RF** to setup the 802.11a/b/g Wireless LAN for RF connecting.

Chapter 5. Software Applications

5.1 Introduction

You can switch to any software program by tapping the Start Menu.

5.2 Software Applications

5.2.1 Internet Explorer

With Internet Explorer, you can view Web or intranet Web pages on your device. You will need to use a modem or WLAN to connect to an Internet server provider (ISP) or network.

5.2.1.1 Connect to the Internet

Before you can view Web pages, you must set up a remote connection to your ISP or network.

5.2.1.2 Start Internet Explorer

- ✓ Open Internet Explorer by selecting **Start > Programs > Internet Explorer**.
- ✓ To get default home page, navigate to the desired default web page.
- ✓ Select **View > Internet Options** from the command bar.
- ✓ Enter the desired URL in the **Start page** field.
- ✓ Press the **OK** button.

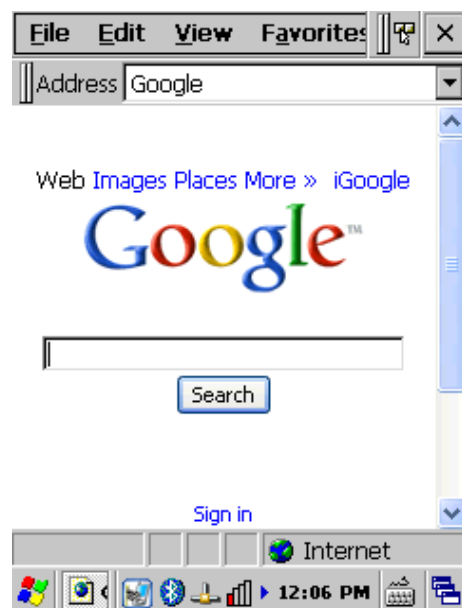

Figure 5-1 Internet Explorer

5.2.1.3 Navigation Control

Internet Explorer uses sliding menus for application and navigation control. Tap and drag the sliding menus to the left or right to see the hidden menu items and toolbars.

To achieve more screen real estate in Internet Explorer, you can hide the **Status** bar and **View** menu. From the top menu bar, go to **View > Hide Toolbars**.

Once it is hidden, you must cold reset to access these features again. Refer to 2.7.2 “**Cold Reset**” for more information.

5.2.1.4 Set up a proxy server

Proxy servers are often used when connecting to the Internet through a local network, such as a corporate network, for added security.

- ✓ Select **View > Internet Options > Connection** Tab.
- ✓ Select **Access the Internet using a proxy server**.
- ✓ Enter the proxy server address and port. For more information, see your administrator.
- ✓ To bypass the proxy server for local address, such as corporate intranet pages, select **Bypass proxy for local address**.

5.2.1.5 Enable Cookies

A cookie file contains information about your identity and preferences so that a Web site can tailor information to your needs. The Web site sends the file and it is stored on your mobile device.

- ✓ Select **View > Internet Options > Security** Tab.
- ✓ Select **Allow cookies**.

5.2.1.6 Search for an Internet Site

- ✓ Select **View > Go > Search** to search the web.

5.2.1.7 Go to an Internet address

- ✓ Select **Address Bar**, if necessary to display the Address bar
- ✓ Enter the address
- ✓ Press “**ENTER**” key.

5.2.1.8 View previously visited sites

- ✓ Tap the **Arrow** button at the right side of Address Bar
- ✓ Select the **Web Address** you want to view.

5.2.1.9 Add and view Favorites

- ✓ Go to the page you want add
- ✓ Select **Favorites > Add To Favorites**.
- ✓ If necessary, locate the folder you want.
- ✓ Confirm or change the name.
- ✓ To view your favorite Web sites, select **Favorites** and the Web site you want to view.

Note:To organize your Favorites list, select **Favorites > Organize Favorites**.

5.2.1.10 Browse Web pages

- ✓ To move to a page you have previously view, select **View > Back**
- ✓ To move to the next page (provided you have viewed it previously), Select **View > Forward**.
- ✓ To return to your Home page, select **View > Go > Home**.

5.2.1.11 Refresh current page

- ✓ Select **View > Refresh**.

5.2.1.12 Stop loading a page

- ✓ Select **View > Stop**.

5.2.1.13 View current page

- ✓ Select **View > Internet Options**
- ✓ To view the protocol, page type, size, and address, selects the **General** tab.
- ✓ To view security information about the page, select the **Security** tab.

5.2.1.14 View HTML source code

- ✓ While viewing the page, select **File > Save As** and save the file as .txt file.
- ✓ Open the file in a word processing program, such as **WordPad**.

5.2.1.15 Change home and search page settings

- ✓ Open the page you want to use as your home or search page.
- ✓ Select **View > Go > Home** or **Search**.

5.2.1.16 Save a copy of current page

You can save Web pages and view them later when you're disconnected

from the Internet or Intranet without using cached memory.

- ✓ Select **File > Save As**
- ✓ Specify a folder location and give the file name.

5.2.1.17 Copy a Web page to a document

- ✓ Select all or part of the Web page you want to copy.
- ✓ Select **Edit > Copy**.
- ✓ Go to the document where you want to place the information and select the location.
- ✓ Select **Edit > Paste**.

5.2.1.18 Select security Options

- ✓ Select **View > Internet Options > Security** tab
- ✓ Select the security protocols you want.

5.2.1.19 Change the font size

- ✓ Select **View > Text Size** and select the desired size.

5.2.2 Microsoft WordPad

You can create and edit documents and templates in WordPad, using buttons and menu commands that are similar to those used in the desktop version of Microsoft Word. You can work with files Normal or Outline view. WordPad documents are usually saved as **.pwd** files, but you can also save documents in other file formats, such as **.rtf** or **.doc**.

5.2.2.1 Selecting and Editing Text

- ✓ **Select text**

| To select | Do this |
|--------------------|----------------------------------|
| Any amount of text | Drag the stylus over the text. |
| A word | Double-tap the word. |
| A single paragraph | Triple-tap within the paragraph. |
| An entire document | Select Edit > Select All |
| An picture | Tap the picture |

- ✓ **Find text**

- To search for text in one part of a document, select that part. Otherwise, the whole document is searched.

- Select **Edit > Find**
 - Enter the text you want to find. For a paragraph, enter **^p**. For a tab stop, enter **^t**.
 - Select the search options you want.
 - To continue searching, select **Edit > Find > Next**.
- ✓ **Replace text**
- To replace text in one part of document, select that part. Otherwise, the whole document is searched.
 - Select **Edit > Replace**.
 - Enter the text you want to find and the text you want to replace it with. For a paragraph, enter **^p**. For a tab stop, enter **^t**.
 - Select the replacement options you want.
 - Select **Find Next**.
 - On the **Find/Replace** toolbar, select the appropriate button.
- ✓ **Move, copy, or delete text**
- Select the text you want to move, copy, or delete.
 - To move or delete text, select the **Cut** button. To copy the text, select the **Copy** button.
 - To paste the information, move the insertion point to the desired location, and select the **Paste** button.

Notes:

- To undo an action, select **Edit > Undo**.
- To restore the action, select **Edit > Redo**.

5.2.2.2 Formatting Text

- ✓ **Create bulleted and numbered lists**
- Select the **Bullets** or **Numbering** button.
 - Type the first item.
 - Press **ENTER**, type the next item, and repeat as needed.
 - Select the button again to end list formatting.

Note: To change the number style for the selected list, select **Format > Paragraph**, In the **Format** list, select the style you want.

- ✓ **Set the default font**
- Select **Format > Font**.
 - Select the font you want.

- Select **Set As Default**
- To confirm that your changes will be applied to subsequent documents you create, select **Yes**.

Note: To apply the default font and stylus to selected text, select **Apply Default**.

- ✓ **Select a different font**
 - Select the text you want to change. To select all text, select **Edit > Select All**.
 - From the **Font** list, select the font you want.
 - From the **Font Size** list, select a size.

Note: To see more formatting options, select **Format > Font**.

- ✓ **Change font formatting**
 - Select desired text.
 - Select the **Bold**, **Italic**, or **Underline** button.
 - To change the color, select **Format > Font** and select the color you want from the **Color** list.

- ✓ **Adjust the paragraph alignment**
 - Select the paragraph you want to align.
 - Select the **Align Left**, **Center**, or **Align Right** button.

Note: To see more formatting options, select **Format > Paragraph**.

- ✓ **Indent a paragraph**
 - Select the paragraph you want to indent.
 - Select **Format > paragraph**.
 - Adjust the indentation settings as needed.

- ✓ **Set tabs**
 - Select **Format > Tabs**.
 - Change the tab settings as needed.

5.2.2.3 Adjusting the Display

- ✓ **Wrap text in the window**
 - Select **View > Wrap to Window**.
- ✓ **Display the document using the full screen**
 - Select **View > Full Screen**.
 - To exit Full Screen view, select **Restore**.

- To move the **Restore** button, drag the bar on the left side.
 - ✓ **Display or hide scroll bars**
 - Select **View > Horizontal Scroll Bar** or **Vertical Scroll Bar**.
 - ✓ **Zoom in or out**
 - Select **View > Zoom**, and select the desired percentage.
- Note:** For **Custom**, enter the exact percentage and select **OK**.

5.2.2.4 Working in Outline View

- ✓ **Switch between Normal and Outline views**
 - Select **View > Normal** or **Outline**.
- ✓ **Assign and change outline levels**
 - Select **View > Outline**.
 - Select the appropriate buttons on the toolbar.

5.2.2.5 Inserting Symbols

- ✓ Place the insertion point where you want to insert the symbol.
- ✓ Select **Tools > Insert Symbols**.
- ✓ Select the symbol you want, and then select **Insert**.

Tips:

If you select a different font (or subset of a font), a different set of Symbols will be displayed.

5.2.2.6 Printing a Document

- ✓ Select **File > Print**.
- ✓ Select the printing options you want.

Tips:

- **Port** list the available printer ports
- If **Network** is selected from the **Port** list, enter the path to the network printer to the **Net Path** box.

5.2.2.7 Setting a password for a Document

- ✓ Select **File > password**.
- ✓ Type and verify the password.
- ✓ You must save the document (**File > Save**) to return the password.

5.2.2.8 Converting Documents

✓ **About document conversion**

If an e-mail program is installed on your device and you receive an attached Word document or template created in Word version 6.0 or later, WordPad will convert the file on your device. To view the document, simply open the attachment in your e-mail program or open the file in the WordPad.

During conversion, some formatting attributes may be changed or lost. To avoid losing these attributes permanently, close the file after viewing it rather saving the file on your device. If you save the file, save with a different file name.

For more information about conversion performed on your device, see the following topics.

✓ **Changes caused by Word document conversion**

➤ **Formatting**

- **Borders and Shading**

Borders and shading are not displayed in WordPad, but are restored when converted back to a Word document. Shading is not restored when used in a table, but simple borders are restored.

- **Character formatting**

Bold, italic, strikethrough, superscript, subscript, and hidden text are retained and displayed. Other effects are changed or removed.

- **Colors**

Colors are retained and mapped to colors available on your device.

- **Fonts and font sizes**

Fonts not supported by your mobile device are mapped to the closest font available in WordPad.

- **Page Formatting**

Headers, footers, footnotes, columns, pages setup information, and style sheets are removed during conversion to WordPad. WordPad supports built-in headings.

- **Paragraph formatting**

Tabs, alignment, bullets, indentation, simple numbered lists, and paragraph spacing are retained and displayed in WordPad.

- **Pictures**
Pictures are removed during conversion.
- **Table of Contents**
Table of Contents text and some formatting are preserved. However, any text set at right-aligned tab stops may wrap to the next line.
- **Index**
Index text and some formatting are preserved.
- **Tables**
Tables appear as tab-delimited text. Cells containing wrapped text, tabs, or paragraph markers may be difficult to read. Simple tables are displayed accurately and restored when you convert the WordPad file back to a WordPad document.
- **OLE Objects**
OLE Objects are removed during conversion.
- **Revisions marks, annotations, and comments**
Revision marks are visible but cannot be changed. Annotations and documents are removed during conversion.

5.2.3 Remote Desktop

Using Remote Desktop Connection, you can log on to Windows Terminal Server and use all programs installed on this server. For example, instead of running Microsoft Pocket Word, you can run the desktop version of Microsoft Word.

5.2.3.1 Connecting to Terminal Server

- ✓ Select **Start > Programs > Remote Desktop**, or run 'CETSC' from the command prompt.
- ✓ In the Server box, type or select a Terminal Server name or TCP/IP address, or select a server in the drop-down list.
- ✓ Select **Connect**.
- ✓ In the **Remote Desktop** window, type your user name, password, and domain(if required), and then select **OK**.

Figure 5-2 Remote Desktop Connection

5.2.3.2 Disconnecting Without Ending a Session

- ✓ In the **Remote Desktop Connection** window, select **Start > Shutdown**.
- ✓ Select **Disconnect > OK**.

Note: If you previously disconnected from a Terminal Server without ending the session, the Terminal Server will continue to execute any running processes and Remote Connection can later reconnect to this same session (if your administrator has configured Remote Connection to reconnect to disconnected sessions).

5.2.3.3 Disconnecting and Ending a Session

- ✓ In the **Remote Connection** window, select **Start > Shutdown**.
- ✓ Select **Log Off > OK**.

5.2.4 Windows Explorer

Windows Explorer works almost the same on your Device as it does on your PC. See the topics below for information about the difference in Windows Explorer on your device.

5.2.4.1 Navigating in File View

- ✓ **Go forwards and Back**
 - To go to the previous folder, select **Go > Back**.
 - To go to the next folder (which you have just viewed), select **Go > Forward**.

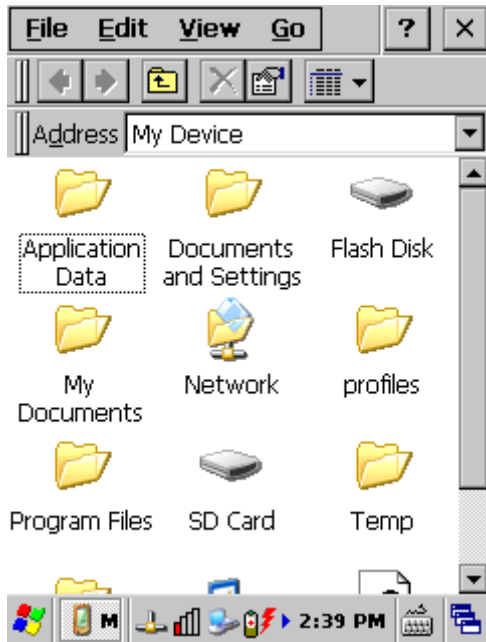

Figure 5-3 Windows Explorer

- ✓ **Use the Go menu**
 - To quickly access the My Documents folder, select **Go > My Documents**
 - To see all of the folders you have accessed, select **Go > History**. Double-tap a folder to return to it.

5.2.4.2 Viewing Files as Icons Lists

- ✓ To view icons, select **View > Large Icons** or **Small Icons**.
- ✓ To view a list, select **View > Details**.

5.2.4.3 Working with Files and Folders

- ✓ **Create a new folder**
 - If necessary, open the folder where you want the new folder to reside.
 - Select **File > New Folder**.
- ✓ **Add a folder to your Favorites list**
 - Open the folder
 - Select **Favorites > Add to Favorites**.
 - In the **Name** box, type the shortcut name.

Tips:

- To open a favorite file or folder, select **Favorites** and then select the folder.
- To organize your favorites, select **Favorites > Organize Favorites**.

- ✓ **Transfer a file using infrared**
 - To send a file, select it, line up the infrared ports, and select **File > Send To > Infrared Recipient**.
 - To receive a file, line up the infrared ports, and select **File > Receive**.

5.2.4.4. Creating Desktop Shortcuts

- ✓ Display the file or Web page for which you want to create a Shortcut.
- ✓ Select **File > Send to**.
- ✓ Select **Desktop as Shortcut**.

5.2.4.5 Switch to Internet

- ✓ Type a URL in the Address bar.

5.3 Flash Disk

The FlashDisk let the application or a data file can be stored into the Flash Memory.

Note: The FlashDisk storage memory persists all reset (warm/cold reboot) conditions and software/firmware updates.

We strongly recommends installing all applications, applets, programs, and important data files to the FlashDisk location.

Caution:

If an application or a data file is only installed or saved in RAM, a hard reset will result in the loss of that application or data file.

5.3.1 Saving to Flash

To save an application or data to the Flash Memory, from your current application, select **File > Save As >** navigate to the **FlashDisk** location and save it.

5.3.2 FlashDisk Location

To access the contents of FlashDisk storage:

- ✓ Double-tap the **My Computer** icon on the desktop.
- ✓ Double-tap the **FlashDisk** icon to view **FlashDisk**.

Figure 5-4 FlashDisk

5.3.3 FlashDisk Size

The size of the FlashDisk will vary, depending on the size of system firmware.

- ✓ Inside the **FlashDisk** directory, tap **File > Properties**.
- ✓ The **FlashDisk Properties** dialog:

The number following **Free** is the amount of memory currently available on your device.
