

Document Capture in the Legal Environment

An organized, efficient document management strategy is essential to operating a successful law firm. The ability to find crucial records can mean the difference winning or losing a case. The Federal Paperwork Reduction Act requires electronic filing of all documents in federal cases. Electronic document management is no longer a luxury, it's the law.

SimpleIndex lowers costs by automating the data entry required to organize scanned files, extracting key information using powerful recognition features normally found only in large, expensive scanning solutions. **SimpleIndex** also works with electronic files like MS Office, PDF, e-mail, photos, audio and video clips, combining all case-related files into a single repository.

1-Click scanning with your existing hardware

SimpleIndex is ideal as an inexpensive, standalone application for small firms, or a distributed capture front-end for large firms. The low cost and powerful features of **SimpleIndex** make it a better alternative to the built-in scanning interface included within some case management systems, especially when documents are received from multiple remote locations.

Benefits of **SimpleIndex** to your Firm

- Automatically **Bates Stamp** documents.
- "E-file" information to the Courts.
- Use **SimpleSearch** or **Google Desktop** for research/discovery.
- Upload files into case management systems like **CaseMap**, **WORLDOX** or **Time Matters**.
- Burn case files to searchable CD or DVD.
- Eliminate the costs of off-site storage & courier services.
- Increase staff productivity, efficiency, and satisfaction.

SimpleIndex's most powerful feature is its simplicity! Complex scanning workflows can be performed with just a single click. Installation is quick, and training is minimal. You can even use your digital copier to scan files and let **SimpleIndex** process them automatically.
