Changing display information

The Stock Ticker and Info Extras can either be scrolled (moving from right to left in the display) or paged (one symbol at a time). To switch from one option to the other:

1. Press the **"menu"** button and select "Display Mode."
2. Choose either "Pages" or "Scroll." Press the **"select"** button to confirm.

Direct Tune

Normally as you press the arrow buttons, you can preview what's playing on other XM channels before actually selecting a channel. To automatically tune to a channel without having to press the **"select"** button, set the following option:

1. Press the **"menu"** button.
2. Select "Direct Tune."
3. Select "On." To return to the factory-default method, select "Off."

Auto-On

When you use your roadyXT in a car or truck, it normally turns on when you switch on the vehicle's ignition. If you prefer to manually turn on your roadyXT using its power button, set the following option:

1. Press the **"menu"** button.
2. Select "Auto-On."
3. Select "On." To return to the factory default, select "Off."

You should also set this option to "Off" if your roadyXT is connected to a power source that is always live.

Auto-Off and "sleep" timer

You can set your roadyXT to shut off the radio 1 to 3 hours after being turned on. Set this option if you have connected your roadyXT to a power source in your vehicle that is always live. Your roadyXT will then automatically shut off and prevent you from draining your vehicle's battery. You can also use this feature as a "sleep" timer.

1. Press the "**menu**" button.

2. Select "Auto-Off."

3. Select the desired time interval. Choose "Off" if you do not want to use the sleep timer.

Resetting to factory default

You can return your roadyXT to the state it was shipped from the factory. Be careful: this will erase all settings, including Stock Ticker, Info Extras, presets, display options, and audio options.

1. Press the "**menu**" button.

2. Select "Factory Default."

3. Select "Yes" to restore your roadyXT to the factory settings.

Other Things You Should Know

Care

You should be able to use your roadyXT during most of your daily activities. However, you should remember:

- If your roadyXT does get dirty, wipe the case with a soft cloth (lightly moistened with water if necessary), then wipe dry with another cloth. Avoid chemicals such as paint thinner, alcohol, or abrasive cleansers.

- It is best to keep your roadyXT out of direct sunlight or other sources of extreme heat.

> **Caution:** Refrain from using food or drinks near the roadyXT Spilling food or drinks on the unit could damage it. Also, improper antenna cable installation can cause a leak that could result in damage to your roadyXT and/or your vehicle.

Accessories (sold separately)

We're always developing useful and clever accessories for your roadyXT such as a Home Kit. Check our web sites, www.xmradio.com or www.delphi.com, or your favorite electronics retailers.

Troubleshooting

Your roadyXT should provide you with trouble-free performance without needing any servicing. If it does not appear to be working properly, first try to remedy the problem by following these steps:

1. Attach all connections firmly and securely.

2. Ensure the cigarette lighter adapter or auxiliary power socket is clean and free of corrosion.

3. Check the adapter fuse by unscrewing the ribbed end of the adapter. If required, replace with a 2-amp fuse only. If your cigarette lighter adapter does not have a removable end cap, then it is equipped with an internal fuse that resets itself after it is left unpowered for a period of time.

If you see this on the display:	You should:
NO SIGNAL Cause: The XM signal is being blocked.	Move your roadyXT away from the obstructed area (e.g., an underground garage).
ANTENNA Cause: Possible problem with XM antenna.	Connect the antenna. Make sure the cable and connectors are not damaged or kinked.
ANTENNA Cause: When using home stand or vehicle cradle, home or car antenna is not plugged in.	Make sure the home or car antenna is plugged into the home stand or vehicle cradle.
OFF AIR Cause: The channel selected is not currently broadcasting.	Tune to another channel.

If you see this on the display:	You should:
UPDATING Cause: Your roadyXT is being updated with the latest encryption code.	Simply wait a few seconds until the update is done.
--- Cause: You may have tried to tune to a channel that you have blocked or that you cannot receive with your subscription package.	To receive that channel, contact XM Satellite Radio at 1.800.967.2346.

If this happens:	You should:
The display is blank; nothing happens when you push the power button.	Check the power connections to your roadyXT.
You do not receive all XM channels you have subscribed to.	Your roadyXT may not be activated. Contact XM Satellite Radio (see page 10).
Audio sounds distorted when using the built-in FM transmitter.	Reduce audio output level (see page 17).
Audio is too soft when using the built-in FM transmitter.	Increase audio output level (see page 17).
No audio from your audio system.	Check whether your audio system can play a CD, or regular AM or FM stations. Then check the audio connections between your audio system and your roadyXT.
You cannot tune to a channel.	Contact XM Satellite Radio at 1.800.967.2346. Verify that you are authorized to receive that channel as part of your XM subscription, and that you have not asked XM Satellite Radio to block that channel.
No song title or artist name displayed.	Nothing is wrong with your roadyXT. That information may be in the process of being updated. On some sports and news channels, there is no title or artist information.
No audio when listening through your vehicle's FM radio.	Make sure that the vehicle's FM radio and your roadyXT are set to the same frequency (see page 16).

If this happens:	You should:
Audio has static while listening through an FM radio.	Change to another FM frequency (see page 16). If the problem persists and you are using the FM transmitter in a vehicle, use the Delphi FM Direct Adapter (model SA10112, sold separately).
Audio on XM instant traffic and weather channels sounds different from other XM channels.	Nothing is wrong with your roadyXT. These channels use a different audio technology than the other XM channels.

Contacting Technical Support

For additional information in solving problems with your roadyXT, contact Delphi Technical Support at 1.877.GO DELPHI (1.877.463.3574), 8:00 a.m.— 8:00 p.m. Eastern Time, Monday — Friday. Technical Support is also available at www.delphi.com.

Warranty

Delphi limited consumer warranty

Delphi Product and Service Solutions ("Delphi") warrants all XM Satellite Radio Products sold by Delphi (each "Product") to be free of defects in material and workmanship, subject to the following conditions:

The duration of Delphi's warranty with respect to each Product is limited to one (1) year from the date of sale to the original consumer purchaser.

No other express warranties are made with respect to any Product. All implied warranties, including warranties of merchantability and fitness for a particular purpose are limited to the warranty period set forth above. This warranty is not transferable and applies only to the original consumer purchaser of the Product.

Delphi will, as its sole obligation under this warranty, replace or repair, at its option, any Product that does not conform to this warranty. Products may be repaired or replaced with new or with refurbished items. This limited warranty does not cover defects in appearance, cosmetic or decorative items, including any non-operative parts. Under no circumstances will Delphi be liable for any incidental or consequential damages under this warranty or any implied warranties. These remedies are the customer's exclusive remedies for breach of warranty. This limited warranty only extends to customers who purchase the Products in the United States.

Delphi will not be responsible for damage resulting from any (i) deviation of Delphi's operating instructions as printed in Delphi's catalog or on any packaging, labels or other literature provided with a Product, (ii) installation of a Product in a manner which is inconsistent with Delphi's written instructions,
