

Install the Home Dock and Radio, and Connect an Audio Device

Select a location in close proximity to your stereo system or powered speakers for the *Bluetooth* Home Dock. The location should be easily accessible and provide good visibility of the display, but should not be located where it will be in direct sunlight, which will reduce the visibility of the display screen.

a. Connect the Home Power Adapter to the **red POWER** connector at the rear of the Home Dock, and plug it into an outlet.

b. If you plan to subscribe to satellite radio, connect the Indoor/Outdoor Home Antenna to the **silver ANT** connector at the rear of the Home Dock.

c. Place Lynx into the Home Dock and press the **Power button**.

d. Lynx will automatically connect via *Bluetooth* to the Home Dock. The *Bluetooth* Pairing Light will blink during the connection process, and become solid when connected. If for any reason Lynx fails to connect to the dock, see the section “**Bluetooth Connections**” for instructions on manually connecting the dock.

Once connected, you can remove Lynx from the dock and carry it with you.* To listen to satellite radio, or to use the Remote Control, Lynx must be in the dock.

The *Bluetooth* Home Dock can be connected to your stereo system, or to a set of powered speakers.

To Connect the Home Dock to Your Stereo System:

a. Using the provided Stereo Audio Cable, connect the single connector to the **green AUDIO** connector at the rear of the *Bluetooth* Home Dock.

b. Connect the white left and red right Stereo Audio Cable connectors to any available input other than PHONO on your stereo system. (If your stereo's inputs are marked red and black, connect the white plug to the black input.)

c. Turn the stereo system On, and set input on your stereo system for the AUX In or LINE In connection, or whatever input you have connected to.

To Connect the Home Dock to Your Powered Speakers:

a. Connect the powered speakers to the **green AUDIO** connector at the rear of the *Bluetooth* Home Dock.

b. Plug the powered speakers into a wall outlet.

c. Turn On the powered speakers.

Bluetooth Connections

Connecting Lynx to the *Bluetooth* Home Dock using *Bluetooth* provides a wireless streaming connection between them. You can take Lynx out of the dock and carry it with you and manage your listening experience from wherever you are.* (Listening to satellite radio, or using the Remote Control, requires Lynx to be in the dock.)

You can also use *Bluetooth* to connect Lynx with a *Bluetooth* stereo audio streaming device, such as headphones, earbuds, speakers, etc., devices which use the A2DP profile.

Lynx will automatically pair with and connect to the *Bluetooth* Home Dock when you insert Lynx into the dock. Once connected, you can remove Lynx and carry it with you.

To Connect Lynx without inserting it into the Bluetooth Home Dock:

To connect using Lynx:

a. Tap **Home** , tap **>**, tap **Connect** .

b. From the **Bluetooth Settings** menu tap **Bluetooth** to turn it on, if it's not already on. A check mark will appear in the box at the right once *Bluetooth* is on. Lynx will scan for and show available *Bluetooth* devices under **Bluetooth devices**.

c. Tap the dock name in the list and Lynx will connect with the dock. If successful, the **Connected to...** message will be displayed below dock name.

To connect using the *Bluetooth* Home Dock:

a. Press the **Power** button on the top rear of the *Bluetooth* Home Dock. The *Bluetooth* pairing light on the right side of dock will begin to blink. Once connected, the light will be steady.

To Connect Lynx to a Bluetooth Device Other Than the Bluetooth Home Dock:

If you had previously paired the device with Lynx, tap **Home** , tap **>**, tap **Connect**  and tap the *Bluetooth* device in the list.

To use a new *Bluetooth* device, you'll need to pair and connect it with Lynx. You'll need to know how to place your *Bluetooth* device in discoverable mode and may also need the passcode.

a. Tap **Home** , tap **>**, tap **Connect** .

b. From the **Bluetooth Settings** menu tap **Bluetooth** to turn it on, if it's not already on. A check mark will appear in the box at the right once *Bluetooth* is on. Lynx will scan for and show available *Bluetooth* devices under **Bluetooth devices**.

c. If necessary, consult the instructions for your *Bluetooth* device and place the device in *Bluetooth* discoverable mode.

d. Tap the *Bluetooth* device you wish to connect to. (You may be prompted for the passcode for the device. If so, enter the passcode.) If pairing is successful, the **Paired but not connected** message will be displayed below the *Bluetooth* device name.

e. Tap the *Bluetooth* device name again and a menu will be displayed with the choices **Connect**, **Unpair**, **Options...** Tap **Connect** and Lynx will connect to the device. If successful, the **Connected to...** message will be displayed below your *Bluetooth* device name.

*Bluetooth range is generally up to 30 feet, but the actual distance may vary depending upon the location of the *Bluetooth* Home Dock.

Subscription Options

SiriusXM offers two subscription options, Internet radio and satellite radio. Subscribing to both provides you with the complete experience of Lynx, giving you access to all of the features Lynx has to offer. Whether you're in your home, in your vehicle*, out walking or jogging, or within range of a Wi-Fi network, you'll always have a variety of content to which you can listen.

Internet radio provides the ability to listen to SiriusXM using a Wi-Fi connection. Whether in your home, or at any establishment that has Wi-Fi, you can listen to live SiriusXM radio. (An Internet radio subscription also provides the ability to listen to SiriusXM using your computer.)

If you plan to subscribe to Internet radio only, consult the Quick Start Guide which accompanied your Lynx, the section titled “Subscribe Lynx to SiriusXM Internet Radio”. You can always subscribe to satellite radio later if you change your mind.

Satellite radio adds additional exciting features such as the ability to “Love”  the song to which you're listening, and build your own personal channel (My SXM Channel). Select the artists of “Loved” songs and Lynx will find and add additional songs by the artists to your channel. Another feature a satellite radio subscription provides is Radio Replays. When you select channels as favorites, Lynx will record content from those channels for playback when you are on-the-go, or whenever you want to listen to them.

Continue with the next panel if you plan to subscribe to satellite radio. You can subscribe to both Internet radio and satellite radio at the same time.

*To listen to satellite radio in your vehicle you will need to purchase the LV1 Vehicle Kit.

Install the Indoor/Outdoor Home Antenna and Subscribe to Satellite Radio

This step is optional and only necessary if you will be subscribing to SiriusXM satellite radio. The Indoor/Outdoor Home Antenna needs to be installed so that it has a clear view to the satellites in the south sky.

a. Open the antenna clamshell approximately half way, and place the antenna in a window that faces south. Place the antenna on the windowsill making sure it faces the glass and not the window frame. There should be nothing outside the window which would block the antenna's clear view of the sky, such as a building, trees, or shrubs.

Not sure which way is south? Think about where the sun rises (in the east) and sets (in the west). Then stand so that east is to your left and you'll be facing south. Is there a window in the direction you're facing? Place the antenna in that window.

b. Avatar will check the signal strength. If **Signal Found** is displayed, tap **Continue** to proceed with the audio check. If Avatar displays **No Signal/Check Antenna**, try repositioning the antenna in a different south facing window, and tap **Not getting a signal?** to proceed and try again.

If you were unable to find an indoor location where the antenna could receive the signal, you will need to place it outdoors instead, facing the south sky. You can also refer to www.siriusxm.com for additional help and support for installing the Indoor/Outdoor Home Antenna.

If you have connected the Indoor/Outdoor Home Antenna, but have not yet subscribed to SiriusXM satellite radio, follow the instructions on the **Activation** screen to subscribe. You may need to turn Lynx off, and then on again to show the Activation screen.

a. You will need the Radio ID which can be found:

- on the **Activation** screen
- by tuning to channel 0
- on a label on the bottom of the gift box
- on the label inside the rear cover of Lynx

The Radio ID does not use the letters I, O, S, or F.

b. Lynx should still be in the *Bluetooth* Home Dock and displaying the **Activation** screen.

- **By phone:** Call **1-800-967-2346**
- **Online:** Go to **www.siriusxm.com/activatenow**

c. Activation usually takes 10 to 15 minutes after you have completed the subscription process, but may take up to an hour. We recommend that Lynx remain on and in the dock until subscribed. Once subscribed, you'll be able to tune to the channels in your subscription plan.

If Lynx has a Wi-Fi connection, but you have not yet subscribed to SiriusXM Internet radio, Lynx will prompt you to set up Internet radio. Follow the instructions if you wish to subscribe to Internet radio.

Hardware and subscription sold separately. **Service will automatically renew for additional periods of the same length as the plan you choose, on the subscription package you choose (which may differ from the package which arrived with the radio) until you call us at 1-866-635-2349 to cancel. See our Customer Agreement for complete terms at www.siriusxm.com.** Activation fee of \$15, other fees and taxes apply. All fees and programming are subject to change.

Remote Control Button Functions & Battery

Pause and Replay Buttons:
Pause/Play button **II**
 Pauses or resumes playing of the currently tuned channel.

Rewind button **◀◀**
 Rewinds through content so you can hear-that-again. Tap to rewind to the beginning of a song or show segment. (Press+hold to continuously rewind through content.**)

Fast-Forward button **▶▶**
 Advances through content until live radio is reached. Tap to advance to the next song or show segment. (Press+hold to continuously rewind through content.**)

Numbers 1-5
 Selects the corresponding favorite channel in the current favorite page on the Now Playing screen.

Jump**
 If configured for traffic/weather, jumps to the traffic/weather for the city you have selected. If configured for last channel, jumps to the channel to which you had previously been listening.

Direct
 Directly tunes a channel by entering the channel number with the number buttons.

Power Button
 Press to turn Radio On; Press and hold to turn Radio Off.

My SXM Channel**
 Tunes to the virtual channel of all your 'Loved' and 'Loved Artist' songs.

Tune Up/Down Channels
 Immediately tunes up or down the channels.

Love**
 Saves the song to which you are listening to My Library for playback later.

Numbers 6-0
 Selects the favorite channel page, i.e., 6=page 1, 7=page 2, etc.

FM (PowerConnect only)
 Toggles through the FM presets. If no FM presets have been set, opens the FM Settings screen.

Battery Replacement. Turn the Remote Control over and remove the battery cover. Observe the orientation of the battery, then slide it out and replace it with a CR2025. Reinstall the battery cover.

* For music and comedy channels, you are limited to 1 rewind and up to 5 skip-forwards per hour.
 ** When listening to satellite radio.

Bluetooth Home Dock Buttons & Connectors

Bluetooth Home Dock Rear View

ANT (Silver)
 Connection for the Indoor/Outdoor Home Antenna (optional).

POWER (Red)
 Connection for Home Power Adapter.

AUDIO (Green)
 Connection for stereo system or powered speakers.

Bluetooth Home Dock Top View

Power Button
 Press and release to start Bluetooth pairing mode. When paired, press and release to turn off the dock's Bluetooth connection.

Bluetooth Home Dock Side View

Bluetooth Pairing Light
 Blinks when in pairing mode; steady when connected.
