Product: Smart phone

Trade Name: SKY

Model No.: Fuego 3.5M

Manufacturer: Shenzhen OVVI Technology CO., Ltd.

Address: Room 201, Block D, Number 16 LangShan Road, North
of Science Technology Park

Preface

Thank you for choosing the phone, operating on Google Android system 4.4.2, is designed for the WCDMA and GSM network environments. In addition to the general functions, a variety of useful features and services including music playback, camera, sound recording, Bluetooth[®] wireless connection, WIFI[®], web browsers, email, etc... In addition, the open Android platform offers abundant applications, adding value to mobile experience to satisfy all kinds of needs.

Security Notifications

Please read these simple guidelines. Non-compliance may be dangerous or illegal. This user manual provides more detailed information on security matters.

Safe Power on: When wireless device or equipment is prohibited or possible to cause interference or danger, do not switch on.

Safe driving: Please obey all traffic rules and regulations. Please drive with both of your hands.

INTERFERENCE: All wireless devices may be susceptible to interference, which could affect performance.

SWITCH OFF IN HOSPITALS Please follow the restrictions and switch off near hospitals.

SWITCH OFF IN AIRCRAFT Please follow the restrictions. Wireless devices may cause interference to aircraft.

SWITCH OFF WHEN REFUELING: Do not use the device at a refueling point and near fuels or chemicals.

SWITCH OFF NEAR EXPLOSION. Do not use the device during an explosion process.

Follow the documentation and use the product in normal positions. Avoid touching the antenna.

-  **QUALIFIED SERVICE:** Only qualified personnel may install or repair this equipment.

-  **Accessories and batteries:** Use only approved accessories and batteries. Do not connect with incompatible products.

-  This device is not waterproof. Please keep it dry.

-  Remember to backup all important information or keep a written record.

-  When connecting to other devices, read user guide for detailed safety instructions. Do not connect incompatible products.

-  **Emergency call:** ensure there is network available and phone function activated. Press the end button repeatedly to clear the display content and return to standby mode. Enter the emergency number, then press call button and provide your location. Please do not hang up without permission.

FCC Statements:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information:

This Mobile Phone meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: Fuego 3.5M (FCC ID: 2ABOSSKYFUEGO35M) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.382W/kg and when properly worn on the body is 0.933W/kg. This device was tested for typical body-worn operations with the back of the handset kept 10mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 10mm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components.

Body-worn accessories that do not meet these requirements may not comply with RF

exposure requirements and should be avoided. Use only the supplied or an approved antenna.
