Organizer

Enter this Organizer, You can view: Alarm, Calendar, Calculator, Bluetooth, SIM toolkit and Torch. It is convenient and good for you to arrange your life orderly every day and make your life become lively and beautiful.

Settings

- ◆ Profiles: This mobile phone is provided with several profiles. You can customize the ringtone according to events and environment. You can customize a profile and activate it. Available options are:
 - ❖ General
 - ❖ Silent
 - ❖ Meeting
 - ❖ Outdoor
- ◆ Phone settings: The phone has 1 languages: English. In this menu, you can perform: Time and date; Language; Pref. input method; Display, Flight mode.
- ◆ SOS Setting: You can set the SOS number and, when you need help in an emergency, press the "SOS" button to send the Messages you set.

- ◆ Security settings: To protect personal privacy, you can set SIM security and Phone security.
- ◆ Dual SIM settings: Due to dual SIM cards phone design, user can set SIM card by 'Dual SIM settings', Such as Dual SIM open, Only SIM1 open, Only SIM2 open and Flight Mode.
- ◆ Restore settings: To reset the factory setting, please input the password '1122'.

Services

In this menu, you can enter the Homepage, you can also manually enter the URL to search the information you need online

Call story

In the main menu, you can view Missed /Dialed /Received/All calls/Delete call logs .You can also press call key to enter call logs. Go to the advanced settings in the call settings and you can view: Blacklist, Auto call recorder, Answer mode.

Contacts

Phone can store up to 300 phone number of phone calls, and the SIM card contact ability depends on the network operator, please consult the local operators. Into the menu, you can see: View, Send text message, Call, Edit, Delete, Copy, Add to Blacklist, Mark several and Phonebook settings

Multimedia

◆ Audio player

Enter Audio player. Press left soft key to enter options: Play, Refresh list and Settings.

◆ FM radio

This phone can receive the channel without having to plug the headset, it is best to go to the signal good place to search the station for your convenience

◆ Recorder

Enter Sound recorder. Press left soft key and you can do: New record, List.

◆ **Image viewer**

With this function, you can select any picture and press left soft key to perform the following operations: View, Send, Use as, Rename, Delete, Image information.

◆ **Camera**

Camera supports photographing function .you can take pictures with the embedded camera and adjust the camera settings. If the mobile phone memory is insufficient, please delete certain pictures or other files in “File manager”.

◆ **Video recorder**

Press OK key to start video recording. The recording time depends on the time limit and the capacity of the memory card. Enter options to perform the following settings: Switch to camera, Camcorder setting, Video settings and Restore default.

◆ Video player

Enter Video player. Press left soft key to enter options: Play, Send, Rename, Delete.

File manager

File Manager explores the files in phone and external memory card. In this menu, you can manage the pictures, MP3 files and other folders etc in this menu.

FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or

television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

SAR Information Statement

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. * Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output. Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is **1.344W/Kg** and when worn on the body, as described in this user guide, is **0.597W/Kg**(Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements). While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure. The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on

FCC ID: **2ABOSSKYPANDA** Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) web-site at <http://www.wow-com.com>. * In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a sub-stantial margin of safety to give additional protection for the public and to account for any variations in measurements.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of **15mm** must be maintained between the

user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
