THE TRUE MEASURE OF THE GAME™

REGISTERING YOUR SKYCADDIE

Your SkyCaddie SX500 comes pre-loaded with over 35,000 courses worldwide and includes a 30-day trial to play right out of the box. The complimentary 30-day trial period will begin after your first round of golf. Within the trial period simply complete the registration process and sign up for a nominally priced SkyGolf® subscription plans to continue access to the most-accurate, most-detailed and most up-to date course maps in golf. Unlike its competition, SkyGolf walks every course to make sure you can trust your distances to play your best golf.

For information on registering with the SkyGolf 360 mobile app or CaddieSync Desktop app, please visit
www.SkyGolf.com/MySX500

EXTENDED WARRANTY OPTIONS (USA AND CANADA)

When registering your SkyCaddie SX500, you will be given the option of purchasing an Extended Warranty (U.S. or Canada only). This will extend the standard 6-month manufacturer's limited warranty to a 12-month warranty against defects in materials and workmanship.

Terms and conditions are listed online at
www.SkyCaddie.com

CHARGING YOUR SKYCADDIE

Please use the enclosed SX500 micro USB cable to charge your SkyCaddie. Other micro USB cables may not work with your device. The USB cable provided is specific to your SX500 that requires a longer connector due to its water resistant design. USB cables must be rated at 2 Amps for the SX500. Use of other connectors may create longer charging times or a failure to complete a full charge.

It is recommended that you charge your SX500 after each round.

HELPFUL TIPS

- Turn on your SkyCaddie SX500 outdoors, with a clear view of the sky, to receive satellite signals. Give it an initial five minutes before play to download the latest satellite data used to improve accuracy. The higher the strength on the GPS Signal Indicator, the higher the accuracy.

- To maintain optimal accuracy during play, make sure your SkyCaddie SX500 is always on and has a clear view of the sky. Do not put the SkyCaddie SX500 in your pocket or turn it on and off during play.

- While the SX500 is highly ruggedized, for best results treat it like your smartphone.

- Don't expose the SkyCaddie SX500 to extreme temperatures or water. Storing your SkyCaddie in areas that may allow the battery to freeze may result in diminished run time or failure.

- When cleaning and wiping the display use only a cloth intended for cleaning optics. Do not wipe with a towel or paper napkins. Use of the screen protector is highly recommended.

- Fully charge the battery before each round. The SX500 has the largest battery among rangefinders. So, in spite of its large and brilliant display and ultra-fast processor, you can expect 12-14 hours of play time by utilizing optional battery management features such as auto-dimming commonly used on smartphones.

- Never disconnect or turn off your SkyCaddie SX500 while it is syncing. Wait until it is finished communicating before you disconnect it, power it off, or power off your computer.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which

the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the

following two conditions:

(1) this device may not cause harmful interference, and (2) this device must

accept any interference received, including interference that may cause

undesired operation.

RF Exposure Information:

FCC RF Exposure requirements: The highest SAR value reported under this

standard during product certification for use next to the head with the minimum

separation distance of 0mm is 0.337 W/Kg and 0mm to the body is 0.691 W/Kg.

This transmitter must not be collocated or operating in conjunction with any

other antenna or transmitter.

This product is compliance to FCC RF Exposure requirements and refers to

FCC website https://apps.fcc.gov/oetcf/eas/reports/GenericSearch.cfm

search for FCC ID: X8F-SX500

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1)this device may not cause interference, and(2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables auxappareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :(1) l'appareil ne doit pas produire de brouillage, et(2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre lefonctionnement.

This EUT is compliance with SAR for general population/uncontrolled exposure limits in IC RSS-102 and had been tested in accordance with the measurement methods and procedures specified in IEEE 1528 and IEC 62209. This equipment should be installed and operated with minimum distance 0mm between the radiator and your head, 0mm between the radiator and your body. This device and its antenna(s)must not be co-located or operating in conjunction with any other antenna or transmitter.

Cet appareil est conforme aux limites d'exposition DAS incontrôlée pour la population générale de la norme CNR-102 d'Industrie Canada et a été testé en conformité avec les méthodes de mesure et procédures spécifiées dans IEEE 1528 et IEC 62209. Cet équipement doit être installé et utilisé à une distance minimale de 0mm entre le radiateur et votre tête, 0 mm entre le radiateur et votre corps. Cet appareil et son (ses) antenne (s) ne doivent pas être co-localisés ou fonctionner conjointement avec une autre antenne ou un autre émetteur.
