General information

For Your Safety

To avoid electric-shock hazards, do not open the cabinet, refer servicing to qualified personnel only.

Keep the receiver away from flower vases, tubs, sinks, etc., in order to avoid damaging the equipment.

Do not expose the receiver under the sunlight. And keep it away from the heat source.

Do not block ventilation holes of the Receiver so that air can circulate freely.

General information

When the abnormal phenomenon occur, you should cut off the power immediately.

Do not touch the receiver during thunder, since that might create electric-shock hazards.

FCC STATEMENT

1.This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

General information

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, Human proximity to the antenna shall not be less than 20cm(8 inches) during normal operation.

Then choose Ok in this pop-up window:

Menu Operation

2. Upgrade by OTA

Clicking “Check OTA upgrade” will upgrade system automatically.

Menu Operation

If the OTA update shows following message then you don't need to do update operation.

Troubleshooting

● No power

1. Please check the main cable which is plugged into the power socket, when the ⏻ light shows green which means is turned on and red means is on standby.
2. If there is still no power, please retry to plug into the power socket.

● No sound

1. Please check whether it is kept in the home menu, as there is no sound in the home menu.
2. If music is playing press "Vol+" to see if the volume was too quite or in mute.
3. Please check if the connection for Audio cable is fine.

Troubleshooting

- **Blank Screen or Pictures showed abnormal**

1. Please check whether the AV Cable or HDMI cable connected is fine.
2. Please check whether the input mode of system or TV is set up correctly.

- **The RCU is not working**

1. Battery might be empty or incorrectly aligned.
2. Please check whether adjusting the distance and angle improves signal strength.
3. Please check whether there is a strong light source nearby as this might conflict with the infrared signal.
