LABEL	DESCRIPTION
LABEL WITH ID	Object iD used to identify object on Smiirl platform.
WALLMOUNT SYSTEM	Hole to be able to hung the object on the wall.
POWER SUPPLY PLUG	Plug to connect the power supply.
ETHERNET PORT	Plug to connect ethernet devices.

UNDERSTAND YOUR COUNTER

Counter is broadcasting a wifi network « SmiirlSetup ».
It is ready to be connected to internet.

User is connected on the web interface.

Counter is successfully associated to the wifi network configured.

Counter is successfully connected to internet. (Can access google.com server)

Counter is connected to internet and is waiting to be configured on <http://my.smiirl.com>.

CREATE ONLINE ACCOUNT

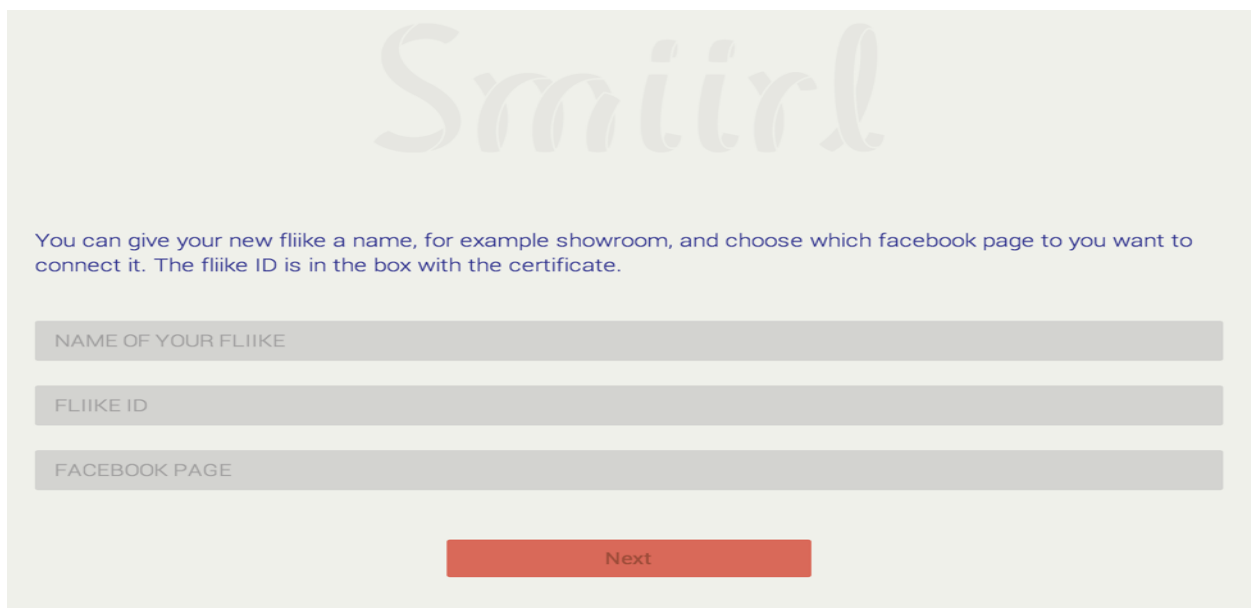

Before connecting your Counter to internet, you have to create an account on <http://my.smiirl.com> and register your Counter on this platform. The design & process of the website for the configuration may change following our website release. Process will not change.

ADD COUNTER

To link the Counter to your user account, you have to go on my.smiirl.com and log-in. In the section “Your Counter(s)”, click on:

This is what you should see then:

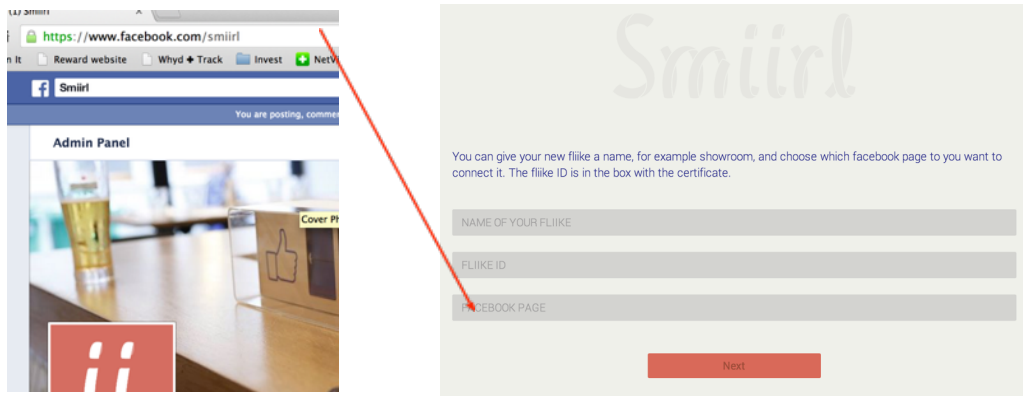

A screenshot of a registration form titled "Smiirl". The form is set against a light gray background. At the top, the word "Smiirl" is written in a large, light gray, cursive font. Below the title, there is a line of text: "You can give your new fliike a name, for example showroom, and choose which facebook page to you want to connect it. The fliike ID is in the box with the certificate." Below this text are three input fields, each with a light gray border and a light gray background. The first field is labeled "NAME OF YOUR FLIIKE", the second is labeled "FLIIKE ID", and the third is labeled "FACEBOOK PAGE". At the bottom of the form, there is a red rectangular button with the word "Next" written in white, centered on it.

Choose an appropriate name for your Counter (like “Showroom”) and enter the “Counter ID” that can be found at the back of the object.

You can now choose the Facebook page that you want to link with this Counter by inserting the full url of this page, example: <http://www.facebook.com/smiirl>

Example:

If you want to link your Counter to the Facebook page of Smiirl, simply find the page on Facebook

When you are on this page, copy the URL of the page and paste it at the right place

Once created, here is what you should see on the home page of my.smiirl.com:

Where "A_ENSCI" will be the name that you gave to the Counter and the number of fans displayed is corresponding to the Facebook page you linked-it with.

CONNECTING THE COUNTER

Now that your profile is set-up on <http://my.smiirl.com>, you'll have to connect the Counter to internet. To do that, there are two ways to connect it:

1. through wifi (recommended if you wan't to hang your Counter on a wall)
2. through ethernet.

ETHERNET

Required step :

- Create an online account

If you want to connect your Counter through Ethernet, just plug a RJ45 cable from your internet router to the back of the Counter. If your network is not protected with special firewall, your Counter will be able to access internet and display the number that you have configured while « online account »

WIFI

To connect-it via Wifi: you have to connect your computer (or smartphone) to the local system of your Counter through the wifi it broadcasts in order to give him the information needed to connect itself to your own wifi network.

1) Plug the Counter

Every time you plug-in the Counter, there is a calibration process where every digits will move one after each other.

Once the Counter is calibrated it will broadcast a "SmiirlSetup" wifi network.

Warning : The network « SmiirlSetup » is broadcasted only when the Counter has no access to internet.

When the « SmiirlSetup » is broadcasted, the Counter displays :

2) Connect your computer to the “SmiirlSetup” wifi network

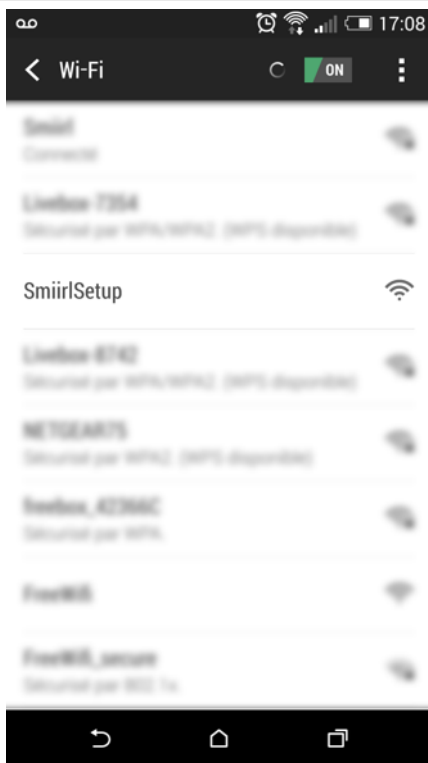

Connect to the « SmiirlSetup » wifi on your device.

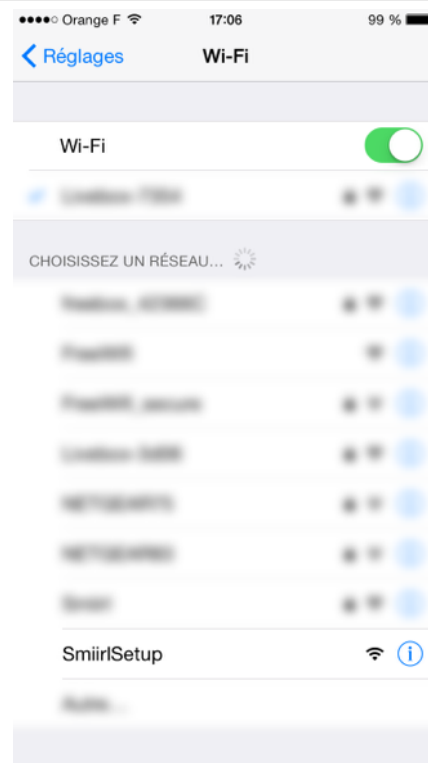

Windows

Mac OS X

Android

iDevices (iPhone, iPad)

3) Access to the inside of the Counter

Right now your computer won't have access to internet but is connected on the network broadcasted by the Counter.

Use your web browser (Chrome, Firefox, Internet Explorer...etc) and go on the address:

<http://192.168.1.1>

When the page is loaded, the Counter displays:

4) Connect the Counter to your wifi network

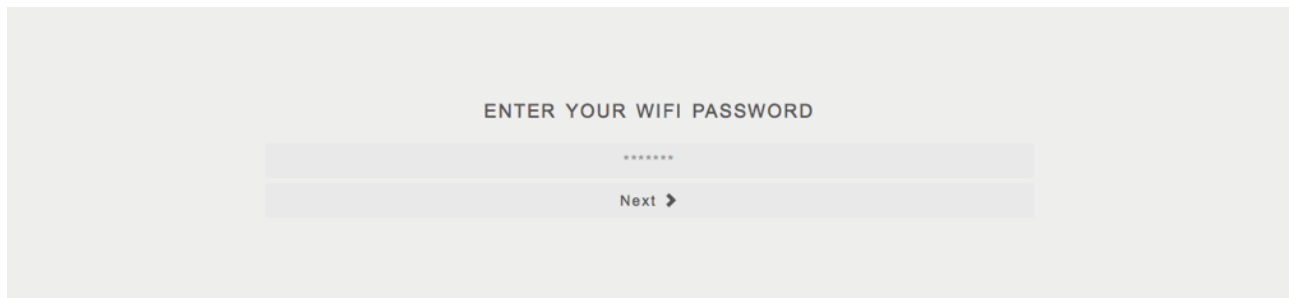

Counter is scanning the wifi networks available around. It will switch to next step automatically (should not take more than 1 minute).

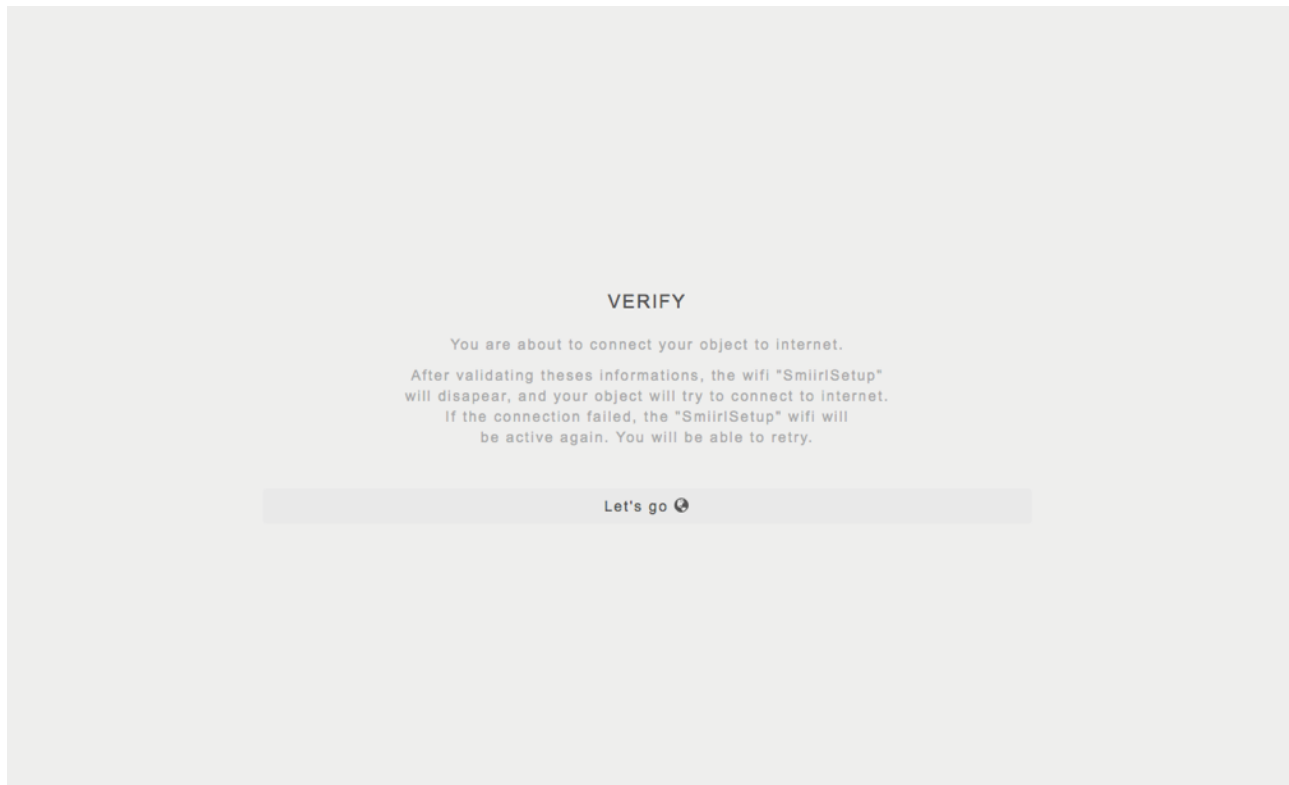

You now have to choose to which wifi network the Counter should be connected.

This list is updated each 7 seconds. To select the wifi that you want to connect on, just click on the following wifi network.

And if this wifi is protected, please enter the WEP/WPA Key.

Next step is only informative. It explain that the object will stop to broadcast « SmiirISetup » wifi network and try to connect to the wifi that you configured. If it failed, it will broadcast again a « SmiirISetup » network and you will be able to restart this process.

THANK YOU

You can now reconnect to your wifi and
go back to <http://my.smiirl.com>.

Once validated the Counter will apply the configuration and display this confirmation message.

The object will display 3 striped flaps if the password is correct.

The object will display 4 striped flaps if it is able to connect to internet.

If your account is correctly configured on <http://my.smiirl.com>,
the object will display the number.

5) Understanding Counter errors

If you did not have the number at the end of the process, the Counter can display 2 different screen.

Counter is connected to internet, but you need to go to <http://my.smiirl.com> to finish the configuration.

Something went wrong while trying to setup the object. You can restart the process and the first page will display you a detailed error.

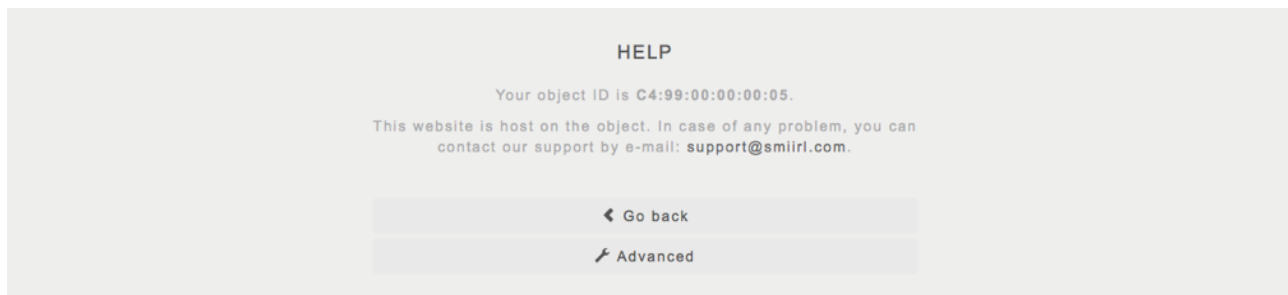

Example of detailed error when you connect on « SmiirlSetup » and you go to <http://192.168.1.1>

HELP & ADVANCED CONFIGURATION

HELP

You can access a quick help, and advanced configuration when you click on the button « ? » on right bottom of the page.

You can find your Counter ID on this page. Or go to advanced configuration.

ADVANCED CONFIGURATION

The screenshot displays a web interface for advanced configuration. It is divided into three main sections:

- WIFI SETTINGS:** Contains three input fields labeled "WIFI Network", "Password", and "Next >".
- MANUAL IP:** Contains four input fields labeled "IP", "Netmask", "Gateway", and "Apply ✓".
- RESET:** Contains one button labeled "Reset ⌂".

1) Wifi Settings

Use this form to connect your Counter to any Wifi Network. It is useful for any hidden network.

2) Manual IP

If the Counter need a Manual IP, you can apply the configuration in the section « Manual IP ». You need to specify the IP address, the netmask of the network and the gateway.

3) Reset

You can recover your Counter with the factory's settings by click on the reset button on the web interface.

APPENDIX

FCC STATEMENT

This device complies with FCC radiation exposure limits set forth for an uncontrolled environment and it also complies with Part 15 of the FCC RF Rules. This equipment must be installed and operated in accordance with provided instructions and the antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provided with antenna installation instructions and consider removing the no-collocation statement.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution!

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

EUROPEAN REGULATIONS

The product has been designed, tested and manufactured according to the European R&TTE directive 1999/5/EC.

CE 00682

SAFETY WARNINGS

For your safety, be sure to read and follow all warning notices and instructions.

- Do not open the device. Opening or removing the device cover can expose you to dangerous high voltage points or other risks. Only qualified service personnel can service the device. Please contact your vendor for further information.
- Do not use your device during a thunderstorm. There may be a risk of electric shock brought about by lightning.
- Do not expose your device to dust or corrosive liquids.
- Do not use this product near water sources.
- Make sure to connect the cables to the correct ports.
- Do not obstruct the ventilation slots on the device.
