

**FR 4.4.2. Editing an automatic command**

In automatic mode, the "Simulated presence" or "Vacation Mode" function randomly "mimics the times at which the programmed selection button (●) is switched on or off". This function is recommended to simulate your presence when you are on vacation or away from home for an extended period of time.

**To activate or deactivate the function:**

- 1) Press and hold the selection button (●) until "SET" appears on the screen. The "Simulated presence" function is activated.
- 2) Press and hold the selection button (●) until "EDIT" appears on the screen. The "Simulated presence" function is deactivated.
- 3) Press and hold the selection button (●) until "DELET" appears on the screen. The "Simulated presence" function is deactivated.
- 4) Press and hold the selection button (●) until "SEARCH" appears on the screen. The "Simulated presence" function is deactivated.
- 5) Press and hold the selection button (●) until "SEARCH" appears on the screen. The "Simulated presence" function is deactivated.
- 6) Press and hold the selection button (●) until "SEARCH" appears on the screen. The "Simulated presence" function is deactivated.
- 7) Press and hold the selection button (●) until "SEARCH" appears on the screen. The "Simulated presence" function is deactivated.
- 8) Press and hold the selection button (●) until "SEARCH" appears on the screen. The "Simulated presence" function is deactivated.
- 9) Press and hold the selection button (●) until "SEARCH" appears on the screen. The "Simulated presence" function is deactivated.
- 10) Press and hold the selection button (●) until "SEARCH" appears on the screen. The "Simulated presence" function is deactivated.
- 11) Press and hold the selection button (●) until "SEARCH" appears on the screen. The "Simulated presence" function is deactivated.
- 12) Press and hold the selection button (●) until "SEARCH" appears on the screen. The "Simulated presence" function is deactivated.
- 13) Press and hold the selection button (●) until "SEARCH" appears on the screen. The "Simulated presence" function is deactivated.
- 14) Press and hold the selection button (●) until "SEARCH" appears on the screen. The "Simulated presence" function is deactivated.
- 15) Press and hold the selection button (●) until "SEARCH" appears on the screen. The "Simulated presence" function is deactivated.

**EN 4.4.2. Editing an automatic command**

In automatic mode, the "Simulated presence" or "Vacation Mode" function randomly "mimics the times at which the programmed selection button (●) is switched on or off". This function is recommended to simulate your presence when you are on vacation or away from home for an extended period of time.

**To activate or deactivate the function:**

- 9) Press and hold the selection button (●) until "SEARCH" appears on the screen. The "Simulated presence" function is deactivated.
- 10) Press and hold the selection button (●) until "SEARCH" appears on the screen. The "Simulated presence" function is deactivated.
- 11) Press and hold the selection button (●) until "SEARCH" appears on the screen. The "Simulated presence" function is deactivated.
- 12) Press and hold the selection button (●) until "SEARCH" appears on the screen. The "Simulated presence" function is deactivated.
- 13) Press and hold the selection button (●) until "SEARCH" appears on the screen. The "Simulated presence" function is deactivated.
- 14) Press and hold the selection button (●) until "SEARCH" appears on the screen. The "Simulated presence" function is deactivated.
- 15) Press and hold the selection button (●) until "SEARCH" appears on the screen. The "Simulated presence" function is deactivated.

**EN 4.4.3. Deleting an automatic command**

If the Telis 1 Chronis RTS is in manual mode, briefly press the selection button (●) 10 times to activate the "Delete" function. Press and hold the selection button (●) until "DELET" appears on the screen. The "Delete" function is activated. Press and hold the selection button (●) until "SEARCH" appears on the screen. The "Delete" function is deactivated.

**FR 4.4.3. Suppression d'un ordre automatique**

Si la Telis 1 Chronis RTS est en mode manuel, faire un appui bref sur la touche de sélection (●) 10 fois pour activer la fonction «Suppression d'un ordre automatique». Appuyer sur la touche de sélection (●) jusqu'à ce que «DELET» apparaisse sur l'écran. La fonction «Suppression d'un ordre automatique» est activée. Appuyer sur la touche de sélection (●) jusqu'à ce que «SEARCH» apparaisse sur l'écran. La fonction «Suppression d'un ordre automatique» est désactivée.

**EN 5. Installation**

Check the radio range before installing the Telis 1 Chronis RTS wall mount. Select a location for the wall mount. Mark the screw locations (vertical spacing 40 mm). Drill then secure the wall mount with the included screws (use the provided template). Fit the screw cover. The use of radio appliances (e.g. HF/HF radio headphones) operating on the same frequency may cause interference and affect the performance of the Telis 1 Chronis RTS on or near metal surfaces as this may reduce the radio range.

**FR 5. Installation**

Vérifier la portée radio avant d'installer la Telis 1 Chronis RTS au mur. Sélectionner un emplacement pour le montage mural. Marquer les positions des vis (espacement vertical de 40 mm). Perçer puis visser le montage mural avec les vis fournies (utiliser le gabarit fourni). Installer le couvercle de la vis. L'utilisation d'appareils radio (par exemple un casque radio HF/HF) utilisant la même fréquence peut engendrer des interférences et réduire les performances du produit, en particulier sur des surfaces métalliques, ceci peut réduire la portée radio.

**EN 6. Operation**

To switch from manual to automatic mode or from automatic to manual mode, briefly press the selection button (●).

**FR 6. Utilisation**

Pour passer du mode manuel au mode automatique ou du mode automatique au mode manuel, faire un appui bref sur la touche de sélection (●).

**EN 6.1. Manual mode**

The Telis 1 Chronis RTS is used to:

- send an occasional order to the end-products.
- deactivate automatic command programming.

**FR 6.1. Mode manuel**

La Telis 1 Chronis RTS permet de :

- donner un ordre ponctuel aux applicatifs.
- désactiver la programmation des ordres automatiques.

**EN 6.2. Automatic mode**

The automatic mode of the Telis 1 Chronis RTS is used to:

- automatically control the end-products by means of timed days of the week.
- program the roller shades and blinds on the ground floor to take advantage of the sunlight at 8:00 in the am order for all the programmed automatic commands for each day of the week (see section "Programming the days of the week").
- deactivate automatic command programming.

**FR 6.2. Mode automatique**

Le mode automatique de la Telis 1 Chronis RTS permet de :

- programmer automatiquement les applicatifs grâce à une programmation d'ordres automatiques selon les jours de la semaine.
- programmer les stores et volets de la pièce à vivre de façon à profiter de la lumière du soleil à 8:00 heures le matin pour toutes les applications pour protéger la maison au froid.
- désactiver la programmation des ordres automatiques.

**EN 6.2.1. Modifying the days of the week programming**

See section "Programming the days of the week".

**FR 6.2.1. Modification de la programmation des jours de la semaine**

Voir chapitre «Programmation des jours de la semaine».
