## Notes on use October 2012

### Before use

To make full use of your Help Guide, please read the following notes thoroughly. Please note that the contents of this website are subject to change without prior notice.

### Recommended system environment

Basic operation of the Help Guide has been confirmed on the standard web browsers of the following smartphones:

- **Web browser**

#### Android OS 2.3 or later

Xperia series, NW-Z1000 series

#### iOS 4 or later

iPhone, iPod touch

- **JavaScript**

- JavaScript is used with Sony Help Guides for viewing convenience. If JavaScript is disabled in your web browser settings, your Help Guide may not be displayed correctly or may not operate properly.

- **Style Sheets**

- Cascading Style Sheets are used in designing Sony Help Guides. Your Help Guide layout may not be as intended if you view your Help Guide with style sheets disabled or on a web browser that is not compatible with style sheets.

- **Cookies**

- Sony Help Guides use cookies. To use services in the Help Guide, you need to set to allow all cookies or to enable cookies for the originating website only.

### Handling of personal information obtained from websites

Sony may use cookies, web beacons or similar technologies to analyze customers' web browsing behavior to provide better-customized service for individual customers.

Cookies, web beacon and similar technologies are used to make statistical analysis of customers while preserving anonymity, and information in such analysis may be linked to customers' personal information to provide better-customized service to users of our members-only websites.

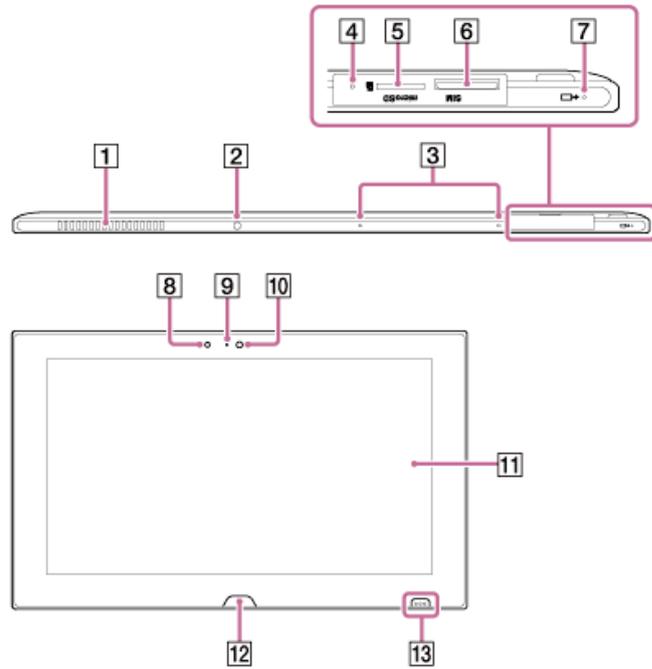

You are free to disable the link between your personal information and information obtained by cookies or anonymous information generated by web beacons. To do so, you need to change web browser settings and refuse to accept cookie-generated or similar data. Please note that, by doing so, you may not be able to make purchases or use services on members-only websites.

## Parts and Controls on the Front

Describes the features on the front of the VAIO computer, such as buttons and indicator lights.

- 1. Air exhaust vent
- 2. Infrared port
- 3. Built-in dual microphones
- 4. Battery off button
- 5. microSD memory card slot
- 6. Micro SIM Card slot
- 7.  Charge indicator
- 8. Ambient light sensor
- 9. Built-in front camera indicator
- 10. Built-in front camera
- 11. Touch screen
- 12.  (Windows) button
- 13. Charge port for Keyboard

**Note**

- The air exhaust vent may get hot during use. Take care when touching it.
- Take care not to damage the front screen when handling your VAIO.

Notes on the LCD screen

The LCD screen is manufactured using high-precision technology. You may, however, see tiny black points and/or bright points (red, blue, or green) that continuously appear on the LCD screen. The ratio of defective pixels to all available pixels of the LCD screen is less than 0.0006 %. Also, depending on the viewing angle, uneven stripes of changes in color and luminance may appear. These are normal results of the LCD screen construction and do not indicate a malfunction. Take

note that returns and replacements are not accepted.

# Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

For product available in the USA/Canada market, only channel 1~11 can be operated. Selection of other channels is not possible.

This device is restricted to **indoor** use when operated in the 5.15 to 5.25 GHz frequency range.

- ※ FCC requires this product to be used indoors for the frequency range 5.15 to 5.25 GHz to reduce the potential for harmful interference to co-channel Mobile Satellite systems.
- ※ This device will not permit operations on channels 116-128 for 11na and 120-128 for 11a which overlap the 5600 -5650MHz band.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

## **IMPORTANT NOTE:**

### **Federal Communication Commission (FCC) Radiation Exposure Statement**

This EUT is compliance with SAR for general population/uncontrolled exposure limits in ANSI/IEEE C95.1-1999 and had been tested in accordance with the measurement methods and procedures specified in OET Bulletin 65 Supplement C.
