features

- ◆ **Plays Back CD-R/RW¹ Discs with MP3/ATRAC3®/ATRAC3plus™ Audio**
For customers who already have extensive music libraries, use the included software and hardware to manage, burn and playback their collection of MP3s. ATRAC3plus is an advanced audio compression technology offering multiple bit rates, allowing you to create music compilations tailored to your listening preference with the ability to get up to 490² songs on 1 CD-R/RW disc @ 48kbps.
- ▲ **PC/Audio In for Digital Music Players or PC Input** An exciting new feature that takes music playback beyond tape and CD. It allows simple plug-and-play integration with a digital music device or PC via a 2.5mm jack.
- ▲ **Ultra Compact with just over 7" in Depth for a Smaller Footprint** Amazingly compact design with a much smaller footprint than traditional micro/desktop systems. Elegant design and form factor will add style and sound to any environment.
- **Two-Way Speaker Design with a 5 1/8" Diameter Woofer and Tweeter** A dual driver design helps ensure audio accuracy by providing a greater frequency range. The speaker's crossover splits the frequency band into two ranges: bass frequencies go to the woofer, and treble frequencies go to the tweeter.
- **Powerful 120W Sound Output (RMS 60W 60W) Speakers** Plenty of power for small to medium size rooms or offices.
- **Compatible with the Connect™ Music Store** offers one of the most extensive music collections online. Unique features such as Moodmix, Connect Sets and live radio, make this a choice destination for customers looking to expand their music collection. It's easy to discover, find and purchase single tracks or entire albums. Choose from top hits and tracks from independent artists.
- **4 Line Dot Matrix LCD Backlight with a Blue Light** Large LCD provides radio stations, track, title, album and artist information of CDs, and time. Blue LED light produces a soft glow for an added accent of style.
- **Easy Jog Dial® Navigation** Easily scroll through playlists and songs on the device with the Jog Dial® navigation system.
- **Full Logic Cassette Deck with Auto Reverse** Often referred to as a "soft-touch" design, a full-logic transport's controls require less effort to use than older style mechanical transports. Because the mechanism can change directions, you can switch sides anytime with the touch of a button.
- **AM/FM Digital Synthesized Tuner with Remote** Precisely locks in the most powerful signal and provides the most accurate drift-free tuning of AM/FM radio stations.
- **Clock Timer Function** Allows the user to set an alarm for a helpful reminder throughout the day and night.

specifications

Tuner Frequency Range: FM: 87.5-108MHz/50kHz; AM: 530-1710kHz/10kHz

Antenna System: 75 ohm /Loop (External FM/MW)

CD Player: Front Loading

Analog-to-Digital Converter: 1 Bit D/A
