### features

- ▲ **170 Watts Total: 85 Watts per Channel x 2 (RMS 10% THD)** Plenty of power for small to large size rooms or offices.
- ▲ **PC/Audio In for Digital Music Players or PC Input** An exciting new feature that takes music playback beyond tape and CD. It allows simple plug-and-play integration with a digital music device or PC via a 2.5mm jack.
- **5 Disc CD Changer with CD Pop-Up Loading Mechanism** Provides a unique way to keep the music going all day, or all night long. Pop-up mechanism ejects CD's vertically for convenience and style.
- **3 Way Main Speakers with Woofers** A three driver design helps ensure audio accuracy by providing a greater frequency range. The speaker's crossover splits the frequency band into three ranges: bass frequencies go to the woofer, and treble frequencies go to the tweeter and the middle frequencies are sent to a third driver commonly referred to as the midrange.
- **Plays Back CD-R/RW<sup>1</sup> Discs with MP3/ATRAC3®/ATRAC3plus™ Audio** For customers who already have extensive music libraries, use the included software and hardware to manage, burn and playback their collection of MP3s. ATRAC3plus is an advanced audio compression technology offering multiple bit rates, allowing you to create music compilations tailored to your listening preference with the ability to get up to 490<sup>2</sup> songs on 1 CD-R/RW disc @ 48kbps.
- **Compatible with the Connect™ Music Store** Offers one of the most extensive music collections online. Unique features such as Moodmix, Connect Sets and live radio, make this a choice destination for customers looking to expand their music collection. It's easy to discover, find and purchase single tracks or entire albums. Choose from top hits and tracks from independent artists.

### specifications

**Impedance:** 6 ohms

**Tuning:** FM/AM Superheterodyne Tuner

**Tuner Frequency Range:** AM: 530-1,710kHz; FM: 87.5- 108.0MHz
