FEATURES

- **SUPER ESP² STEADYSOUND ELECTRONIC SHOCK PROTECTION** provides 3 times stronger anti-shock protection than Sony's current ESP² SteadySound ESP buffer memory system, and uses DSP (Digital Signal Processor) technology to provide Sony's best anti-skip protection for even longer continuous playback in more active uses*
- **HIGH QUALITY DESIGN WITH ALUMINUM LID** has attractive yet functional styling, and helps protect against high temperature build-up especially when using the Discman® in hot climates in a car
- **LUMINOUS BACKGLOW™ DISPLAY** make characters on the LCD shine in electronic luminescent blue color, making it easy to see the display even in low light
- **UP TO 25 HOURS PLAYBACK WITH 2 "AA" BATTERIES (ESP OFF)** is made possible by advanced design that allows extended battery life
- **FOLDING STEREO HEADPHONES WITH BACKLIT REMOTE CONTROL SUPPLIED** have in-line Electronic Luminescence Backlit LCD remote for ease of operation, are Mega Bass compatible, fold up for convenient storage or travel, and provide wide dynamic range with excellent sound
- **ULTRA SLIM DESIGN** is attractive and functional, yet less than one inch thick
- **MD LINK OPTICAL OUTPUT** permits digital connection to MiniDisc recorder (requires optional digital cable)
- **MEGA BASS® SOUND SYSTEM WITH GROOVE SOUND POSITION** produces deeper, richer bass tones for more pleasing overall sound, with a special position for contemporary music that virtually doubles the bass response compared to regular Mega Bass®
- **11 PLAYBACK MODES** provide many choices in the playback of CDs: hear one track over and over, program a selection of tracks in a desired order, hear tracks in Shuffle (random) order, or select Track Loop Repeat which provides seamless access to all tracks
- **22 TRACK RMS PROGRAMMING** lets you customize the order in which tracks are played
- **BATTERY RECHARGE CAPABILITY FOR NH-DM2AA** uses the Discman as charger for rechargeable battery when player is connected to AC using optional AC adaptor

- **RESUME PLAY** re-starts the compact disc at exact track where playback last stopped instead of at the beginning of disc
- **2 POSITION AUTOMATIC VOLUME LIMITER SYSTEM** maintains volume output at levels below distortion threshold for cleaner sound reproduction
- **RECHARGEABLE BATTERY (NH-DM2AA) SUPPLIED** uses advanced Nickel Metal Hydride technology and offers great savings and convenience over replaceable batteries
- **CARRYING CASE SUPPLIED** allows Discman to be protected while carried
