Troubleshooting

What should I do if the photo frame is not turned on? • Make sure the AC power cord is inserted securely.

Why doesn't my photo frame display images?

- A memory card is not inserted properly.
- The image file is not compatible with DCF format or is not supported by the photo frame.
- The image file may be damaged.
- The photo frame can display up to 4,999 image files.

What should I do if nothing happens when I operate the photo frame?

• Turn the photo frame off then back on again.

Why doesn't my photo frame import a desired file?

- Avoid doing the following while an image is being imported to internal memory. (Doing so may damage the photo frame, memory card, or data.)
- Turning off the power – Removing a memory card
- -Inserting another memory card
