

### Key Features

- Micro speakers deliver 5.1 channel surround sound
- 3 HDMI inputs
- HDMI repeater
- HDMI upconversion
- S-AIR Digital Wireless capability
- IR repeater x 2
- BRAVIA® Sync™ 2 for Theater
- Digital Media Port<sup>3</sup> (DMP)
- Digital Cinema Auto Calibration
- Digital Cinema Sound™

### Key Technologies

Compact design with robust HDMI connectivity features illuminated, touch-sensitive controls, while the unobtrusive micro speakers fill your entertainment room with surround sound from movies or games.

S-AIR Digital Wireless capability combines with the optional EZW-T100 S-AIR Ready Transmitter and AIR-SA10 Air Station receiver/speaker (all sold separately) to let you fill up to four rooms in your home with sound from the main unit.

S-AIR technology lets you create a wireless surround sound speaker configuration without the hassle of custom installation or running speaker wires across the room – just add the WAHT-SA1 and/or WAHT-SA10 Wireless Surround for Rear Speakers

HDMI™ connectivity delivers support for Blu-ray Disc and HD sources while simplifying cable connections with the ability to transmit High Definition video and surround sound audio using a single cable.

BRAVIA® Sync™ for theater enables one-touch operation of your compatible Sony HDTV and connected devices from a single remote<sup>2</sup>.

DIGITAL MEDIA PORT<sup>3</sup> (DMP) proprietary interface adds networking and connectivity options through optional accessories that can connect with PCs, Walkman™ players, Bluetooth® devices, and iPod® products.

Digital Cinema Auto Calibration uses Sony's Digital Signal Processing technology and an included microphone to optimize audio playback for your room at the touch of a button.
