Color, clarity & detail at their best

Suddenly, everything looks better. All of your existing sports, TV shows and movies are upscaled to super clear quality. Even YouTube® clips and smartphone videos are enhanced with stunning results. The X-Reality™ PRO picture engine analyzes and processes every image to refine color, clarity and detail for a beautifully natural picture.

Experience precise motion clarity.

Golf balls roll clearly, with less blurring, as the camera follows them across the green. Footballs retain their detail and move smoothly as the camera quickly pans down the field during kickoff. Even fast moving action sequences like fight scenes appear amazingly realistic since Motionflow XR 480 takes motion clarity beyond refresh rates, which are only measured in Hz, to double the motion effect for lifelike clarity.
