Transferring contacts to your new phone

Transferring contacts to your new phone can sometimes be complicated, but help is available. You can transfer contacts from several phone brands, including iPhone, Samsung, HTC and Nokia

- Vou need: An Internet-connected PC running Windows® A USB cable for your old phone A USB cable for your new Android™ phone
- Your old phone
- Your new Android[™] phone
- ! If you don't have access to all of the items listed above, go to www.sonymobile.com to find out about other ways to transfer your contacts.

Get started transferring your contacts

Use the PC Companion program to transfer your contacts. It's free, and the installation files are already saved on your new phone. PC Companion also offers a range of other features, including help to update your phone software.

To install PC Companion

- New phone: Turn on your new Android™ phone and connect it to a PC using a USB cable.
 New phone: Tap Install to install PC Companion
- on the PC.
- 3 Computer: If a popup window appears, select Run Startme.exe. In the new popup window that appears, click Install to start the installation and then follow the instructions to complete the installation.

To transfer contacts to your new phone using PC Companion

- Make sure that PC Companion is installed on
- your PC. 2 Open the PC Companion program on the PC, then click Contacts Setup and follow the instructions to transfer your contacts.

Finding your way

Home screen

Your phone Home screen is the equivalent of the desktop on a computer. You can customise vour Home screen with widgets, shortcuts, folders. themes, wallpaper and other items. The Home screen extends beyond the regular screen display width, so you need to flick left or right to view content in one of the screen's four extensions

The items in the bar at the bottom of the screen are always available for quick access.

• Press ₁.

- To browse the Home screen Flick right or left.

To change your Home screen wallpaper

- From your Home screen, press _____.
 Tap Wallpaper, then select an option.

Widgets

Widgets are small applications that you can use directly on your Home screen. For example, the Music player widget allows you to start playing music directly.

Some widgets are resizable, so you can expand them to view more content or shrink them to save space on your Home screen.

Application screen

The Application screen, which you open from your Home screen, contains the applications that come installed with your phone as well as the applications you download.

The Application screen extends beyond the regular screen width, so you need to flick left and right to view all content.

To open the Application screen

From your Home screen, tap

To open an application From your Home screen or the Application screen, tap the application.

Applications

An application is a phone program that helps vou perform a task. For example, there are applications to make calls, take photos and download more applications.

Status and notifications

The status bar at the top of your screen shows what's going on in your phone. For example, new message and calendar notifications appear here

A notification light also gives you battery status information and some notifications. For example, a flashing blue light means there is a new message or a missed call. The notification light may not work when the battery level is low.

Checking notifications and ongoing activities

You can drag down the status bar to open the Notification panel and get more information. For example, you can use the panel to open a new message or view a calendar event. You can also open some applications that run in the background, such as the music player.

To open the Notification panel

Drag the status bar downwards.

Phone settings menu

View and change your phone settings from the Settings menu.

To access the phone settings From vour Home screen, tap 2 Tap Settings.

· ↓ You can also drag the status bar downwards on the Home screen and tap X to access the phone settings.

More basics

- recipient, tap Edit recipient. To renove a recipient, tap Edit recipients and tap in ext to a recipient field. When you are finished, tap Done. 7 To send the message, tap Send.

Troubleshooting

My wired headset does not work

 Make sure the wired headset that you are using complies to the CTIA standard. Your phone supports the CTIA standard, and may not be fully compatible with other standards such as OMTP. If you have a wireless headset that is compatible with your phone, try using that instead.
