Starry does not warrant against normal wear and tear, nor damage caused by accident or abuse. To obtain service call Starry Customer Service—available service options dependent on country in which service is requested and may be restricted to original country of sale. Call

- The physiological effects of chemical substances used in or with this equipment have not been investigated.

Placing, using, and storing your Starry Station

- Your Starry Station should be placed on surface that allows the pad on the bottom to grip the mounting surface. The mounting surface must be firm, such as a tabletop, countertop or shelf.
- Do not cover your Starry Station with anything at anytime, regardless of whether it is currently operating or not operating. It must be in free space and uncovered at all times.
- Do not place your Starry Station in direct sunlight or expose the unit to heat sources at any time.
- **WARNING:** To reduce the chance of electric shock or injury, do not use Starry Station in or near water or wet locations. Do not expose your Starry Station at anytime to water, moisture or dampness. Keep your Starry Station away from drinks, bathrooms, sinks, open windows and so on.

Caution: Changes or modifications not expressly approved by the manufacturer void the user's authority to operate the equipment.

This product has demonstrated EMC compliance under conditions that included the use of compliant peripheral devices and shielded cables (including Ethernet network cables) between system components. It is important that you use compliant peripheral devices and shielded cables between system components to reduce the possibility of causing interference to radios, television sets, and other electronic devices.

- Do not block the air vents or insert any items into air vents at anytime.

Exposure to Radio Frequency Energy

The radiated output power of the wireless technology is below the FCC radio frequency exposure limits. Nevertheless, it is advised to use the wireless equipment in such a manner that the potential for human contact during normal operation is minimized.

The radiated output power is below the Industry Canada(IC) radio frequency limits.

Canadian Compliance Statement

This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Cet appareil est conforme aux normes CNR exemptes de licence d'Industrie Canada. Le fonctionnement est soumis aux deux conditions suivantes : (1) cet appareil ne doit pas provoquer d'interférences et (2) cet appareil doit accepter toute interférence, y compris celles susceptibles de provoquer un fonctionnement non souhaité de l'appareil.

Certification + Regulatory Information

FCC Compliance Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. See instructions if interference to radio or television reception is suspected.

Radio and Television Interference

This computer equipment generates, uses, and can radiate radio-frequency energy. If it is not installed and used properly—that is, in strict accordance with Starry's instructions—it may cause interference with radio and television reception.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the

instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

If necessary, consult Starry. See the service and support information that came with your Starry product. Or consult an experienced radio/television technician for additional suggestions.
