SL15 User Manual

SL15 is an electronic ballast to be used in Fluorescent Lamp Lighting Fixture. The ballast is designed to be non-interfering to radio, television, cordless phone and remote controller. General specifications are listed on below.

- **Input voltage – 120V 60Hz**
- **Input power – 66W**
- **Safety – UL and cUL approved per UL 935, file #E177888.**
- **Suitable lamps – 2 pcs of following lamps that the input power does not over 66W total.**
 - **Linear lamps - 25W T12, 40W T12, 34W T12, 25W T8 and 32W T8**
 - **Circline lamps – 22W and 32W.**
 - **Biax type – 26W twin tube, 32W triple tube**

Unit must be grounded to the lighting fixture to avoid electric shock. If the interference occurs, move this ballast away from the device or plug it into a different outlet.
