

MFD-2002 SMART FINDER INSTRUCTION

Introduction

The MFD-2002 is a smart gadget to easily locate your misplaced items such as keys, remote controls, purses, etc. This handy remote control transmitter can send a radio signal up to 60 feet away.

Operation

First, remove the battery isolation tag found both on the transmitter and receiver

Activating Key Ring Receiver (fob without button)

1. Attach your keys or other objects to the receiver.
2. Press and hold the button with key icon on the transmitter for two seconds.
3. The receiver will emit audible beeps for you to locate the object when it's within the operation range (60 feet). If no beeps are heard, move around and press the locating button on transmitter as in step 2.

Transmitter

Receiver
