USER GUIDE
Wireless Charger
INSTRUCTION
MODEL: MC-008

APPEARANCE AND FUNCTION

1. Micro USB connection
2. Charge and discharge red/blue indication light
3. Wireless charge zone
4. Wireless charge zone

SPECIFICATION

- Model: MC-008
- Size: 188x95x10mm
- Input: 5V \pm 2.0A 9V \pm 1.5A
- Output: Out1/5V \pm 1.0A Out2/5V \pm 1.0A
- Power: Out1+Out2=10W(Max)
- Working temperature: -5~45°C
- Weight: 132g

ITEM LIST

- Wireless charger X1
- Instruction X1
- Charge cable X1
- Specific accessories are based on real products

INSTRUCTION

Figure 1

- Charging cable Interface: Micro USB

Figure 2

- Charging display: after power on the red and blue light display at the same time, light 3 seconds after the red and blue lights out, into the standby State.

Figure 3

- Charging ways and requirements: wireless charging by power, red and blue lights flashing at the same time, the hand must be led wireless charging collection module, automatically recharge, mobile phone wireless charging display a red light and blue light 6 seconds long breath, automatically disconnected after fully charged, the red light and blue light automatically extinguished, lack of power and phone overtemperature red and blue lights automatically out.

Figure 4

- When using wireless charger, place it in the correct way as shown in Figure 4.

FCC CONTENT

- This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
- (1) This device may not cause harmful interference
- (2) This device must accept any interference received, including interference that may cause undesired operation.
- Please note that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference that will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Please note that changes or modifications not expressly approved by the party responsible for compliance could void user's authority to operate the equipment.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
