Federal Communications Commission (FCC) Statement

This equipment has been tested and found to comply with
the limits for a Class B digital device, pursuant to part
15 of the FCC Rules. These limits are designed to provide
reasonable protection against harmful interference in a
residential installation. This equipment generates, uses
and can radiate radio frequency energy and, if not
installed and used in accordance with the instructions,
may cause harmful interference to radio communications.
However, there is no guarantee that interference will not
occur in a particular installation. If this equipment
does cause harmful interference to radio or television
reception, which can be determined by turning the
equipment off and on, the user is encouraged to try to
correct the interference by one or more of the following
measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and
   receiver.

-- Connect the equipment into an outlet on a circuit
   different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV
   technician for help.

Warning: A shielded-type power cord is required in order
to meet FCC emission limits and also to prevent
interference to the nearby radio and television reception.
It is essential that only the supplied power cord be used.

Use only shielded cables to connect I/O devices to this
equipment.

You are cautioned that changes or modifications not
expressly approved by the party responsible for
compliance could void your authority to operate the
equipment.

********************
```

The mouse's ball, the rollers against which the ball presses, and the mouse
housing will all become dirty with time. These parts should be cleaned regularly
with a lintfree cloth.

1. Turn off the computer.

2. Turn the mouse upsidedown and remove the ball cover.

3. Remove the ball itself, and wipe off the ball, the rollers, and the housing with a cloth that has been wetted with water or a mild soap solution. You may wish to use a swab instead of a cloth to clean the rollers.

4. Replace the ball and the cover.

*    Trouble shooting    *
**********************
```

If the screen cursor doesn't move in response to the mouse, do the following

* Check the communications interface. Do you have the mouse hooked to the right port(USB port)? Is the connection firm? You may want to tighten the connector.

* Verify that you have loaded the mouse driver. Load the mouse driver by changing to the MOUSE directory.

* Verify that the mouse is operating in the proper mode. There are application programs which require a particular operating mode.

* Check the settings in a particular graphical user interface such as Windows to verify that they will allow the mouse to be used.
