Quick Start Guide

www.sar-tick.com

This product meets applicable national SAR limits of 1.6 W/kg. The specific maximum SAR values can be found on page 19 of this user guide.

When carrying the product or using it while worn on your body, either use an approved accessory such as a holster or otherwise maintain a distance of 1.0 cm from the body to ensure compliance with RF exposure requirements. Note that the product may be transmitting even if you are not making a phone call.

The mobile phone is in compliance with the requirement of EN 60950-1: 2006 amendment A12: 2011. There will appear a warning box when the volume level is over 4. If the user selects left soft key in the warning box, the volume can be increased and the phone will repeat the acknowledgement more than once every 20h of cumulative listening time

PROTECT YOUR HEARING

To prevent possible hearing damage, do not listen at high volume levels for long periods. Exercise caution when holding your device near your ear while the loudspeaker is in use.

Safety and use.....

We recommend that you read this chapter carefully before using your mobile phone. The manufacturer disclaims any liability for damage. which may result as a consequence of improper use or use contrary to the instructions contained herein

TRAFFIC SAFFTY

Given that studies show that using a mobile phone while driving a vehicle constitutes a real risk, even when the hands-free kit is used (car kit, headset...), drivers are requested to refrain from using their mobile phone when the vehicle is not parked. Check the laws and regulations on the use of wireless mobile phones and their accessories in the areas where you drive Always obey them. The use of these devices may be prohibited or restricted in certain areas When driving, do not use your mobile phone and headset to listen

to music or to the radio. Using a headset can be dangerous and forbidden in some areas.

When switched on, your mobile phone emits electromagnetic waves that can interfere with the vehicle's electronic systems such as ABS anti-lock brakes or airbags. To ensure that there is no problem:

- do not place your mobile phone on top of the dashboard or within an airbag deployment area,
- check with your car dealer or the car manufacturer to make sure that the car's electronic devices are shielded from mobile phone RF energy.

CONDITIONS OF USE:

You are advised to switch off the mobile phone from time to time to ontimize its performance Remember to abide by local authority rules of mobile phone use

on aircrafts

Operational Warnings: Obey all posted signs when using mobile devices in public areas.

Follow Instructions to Avoid Interference Problems: Turn off your mobile device in any location where posted notices instruct you to do so. In an aircraft, turn off your mobile device whenever instructed to do so by airline staff. If your mobile device offers an airplane mode or similar feature, consult airline staff about using it in flight.

Switch the mobile phone off when you are in health care facilities, except in designated areas. As with many other types of equipment now in regular use, mobile phones can interfere with other electrical or electronic devices, or equipment using radio frequency.

Switch the mobile phone off when you are near gas or flammable liquids Strictly obey all signs and instructions posted in a fuel depot gas station or chemical plant or in any potentially explosive atmosphere When the mobile phone is switched on it should be kept at least 15 cm from any medical device such as a pacemaker, a hearing aid or insulin pump. In particular when using the mobile phone you should hold it against the ear on the opposite side to the device, if any, Read and follow the directions from the manufacturer of your

implantable medical device. If you have any questions about using your mobile device with your implantable medical device, consult your To avoid hearing impairment, answer the call before holding your

mobile phone to your ear. Also move the handset away from your ear while using the "hands-free" option because the amplified volume might cause hearing damage.

It is recommended to have proper supervision while small children use

When replacing the cover please note that your mobile phone may contain substances that could create an allergic reaction. Always handle your mobile phone with care and keep it in a clean and

dust-free place Do not allow your mobile phone to be exposed to adverse weather

or environmental conditions (moisture, humidity, rain, infiltration of liquids, dust, sea air, etc.). The manufacturer's recommended operating temperature range is -10°C to +50°C (the max value depends on device, materials and housing paint/texture).

Over 50°C the legibility of the mobile phone's display may be impaired, though this is temporary and not serious.

o not open or attempt to repair your mobile phone yourself. Do not drop, throw or try to bend your mobile phone.

Do not use the mobile phone if the glass made screen, is damaged. cracked or broken to avoid any injury. Do not paint it

Use only batteries, battery chargers, and accessories which are recommended by TCL Communication Ltd. and its affiliates and are compatible with your mobile phone model, TCL Communication Ltd. and its affiliates disclaim any liability for damage caused by the use of other chargers or batteries

Your mobile phone should not be disposed of in a municipal waste. Please check local regulations for disposal of electronic products. Remember to make back-up copies or keep a written record of all important information stored in your mobile phone

Some people may suffer epileptic seizures or blackouts when exposed BATTERY AND ACCESSORIES: Before removing the battery from your mobile phone, please make sure to flashing lights, or when playing video games. These seizures or that the mobile phone is switched off. blackouts may occur even if a person never had a previous seizure or Observe the following precautions for battery use:

blackout. If you have experienced seizures or blackouts, or if you have a family history of such occurrences, please consult your doctor before playing video games on your mobile phone or enabling a flashing-lights feature on your mobile phone. Parents should monitor their children's use of video games or other features that incorporate flashing lights on the mobile phones. All persons should discontinue use and consult a doctor if any of the following symptoms occur: convulsion, eye or muscle twitching, loss of awareness, involuntary movements, or disorientation. To limit the likelihood of such symptoms, please take

the following safety precautions:

is in use.

CHARGERS

Home A.C./ Travel chargers will operate within the temperature range of: 0°C (32°F) to 40°C (104°F).

The chargers designed for your mobile phone meet with the standard for safety of information technology equipment and office equipmen use. Due to different applicable electrical specifications, a charger you purchased in one jurisdiction may not work in another jurisdiction They should be used for this purpose only.

Characteristics of power supply (depending on the country): Travel charger: Input: 100-240 V, 50/60 Hz, 100 mA

THIS MOBILE PHONE MEETS THE GOVERNMENT'S REQUIREMENTS

Your mobile phone is a radio transmitter and receiver. It is designed

and manufactured not to exceed the emission limits for exposure to

radio-frequency (RF) energy. These limits are part of comprehensive

guidelines and establish permitted levels of RF energy for the general

population. The guidelines are based on standards that were developed

by independent scientific organizations through periodic and thorough evaluation of scientific studies. These guidelines include a substantial

safety margin designed to ensure the safety of all persons, regardless

The exposure standard for mobile phones employs a unit of

measurement known as the Specific Absorption Rate, or SAR. The

SAR limit set by public authorities such as the Federal Communications

Commission of the US Government (FCC), or by Industry Canada, is 1.6

W/kg averaged over I gram of body tissue. Tests for SAR are conducted

using standard operating positions with the mobile phone transmitting at

Although the SAR is determined at the highest certified power level

the actual SAR level of the mobile phone while operating can be

well below the maximum value. This is because the mobile phone is

designed to operate at multiple power levels so as to use only the

power required to reach the network. In general, the closer you are

to a wireless base station antenna, the lower the power output of

the mobile phone. Before a mobile phone model is available for sale

to the public compliance with national regulations and standards

The highest SAR value for this model mobile phone when tested is

1.13 W/Kg for use at the ear and 1.17 W/Kg for use close to the body.

While there may be differences between the SAR levels of various

mobile phones and at various positions, they all meet the government

requirement for RF exposure. For body-worn operation, the mobile

phone meets FCC RF exposure guidelines provided that it is used with

body. Use of other accessories may not ensure compliance with FCC

a non-metallic accessory with the handset at least 10 mm from the

its highest certified power level in all tested frequency bands.

Output: 5 V, 200 mA

Lithium 400 mAh

Additional information on SAR can be found on the Cellular Telecommunications & Internet Association (CTIA) Web site: The World Health Organization (WHO) considers that present

As mobile devices offer a range of functions, they can be used in positions other than against your ear. In such circumstances the scientific information does not indicate the need for any special device will be compliant with the guidelines when used with headset precautions for use of mobile phones. If individuals are concerned, they or usb data cable. If you are using another accessory ensure that night choose to limit their own or their children's RF exposure by limiting the length of calls, or using "hands-free" devices to keep mobile phones away from the head and body. (fact sheet n°193). Additional WHO information about electromagnetic fields and public health are

20

available on the following website: http://www.who.int/peh-emf Note: This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Recrient or relocate the receiving antenna

- Increase the separation between the equipment and receiver. Connect the equipment into an outlet on a circuit different from that
- to which the receiver is connected Consult the dealer or an experienced radio/ TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate For the receiver devices associated with the operation of a licensed

radio service (e.g. FM broadcast), they bear the following statement: This device complies with Part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference

For other devices, they bear the following statement: This device complies with Part 15 of the FCC Rules. Operation is

subject to the following two conditions: (1) this device may not cause harmful interference

(2) this device must accept any interference received, including

interference that may cause undesired operation
