

Quick Start Guide

For more information about how to use your phone, please visit www.alcatel-mobile.com to download the complete user manual. On our Website, you will also find our FAQ (Frequently Asked Questions) section.

national SAR limits of 1.6 W/kg. The specific maximum SAR values can be found on Radio waves section www.sar-tick.com

When carrying the product or using it while worn on your body, either use an approved accessory such as a holster or otherwise maintain a distance of 15 mm from the body to ensure compliance with RF exposure requirements. Note that the product may be transmitting even if you are not making a phone call.

This product meets applicable

To prevent possible hearing damage, do not listen at high volume levels for long periods. Exercise caution when holding your device near your ear while the loudspeaker is in use.

English -CJB1KX101AAA

The charge is complete when the animation stops.

2.2 Power on your phone

Hold down the other key until the phone powers on.

2.3 Power off your phone

Hold down the ** key from the idle screen.

Calls.....

3.1 Making a call

Dial the desired number, press the **===** key to place the call. If you make a mistake, you can delete the incorrect digits by pressing the key. To hang up the call, press the two key.

Making an emergency call

If your phone is covered by the network, dial emergency number and press the **===** key to make an emergency call. This works even without a SIM card and without typing the PIN code or unlocking the keypad.

3.2 Calling your Voice mail (1)

To access your voicemail, hold down the 1 ∞ key.

3.3 Receiving a call

When you receive an incoming call, press the *** key to talk and 7.1 then hang up using the okey.

3.4 Available functions during the call

During a call, you can access your directory, calendar, short messages, etc. without hanging up the phone.

(1) Contact your network carrier to check service availability

Your mobile

Safety and use

We recommend that you read this chapter carefully before using your phone. The manufacturer disclaims any liability for damage, which may result as a consequence of improper use or use contrary to the instructions contained herein

• TRAFFIC SAFETY:

When driving, do not use your phone and headphone to listen to music or to the radio. Using a headphone can be dangerous and forbidden in some areas.

When switched on, your phone emits electromagnetic waves that can interfere with the vehicle's electronic systems such as ABS anti-lock brakes or airbags. To ensure that there is no problem:

- do not place your phone on top of the dashboard or within an airhag denloyment area
- check with your car dealer or the car manufacturer to make sure that the dashboard is adequately shielded from mobile phone RF energy.

CONDITIONS OF USE

You are advised to switch off the telephone from time to time to optimize its performance.

Switch the phone off before boarding an aircraft. Switch the phone off when you are in health care facilities, except

in designated areas. As with many other types of equipment now in regular use, mobile telephones can interfere with other electrical or electronic devices, or equipment using radio frequency.

Switch the phone off when you are near gas or flammable liquids. Strictly obey all signs and instructions posted in a fuel depot, petrol station, or chemical plant, or in any potentially explosive atmosphere. When the phone is switched on, it should be kept at least 15 cm.

from any medical device such as a pacemaker, a hearing aid or insulin pump, etc. In particular when using the phone, you should hold it against the ear on the opposite side to the device, if any,

(iii) the risks involved with the processing of the personal data,

You can access, review and edit your personal information at any

time by logging into your user account, visiting your user profile

or by contacting us directly. Should you require us to edit or

delete your personal data, we may ask you to provide us with

PADIO WAVES

THIS MOBILE PHONE MEETS THE GOVERNMENT'S Do not nuncture disassemble or cause a short-circuit in a REQUIREMENTS FOR EXPOSURE TO RADIO WAVES.

> Your mobile phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio-frequency (RF) energy. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. These guidelines include a substantial safety margin designed to ensure the safety of all persons, regardless of age and health.

> The exposure standard for mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR.

> The SAR limit set by public authorities such as the Federal Communications Commission of the US Government (ECC), or by Industry Canada, is 1.6 W/kg averaged over 1 gram of body tissue.

Tests for SAR are conducted using standard operating positions with the mobile phone transmitting at its highest certified power level in all tested frequency bands.

Although the SAR is determined at the highest certified power level, the actual SAR level of the mobile phone while operating can be well below the maximum value. This is because the mobile phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output of the mobile phone.

Before a mobile phone model is available for sale to the public, compliance with national regulations and standards must be shown.

The highest SAR value for this model mobile phone when tested is 1.40 W/kg for use at the ear and 0.73 W/kg and for use close to

While there may be differences between the SAR levels of various mobile phones and at various positions, they all meet the government requirement for RF exposure. For body-worn operation, the mobile phone meets FCC RF exposure guidelines provided that it is used with a non-metallic accessory with the handset at least 15 mm from the body. Use of other accessories

Make sure charging is carried out under normal conditions 0°C

may not ensure compliance with ECC RF exposure guidelines. Additional information on SAR can be found on the Cellular Telecommunications & Internet Association (CTIA) Web site: http://

The World Health Organization (WHO) considers that present scientific information does not indicate the need for any special precautions for use of mobile phones. If individuals are concerned, they might choose to limit their own or their children's RF exposure by limiting the length of calls or using "hands-free" devices to keen mobile phones away from the head and body. (fact sheet no193).

Additional WHO information about electromagnetic fields and public health are available on the following website: http://www. who int/neh-emf

Note: This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference to radio or television reception, which can be determined by turning the equipment off and on the user is encouraged to try to correct the interference by one or more of the following measures:

- Regrient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver. - Connect the equipment into an outlet on a circuit different from
- that to which the receiver is connected.

Consult the dealer or an experienced radio/ TV technician for help. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

For the receiver devices associated with the operation of a licensed radio service (e.g. EM broadcast), they bear the following statement:

This device complies with Part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful

Check that you have subscribed to this service with your carrier

For other devices, they bear the following statement:

device will be compliant with the guidelines when used with headset or USB data cable. If you are using another accessory ensure that whatever product is used is free of any metal and that it positions the mobile phone at least 15 mm away from the body. FCC ID: 2ACCJB098

Telephone warranty.....

TCL Communication Ltd. warrants to the original retail purchaser of this wireless device that should this product or part thereof during normal consumer usage and condition be proven to be defective in material or workmanship that results in product failure within the first twelve (12) months from the date of purchase as shown on your original sales receipt from an authorized sales agent. Such defect(s) will be repaired or replaced (with new or rebuilt parts) at the company's option without charge for parts or labor directly related to the defect(s)

Batteries, power adapters, and other accessories sold as in box items are also warranted against defects and workmanship that results in product failure within the first six (6) months period from the date of purchase as shown on your original sales receipt. Such defect(s) will be repaired or replaced (with new or rebuilt parts) at the company's option without charge for parts or labor directly related to the defect(s).

The limited warranty for your wireless device will be voided if any of the following conditions occur:

- Non-compliance with the instructions for use or installation or with technical and safety standards applicable in the geographical area where your phone is used;
- Connection to any equipment not supplied or not recommended by TCL Communication Ltd.; • Modification or repair performed by individuals not authorized by
