

1 Your telephone

- 1 Sub-display ⁽²⁾
- 2 Volume up
- 3 Play/Pause key
- 4 Volume down
- 5 Left softkey
- 6 Answer/Send call
- 7 Call memory
- 8 Voicemail
- 9 Right softkey
- 10 Switch on/Switch off
- 11 End call
- 12 Vibration alert
- 13 Navigation key ⁽¹⁾:
- 14 Menu/Confirm an option
- 15 Messages
- 16 Directory
- 17 WAP
- 18 File manager

⁽¹⁾ Depending on your network operator.
⁽²⁾ Display events (call, SMS, MMS, alarm...) or current status.

1.1 Keys

- Navigation key
Confirm an option (press the middle of the key)
Access slide show and music player (long keypress)
- Answer
Send a call
Access call memory (Redial) (short keypress)
Access events (long keypress)
- Switch on/Switch off the telephone (long keypress)
- End call
Return to the main screen
- Left softkey
- Right softkey
Access your voicemail (long keypress)
- In Edit mode:
 - Short keypress: change input methods
 - Switch from T9 predictive mode to Normal mode
 - Long keypress: access the Symbols table
- In Edit mode:
 - Short keypress: access the language list
 - Long keypress: enter zero
- From main screen
 - Short keypress: #
 - Long keypress: activate/deactivate the vibrator
- In edit mode:
 - Short keypress: (space)
 - Long keypress: add a word
- Short keypress: Play/pause music, Radio off.
Long keypress: Lock/Unlock the side keys (flip off).
- Short keypress: Previous/next song (in the playing mode)
Previous/next channel (Radio on)
Long keypress: Volume up/down

1.2 Main screen icons

- Battery charge level
- Vibrate alert: your phone vibrates, but neither rings nor beeps except for the alarms.
- Bluetooth status (Blue - Activated).
- Bluetooth status (Connected to an audio device).
- Headset connected.
- Call forwarding activated: your calls are forwarded.
- Alarm clock programmed.
- Level of network reception.
- Voicemail message arrived.
- Unanswered calls.
- WAP alerts ⁽¹⁾.
- Roaming.
- Memory card scanning in progress.
- Memory card scanning completed.
- Line switching ⁽¹⁾: indicates the selected line.
- GPRS connection status (Blue - Activated).
- Shown only in no ciphering mode while calling, sending/receiving SMS.
- Multimedia player active.
- USB cable connected.
- Reception of a message in progress.
- Sending a message.
- Silence mode: your phone neither rings, beeps nor vibrates except for the alarms.
- Message unread
- Message list is full: your terminal cannot accept any new messages. You must access the message list and delete at least one message on your SIM card.
- Antenna off mode.
- A2DP connected.

⁽¹⁾ Contact your network operator to check service availability.

2 Getting started

2.1 Set-up

Removing and installing the back cover

Installing and removing the battery

Inserting and removing the SIM Card

Place the SIM card with the chip facing downwards and slide it into its housing. Make sure that it is correctly inserted. To remove the card, press it and slide it out. Please power off your phone before you remove the SIM card.

2.2 Power on your phone

Hold down the key until the telephone powers on.

2.3 Power off your phone

Hold down the key from the main screen.

Insert the memory card

To release the microSD card holder, slide it in the direction of the arrow and lift it. Then insert the microSD card with the golden contact downward. Finally, turn down the microSD holder and slide it in the opposite direction to lock it.

10.7 Formats and compatibility

- Sounds: mp3, m4a, aac, midi, wav, amr
- Images: jpg, gif, bmp
- Videos: 3gp, mjpg

11 Camera

Your cellphone is fitted with a camera for taking photos and shooting videos that you can use in different ways:

- store them in your "File manager".
- send them in a multimedia message (MMS) to a cellphone or an email address.
- customize your main screen.
- select them as incoming call image to a contact in your directory.
- transfer them by data cable or microSD card to your computer.
- modify your photos through adding frames.

12 Multimedia player

Access this feature from the main menu by selecting "Multimedia player". You will have full access to "Music player", "Video player", "Image viewer" and "FM radio".

3 Calls

3.1 Making a call

Dial the desired number then press the key to place the call. If you make a mistake, you can delete the incorrect digits by pressing the right softkey.

To hang up the call, press the key.

Making an emergency call

If your phone is covered by the network, dial emergency number and press the key to make an emergency call. This works even without a SIM card and without typing the PIN code or unlocking the keypad.

3.2 Calling your voicemail ⁽¹⁾

To access your voicemail, hold down the key.

3.3 Receiving a call

When you receive an incoming call, press the key to talk and then hang up using the key.

3.4 Available functions during the call

During a call, you can use your directory, your diary, short messages, etc. without losing your correspondent by pressing the key.

⁽¹⁾ Contact your network operator to check service availability.

4 Call register

4.1 Call memory

You can access your call memory by pressing the key from the main screen.

4.2 Events

By holding down the key from main screen or accessing from main menu, it allows you to view a list of your all latest 20 events (SMS, MMS, WAP Alerts, Voicemail and unanswered calls).

4.3 Billing

You can access different items with this option: Amount, Duration, GPRS counter, Beep duration.

4.4 Call settings

You can access a number of items with this option: Call waiting, Call forwarding, Call barring, Caller ID, Line switching, Auto redial.

5 Directory

5.1 Consulting your directory

To access the **directory** from the main screen, press the key or press the key and select the icon from the menu.

5.2 Creating a file

Select the directory in which you wish to create a file, press the "Options" softkey, select "Create file" then .

6 Messages

6.1 Create message

From the main menu select "Messages" to create text/multimedia message. You can type a message and you can also modify a predefined message in **Templates** or customize your message by adding pictures, photos, sounds, titles, etc (only available while editing a MMS). While writing a message, select "Options" to access all the messaging options. You can save your messages that you send often to **Drafts** or **Templates** (MMS only).

6.2 Inbox

All received messages (read and unread) are stored in the same Inbox.

7 My settings

From the main screen, select the icon menu and select the function of your choice in order to customize your telephone: Color, Theme, Clamshell, Equalizer, Display, Clock, Keys, More settings...

8 Tools

8.1 Bluetooth

Access this feature by selecting "Tools" from the main menu, then "Bluetooth".

8.2 Organizer

Once you enter this menu from "Tools", there is a monthly-view calendar for you to keep track of important meetings, appointments, etc. Days with events entered will be marked in color.

8.3 Alarm

Your cellphone has a built-in alarm clock with a snooze feature.

8.4 Calculator

Hold down the key to get the decimal point. Confirm with the key or the left softkey.

8.5 Converter

Unit converter and Currency converter.

8.6 Voice memo

This feature enables you to record a call by selecting "Voice memo" while communicating. To record a sound, select "Voice memo", then "New record".

8.7 Memory status

It will indicate how much space is used and how much is currently free on your phone and memory card (if any).

8.8 Directory backup

It maintains copy of contacts between Phone Directory and memory card, in case of phone errors, theft or disasters.

8.9 My shortcuts

Access the shortcuts already programmed. To program new shortcuts: select "My shortcuts" if you want to create a quick access to a function, Directory, or WAP Bookmarks, etc.

9 WAP

Access Wap options: Homepage, Bookmarks, Recent pages, Go to URL and Profiles.

10 File manager

You will have an access to all audio and visual files stored in phone or memory card in File manager.

10.1 My audios

Choose an audio for the ON/OFF screen, for an incoming call, a message alert, power on/off ringtone or an alarm and scheduler.

10.2 My images

You can select an image or a photo as wallpaper, ON/OFF screen, or assign it to a contact in the directory.

10.3 My videos

The "My videos" album contains all video clips embedded and downloaded in phone or memory card.

10.4 My creations

This feature stores all the photos captured by your cellphone.

10.5 Unknown files

Store files of unsupported format.

10.6 Memory card

You will have access to all files stored in memory card here.

13 Games & Applications

Your Alcatel phone may include ⁽¹⁾ some Java™ applications and games. You can also download new applications and games to your phone.

14 Profiles

With this menu, you may personalise ringtones for different events and environments.

15 Making the most of your cellphone

PC suite is provided on www.branddesignlab.com.

You can download software upgrade for free from this website.

16 Latin input mode

To write messages, there are two writing methods:

- Normal: this mode allows you to type a text by choosing a letter or a sequence of characters associated with a key.
- Predictive with the T9 mode: this mode speeds up the writing of your text.
- key in edit mode:
 - Short keypress: Access the language list
 - Long keypress: Enter zero

⁽¹⁾ Depending on your country or your operator.

ALCATEL is a trademark of Alcatel-Lucent and used under license by TCT Mobile Limited.

All rights reserved © Copyright 2009 TCT Mobile Limited.

TCT Mobile Limited reserves the right to alter material or technical specification without prior notice.

Prolonged exposure to music at full volume on the music player may damage the listener's hearing. Set your phone volume safely. Use only headphones recommended by TCT Mobile Limited and its affiliates.

Safety and use.....

Thank you for buying Crystal mobile phone.

Made with CRYSTALLIZED™ - *Swarovski Elements*, your Crystal mobile phone is a unique masterpiece of craftsmanship, designed to be the perfect gift for every occasion. It is a delicate product and should be treated as a jewel. It should be handled carefully and put into a protective case when not used, in order to avoid any damage, such as scratching. Do not let your children play with it, it is not a toy.

In order to help maintain the beauty of your Crystal mobile phone over time, carefully polish it with a soft, lint-free cloth when necessary. Avoid contact with harsh cleansers. We wish you the most enjoyable experience with your new Crystal mobile phone.

We recommend that you read this chapter carefully before using your phone. The manufacturer disclaims any liability for damage, which may result as a consequence of improper use or use contrary to the instructions contained herein.

• **TRAFFIC SAFETY:**

Given that studies show that using a cellphone while driving a vehicle constitutes a real risk, even when the hands-free kit is used (car kit, headset...), drivers are requested to refrain from using their cellphone when the vehicle is not parked. Check the laws and regulations on the use of wireless telephones and their accessories in the areas where you drive. Always obey them. The use of these devices may be prohibited or restricted in certain areas.

When driving, do not use your cellphone and headphone to listen to music or to the radio. Using a headphone can be dangerous and forbidden in some areas.

When switched on, your cellphone emits electromagnetic waves that can interfere with the vehicle's electronic systems such as ABS anti-lock brakes or airbags. To ensure that there is no problem:

- do not place your cellphone on top of the dashboard or within an airbag deployment area, - check with your car dealer or the car manufacturer to make sure that the car's electronic devices are shielded from cellphone RF energy.

• **CONDITIONS OF USE:**

You are advised to switch off the cellphone from time to time to optimize its performance. Switch the cellphone off before boarding an aircraft to avoid prosecution.

Switch the cellphone off when you are in health care facilities, except in designated areas. As with many other types of equipment now in regular use, cellphones can interfere with other electrical or electronic devices, or equipment using radio frequency. Switch the cellphone off when you are near gas or flammable liquids. Strictly obey all signs and instructions posted in a fuel depot, gas station, or chemical plant, or in any potentially explosive atmosphere.

When the cellphone is switched on, it should be kept at least 15 cm from any medical device such as a pacemaker, a hearing aid or insulin pump. In particular when using the cellphone you should hold it against the ear on the opposite side to the device, if any.

To avoid hearing impairment, answer the call before holding your cellphone to your ear. Also move the handset away from your ear while using the "hands-free" option because the amplified volume might cause hearing damage.

Do not let small children use your cellphone without supervision.

13					
----	--	--	--	--	--

Telephone warranty

Congratulations on choosing this cellphone - we hope that you will be completely satisfied with it.

Your cellphone is guaranteed against any deviation from technical specifications for a period of twelve (12) months from the date specified on your original invoice, subject to any other specific provisions ¹⁾.

The warranty terms defined in the manual also apply to the battery and accessories sold with the cellphone but for a period of six (6) months ²⁾ from the date of purchase shown on your original invoice.

Under the terms of this warranty, you must immediately inform your vendor (or any repair centre approved by TCT Mobile Limited or its affiliates, which are listed on our website http://www.alcatel-mobilephones.com) in case of a conformity defect on your cellphone, and present the invoice given to you at the time of purchase.The vendor or repair centre will decide whether to replace or repair, as appropriate, all or any part of the cellphone or accessory found to be defective; this warranty covers the cost of parts and labour but excludes any other costs. Repair or replacement may be carried out using reconditioned components offering equivalent functionality.

Servicing under the terms of this warranty, especially repair, modification or replacement of products, shall entitle to a ONE ⁽¹⁾ month warranty unless there are statutory provisions to the contrary. This warranty shall not apply to damage or defects to your cellphone and/or accessory caused by:

1) not following the instructions for use or installation,

2) not being compliant with technical and safety standards applicable in the geographical area where the equipment is used,

3) improper maintenance of sources of energy, and of the overall electric installation,

4) accidents or consequences of theft of the vehicle in which the cellphone is transported, acts of vandalism, lightning, fire, humidity, infiltration of liquids, inclement weather,

5) connecting to or integrating into the cellphone any equipment not supplied or not recommended by TCT Mobile Limited or its affiliates, without their express written consent for such,

6) any servicing, modification or repair performed by individuals not authorized by TCT Mobile Limited or its affiliates, the vendor or the approved maintenance centre,

7) use of the cellphone and/or its accessory for a purpose other than that for which it was designed,

8) normal wear,

9) malfunctions caused by external causes (e.g., radio interference from other equipment, power voltage fluctuations),

10) modifications made to the equipment even if required by changes in regulations and/or modification of network parameters,

11) faulty connections resulting from unsatisfactory radio transmission or caused by the absence of radio relay coverage.

12) equipment on which markings or serial numbers have been removed or altered, and handsets on which labels have been removed or deteriorated shall be excluded from the warranty. In accordance with the applicable law, your product is warranted against hidden defects (defects inherent in the design, manufacture, etc.).

There are no express warranties, whether written or oral, other than this printed limited warranty, express or implied, of any nature whatsoever. In no event shall TCT Mobile Limited or its affiliates be liable for incidental or consequential damages of any nature whatsoever, including but not limited to trading loss, commercial loss, to the full extent those damages can be disclaimed by law. Some countries/states do not allow the exclusion or limitation of incidental or consequential damages, or limitation of the duration of implied warranties, so the preceding limitations or exclusions may not apply to you.

When replacing the cover please note that your cellphone may contain substances that could create an allergic reaction. Always handle your cellphone with care and keep it in a clean and dust-free place. Do not allow your cellphone to be exposed to adverse weather or environmental conditions (moisture, humidity, rain, infiltration of liquids, dust, sea air, etc.). The manufacturer's recommended operating temperature range is -10°C to +55°C (the max value depends on device, materials and housing paint/texture). Over 55°C the legibility of the cellphone's display may be impaired, though this is temporary and not serious. Do not open or attempt to repair your cellphone yourself. Do not drop, throw or try to bend your cellphone. Do not paint it.

Use only batteries, battery chargers, and accessories which are recommended by TCT Mobile Limited and its affiliates and are compatible with your cellphone model.TCT Mobile Limited and its affiliates disclaim any liability for damage caused by the use of other chargers or batteries. Your cellphone should not be disposed of in a municipal waste. Please check local regulations for disposal of electronic products. Remember to make back-up copies or keep a written record of all important information stored in your cellphone. Some people may suffer epileptic seizures or blackouts when exposed to flashing lights, or when playing video games. These seizures or blackouts may occur even if a person never had a previous seizure or blackout. If you have experienced seizures or blackouts, or if you have a family history of such occurrences, please consult your doctor before playing video games on your cellphone or enabling a flashing-lights feature on your cellphone. Parents should monitor their children's use of video games or other features that incorporate flashing lights on the cellphones. All persons should discontinue use and consult a doctor if any of the following symptoms occur: convulsion, eye or muscle twitching, loss of awareness, involuntary movements, or disorientation. To limit the likelihood of such symptoms, please take the following safety precautions:

- Do not play or use a flashing-lights feature if you are tired or need sleep. - Take a minimum of a 15-minute break hourly. - Play in a well lit environment. - Play at the farthest distance possible from the screen.

When you play games on your cellphone, you may experience occasional discomfort in your hands, arms, shoulders, neck, or other parts of your body. Follow these instructions to avoid problems such as tendonitis, carpal tunnel syndrome, or other musculoskeletal disorders:

- Take a minimum of a 15-minute break every hour of game playing. - If your hands, wrists, or arms become tired or sore while playing, stop and rest for several hours before playing again. - If you continue to have sore hands, wrists, or arms during or after playing, stop the game and see a doctor.

Prolonged exposure to music at full volume on the music player may cause the listener's hearing impairment. Adjust the volume before placing headphones on or in your ear. Only use headphones recommended by TCT Mobile Limited and its affiliates.

They will then be recycled, preventing substances being disposed of in the environment, so that their components can be reused.

In European Union countries:

These collection points are accessible free of charge. All products with this sign must be brought to these collection points.

In non European Union jurisdictions:

Items of equipment with this symbol are not be thrown into ordinary bins if your jurisdiction or your region has suitable recycling and collection facilities; instead they are to be taken to collection points for them to be recycled. In the United States you may learn more about CTIA's Recycling Program at www.recyclewirelessphones.com

CAUTION: RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS

Home A.C. chargers will operate within the temperature range of: 0°C to 40°C. The chargers designed for your cellphone meet with the standard for safety of information technology equipment and office equipment use. Due to different applicable electrical specifications, a charger you purchased in one jurisdiction may not work in another jurisdiction. They should be used for this purpose only.

Characteristics of power supply (depending on the country):
Travel charger: Input: 100-240 V, 50/60 Hz, 0.15 A
Output: 5 V, 500 mA
Lithium 750 mAh

Battery:
• **RADIO WAVES:**
THIS CELLPHONE MEETS THE GOVERNMENT'S REQUIREMENTS FOR EXPOSURE TO RADIO WAVES.

Your cellphone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio-frequency (RF) energy. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. These guidelines include a substantial safety margin designed to ensure the safety of all persons, regardless of age and health.

The exposure standard for cellphones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by public authorities such as the Federal Communications Commission of the US Government (FCC), or by Industry Canada, is 1.6 W/kg averaged over 1 gram of body tissue. Tests for SAR are conducted using standard operating positions with the cellphone transmitting at its highest certified power level in all tested frequency bands.

Although the SAR is determined at the highest certified power level, the actual SAR level of the cellphone while operating can be well below the maximum value. This is because the cellphone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output of the cellphone Before a cellphone model is available for sale to the public, compliance with national regulations and standards must be shown.

The highest SAR value for this model cellphone when tested is 1.08 W/kg for use at the ear and 1.09 W/kg for use close to the body.

While there may be differences between the SAR levels of various cellphones and at various positions, they all meet the government requirement for RF exposure. For body-worn operation, the cellphone meets FCC RF exposure guidelines provided that it is used with a non-metallic accessory with the handset at least 1.5 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines.

The World Health Organization (WHO) considers that present scientific information does not indicate the need for any special precautions for use of cellphones. If individuals are concerned, they might choose to limit their own or their children's RF exposure by limiting the length of calls, or using "hands-free" devices to keep cellphones away from the head and body. (fact sheet n°193). Additional WHO information about electromagnetic fields and public health are available on the following website: http://www.who.int/peh-ertf.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/ TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

For the receiver devices associated with the operation of a licensed radio service (e.g. FM broadcast), they bear the following statement:

This device complies with Part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference.

For other devices, they bear the following statement:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference

(2) This device must accept any interference received, including interference that may cause undesired operation.

Your cellphone is equipped with a built-in antenna. For optimal operation, you should avoid touching it or degrading it.

As cellphone devices offer a range of functions, they can be used in positions other than against your ear. In such circumstances the device will be compliant with the guidelines when used with headset. If you are not using headset ensure that whatever product is used is free of any metal and that it positions the phone at least 2 cm away from the body.

Due to different applicable electrical specifications, a charger you purchased in one jurisdiction may not work in another jurisdiction. They should be used for this purpose only.

Characteristics of power supply (depending on the country):
Travel charger: Input: 100-240 V, 50/60 Hz, 0.15 A
Output: 5 V, 500 mA
Lithium 750 mAh

Battery:
• **RADIO WAVES:**
THIS CELLPHONE MEETS THE GOVERNMENT'S REQUIREMENTS FOR EXPOSURE TO RADIO WAVES.

Your cellphone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio-frequency (RF) energy. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. These guidelines include a substantial safety margin designed to ensure the safety of all persons, regardless of age and health.

The exposure standard for cellphones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by public authorities such as the Federal Communications Commission of the US Government (FCC), or by Industry Canada, is 1.6 W/kg averaged over 1 gram of body tissue. Tests for SAR are conducted using standard operating positions with the cellphone transmitting at its highest certified power level in all tested frequency bands.

Although the SAR is determined at the highest certified power level, the actual SAR level of the cellphone while operating can be well below the maximum value. This is because the cellphone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output of the cellphone Before a cellphone model is available for sale to the public, compliance with national regulations and standards must be shown.

The highest SAR value for this model cellphone when tested is 1.08 W/kg for use at the ear and 1.09 W/kg for use close to the body.

While there may be differences between the SAR levels of various cellphones and at various positions, they all meet the government requirement for RF exposure. For body-worn operation, the cellphone meets FCC RF exposure guidelines provided that it is used with a non-metallic accessory with the handset at least 1.5 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines.

The World Health Organization (WHO) considers that present scientific information does not indicate the need for any special precautions for use of cellphones. If individuals are concerned, they might choose to limit their own or their children's RF exposure by limiting the length of calls, or using "hands-free" devices to keep cellphones away from the head and body. (fact sheet n°193). Additional WHO information about electromagnetic fields and public health are available on the following website: http://www.who.int/peh-ertf.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/ TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

For the receiver devices associated with the operation of a licensed radio service (e.g. FM broadcast), they bear the following statement:

This device complies with Part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference.

For other devices, they bear the following statement:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference

(2) This device must accept any interference received, including interference that may cause undesired operation.

Your cellphone is equipped with a built-in antenna. For optimal operation, you should avoid touching it or degrading it.

As cellphone devices offer a range of functions, they can be used in positions other than against your ear. In such circumstances the device will be compliant with the guidelines when used with headset. If you are not using headset ensure that whatever product is used is free of any metal and that it positions the phone at least 2 cm away from the body.
