Important Safety Information

Read these simple guidelines. Breaking the rules may be dangerous or illegal. Further detailed information is given in this user guide.

◆ Charger and Adapter Safety

- The charger and adapter are intended for indoor use only.
- Do not expose the battery charger to direct sunlight or use it in areas of high humidity, such as the bathroom.
- Do not handle the phone with wet hands while it is being charged. It may cause an electric shock or seriously damage your phone.

◆ Battery Information and Care

- Use only manufacturer-approved battery and chargers specific to your phone model since they are designed to maximize battery life.
- Please dispose of your battery properly or take it to your local wireless carrier for recycling.
- Do not dispose of your battery by fire or with hazardous or flammable materials.
- The battery does not need to be fully discharged before recharging.
- When charging, please do not remove the battery.
- Unplug the charger during lightning storms to avoid electric shock or fire.
- Make sure that no sharp-edged items such as animal's teeth, nails, come into contact with the battery. There is a risk of causing a fire
- Do not disassemble or short-circuit the battery.
- Do not place or answer calls while charging the phone as it may short-circuit the phone and/or cause electric shock or fire.
- Keep the battery's metal contacts clean.
- Replace the battery when it no longer provides acceptable performance. The battery can be recharged several hundred times before replacement.
- Recharge the battery after long periods of non-use to maximize battery life.
- Do not leave the battery in hot or cold places as it may deteriorate battery performance.
- Battery life will vary due to usage patterns and environmental conditions.
- Use of extended backlighting, Mini-Browser, and data connectivity kits affect battery life and talk/standby times.
- The self-protection function of the battery will cut the power of the phone when its operation is in an abnormal state. In this case, remove the battery from the phone, reinstall it, and turn the phone on.

Explosion, Shock, and Fire Hazards

- Do not put your phone in a place subject to excessive dust and keep the minimum required distance between the power cord and heat sources.
- Unplug the power cord prior to cleaning your phone, and clean the power plug pin when it is dirty.
- When using the power plug, ensure that it is firmly connected. If it is not, it may cause excessive heat or fire.
- If you put your phone in a pocket or bag without covering the receptacle of the phone (power plug pin), metallic articles (such as a coin, paperclip or pen) may short-circuit the phone. Always cover the receptacle when not in use.
- Do not use harsh chemicals (such as alcohol, benzene, thinners, etc.) or detergents to clean your phone. There is a risk of causing a fire.

- Do not short-circuit the battery. Metallic articles such as a coin, paperclip or pen in your pocket or bag may short-circuit the + and – terminals of the battery (metal strips on the battery) upon moving. Short-circuit of the terminal may damage the battery and cause an explosion.

General Notice

- Do not place items containing magnetic components such as a credit card, phone card, bank book or subway ticket near your phone. The magnetism of the phone may damage the data stored in the magnetic strip.
- Talking on your phone for a long period of time may reduce call quality due to heat generated during use.
- When the phone is not used for a long period time, store it in a safe place with the power cord unplugged.
- Using the phone in proximity to receiving equipment (i.e., TV or radio) may cause interference to the phone.
- Do not use the phone if the antenna is damaged. If a damaged antenna contacts skin, it may cause a slight burn. Please contact a manufacturer Authorized Service Center to replace the damaged antenna.
- Do not immerse your phone in water. If this happens, remove the battery immediately. If the phone does not work, take it to a manufacturer Authorized Service Center.
- Only authorized personnel should service the phone and its accessories. Faulty installation or service may result in accidents and consequently invalidate the warranty.
- The power cord on this product will expose you to lead, a chemical known to the State of California to cause (cancer) birth defects or other reproductive harm. Wash hands after handling
- Do not disassemble the phone.
- Do not drop, strike, or shake your phone severely. Such actions may harm the internal circuit boards of the phone.
- The data saved in your phone might be deleted due to careless use, repair of the phone, or upgrade of the software. Please backup your important phone numbers. (Ring tones, text message, voice message, pictures, and videos could also be deleted.) The Manufacturer is not liable for damage due to the loss of data.
- When you use the phone in public places, set the ring tone to vibration so as not to disturb others.
- Do not turn your phone on or off when putting it nearby your ear.
- When riding in a car, do not leave your phone or set up the hands-free kit near to the air bag. If wireless equipment is improperly installed and the air bag is activated, you may be seriously injured.
- Do not use a hand-held phone while driving.
- Be careful that children do not swallow any parts such as battery or rubber plugs (earphone, connection parts of the phone, etc.). This could cause asphyxiation or suffocation.
- Never store your phone in temperatures less than -15°C or greater than 50°C.
- The Maximum SAR Value is 1.414W/kg.

Warning statement

a. Missing Body worn accessory statement. Indicate that Body SAR was tested at 1.5cm without any accessory. When using any body worn accessory, please help to make sure it as least 1.5cm clearance between phone and human body. The body worn accessory should not contain any metal.

b. 1. This device complies with Part 15 of the FCC Rules. Operation is subject to the

following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure of measurement is known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. Transmitting at its highest certified power level in all Your mobile phone is a radio transmitter and receiver. It is at the highest certified power level, the well below the maximum value. This is power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The FCC has granted an Equipment Authorization for evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on FCC ID: **RAD438**.

c. 15.105 Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

1. Introduction

Congratulations on your purchase of the advanced and compact cellular phone, designed to operate with the latest digital mobile communication technology, Code Division Multiple Access (CDMA). Along with many advanced features of the CDMA system such as greatly enhanced voice clarity this phone offers:

- Message, Voice mail, and Caller ID.
- MP3
- Voice record
- FM Radio
- Camera
- Bluetooth
- browser
- Optional accessories with greater convenience and enhanced functionality.
- English/Spanish language support.

Icons On screen

The LCD shows icons on the top of the LCD screen.

Different icons appear based on the phone's operating mode.

Icon	Description	Icon	Description
	Network signal strength.		Profile - outdoor.
	CDMA 1X signal		Profile - general.
	Make a call.		Profile - silent.
	New text message.		Profile - vibrate.
	Alarm clock turn on.		Profile - headset.
	Battery power level.		Keypad lock
			U disk connected.

2. Menu&Keypad Overview

3. Getting Started

Charging the Battery

Use the charger provided with your phone.

Warning! Use only the charger provided with the phone or authorized by manufacturer.

Use any chargers other than above mentioned may damage your phone or battery.

- Plug the end of the adapter into the phone's charger port. The battery power level will move after the correct connection.
- When the battery power level becomes static, the battery is fully charged. Disconnect the adapter from the phone.
- The charge time varies depending upon the battery level.

Install UIM card

- Power off the handset, then remove the cover of the phone and the battery.
- Insert the UIM card into the card slot.
- Install the battery and the cover of the phone.

Install T-Flash card

- Power off the handset, then remove the cover of the phone and the battery.
- Insert the T-Flash card into the card slot.
- Install the battery and the cover of the phone.

4. Basic Operation

4.1 Menu Operate

- 1) In standby screen, press [**Left Soft**] key to enter the Main Menu screen.
- 2) Using [**Navigation**] keys to choose the menu item, and press [**Left Soft**] key or [**OK**] key to enter the item.

You could press the corresponding number keys according to the Menus Overview to select the item directly.

- 3) Press [**Right Soft**] key to return to the previous menu item or quit the Main Menu.
- 4) Press **END/PWR** key to return to the standby screen directly.

4.2 Make a Call

- 1) Type the phone number or select one contact in the phone book, then press **Call** key.

- 2) To end the call, press **END/PWR** key.

Note: 1. In standby screen, press **Call** key to view the recent calls.

2. Type the speed dial number, press **Call** key to call the assigned contact.

3. In addition, you can make a call to message sender by pressing **Call** key during a message check.

4.3 Note In Call

This function is a convenient feature which you can note during a call.

When you need, press [**Left**] key in the call could switch to use the call memo.

When you have saved call memo, you can find it in menu **<Call Logs>- <Note In Call>**, then you can view, edit message, save, erase.

4.4 Loud Speaker

This function is a convenient feature which enables you to use loud speaker

When you need, press [**OK**] key in the call could switch to using loud speaker.

Version info

You can view the name of the mobile phone, the S/W, PRL and H/W version.

5.23.2 Security

You must key in Lock Code to enter the **Security** Setting. The default Lock Code is 0000.

Phone Lock:Keep your phone from unauthorized use. Select Lock Mode, the options are **(Off/Now/On Power Up)**.

1. Select **Now**, the phone will be locked immediately. You need to key in the correct Lock Code to activate the phone.

2. Select **On Power Up**, the phone will be locked after powered on, and you need to key in the correct Lock Code to activate the phone.

Note: The continuous wrong inputs of the Lock Code wouldn't lock the UIM card. When the handset is locked, input "0000" to unlock the phone.

Change Phone Code: Allow you to change to a new four-digit lock code number. For confirmation, your phone will prompt you to enter the new lock code twice.

Reset Factory Settings

Reset all settings to the default options.

Reset all items in the phone. (Delete all contacts, all messages, internal gallery photos and other records in the phone)

Warning: Please confirm the important contacts, messages, photos and other records in the phone are backedup before you reset factory settings.
