FAQ

Q1: What devices can I control with the Smart Plug?

A1: You can control desk lamps, coffee makers, humidifiers, tower fans, and any other small household appliances whose rated power does not exceed the maximum power of the Smart Plug.

Q2: What should I do when the LED indicator of the Smart Plug lights solid orange?

A2: Try the following solutions:

- Check whether the WiFi network of your wireless router is enabled. If not, enable it.
- Check whether the WiFi name or password of your wireless router is changed. If so, reset the Smart Plug, and connect it to your wireless router again with the new WiFi name or password.
- Reset the Smart Plug, and reconfigure it using the Tenda **Beli** App.

Reset method: Hold down the button of the Smart Plug for about 5 seconds and release it when the LED indicator blinks orange.

Q3: How to control the Smart Plug with voice-activated devices, such as Amazon Alexa or Google Assistant?

A3: In your Tenda **Beli** App, tap the Smart Plug in the **Device** page, then > (for Amazon Alexa) or (for Google Assistant) to get the help.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Radiation Exposure Statement

This device complies with FCC radiation exposure limits set forth for an uncontrolled environment and it also complies with Part 15 of the FCC RF Rules.

This equipment should be installed and operated with minimum distance 20cm between the device and your body.

Caution:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Operating frequency: 2412-2462MHz

NOTE: (1) The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. (2) To avoid unnecessary radiation interference, it is recommended to use a shielded RJ45 cable.

For PLUGGABLE EQUIPMENT, the socket-outlet shall be installed near the equipment and shall be easily accessible. For passthrough devices, plug the power strips into the integrated electrical sockets of the devices, but devices of the same or another type not be stacked in normal use.

RECYCLING

This product bears the selective sorting symbol for Waste electrical and electronic equipment (WEEE). This means that this product must be handled pursuant to European directive 2012/19/EU in order to be recycled or dismantled to minimize its impact on the environment. User has the choice to give his product to a competent recycling organization or to the retailer when he buys a new electrical or electronic equipment.

Operating Temperature: 0°C - 40°C
Operating Humidity: (10% - 90%) RH, non-condensing
