五、Technical parameters

FM	Model	
	Ranges	87.5-108MHZ
Format Supported/Capacity	TF Card	MP3
Headphone	Voltage	3.5V-4.2Vv3
	Current	30mA
	Work Time	15H
	Stereo Output	125mW+125mW
	Loudspeader Diameter	40mm
	Resistance	32Ω
	Interfaces	USB <input type="checkbox"/> 3.5mm <input type="checkbox"/>
		3.5-4P Stereo/Mic
	Bluetooth Specification	2.1
	RF Range	10m
	Frequency Response	80Hz-20KHz
	Loudspeaker Output	10mW
	Signal To-Noise	<input type="checkbox"/> 80dB
	Distortion	<input type="checkbox"/> 5.0%
	Playback Time	8 hours
	Charging Time	2.5 hours
Charge	Socket	5V/1000mA
Battery	Li-ion Battery	3.7V/250mAH

六、ADVICE

- 1☑Using for the first time, fully charge.
- 2☑waterproof;
- 3☑Please charging on the USB port of the computer , or the output of 5V charger;
- 4☑unused for long periods, charge and discharge once a week.

七、Frequently asked questions

Fault	Reason	Resolution
Will not turn on	Power Down	Charge in time
Not read TF Card	Incompatible Audio Format	Change TF card or audio files
No devices	Connector mistake or unworkable cables	Repeat plug or change cable

八、Accessories:

- 1☑3.5mm Aux line;
- 2☑USB Cable.

十、Warning:

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.
