● **Operation Instruction:**

- ④ Put a 12V alkaline battery into the battery cover (battery polar +/-)
- ④ Press A for the winch running forward, Press B for the winch running reverse.
- ④ The remote control distance will be about 5m.

Warning:

After the winch is running, it may generate disturbance. At that time the remote control distance may be shorter.

The battery shall be changed to be a new battery every half a year.
