## Manual Statements

2016. Thank you for selecting our mobile phone. This user guide will provide you with the general information and operation instructions.

### Note:

- Use only accessories approved by the phone manufacturer to ensure safety. Failing to comply with this will violate the terms and conditions of the warranty.
- If the contents and displays described in this user guide do not match the actual operation of the phone set, please use the display of the actual phone set. We reserved the rights to change the mechanisms of the phone without notice.

Protect your environment! We strive to produce products in compliance with global environmental standards. Please consult your local authorities for proper disposal.

## General Information

### 1. Security

#### ✧ Emergency call

In any country, you can dial 112 (or other emergency call number) for emergency help.

**Note:** Based on the nature of cellular networking, the success of the emergency call cannot be guaranteed.

#### ✧ Safety Precautions

Before using your phone, please read the following important information to eliminate or reduce any possibility causing damage and personal injury.

- Do not use wireless phones while driving.
- Switch off wireless devices in aircraft.
- Do not use mobile phones at refueling point. Don't use near fuel or chemicals.
- Follow regulations or rules in hospital and health care facilities. Switch phone off.
- Only qualified service personnel can install or repair this device.
- Use only approved accessories and batteries.
- Do not expose your phone to extreme high temperatures above +60°C (+140 F).

◇ **Battery Information**

**Information Charging and Discharging**

- The charger is designed to be used in temperatures between 0 to 40°C.
- Do not charge the phone in wet and damp conditions.
- We strive to produce products in compliance with global environmental standards.
- When a charger is not in use, disconnect it from the power source. Do not leave the battery connected a charger for longer than 12 hours, since overcharging may shorten its life.

**Tips for Battery**

- Do not disassemble or modify the battery by yourself.
- Do not short-circuit the battery.
- Do not dispose of batteries in fire.
- If you smell anything strange from the battery or find that the battery is overheated, you should stop using it immediately and contact the authorized Service Center in your region.

**2. Getting Started**

**2.1.1. Installing and uninstalling SIM card**

Switch off the phone; remove the back cover, battery and other external power source. Fit the SIM card into the

SIM card slot.

### **2.1.2. Charging the battery**

Plug the charger into the socket on the side of your phone. Connect the charger to an AC wall socket. The blinking of the battery level icon indicates the battery is being charged. When the blinking stops, it indicates the charging is finished

During charging, the phone and charger will feel warm to the touch. This is normal.

#### **Warning:**

- The operating ambient temperature of the charger is 0°C-50°C. Do not use it when the temperature exceeds this limit.
- Use only chargers approved by the phone manufacturer to ensure safety. Failing to comply with this will violate the terms and conditions of the warranty.

## **2.2. Connecting to the Network**

### **2.2.1. SIM card**

Please insert available Subscriber Identity Module (SIM) card into your phone before using it. SIM card is supplied

by your network carrier. All the information related to network connection is recorded on the SIM card, so are the contact information such as names, phone numbers and SMS that you set to store on the SIM. You can take out the SIM card from the phone and insert it into another GSM phone to use it. Most new phones will recognize the SIM card automatically.

### **2.2.2. Connecting to the network**

After the SIM card is unlocked, your phone will automatically search for the registered network or other local available network. Once connected, the name of the network carrier will appear on the top of the screen. Your phone is now in Standby mode, ready for making and receiving calls.

## **Main menu**

### **3. Contacts**

You can save a phone number in the memories of SIM cards or phone. Select a contact in the contact list window and press **LSK** to perform:

- **View contact:** View the detail of the current contact.

You can create a security message inside this folder, user to open it, must need the password, the default password is "0000"

#### **4.4. Templates**

Some message templates given inside this menu.

#### **4.5. Broadcast Messages**

Look up the broadcast messages.

#### **4.6. Voice mail service**

This is similar to the Answer machine. You may transfer the incoming call that you fail to answer duly to your Voice mail server, where the caller can leave message.

#### 4.7. SMS backup

Import or Export the message which is saved in your phone or memory card.

#### 4.8. Options(Settings)

You can check the SMS Settings, MMS settings, push message, and Message capacity.

### 5. Call logs

With this function, you can view the information of Missed calls、Dialed calls、Received calls、Rejected calls and also you can clean all these records via Delete Call Logs. Enter into any history interface, Select anyone logs, Press **LSK Key** to enter the Option list:

- **Details:** View the detail of the current call.
- **Call:** Call the current number.
- **Write message:** Directly input the SMS or MMS and send it to the current number.
- **Add to contacts:** save to phonebook.
- **Add to blacklist:** Add the number to black list and block the same number to call you.
- **Delete:** Delete the current logs.
- **Delete all:** Delete all the current logs.

## 6. Multimedia

### 6.1. Images

You can view the photos snapped with the camera through this function.

### 6.2. Video Recorder

- **More options:** You can switch to **Camera** mode; modify the **Effect, Contrast, Brightness** and others.
- **Camcorder Settings:** Set up the video recorder.

### 6.3. Audio player

You can enjoy the music with this function. You can use the following keys during the play.

Key	Function
<b>Left direction Key</b>	Press to switch to a previous song with cursor. Press and hold: go backwards
<b>Right direction Key</b>	Press to switch to a next song with cursor. Press and hold: go forwards
<b>OK Key</b>	Press to play/pause the Audio.
<b>Up , Down key</b>	Press to volume up and down.

#### 6.4. Video Player

You can play the video with this function. You can use the following keys during the play.

Key	Function
<b>Left key</b>	Press to go backwards. Press and hold to continuously go backwards.
<b>Right key</b>	Press to go forwards. Press and hold to continuously go forwards.
<b>OK Key</b>	Press to play/pause the video.
<b>Up, Down key</b>	Press to volume up and down.

#### 6.5. FM radio

You can listen the FM radio with this phone, also you can record the FM radio station which do you want record.

- **Auto search and save:** Search and save the channels.

- **Channel List:** Play, edit or delete the saved channels.
- **Save:** Save current playing frequency into channel list.
- **Manual search:** Search the radio by manual.
- **Open speaker:** Playing FM in loudspeaker mode. (It active when headset inserted only)
- **Background play:** Return the standby interface and keep paying FM radio.
- **Record:** Record the currently-hearing FM.
- **Timing record:** You can set up that the FM (one channel which you selected) will record at a specific time with this function.
- **Record file List:** View the recorded files list.
- **Help:** You can get the operation guide in here.

## 16. Health

- Please read these simple guidelines.
- **SAR Compliance**
  - Your phone is designed not to exceed the limits of emission of radio waves recommended by international guidelines.
  - SAR (specific absorption rate) is the measurement of body-absorbed RF quantity when the phone is in use. SAR value is ascertained according to the highest RF level generated during laboratory tests.

- The SAR value of the phone may depend on factors such as proximity to the network tower, use of accessories or other accessories.
- Use a wireless hands-free system (headphone, headset) with a low power Bluetooth emitter.
- Please keep your calls short and use SMS whenever more convenient. This advice applies especially to

- **SAR Recommendations**

children, adolescents and pregnant women

- Prefer to use your cell phone when the signal quality is good.
- People having active medical implants should preferably keep the cell phone at least 10 cm away from the implant.

Maintain a preferable distance of 10 mm from the device.

## FIGO A240 Duos

### Contenido

- 1            Introducción
  - 1.1            Instalación de las tarjetas SIM y la batería

#### FCC Caution

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

SAR tests are conducted using standard operating positions accepted by the FCC with the Phone transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the phone While operating can be well below the maximum value, in general, the closer you are to a Wireless base station antenna, the lower the power output.

Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC, Tests for each phone are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC.

For body worn operation, this model phone has been tested and meets the FCC RF exposure Guidelines when used with an accessory designated for this product or when used with an accessory that Contains no metal and that positions the handset a minimum of 15mm from the body.
